**Pharmaceutical Sciences: Pharmacetics Option - PhD**

The Auburn University Harrison School of Pharmacy offers interdisciplinary MS and PhD degree programs in Pharmaceutical Sciences. Those pursuing one of these degrees must select one of four curricular options: 1) Medicinal Chemistry, 2) Pharmacetics, 3) Pharmacology, or 4) Health Outcomes Research and Policy.
The Medicinal Chemistry, Pharmaceutics and Pharmacology options are designed for students interested in the drug discovery or development processes, and are affiliated with the Department of Drug Discovery and Development. Areas of interest include neurodegenerative diseases, cardiovascular diseases, infectious diseases, cancer, diabetes and other metabolic diseases, synthetic organic chemistry, forensic analytical chemistry and drug delivery, disposition and formulation.

The Health Outcomes Research and Policy option is designed for students interested in studying healthcare delivery, medication use and outcomes. This option is affiliated with the Department of Health Outcomes Research and Policy.

Note that courses used to fulfill program core requirements may also be used to fulfill option specific requirements.

The PhD program requires a minimum of 60 semester hours earned through instruction beyond the bachelor’s degree including 1) a minimum of 30 semester hours graded (e.g. A, B) graduate course work (6000 - 8999); and 2) a minimum of 30 semester hours of additional graduate course work (6000 - 8999) that may include ungraded courses, and must include at least 10 hours of research and dissertation. A general examination, often called the preliminary examination, is required of all applicants for the degree of doctor of philosophy. It consists of written and oral testing. The student becomes a candidate for the degree upon successful completion of the general examination. Students working on the dissertation, submitting their dissertation or awaiting approval of their final examination must register for Research and Dissertation in the semester(s) when these steps occur. Candidates for the PhD degree must complete a dissertation proposal and successfully defend their proposal during the final examination.

Physics - MS, PhD

Degree Program:

• Physics - MS (p. 1610)
• Physics - PhD (p. 1611)

The Department of Physics offers the doctor of philosophy degree to students who have achieved a mastery of the fundamental laws of nature and demonstrated the ability to complete a research project that results in new knowledge in physics. All students complete the basic graduate level courses in Classical Mechanics, Electricity and Magnetism, Quantum Mechanics and Statistical Physics. They demonstrate their mastery of these subjects by passing a General Doctoral Examination that has both a written and an oral component. To increase their knowledge of a broad range of advanced physics topics and to develop expertise in their chosen area of focus, students complete at least 12 additional hours of graded course work with a minimum of nine at the 8000-level. The research project is usually undertaken in one of the research focuses of the Department - plasma physics, condensed matter and surface physics, atomic and molecular physics, space physics, and computational physics. It is completed with the defense of the student’s dissertation. Students are also expected to publish their research in a refereed journal and/or present it at an appropriate professional meeting.

The master of science is also offered. Successful students complete the same basic graduate level courses as PhD students. Students electing the non-thesis option complete an additional 12 hours of graduate level course work. Students electing the thesis option complete at least an additional 6 hours of graduate level course work and at least 4 hours of thesis work. In addition to defending their thesis, they are encouraged to publish their results in a refereed journal or present them at a scientific meeting.

**Plant Pathology - MAg, MS, PhD**

**Degree Programs:**

- Plant Pathology - MAg (p. 1613)
- Plant Pathology - MS (p. 1613)
- Plant Pathology - PhD (p. 1613)

The Department of Entomology and Plant Pathology offers plant pathology degrees including a Master of Science (MS), Master of Agriculture (MAg) and Doctor of Philosophy (PhD). The Graduate program emphasizes basic and applied aspects of the science of plant pathology preparing students for careers in teaching, research and extension with a variety of academic, governmental, state, private and industrial opportunities. The educational goals and objectives of the MS degree program are to produce graduates who are fundamentally trained in the scientific principles and general knowledge of plant pathology and related sciences and who are able to apply these principles to successfully solve problems and employ this knowledge at an advanced level of study. The purpose of the PhD program in plant pathology is to produce graduates who are fundamentally trained in the scientific principles and general knowledge of plant pathology and related sciences and who are able to employ this knowledge at the advanced level of study and apply these principles to solve problems involving plant diseases and associated pathogens.

Admission is based primarily on a combination of Grade Point Average (GPA) and Graduate Record Examination (GRE) scores and (if an international student) TOEFL tests are also required.

Students holding baccalaureate degrees in agriculture or the biological sciences may find this degree program helpful to their professional development and career goals. For a major in plant pathology at the MS level, the student should have a baccalaureate degree from a recognized institution with pre-requisite training in agriculture, biology, botany, microbiology and related fields such as chemistry, physics, and mathematics. Qualified students lacking mandatory courses may be admitted but will be required by the student’s advisory committee to make up any deficiencies.

The MS program in plant pathology is available to qualified individuals who wish to pursue a master’s level program that requires a thesis. Importance is placed on both classroom and research training. The MS requires a minimum of 30 semester hours, including:

A graduate-level course in statistics is also required. A minimum of 21 semester hours must be taken in plant pathology and a specialty area may be selected from related subject matter fields. There is no language requirement for the MS degree. In addition to the required course work, the student must complete research, a written thesis and a thesis defense examination as defined by the student’s advisory committee.

The master of agriculture (MAg) program with a specialization in plant pathology is available to qualified applicants who wish to pursue a master’s level program that does not require a thesis. The MAg with a specialization in plant pathology carries the same entrance requirements as the MS but is a non-thesis degree. The MAg requires a minimum of 32 semester hours, 21 of which must be in plant pathology, including:

Poultry Science - MAg, MS, PhD

Program Degrees:
- Poultry Science - ABM
- Poultry Sciences - MAg
- Poultry Sciences - MS
- Poultry Sciences - PhD

The Department of Poultry Science offers graduate programs in Poultry Science, leading to Master of Agriculture, Master of Science, and Doctor of Philosophy degrees. These degrees are designed to prepare outstanding students for careers in the commercial poultry industry, allied industries, government, and academia. Research training and experience can be acquired in the specialized areas of poultry management, poultry nutrition, poultry health (parasitology, pathology, virology), poultry physiology, processing and product technology, and food safety.

Applicants must indicate which graduate degree they wish to pursue in Poultry Science. All applications are reviewed by the departmental Graduate Committee. Application materials include: official copies of all college transcripts, TOEFL scores (for international students), 3 letters of recommendation, a resume, and a statement of purpose. Transcripts and test scores are sent directly to the Graduate School. The letters of recommendation may either be submitted online (preferred) or mailed to the graduate program officer. The resume and statement of purpose are sent to the graduate program officer at the departmental address or via email attachment. The GRE is not required. For graduate studies leading to MS or MAg degrees, applicants must have a bachelor’s degree in poultry science, animal science, or the biological sciences from a recognized institution with a minimum GPA of 3.0 out of 4.0. To be considered for the PhD program, applicants must have a MS degree with thesis in an appropriate field. The course of study, developed by the student and the advisory committee, may include additional courses to address specific needs or course work deficiencies.

Additional information about the departmental requirements, policies and availability of financial support can be obtained by contacting the graduate program officer, Dr. Wilmer Pacheco (wjp0010@auburn.edu).

MS/MAg Degree Requirements
1. The Master of Science (MS degree) requires a research project with a formal written thesis while the Master of Agriculture (MAg) requires a research project with a written report. The MS degree requires a minimum of 30 semester credit hours while the MAg requires a minimum of 33 semester credit hours. Both degrees require a comprehensive final oral examination.
2. Curriculum – Courses are selected in conjunction with the major professor and advisory committee to address the area of emphasis. All students are required to take 2 credits of POUL 7950, a course in statistics, and 4 credits of POUL 7990 or POUL 7980.

PhD Degree Requirements
1. For the PhD degree, a minimum of 30 semester hours of graduate coursework beyond the MS (60 hours beyond the bachelor’s degree) is required.
2. Curriculum – Courses are selected in conjunction with the major professor and advisory committee to address the area of emphasis. All students are required to take 3 credits of POUL 7950, a minimum of one course in statistics, and at least 10 credits of POUL 8990.
3. Examinations – Upon completion of course work, students must pass general written examinations administered by the advisory committee, followed by a comprehensive preliminary oral examination. After satisfactory completion of these exams, the student advances to candidacy. A dissertation based on an independent research project is required to earn a PhD degree. After completion of the dissertation, the student must pass a final Doctoral oral examination defending the dissertation.

Psychology - MS, PhD

Degree Programs:

- Applied Behavior Analysis in Developmental Disabilities Non-Thesis - MS
- Psychology (Industrial and Organizational) - ABM
- Industrial & Organizational Psychology Non-Thesis - MS
- Clinical Psychology - PhD
- Cognitive and Behavioral Sciences - PhD
- Industrial & Organizational Psychology - PhD

The Department of Psychology offers two terminal master's degrees - a Master of Science (Non-Thesis) in Applied Behavior Analysis in Developmental Disabilities (ABA) and a Master of Science (Non-Thesis) in Industrial & Organizational Psychology (I-O) - and doctoral degrees in three areas—a PhD in Clinical Psychology, a PhD in Cognitive and Behavioral Sciences (CaBS), and a PhD in Industrial & Organizational Psychology (I-O). The doctoral programs do not offer terminal master's degrees.

For the most accurate and up-to-date information about program requirements, applicants should consult the department's webpage (www.auburn.edu/psychology, click on "Graduate"). Please email bryangt@auburn.edu or call (334) 844-6471 for application and general program information.

Graduate degrees in Counseling, Counseling Psychology, Educational Psychology, and School Psychology are offered through the College of Education.

Admission Requirements for the MS and the PhD

Holders of the bachelor’s degree in any discipline from an accredited institution will be considered for graduate work in psychology. Students admitted to the PhD programs earn a thesis-based MS degree after completing intermediate program requirements. All programs commence in the fall semester. Spring or summer semester admission is not available.
To be considered for admission, potential applicants must submit an online application and related materials. Required materials and deadlines are subject to change, so it is imperative that applicants consult the application instructions on the Department of Psychology’s web page for up-to-date directions. See the PhD program instructions, ABA MS instructions or I-O MS instructions, depending on your program preference.

To ensure consideration, the application process should be completed by December 1 for the PhD programs, February 1 for the ABA-MS program, and February 15 for the MS in I-O program.

**MS in Applied Behavior Analysis in Developmental Disabilities**

In the ABA program, students are trained to provide clinical and educational services to individuals with mental retardation and autism spectrum disorders, to typically developing children in school settings, and to families. The ABA program is an approved verified course sequence provider and an approved experience provider.

**General Requirements**
The MS in ABA is a full-time non-thesis program requiring six consecutive semesters of full-time coursework (24 semester hours) and practicum training (21 semester hours). All students complete a capstone research project. Course and credit-hour requirements for the program total 45 hours.

**Required Courses**
See the Applied Behavior Analysis in Developmental Disabilities Non-Thesis - MS

**MS in Industrial and Organizational (I-O) Psychology**
The non-thesis M.S. in I-O Psychology program is designed to train students with the skills and knowledge to enable students to become Industrial - Organizational practitioners in an applied setting. I-O Psychology focuses on understanding, predicting, and modifying behavior in organizational settings, typically, but not limited to, work environments.

**General Requirements**
The M.S. in I-O Psychology program provides students with a well-rounded foundation in Industrial and Organizational Psychology. This degree does not require research or a thesis, and students participate in applied opportunities and internships.

**Required Courses**
See the Industrial & Organizational Psychology Non-Thesis - MS

**PhD in Clinical Psychology**
The Clinical Psychology PhD program uses a scientist-practitioner training model that blends basic and applied research with clinical practice.

**General Requirements**
Typically, the program requires five years at Auburn in course work, individualized research, and practicum experiences. In addition, a one-year full-time internship at an APA-approved program is required. 83 credit hours total are required.

Students enrolled in the Clinical Psychology PhD program complete a sequence of departmental core courses providing a foundation in psychology on which specialization is based. In doctoral study, students are expected to write and defend an empirically based master’s thesis. Admission to doctoral candidacy is contingent upon the successful completion of the general doctoral examination. Students must also write and defend a research dissertation.

**Required Courses**
See the Clinical Psychology - PhD

**PhD in Cognitive and Behavioral Sciences**
The CaBS program provides a firm foundation in cognitive and behavioral sciences. Electives allow students in the CaBS PhD program flexibility in developing their own areas of specialization.
General Requirements
CaBS students are required to complete a series of core courses, write and defend an empirically based master's thesis, and successfully complete a general doctoral examination before being admitted to doctoral candidacy. They must also write and defend a research dissertation. 60 credit hours total are required.

Required Courses
See the Cognitive and Behavioral Sciences - PhD

PhD in Industrial and Organizational (I-O) Psychology
Students enrolled in the I-O Psychology doctoral program will be trained in scientific methods applied to the industrial and organizational environment. Graduates of the program will be prepared to work in academic, research, and/or applied settings.

General Requirements
The I-O Psychology doctoral program provides doctoral students with a well-rounded foundation in Industrial Psychology, Organizational Psychology, and quantitative coursework. Students are required to complete a research-based thesis and a general doctoral exam before advancing to doctoral candidacy. The last milestone is a doctoral dissertation. The degree requires a total of 73 semester hours of credit.

Public Administration and Public Policy - MPA, PhD, Graduate Certificates

Degree Program:
- Public Administration - MPA
- Public Administration and Public Policy - PhD

Graduate Certificates:
- Election Administration
- NonProfit Organizations and Community Governance

The Department of Political Science offers the Master of Public Administration (MPA), and the PhD in Public Administration and Public Policy is offered jointly by the Auburn University Department of Political Science and the Auburn University at Montgomery Department of Political Science and Public Administration. Graduates from the MPA program are employed as managers, planners, and directors in city, state, and local government agencies and federal government programs; they also serve as program officers, development directors, executive directors, and senior administrators in local and national nonprofit organizations. The Department of Political Science also offers two graduate certificates: Graduate Certificate in NonProfit Organizations and Community Governance and Graduate Certificate in Elections Administration.

For more information about the MPA program, see [http://www.cla.auburn.edu/polisci/graduate-programs/mpa/](http://www.cla.auburn.edu/polisci/graduate-programs/mpa/).

Master of Public Administration

The Department of Political Science offers the MPA. It is a professional degree program for leadership in public service at all levels of government as well as in nonprofit organizations. The program is accredited by the Network of Schools of Public Policy, Affairs, and Administration (NASPAA). Highly qualified students may pursue concurrently the Master of Community Planning.

Application Process

Applicants for the MPA must have a bachelor's degree or its equivalent from an accredited college or university. The admissions committee will evaluate the undergraduate transcripts, personal statement, letters of recommendation, a writing sample, and any
public sector experience in government agencies or nonprofit organizations. The program is not limited to political science majors, but successful applicants who have little background in public sector institutions and processes may be required to take additional courses.

Applicants should ensure these materials are sent to the Graduate School web application:

- Official transcripts from every institution attended
- Personal statement of purpose in pursuing the MPA degree
- Three letters of professional or academic recommendation
- Writing sample
- Statement of merit or need (If applying for a graduate assistantship)
- Other information listed in the application

Web applications are located at: http://graduate.auburn.edu/prospective-students/application-instructions/

**Degree Requirements**

Once they are admitted, the program requires 42 semester hours and an ePortfolio. Eight core courses for a total of 24 hours credit are required of all students. The required 24 hours include 3 credit hours of an administrative internship in a governmental agency or nonprofit organization and 3 credit hours participation in a research project pertaining to the public sector. Students take an additional 18 hours of electives in either public administration, broadly conceived, or an approved concentration in a related administrative field or policy area.

Details about the requirements are provided below.

### Practical Experience through Internship and Applied Research Project (6 hours)

The program requires a total of 3 credit hours of internship (POLI 7920 Internship) and 3 credit hours of applied research (POLI 7930 MPA Research Project). Students with extensive direct experience with government agencies or nonprofit organizations have the option to complete an approved research project for 6 hours.

### Electives (18 hours)

The MPA requires 18 credits of electives. This requirement may be fulfilled in any one of the three following ways:

- By taking 18 credits of classes approved by the MPA director that support the generalist public administration curriculum
- By completing the Dual MPAMCP Degree with Community Planning
- By completing one of the following two formal specializations: Graduate Certificate in Elections Administration or Graduate Certificate in Non-Profit Organizations and Community Governance

### ePortfolio

Successful completion of the degree includes the preparation of the MPA ePortfolio. The MPA ePortfolio demonstrates mastery of the competencies established by the Network of Schools of Public Policy, Affairs, and Administration (NASPAA).

The MPA Portfolio reviews are scheduled in the final semester of course work. Students who do not pass the MPA Portfolio review have one additional opportunity to present their material to MPA faculty in the following fall or spring semester.

The PhD in Public Administration and Public Policy is offered jointly by Auburn University’s Department of Political Science and Auburn University at Montgomery’s Department of Political Science and Public Administration. Only students with master’s degrees from accredited universities or colleges will be considered for the AU/AUM joint PhD program. Applicants having an insufficient background in public administration and public policy may be required to take additional prerequisite courses as determined by the admissions committee.

A minimum of 1/3 of the total course credits taken on both campuses toward the degree for the Joint AU/AUM Ph.D. in Public Administration and Public Policy must be from each campus (a minimum of 1/3 from Auburn University and a minimum of 1/3 from Auburn University at Montgomery).

Application Process

Applicants must submit transcripts, a CV or resume, a statement of purpose, letters of recommendation, and GRE scores. Normally, scores of approximately 150 on the verbal, 150 on the quantitative, and 4.5 on the writing sections of the GRE are expected for admission.

Applicants should ensure these materials are sent to the Graduate School web application:

- Official scores from the General Test of the GRE
- Official transcripts from every institution attended

Applicants should ensure these materials are sent to the PhD administrators in the Department of Political Science:

- CV or resume
- Three letters of recommendation
- Statement of purpose

For more information, see the website for the PhD in Public Administration.

Requirements

The PhD curriculum includes core courses, a research methodology sequence, the student’s choice of either the Public Administration or Public Policy track, and a series of electives where students develop expertise in chosen area of specialization. Details about the requirements for both tracks are given below.

Core Courses

All students in the program take the core courses in Public Administration and Public Policy.

Research Methodology Courses

Students will take a three-course methodology sequence covering a broad scope of political inquiry, research design, qualitative methods, and quantitative analysis. Students must earn a grade of A or B in each of the methodology courses before they can progress to the general comprehensive exams.

Tracks

The PhD program has two tracks, Public Administration and Public Policy. Students are required to take at least three courses within the track they choose. For the Public Administration track, required courses are as follows: public finance, human resource management, and organizational theory. For the Policy track, students should choose three of the following five courses: American politics and public policy, comparative politics and public policy, international relations and public policy, political theory and public policy, and public law and public policy.
Electives
The other five courses are chosen in consultation with the student’s advisory committee. These electives should help the student develop expertise in a particular area of specialization.

Comprehensive Exams, Oral Exams, and Dissertation Defense

During the spring or fall semester after the course work is completed, students take comprehensive exams administered by the department. The exams will consist of sections testing core and track knowledge as well as one section focusing on students’ areas of specialization. Students will have two opportunities to pass the comprehensive exams and must pass each written examination before scheduling the oral examination. Upon successful completion of the comprehensive exams, students should prepare a prospectus to present to their dissertation committee during their oral examinations. Admission to doctoral candidacy is contingent upon successful completion of all elements of the written and oral doctoral exams. After completion of the dissertation, the students must pass a final oral examination defending their dissertation work before their committee and a University Reader approved by the Graduate School.

Graduate Certificates

Two graduate certificates are offered in public administration and public policy: Graduate Certificate in Elections Administration and Graduate Certificate in NonProfit Organizations and Community Governance.

Application Process

Applications for graduate certificates include the same items as applications for the MPA degree with the exception that GRE scores are not required.

Applicants should ensure these materials are sent to the Graduate School web application:

- Official transcripts from every institution attended
- Other information listed in the application

The program is entrepreneurially and industry focused, designed for practicing professionals with a minimum of three to five years in real estate development or related fields (real estate or mortgage brokerage, architecture, landscape architecture, community planning and building construction, for example). It combines short, intense on-campus residencies with distance modules and four-day field trips to nationally and internationally significant cities and development projects. The curriculum consists of 39 credit hours that are delivered over a five semester period.
Information concerning specific program requirements may be obtained by visiting www.harbert.auburn.edu.

Graduate Executive Programs –

The Graduate Executive Programs comprise the Executive MBA, the Physicians Executive MBA, and the Masters of Real Estate Development Executive programs. These programs are designed to be taken as a cohort with one start in the Fall of each year, an exact sequence of courses taken each term and with graduation in the Spring – five semesters later.

Non-Standard Calendar:

Due to the hybrid nature of these Graduate Executive programs, which use a format that combines on-campus residency with online learning, the residencies typically occur during breaks on campus. See the relevant program website for the exact calendar dates per term for each executive program.

Full-Time Credit Hour Requirements:

Students in the Graduate Executive Programs are restricted to the exact courses which are offered to that cohort in any one semester. The course load varies from term to term – from a minimum of 5 hours to a maximum of 9 hours. The course load is thus considered to be full time as they cannot take more hours or less as they follow the mandated and approved curriculum.

Tuition Costs Excluded VA Benefit Coverage:

VA benefits will not cover costs for lodging, meals, travel, books, supplies or memberships to organizations. As many of these costs are included in the Graduate Executive Programs’ tuition, those costs have been broken out and will be billed separately. See the relevant program website for the exact amounts per term.

Sociology - MA, MS

Degree Program:

- Sociology - MA (p. 1635)
- Sociology - MS (p. 1635)
- Rural Sociology - MS (p. 1636)

The interdepartmental graduate program in sociology offers study and research leading to the degrees of Master of Arts or Master of Science in Sociology and in Rural Sociology. Anthropologists, social work faculty, rural sociologists, and sociologists make up the faculty. The program is administered by a two-member coordinating committee from the Department of Agricultural Economics and Rural Sociology and the Department of Sociology, Anthropology, and Social Work. Information about the two degrees is available at http://www.cla.auburn.edu/sociology/sociology-program/graduates/the-interdepartmental-masters-program/.

Admission Requirements

Admission to the program is administered by co-directors representing the Department of Sociology, Anthropology & Social Work and the Department of Agricultural Economics & Rural Sociology. Applicants are required to have a bachelor's degree from an accredited institution and generally are required to have a minimum GRE score of 290 (150 V and 140 Q) and a GPA of 3.0 on all completed coursework. The applicant's statement of interest and letters of recommendation also are considered in making a decision on admission.

Applicants should ensure the following materials are submitted to the Graduate School web application:

- Official scores from the General Test of the GRE
- Official transcripts from every college and university attended
- If an international student, the official score from the TOEFL exam
- Three letters of recommendation

Applicants should ensure that the following materials are submitted to the graduate program officer in the Department of Sociology, Anthropology, and Social Work:

- Statement of interest

Applications to the program are reviewed year round.

The program’s coordinating committee will evaluate each applicant’s dossier.

Thesis and Non-Thesis Options

Thesis and non-thesis options are available for both the MA and the MS. These two degree options are designed to serve the needs of differing types of students. The thesis option is recommended for students who might be interested in pursuing advanced graduate work and who are interested in gaining research experience. The non-thesis option is designed for individuals who are in mid-career, who wish to learn new skills in order to be more productive professionally, and who have no intent on pursuing a more advanced graduate degree.

The thesis option requires a minimum of 30 semester hours, with 6 semester hours of this total being for research and thesis (SOCY 7990 Research and Thesis or RSOC 7990 Research and Thesis). The non-thesis option requires 36 semester hours of course credit. Additionally, a capstone paper is required for the non-thesis option.

Required Core Courses

All students take core graduate courses in social theory, social research methods, and statistics:

- SOCY 7000 Advanced Sociological Theory
- SOCY 7100 Statistical Analysis of Survey, Aggregate, and Large Data Sources
- RSOC 7700 Methods of Social Research

Students without undergraduate course work in these areas may be required to take additional courses to prepare for the core graduate courses. Additional courses at the 6000-level and above are taken with the advice of the student's graduate advisory committee.
Financial Aid

A variable number of graduate teaching assistantships and graduate research assistantships are available on a competitive basis to support graduate students in the program. Strong preference is given to funding students pursuing the thesis option.

Admission to the program is determined collectively by the coordinating committee, but funding decisions are made by individual departments. To be considered for funding, applicants should send three letters of recommendation to the coordinating committee member in the appropriate department.

Most graduate teaching assistantships and graduate research assistantships require the commitment of 13-15 hours of work per week. Given these responsibilities, graduate students holding graduate teaching assistantships and graduate research assistantships are expected to take no more than 9 hours of graduate credit course work per semester. Experience indicates that a heavier course load leads to an erosion of performance both on the job and in the course work.

Graduate teaching positions are associated primarily with the Department of Sociology, Anthropology, and Social Work and involve working with faculty teaching in the undergraduate core curriculum. Students seeking graduate teaching assistantships should submit their completed applications by March 1 to be included in the review process regarding funding decisions for the following academic year. However, occasionally, funds for graduate teaching assistantships may become available later in the year, and applications are then reviewed accordingly.

Graduate research assistantships are associated primarily with the Department of Agricultural Economics and Rural Sociology and require working with faculty conducting research on a variety of topics dealing with rural development. Funding from grants becomes available at different times of the year. The funds for graduate research assistantships generally are made available in February or March. Please contact the coordinating committee member from the Department of Agricultural Economics and Rural Sociology for further information on funding.

Spanish - MA, MHS

Degree Programs

- Spanish - MA, MHS (p. 1637)

Graduate studies in Spanish lead to the Master of Arts (MA) in Spanish or the Master of Hispanic Studies (MHS). The Spanish graduate program is designed to prepare students for careers in teaching, business, government, world affairs, diplomacy, social service, and law enforcement and for doctoral studies in Spanish, with emphases such as literature, linguistics, or foreign language education. Students may begin their graduate studies at the beginning of any semester during the academic year.

Information about the MA and the MHS can be found at http://www.cla.auburn.edu/forlang/spanish-graduate-program/.

Admission Requirements

Candidates wishing to pursue the MA or the MHS must have a bachelor’s degree from an accredited institution, with at least 38 semester hours of undergraduate Spanish course work above the freshman level and satisfactory scores on the General Test of the GRE. International students must have acceptable scores on the TOEFL. Applicants lacking course requirements need to make up deficiencies before admission to the graduate program.

Applicants should ensure that the following materials are sent to the Graduate School via the Graduate Web Application and Admission Process (https://web.auburn.edu/GWAAP/default.aspx).
• Official transcripts from every undergraduate institution attended
• Official scores from the General Test of the GRE sent from ETS (for domestic students; not required for international students)
• Official scores from the TOEFL (for international students)
• Three letters of recommendation
• Graduate teaching assistantship application
• Writing sample. A writing sample in Spanish should be submitted to the Department of Foreign Languages and Literatures at the time of the application. The writing sample typically is a research paper completed for a course taken as an undergraduate, usually a paper written for a senior-level literature or civilization course. It should be a minimum of five pages, typed.

Applicants should also provide two speaking samples electronically via a OneDrive folder shared privately with each candidate once the formal application has been completed through the Apply Yourself online system:

• Speaking biographical sample: Candidates must provide a 2-3 minute extemporaneous autobiography on the candidate’s relevant background, including an explanation of the candidate’s interest in pursuing a graduate degree in Spanish, and his/her professional plans for the future.
• Reading sample: The second speaking sample should be a reading from a printed text, for example, a poem, a paragraph or two from a novel or short story, or a newspaper article. Applicants should identify the selection on the recording. This selection should be approximately 1-2 minutes in length.
• The speaking samples will be requested electronically through a OneDrive folder shared privately with each candidate once the formal application has been completed through the Apply Yourself online system.

• All materials should be received by February 15.

Courses and Other Graduation Requirements
The MA requires at least 30 semester hours including 4 credit hours for thesis.

Candidates for the MHS must earn a minimum of 36 semester hours in their major, but no thesis is required. A concentration consisting of 6 semester hours of graduate-level courses in a related field or fields may be earned as part of the MHS degree. These 6 hours do not have to be taken in the Department of Foreign Languages and Literatures.

Both degrees require satisfactory performance on the comprehensive examinations.

A reading knowledge of one other foreign language is required. This knowledge may be demonstrated by earning a passing score on the foreign language proficiency test or by completing the first-year sequence (or equivalent) of the foreign language with a grade of B or better.

Financial Aid
Graduate teaching assistantships are available to qualified students. For more information, please contact the department.

All MA-Spanish or MHS graduate students are required to take FLSP 7090 Introduction to College Level Spanish Instruction. For more information, check the student handbook available from the department.

**Statistics - MS, MPS**

**Degree Programs:**
- Statistical Option Thesis - MS (p. 1590)  
- Probability and Statistics Non-Thesis - MProbS (p. 1590)

The Department of Mathematics and Statistics offers degree programs leading to a master of science in statistics and a non-thesis master of probability and statistics. The master of science is designed to provide a suitable mix of theoretical and applied background for students interested in a career in statistics. The curriculum provides students with the necessary technical, analytical and interpretive skills required of professional statisticians while concentrating on education in the fundamentals of statistics and its interdisciplinary nature. Course offerings are structured to give students a variety of choices of specialization in order to pursue a career in academia, government or industry and/or further their pursuit of a PhD degree in statistics. For the MS degree the student must complete and defend a thesis and obtain a passing score on the related oral examination. The master of probability and statistics (MPS) is the non-thesis option in which students are required to complete a project that may involve statistical consulting, programming and/or data analysis. A PhD degree in mathematics with concentration in statistics is also available (see mathematics).

For those students whose graduate research includes a substantial amount of statistical methodology or data analysis, but who do not wish to pursue a degree, a graduate minor in statistics is available (see “Statistics” under “Graduate Minors”).

**Wildlife Sciences - MS, PhD**

**Degree Programs:**
- Wildlife Sciences - MS
- Wildlife Sciences - PhD
- One Health - Graduate Certificate

Wildlife Sciences graduate programs are available for both MS and PhD degrees. Admission requirements parallel those for Forestry graduate programs. In addition to meeting Graduate School admission requirements, applicants are evaluated and recommended for admission by the graduate faculty of the School of Forestry and Wildlife Sciences based on examination of scores on the TOEFL tests for international students, previous academic records, experience, and recommendations. While exceptions may be made, the faculty generally expect a minimum GPA of 3.0 in previous academic course work.

**Degrees offered:**
- **Master of Science (MS)** which requires a minimum of 30 hours beyond the bachelor degree at the graduate level, 21 hours of which must be in the major. A minimum of 4 but not more than 6 hours in Research and Thesis (WILD 7990) is required. All MS students are required to take Research Methods (FORY 7510) and Graduate Seminar (FOWS 7950). A research proposal and thesis based on original research are required components for the MS degree.
- **Doctor of Philosophy (PhD)** degree requires 60 semester hours beyond the bachelor degree. There must be a minimum of 30 semester hours in graded coursework at the 7000-level or above. Of the remaining 30 semester hours, 10 hours must be Research and Dissertation (WILD 8990) and 20 hours of 6000-level or above. While some of these 60 hours can be from previous graduate work, such as a MS degree, the majority of hours of graded coursework at the 6000-level or above must be completed at Auburn. All PhD students are required to take Research Methods (FORY 7510) and Graduate Seminar (FOWS 7950). A research proposal and dissertation based on original research are required as major components of the PhD degree program. Oral and written preliminary exams are required for advancement to candidacy and must be completed no less than two academic terms prior to graduation. The written and oral preliminary examinations for PhD students will normally consist of questions from each committee member regarding technical competency and other related issues.

# Systems & Technology - MS, PhD, Graduate Certificates

**Degree Program:**
- Information Systems Management - MS ([http://bulletin.auburn.edu/thegraduateschool/graduatedegreesoffered/SystemsTechnology_ms/](http://bulletin.auburn.edu/thegraduateschool/graduatedegreesoffered/SystemsTechnology_ms/)) (on-campus/full-time and online)

**Graduate Certificate:**

The Systems and Technology department (SYST) offers graduate study leading to the master of science and the doctor of philosophy degrees in Information Systems Management. The program also offers a joint program leading to both the MSIS and MBA degrees. Applicants must hold a bachelor's degree from a recognized institution. Graduates of business schools will likely have met this requirement; graduates of other programs may be required to complete additional courses to compensate for deficiencies.

## Master of Science in Information Systems

The (MSIS) Program in Business is a non-thesis program that emphasizes practical application of management information systems to managerial problem solving and decision making. Students are required to complete a final project. The program is designed to provide students the opportunity to develop an expertise in a chosen area of management. Applicants to the master's program must have completed an undergraduate degree. The MSIS program is offered as a traditional, on-campus program and as an online program. A twelve-hour graduate certificate is also available.

The MBA/MSIS is a 54-hour program administered jointly by the Systems & Technology faculty and the MBA program. The program saves the student fifteen hours of coursework over completing both degrees separately. For the MBA, students without two years full time work experience are required to do an additional 0-3-credit hour internship. Students must apply separately to each program (MISE and MBA), but only have to pay one application fee. Students can also opt to apply for the second degree program during their first year in the other program.

The PhD program in Business with Information Systems Management Concentration prepares graduates to conduct high-quality research in universities, colleges, government and business. Individual flexibility is provided in a program of study that develops the conceptual and methodological skills that graduates need to establish a leadership position in their chosen fields. Objectives of the program are accomplished through the completion of a formal program of study, successful completion of a statistics core, preparation and completion of two examination manuscripts, and dissertation research. Students with assistantships may also be required to teach. Students are expected to have a fulltime presence on campus. Applications to the PhD program must complete an Auburn University Graduate School application. For full consideration, applications must be received no later than February 1, prior to the Fall term.

Information concerning specific program requirements may be obtained by visiting [www.harbert.auburn.edu](http://www.harbert.auburn.edu).

The Women’s Studies Program offers an interdisciplinary graduate minor in Women’s Studies, open to any graduate student. The minor provides students with specific coursework in women’s and gender studies and a teaching practicum that helps prepare them to teach an introductory women’s studies course. The minor is recommended for students who seek positions in women’s and/or gender studies departments or joint positions for which part of the responsibility is to women’s and/or gender studies.

Students are required to complete 10 hours of graduate-level coursework, including WMST 6980 (Feminist Theory; 3 hours) and WMST 7910 (Teaching Practicum; 1 hour). Students fulfill the remaining hours with graduate courses cross-listed with Women’s Studies; these must be from outside of the student’s home department. See the Women’s Studies Program website for a full listing of course offerings. [http://www.cla.auburn.edu/womensstudies/womens-studies-minor/graduate-curriculum/](http://www.cla.auburn.edu/womensstudies/womens-studies-minor/graduate-curriculum/)

For more information, contact the Director of the Women’s Studies Program.

**Earth System Science - ESSI**

**Courses**

**ESSI 7150 SCIENCE COMMUNICATION (3) LEC. 3.** This course will provide opportunities for STEM graduate students to practice communicating science to multiple audiences. Students will gain skills by communicating with both stakeholders and the public and presenting information, exploring public opinion on socio-political topics such as climate change, resilience, and adaptation planning, and learning about appropriate framing and messaging techniques for target audiences. Guest speakers, reading discussions, practical tips, communication rubrics, and presentations to refine communication skills will be emphasized.

**ESSI 7200 STEM STUDIO (2) LEC. 2.** This course will provide opportunities for interdisciplinary STEM graduate students to learn about structured decision-making and the coproduction of science, which aims to undertake science that is actionable and useful to targeted stakeholder groups. Students will gain skills by communicating with stakeholders and develop a proposal to conduct research with a stakeholder group of their choice. Ideally, students would then implement their research in the follow-on Internship course (ESSI 7920) offered by the ESSI Program/NRT project. Guest speakers, reading discussions, written communication, workshops, and meetings with stakeholders will be included in the course. This course aims to: (i) expose students working on climate adaptation (from natural, social, or humanities sciences) to ideas of interdisciplinary climate knowledge, co-production, and structured decision-making; (ii) help students reflect on and relate these ideas to their own research - how their own climate research could connect with other disciplines and meet the decision needs of stakeholders; (iii) support participants in designing a climate adaptation research project for review by their peers and future implementation with their chosen stakeholder group.

**ESSI 7300 SOCIAL-ECOLOGICAL-ENGINEERED SYSTEMS (3) LEC. 3.** This course explores foundational scholarship on the Social-Ecological Systems (SES) approach to understanding complex environmental problems with emphasis on the role of engineering in human interactions with natural systems. Students are expected to apply SES concepts and theories to analyses in their own areas of research.

**ESSI 7420 NATURAL HAZARDS RISK AND DISASTER RESILIENCE (3) LEC. 3.** The purpose of this course is to present students with an approach to understanding adverse natural hazard impacts and disasters grounded in the analysis of disaster risk, vulnerability, and resilience. The course will use a multidisciplinary perspective to examine factors and conditions that put people differentially at risk before, during, and following a disaster event. The course will also introduce students to the metrics, methodologies, and tools necessary for both quantitative and qualitative resilience assessments and benchmarking methods. Specific topics that are an integral part of the resilience concept will include: climate-related hazard risk assessment; disaster resilience assessment covering ecological, social, economic, infrastructural, and institutional components; community capital; hazard mitigation and planning for fostering resilient communities; social vulnerability, and recovery. The course materials, lectures, and assignments will reflect the emerging emphasis on resilience to climate-induced natural hazards and disasters.

**ESSI 7920 CLIMATE INTERNSHIP (1) INT. 1.** This course will provide graduate Trainees with an opportunity to gain knowledge and skills from a planned work experience in the area of resilience to climate-related natural hazards and disasters. In addition to meeting core learning objectives, jointly developed learning outcomes that are specific to each Trainee will be selected and evaluated by a faculty internship advisor, a stakeholder sponsor, and the Trainee. It is expected that the internship will afford Trainees the opportunity to: 1) explore career paths related to climate resilience outside of academia, 2) conduct research to solve real-world problems, and 3) understand the research needs of stakeholders. The experience will also give students the opportunity to build professional networks.

**ESSI 8000 EARTH SYSTEM SCIENCE AND GLOBAL CHANGE (3) LEC. 3.** The course explores the Earth system as a whole, with an emphasis on the interrelationships between geological, biological, climatological, and human systems on regional and global scales.

**ESSI 8040 URBAN CLIMATOLOGY (3) SEM. 3.** This seminar will explore past, current, and emerging textbooks and literature to introduce (1) the fundamental concepts of the urban-climate system, (2) observational and modeling strategies for studying the urban-climate system, and (3) the context for how the urban-climate system feedbacks fit into the climate change discussion. Students will be graded based on class participation, examinations, a small group project, and an individual project.

**ESSI 8100 EARTH SYSTEM OBSERVATIONS AND ANALYSIS (3) LEC. 2. LAB. 2. Pr. GSEI 1200 and GSEI 2070.** Course reviews recent advances in earth system observations and provides students opportunity to develop holistic understanding of key parameters and processes of the earth system including biosphere, atmosphere, and oceans processes using observations.

**ESSI 8200 EARTH SYSTEM SCIENCE SEMINAR (1) SEM. 1. SU.** Students deliver oral presentations based upon their research and provide constructive criticism of their peers’ presentations. Topics of presentations may include student’s dissertation research areas or critical examination of current research problems in Earth system science.
ESSI 8990 RESEARCH AND DISSERTATION (1-3) DSR. Theoretical and practical aspects of designing dissertation research in the interdisciplinary Earth System Science program. The course is designed to assist students through the proposal and dissertation writing and presentation processes and to prepare for the dissertation defense. Course may be repeated for a maximum of 10 credit hours.

MKTG 4440 MARKETING ETHICS AND CORPORATE SOCIAL RESPONSIBILITY (3) LEC. 3. Pr. MKTG 3310. The purpose of this course is to explore marketing ethics and social responsibility from an organizational perspective. This means that our focus is on managerial decisions. Marketing ethics focuses on organizational integrity in managerial decisions. Social responsibility is associated with proactive stakeholder relationships. Social responsibility is associated with issues that impact society, such as sustainability, philanthropy, social issues, etc. Ethics and corporate social responsibility are complementary, but different. Stakeholders, both internal and external, primary and secondary, determine the success of a marketing strategy. Research has demonstrated that a stakeholder orientation is more effective in increasing marketing performance than a market orientation. A market orientation focuses more on customers and competitors, while a stakeholder orientation understands and addresses the demands of all relevant stakeholders. Customers, employees, shareholders, suppliers, and communities are key primary stakeholders. We will address issues that influence these stakeholders as well as issues that have the potential to increase competitive advantage. This course explores the importance of social responsibility and ethics initiatives and the role they play in a successful marketing strategy. We will address the key issues that marketers must address to be a responsible and successful participant in a dynamic, global marketplace.
