POLI 7050 STATE POLITICS (3) LEC. 3. Current and classical research on state government, politics, and policy. Students critique others’ research and design their own for submission to a professional journal.

POLI 7130 POLITICS OF THE ADMINISTRATIVE PROCESS (3) LEC. 3. Politics and public agencies and their employees at all levels of government. Credit will not be given for both POLI 7130 and POLI 4130.

POLI 7140 FINANCIAL MANAGEMENT FOR PUBLIC AND NONPROFIT ORGANIZATIONS (3) LEC. 3. Comprehensive theoretical underpinning for research. Focuses on models associated with descriptive and prescriptive budgeting research.

POLI 7150 PUBLIC PERSONNEL ADMINISTRATION (3) LEC. 3. Personnel policies, processes, and politics in American governments, including history, theory, and practice.

POLI 7160 FINANCIAL ADMINISTRATION (3) LEC. 3. Application of macroeconomic theory to public finance, with emphasis on capital budgeting, taxation, user charges, debt administration, cash management, and investment for small governments.

POLI 7260 ORGANIZATIONAL THEORY AND ADMINISTRATIVE BEHAVIOR (3) LEC. 3. Structure and functioning of government organizations, with an emphasis on applied management and on leadership techniques.

POLI 7330 SEMINAR IN ADMINISTRATIVE LEADERSHIP, RESPONSIBILITY, AND DEMOCRATIC GOVERNMENT (3) SEM. 3. Problems and ethics, democratic theory and leadership as they relate to public administration.

POLI 7350 FOUNDATIONS OF PUBLIC ADMINISTRATION AND PUBLIC SERVICE (3) SEM. 3. Introduction to public administration as practiced in the United States.

POLI 7360/7366 FOUNDATIONS OF PUBLIC POLICY (3) LEC. 3, SEM. 3. Formation, execution, and evaluation of public policy and an in-depth analysis of selected policy areas.

POLI 7520/7526 PROGRAM EVALUATION (3) LEC. 3. This course provides a graduate-level focus on the theory and practice of program evaluation in the public sector with attention to program planning, process assessment, and impact assessment.

POLI 7630 DIVERSITY IN PUBLIC LIFE (3) LEC. 3. Developing and institutionalizing diversity in complex public organizations as a major part of organizational culture.

POLI 7700/7706 ECONOMIC DEVELOPMENT AND COMPETITION (3) LEC. 3. Politics of economic development at the local, state, and national levels, especially the infrastructure offered by communities and the types of plans that might attract outside investment.
POLI 7920/7926 MPA INTERNSHIP (3-6) INT. SU. Administrative experience in a governmental agency or participation in an approved governmental research project. May count either POLI 7920 or POLI 7926. Course may be repeated for a maximum of 6 credit hours.

POLI 7930/7936 MPA RESEARCH PROJECT (3-6) IND. SU. Completion and approval of a paper related to a policy or administrative issue or problem. Course may be repeated for a maximum of 6 credit hours.

POLI 7960/7966 SPECIAL PROBLEMS (1-3) IND. Directed readings in political science, including topics such as American politics, comparative politics, international relations, political theory, public administration, public policy, public law, and methodology. Course may be repeated with change in topics.

POLI 8000 DOCTORAL SEMINAR IN PUBLIC ADMINISTRATION (3) LEC. 3. Nature of public administration as a field of study and different theoretical perspectives as reflected in current research.

POLI 8010 RESEARCH DESIGN AND ANALYSIS (3) LEC. 3. Development and testing of causal models in political and social science. Students will develop a complex research design under the close supervision of the instructor.

POLI 8020 DOCTORAL SEMINAR IN PUBLIC POLICY (3) SEM. 3. Advanced study of the nature of public policy development and implementation.

POLI 8040 DOCTORAL SEMINAR IN PUBLIC FINANCE (3) SEM. 3. Theory and practice of public finance in a comparative perspective.

POLI 8060 DOCTORAL SEMINAR IN PUBLIC POLICY ANALYSIS AND RESEARCH (3) SEM. 3. Examination of advanced policy analysis and research methodology and the relationship between evaluation and quantitative analysis and policy formulation and implementation.

POLI 8070 DOCTORAL SEMINAR IN HUMAN RESOURCE ADMINISTRATION IN THE PUBLIC SECTOR (3) SEM. 3. Major environmental values affecting public personnel administration and the major processes used in public personnel management.

POLI 8110 AMERICAN GOVERNMENT AND PUBLIC POLICY (3) LEC. 3. Survey of the literature on the main institutions and policy processes of American national government, with emphasis on research design, methodology, and validity.

POLI 8120 QUALITATIVE RESEARCH METHODS (3) SEM. 3. Pr. POLI 8110. In-depth analysis of the use of qualitative methods in political science research.

POLI 8130 QUANTITATIVE METHODS (3) LEC. 3. Pr. POLI 8110. In-depth analysis of the use of quantitative methods in political science research.

POLI 8260 PUBLIC ORGANIZATIONAL THEORY AND MANAGEMENT (3) SEM. 3. Development and refinement of research on administrative and organizational theory in public management. Credit will not be given for both POLI 7260 and POLI 8260.

POLI 8450 COMPARATIVE POLITICS AND PUBLIC POLICY (3) LEC. 3. Theoretical approaches and important sub-field literatures. Applies insights and approaches to solving practical contemporary problems in public policy.

POLI 8550 INTERNATIONAL RELATIONS AND PUBLIC POLICY (3) LEC. 3. Application of the scholarship in international relations to public policy, with a focus on war, defense policy, and conflict management.

POLI 8750 PUBLIC LAW AND PUBLIC POLICY (3) LEC. 3. Role of the courts in public policy-making.

POLI 8970 SPECIAL TOPICS (3) LEC. 3. Directed study of topics of interest. Course may be repeated for a maximum of 9 credit hours.

POLI 8990/8996 RESEARCH AND DISSERTATION (1-10) DSR. Research related to writing the dissertation. Course may be repeated with change in topics.

Curriculum in Health Services Administration

Students are admitted into Health Services Administration by application only. For admission into the HADM major, students must have completed 30 semester hours of course work, have earned a minimum 2.3 GPA in a list of specified courses. See the department chair or program coordinator for further information.

Latin American Studies Minor

15 semester hours in minor (minimum 9 hours at 3000-level or above). Student must test at the equivalent of FLFR 2010 or FLSP 2010 in either French, Spanish, or Portuguese, and complete a minimum of five courses in at least three different disciplines (see advisor for approved course listing). Students must earn a C and maintain a 2.5 GPA for all courses that count toward the minor. Courses taken in fulfillment of the College Core or other majors and minors may not be counted toward the Latin American Studies minor.

Political Science Minor

The Political Science Minor requires 15 semester hours of Political Science courses above the 1000-level, with a minimum of 9 hours at the 3000-level or above. Students must earn a cumulative 2.00 GPA in the courses that count toward the minor. Courses taken in fulfillment of the College Core or other majors and minors may not be counted toward the Political Science minor.

POLI 1090 American Government does not count toward the minor, but it is the prerequisite for some higher level Political Science courses.

See the Political Science Department for the approved course listing.

Public Administration Minor

The Public Administration minor requires 6 hours of foundations course work and 9 hours of emphasis in one of two tracks or Non-Profit Organizations and Community Governance. Students must meet prerequisites for all courses.

Psychological Sciences

We offer two undergraduate degrees: B.A. in Psychology and B.S. in Neuroscience. Our curriculum is designed to provide undergraduates with the best possible education.

The student learning outcomes for psychology are established by the American Psychological Association, and the department aligns with these learning outcomes:

- **Knowledge in Psychology**: Students will be able to identify basic psychological concepts.
- **Scientific Inquiry and Critical Thinking**: Students will be able to critically evaluate and apply basic psychological concepts by means of scientific reasoning acquired from training in statistics and research methods.
- **Ethical and Social Responsibility in a Diverse World**: Students will be able to apply ethical standards to evaluate psychological science and practice.
- **Communication**: Students will be able to interact effectively with others.
- **Professional Development**: Students should be involved in research and outreach opportunities as preparation for pursuing post-baccalaureate education to become future scientists and/or practitioners in a psychological discipline, and to develop necessary skills to be successful in employment after earning their degree.

**Major**

- Psychology (p. 1066)
- Neuroscience (p. 1067)

**Minor**

- Psychology (p. 1068)

**Courses**

**PSYC 2010/2013 INTRODUCTION TO PSYCHOLOGY** (3) LEC. 3. Introduction to the various subfields of psychology such as developmental, biological, cognitive, clinical, and social psychology. May count either PSYC 2010 or PSYC 2013.

**PSYC 2017 HONORS INTRODUCTION TO PSYCHOLOGY** (3) LEC. 3. Pr. Honors College. Introduction to the various subfields of psychology such as developmental, biological, cognitive, clinical, and social psychology.
PSYC 2020 ORIENTATION TO PSYCHOLOGY MAJOR (1) LEC. 1. SU. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). Orientation to the psychology major. Overview and design of psychology curriculum, faculty introduction, faculty expectations, student assessment, career development, study skills, diversity, and ethics.

PSYC 2130/2133 ANALYTICS FOR SOCIAL AND BEHAVIORAL SCIENCES (3) LEC. 3. Pr. (MATH 1100 or MATH 1120 or MATH 1123 or MATH 1130 or MATH 1133 or MATH 1150 or MATH 1610 or MATH 1613 or MATH 1617). Introduces students to the cycle of collecting (using surveys and experiments), analyzing (using Excel) and reporting conclusions about psychological and other social and behavioral sciences data. The course provides a critical thinking approach for quantitative argumentation with data.

PSYC 2140/2143 RESEARCH METHODS IN PSYCHOLOGY (3) LEC. 3. Pr. (PSYC 2130 or PSYC 2133) and (PSYC 2017 or PSYC 2010). Investigation of descriptive and experimental methods used in psychological research.

PSYC 2510 PSYCHOLOGY OF SEXUAL BEHAVIOR (3) LEC. 3. Biological, social, and psychological dimensions of human sexuality.

PSYC 3120/3123 DEVELOPMENTAL PSYCHOLOGY (3) LEC. 3. Pr. PSYC 2010 or PSYC 2013 or PSYC 2017. Introduction to physical, cognitive, social and emotional development across the lifespan.

PSYC 3500/3503 APPLIED BEHAVIOR ANALYSIS (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). Principles and procedures for management of human behavior. Fall, Spring.

PSYC 3510/3513 BEHAVIORAL NEUROSCIENCE (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). Exploration of the relationships between the brain and behavior.

PSYC 3520/3523 PSYCHOLOGY OF LEARNING (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). Phenomena involved in the acquisition of knowledge, skills, and patterns of action.

PSYC 3530 SENSATION AND PERCEPTION (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). Study of perceptual phenomena and the structure and function of sensory systems.

PSYC 3540/3543 COGNITIVE PSYCHOLOGY (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). Phenomena involved with thinking and remembering.

PSYC 3550/3553 PSYCHOLOGY AND CULTURE (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). Survey of the ways culture shapes, modifies and adds distinctiveness to human behaviors.

PSYC 3560/3563 ABNORMAL PSYCHOLOGY (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). Exploration of our attempts to understand, explain, and classify abnormal behavior patterns.

PSYC 3570/3573 THEORIES OF PERSONALITY (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). Survey of selected classical and contemporary theories of personality.

PSYC 3580/3583 SOCIAL PSYCHOLOGY (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). Scientific study of how people think about, influence, and relate to one another.

PSYC 3590/3593 PSYCHOLOGY IN THE WORKPLACE (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). Application of basic psychological principles and theories in the workplace. May count either PSYC 3590 or PSYC 3593.

PSYC 3600/3603 TRAINING AND SUPERVISION IN INDUSTRY (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). Application of behavioral principles to problems common to the training and supervision of people in work organizations.

PSYC 3610/3613 SPORTS PSYCHOLOGY (3) SEM. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). Inquiry into how motivation, emotion, personality, and other mind-body variables influence physiology and athletic performance. Seminar class includes applied exercises in emotional expression, stress and pain management, hypnosis, and diet and exercise challenges.

PSYC 3620/3623 COGNITIVE NEUROSCIENCE (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). Exploration of how mental functions are linked to neural processes to enable the mind.
PSYC 3630 HUMAN MEMORY (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). Theories and application of human memory research, emphasizing long-term and working memory. Applications include education, law, and aging.

PSYC 3640 MOTIVATION AND EMOTION (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). Overview of historical and contemporary perspectives on human motivation and emotion.

PSYC 3650/3653 DRUGS AND BEHAVIOR (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). Introduction to the behavioral effects of drugs, including drug abuse and its treatment.

PSYC 3700 BEHAVIORAL GAME THEORY (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). This course is an introduction to behavioral economics involved in game theory using economics and psychological approaches to examine strategies and decision making when two or more people are involved with applications to real-world situations.

PSYC 3910 SUPERVISED RESEARCH EXPERIENCE (3) LEC. 3. SU. Pr., Departmental approval. Supervised experience in research settings. Course may be repeated for a maximum of 6 credit hours.

PSYC 3940 EXPERIENTIAL LEARNING (3) PRA. 3. SU. Pr., Departmental approval. Supplementary instruction concurrent with job or volunteer experience involving the application of psychological perspectives to community life. Course may be repeated for a maximum of 6 credit hours.

PSYC 3970 SPECIAL TOPICS IN PSYCHOLOGY (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). Theories, research and issues in contemporary psychology on selected topics. Course may be repeated for a maximum of 6 credit hours.

PSYC 4010/4013 CLINICAL PSYCHOLOGY (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). Introduction to clinical psychology focusing on techniques of assessment and intervention.

PSYC 4080/4083 HEALTH PSYCHOLOGY (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). Psychological principles in health maintenance and health problems.

PSYC 4110 INTRODUCTION TO DEVELOPMENTAL DISABILITIES (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). Psychological principles in the care and treatment of developmentally disabled persons.

PSYC 4220 CHILD PSYCHOLOGY (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). Child psychology from a life-span developmental perspective, emphasizing social-emotional development in infancy.

PSYC 4250/4253 PSYCHOLOGY OF CHOICE AND DECISION (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). In-depth exploration of the psychological science of choice and decision making.

PSYC 4260 PSYCHOLOGY OF ADDICTIVE BEHAVIORS (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). Overview of various psychological features of addictive behaviors including alcohol and drug abuse, eating disorders, gambling and excessive sexual behavior.

PSYC 4910 HUMAN SERVICE PRACTICUM (3) PRA. 3. SU. Pr., Departmental approval. Supervised experience in service-delivery settings. Course may be repeated for a maximum of 6 credit hours.

PSYC 4930 DIRECTED STUDIES (1-3) IND. Pr., Departmental approval. In-depth study of a psychological topic under the direction of a faculty member. Only 6 credit hours may be applied to the psychology major. Course may be repeated for a maximum of 9 credit hours.

PSYC 4967 HONORS SPECIAL PROBLEMS (1-3) IND. Pr. Honors College. 2.30 GPA. STAT 2010. Course may be repeated for a maximum of 3 credit hours.

PSYC 4997 HONORS RESEARCH AND THESIS (1-3) IND. Pr. Honors College. STAT 2010. Research in specialized topics. Course may be repeated for a maximum of 6 credit hours.

PSYC 5020 CHILD AND ADOLESCENT PSYCHOPATHOLOGY (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). Description, etiology, and treatment of psychological disturbances in children and adolescents.
PSYC 5610 BEHAVIORAL EFFECTS OF ENVIRONMENTAL CONTAMINANTS (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). Laboratory, occupational and epidemiological assessment of neurotoxic chemicals; risk analysis; developmental and policy considerations. Coverage includes heavy metals, pesticides, solvents, and abused drugs.

PSYC 5620 DRUGS, BRAIN, AND BEHAVIOR (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). A review of drugs affecting nervous system function and behavioral or neural mechanisms that modify these effects. Topics include substance abuse, preclinical and clinical psychopharmacology, learning and memory, behavioral mitigation of drug effects. Course meets APA criteria for Level 1. May count either PSYC 5620 or PSYC 6620.

PSYC 5690 ADVANCED ANALYTICS FOR SOCIAL AND BEHAVIORAL SCIENCES (3) LEC. 3. Pr. PSYC 2130. Application and interpretation of quantitative approaches used in social and behavioral sciences. May count PSYC 5960 or PSYC 6960.

PSYC 5960 SEMINAR IN PSYCHOLOGY (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and (PSYC 2140 or PSYC 2143). Seminar in research and theory on psychological topics. Course may be repeated with changes in topic. Course may be repeated for a maximum of 6 credit hours.

PSYC 6020 CHILD AND ADOLESCENT PSYCHOPATHOLOGY (3) LEC. 3. Pr. PSYC 2120 and PSYC 3560. Description, etiology, and treatment of psychological disturbances in children and adolescents.

PSYC 6610 BEHAVIORAL EFFECTS OF ENVIRONMENTAL CONTAMINANTS (3) LEC. 3. Laboratory, occupational, and epidemiological assessment of neurotoxic chemicals; risk analysis; developmental exposures; and policy considerations. Coverage includes heavy metals, pesticides, solvents, and abused drugs.

PSYC 6620 DRUGS, BRAIN, AND BEHAVIOR (3) LEC. 3. A review of drugs that affect nervous system function and their behavioral and neural mechanisms.

PSYC 6690/6696 ADVANCED ANALYTICS FOR SOCIAL AND BEHAVIORAL SCIENCES (3) LEC. 3. Application and interpretation of quantitative approaches used in social and behavioral sciences. May count either PSYC 5690, PSYC 6690 or PSYC 6696.

PSYC 6960 SPECIAL PROBLEMS (3) LEC. 3. Pr., Departmental approval. Seminar in research and theory on psychological topics. Course may be repeated for a maximum of 18 credit hours.

PSYC 7050 ASSESSMENT IN CLINICAL PSYCHOLOGY (3) LEC. 3. Survey of clinical methods of assessment, including test construction and validation.

PSYC 7100/7106 HISTORY OF IDEAS IN PSYCHOLOGY (3) LEC. 3. Historical developments in psychology with emphasis on the major theories and systems.

PSYC 7110 ETHICS AND PROBLEMS OF SCIENTIFIC AND PROFESSIONAL PSYCHOLOGY (1) LEC. 1. Survey of ethical issues and current problems in psychology.

PSYC 7120 TEACHING OF PSYCHOLOGY (3) LEC. 3. Problems and practices of teaching psychology at the college level. In addition to seminar meetings, students work with faculty in appropriate courses.

PSYC 7130 RESEARCH SEMINAR IN PSYCHOLOGY (1) SEM. 1. Overview of the research process, including the development of research questions, proposal writing, and issues involved in protecting the welfare of research participants.

PSYC 7140 LEARNING AND CONDITIONING (3) LEC. 3. Respondent conditioning and operant behavior, including acquisition of language and other forms of individual and environmental interactions.

PSYC 7150/7156 BIOLOGICAL PSYCHOLOGY (3) LEC. 3. Behavior from a biological perspective, including theory and research from the neurosciences and biopsychology.

PSYC 7160 HUMAN DEVELOPMENT (3) LEC. 3. Introduction to conceptual and substantive issues of developmental psychology from a life-span developmental perspective.

PSYC 7170/7176 THEORIES OF PERSONALITY (3) LEC. 3. Analysis of current issues in personality theory.

PSYC 7180/7186 SOCIAL PSYCHOLOGY (3) LEC. 3. Topics and literature on the social foundations of behavior.

PSYC 7190 COGNITIVE PSYCHOLOGY (3) LEC. 3. Survey of the nature of human intellectual functioning, including pattern recognition, memory, problem solving, reasoning, and language comprehension and generation.
PSYC 7200 ANIMAL COGNITION (3) SEM. 3. Experimental analysis of the mechanisms that underlie animal cognition, including attention, concept formation, counting, language, memory, perception, timing, and problem solving.

PSYC 7210 ANIMAL BEHAVIOR (3) LEC. 3. Pr. PSYC 7140. Evolution of animal behavior, including mating, parental care, feeding, social, predatory, and defensive behavior.

PSYC 7220 BEHAVIORAL PRINCIPLES (3) LEC. 3. Concepts and principles of operant and respondent conditioning and their relevance to changing and interpreting human behavior.

PSYC 7230 PSYCHOMETRIC THEORY (3) LEC. 3. Pr. P/C PSYC 7270 and P/C PSYC 7280. Introduction to basic quantitative theory behind the construction and interpretation of test scores and scales.

PSYC 7240 METHODS FOR STUDYING INDIVIDUAL BEHAVIOR (3) LEC. 3. Examination of strategies for measuring individual and environment interaction, using environmental interventions and identifying behavior change and its causes.

PSYC 7250 CLINICAL RESEARCH METHODS AND ETHICS (3) LEC. 3. Introduction to research methods and ethics in clinical psychology, with an emphasis on critical analysis of the scientific literature.

PSYC 7260 ETHICAL AND PROFESSIONAL ISSUES IN BEHAVIOR ANALYSIS (3) LEC. 3. Ethical and professional issues relevant to the practice of applied behavior analysis.

PSYC 7270 EXPERIMENTAL DESIGN IN PSYCHOLOGY (4) LEC. 4. Introduction to the analysis of data collected under various different experimental designs. Credit will not be given for both PSYC 7270 and STAT 7270.

PSYC 7280 EXPERIMENTAL DESIGN IN PSYCHOLOGY II (4) LEC. 3. LAB. 2. Pr. PSYC 7270. and Enrollment in Psychology PhD program. Correlational and regression models. Matrix based multiple and logistic regression, moderation and mediation, and introduction to path models.

PSYC 7300 ADULT PSYCHOPATHOLOGY (3) LEC. 3. Current theoretical conceptions and research in adult psychopathology.

PSYC 7310 AUTISM AND INTELLECTUAL DISABILITIES (3) LEC. 3. Survey of the definitions, terms, epidemiology, etiologies, and current issues in autism and intellectual disabilities.

PSYC 7320 CLINICAL PSYCHOPHARMACOLOGY (3) LEC. 3. The basic principles of psychopharmacology with special attention given to drugs used in applied or therapeutic settings, their effects, and their potential interactions with behavioral interventions.

PSYC 7400 COGNITIVE NEUROSCIENCE (3) LEC. 3. Exploring how mental functions are linked to neural processes to enable the mind.

PSYC 7700/7706 FOUNDATIONS IN INDUSTRIAL AND ORGANIZATIONAL PSYCHOLOGY (3) SEM. 3. This course is designed to be an advanced survey of the Industrial and Organizational Psychology field.

PSYC 7710/7716 TRAINING AND DEVELOPMENT IN ORGANIZATIONS (3) SEM. 3. A graduate seminar that focuses on critical conceptual and empirical issues facing training and development in the workplace.

PSYC 7720/7726 PERSONNEL SELECTION (3) SEM. 3. Analysis of classical, contemporary, theoretical, and practical issues related to personnel selection. May count either PSYC 7720, PSYC 7726, PSYC 8720 or PSYC 8726.

PSYC 7730/7736 RESEARCH METHODS IN INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY (3) SEM. 3. An overview of basic research methodology applicable to the investigation of organizational phenomena.

PSYC 7740/7746 ORGANIZATIONAL CULTURE (3) SEM. 3. Gain an understanding of organizational culture and provides the context in which organizational behavior may be understood.

PSYC 7750/7756 ETHICS AND PROFESSIONAL ISSUES IN INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY (3) SEM. 3. An introduction to issues faced in professional practice and importance of ethical behavior in the practice of Industrial/Organizational Psychology.

PSYC 7760/7766 OCCUPATIONAL HEALTH PSYCHOLOGY (3) SEM. 3. Occupational health psychology (OHP) is an emerging interdisciplinary field concerned with psychological factors in employee health, safety, and well-being.

PSYC 7770/7776 LEADERSHIP AND MOTIVATION SEMINAR (3) SEM. 3. Analysis of historical and contemporary theories of leadership and motivation and related research. May count either PSYC 7770, PSYC 7776 or PSYC 8740.
PSYC 7910/7916 PRACTICUM IN APPLIED PSYCHOLOGY (1-10) PRA. Supervised practicum in applied psychology. A maximum of 12 hours will apply toward degree. Department approval. Course may be repeated for a maximum of 30 credit hours.

PSYC 7930 DIRECTED STUDIES (1-3) IND. Pr., Departmental approval. Work under the direction of a faculty member on a psychological topic of mutual interest. No more than 3 hours count toward major. Course may be repeated for a maximum of 9 credit hours.

PSYC 7970 RESEARCH IN SPECIAL TOPICS (3) IND. 3. Pr., Departmental approval. Supervised scholarly activity related to student's field of study. Course may be repeated with change in topics.

PSYC 7980/7986 APPLIED BEHAVIOR ANALYSIS CAPSTONE PROJECT (1-10) PRA. Pr., Departmental approval. Supervised practicum in applied psychology behavior analysis project involving delivery of services to a consumer. Maximum of 6 credit hours will count toward degree. Course may be repeated for a maximum of 30 credit hours.

PSYC 7990 RESEARCH AND THESIS (1-10) MST. Departmental approval. Pr., Course may be repeated with change in topics.

PSYC 8180 ADVANCED SOCIAL PSYCHOLOGY (3) LEC. 3. Pr. PSYC 7180. and Departmental approval. Theories, research and issues in contemporary social psychology.

PSYC 8250 MULTIVARIATE METHODS (4) LEC. 3. LAB. 2. Pr. PSYC 7270 and PSYC 7280. Introduction to the theory behind multivariate analyses and the statistical programs that support them.

PSYC 8260 ANALYSIS OF TIME-RELATED DATA IN PSYCHOLOGY (3) LEC. 3. Pr. STAT 7020 or PSYC 8250. Theory and practical applications of statistical approaches for time-related data.

PSYC 8270 FACTOR ANALYSIS (3) SEM. 3. Theoretical and statistical applications of exploratory and confirmatory factor analysis.

PSYC 8280/8286 META-ANALYSIS (3) SEM. 3. Meta-analysis is a quantitative analysis using techniques to analyze and integrate effect sizes that accrue from research studies.

PSYC 8300 DEVELOPMENTAL PSYCHOPATHOLOGY (3) LEC. 3. Introduction to contemporary concepts, constructs, and controversies in developmental psychopathology.

PSYC 8310/8316 INTRODUCTION TO CLINICAL METHODS AND ETHICS (3) LEC. 3. Enrollment in Clinical Psychology Program. Interviewing introduction to interviewing skills, behavioral assessment, crisis intervention, professional and ethical issues in providing clinical services.

PSYC 8320 PSYCHOLOGICAL ASSESSMENT OF ADULTS (3) LEC. 3. Pr. (STAT 7270 or PSYC 7270) and PSYC 8310. Theories and techniques of the psychological assessment of adults.

PSYC 8340 SYSTEMS OF PSYCHOTHERAPY (3) LEC. 3. Pr. PSYC 7300. Survey of theories and research related to modern systems of psychotherapy.

PSYC 8350 APPLIED PSYCHOMETRIC PRINCIPLES (3) LEC. 3. Analysis of classical and modern test theory, with an emphasis on applied psychometric principles.

PSYC 8360 ASSESSMENT OF COGNITIVE ABILITIES AND ACHIEVEMENT (3) LEC. 2. LAB. 2. Theories and techniques for the assessment of cognitive abilities and academic achievement.

PSYC 8370 FOUNDATIONS OF PSYCHOLOGICAL ASSESSMENT (3) LEC. 3. Enrollment in Clinical Psychology program. Measurement theory and introduction to widely used objective personality and behavioral checklists with attention to ethics and diversity.

PSYC 8400 ADVANCED CHILD AND ADOLESCENT PSYCHOPATHOLOGY (3) LEC. 3. Pr. PSYC 7300. Examination of current research and theory of behavioral, cognitive, and emotional disorders in childhood and adolescence.

PSYC 8420 BEHAVIOR CHANGE IN CHILDREN (3) LEC. 3. Pr. PSYC 8310 and (PSYC 8400 or PSYC 8410). Introduction to methods of prevention and treatment of cognitive, behavioral, and emotional disorders of children.

PSYC 8440 HEALTH PSYCHOLOGY AND BEHAVIORAL MEDICINE (3) LEC. 3. Contemporary research in health psychology and behavioral medicine and the empirical foundations of clinical practice.

PSYC 8450 THEORY AND METHOD IN HUMAN ALCOHOL AND DRUG RESEARCH (3) LEC. 3. Pr., Departmental approval. Theoretical framework and methodological practices in basic research on human alcohol and drug abuse.

PSYC 8470 BEHAVIORAL ECONOMICS OF SUBSTANCE ABUSE (3) LEC. 3. Introduction to behavioral theories of choice and behavioral economics and the application of these theories to the study of substance abuse.

PSYC 8480 ADVANCED PROFESSIONAL AND ETHICAL ISSUES IN CLINICAL PSYCHOLOGY (3) LEC. 3. Pr., Enrollment in the Clinical Psychology PhD Program. Advanced discussion of professional issues and ethical mandates of contemporary clinical psychology, emphasizing critical thinking skills and planning for a successful career in psychology.

PSYC 8500 COGNITIVE AND BEHAVIORAL SCIENCES SEMINAR (1) SEM. 1. SU. Pr., Enrollment in Cognitive and Behavioral Sciences PhD program. Examination of professional preparation issues and recent scientific developments relevant to careers in the cognitive and behavioral sciences. Course may be repeated for a maximum of 3 credit hours.

PSYC 8510 CONTEXT AND CONSEQUENCES OF BEHAVIOR (3) LEC. 3. Pr. PSYC 7140. Advanced survey of the role that consequences play in acquisition, maintenance, and structure of behavior, and the methods by which this role is studied.

PSYC 8520 CONCEPTUAL AND THEORETICAL ANALYSIS IN PSYCHOLOGY (3) LEC. 3. Techniques of conceptual analysis relevant to the evaluation of theories and the interpretation of psychological data.

PSYC 8530 BEHAVIOR ANALYSIS AND HUMAN DEVELOPMENT (3) LEC. 3. Examination of conceptual, theoretical, and scientific issues relevant to the study of psychological development from a behavior analytic perspective.

PSYC 8540 BEHAVIORISM (3) LEC. 3. Exploration of the philosophical and theoretical underpinnings of behavior analysis.

PSYC 8550 APPLIED BEHAVIOR ANALYSIS (3) LEC. 3. Pr. PSYC 7140. and Departmental approval. Scientific and conceptual foundations of applied behavior analysis and its strategies of intervention and evaluation.

PSYC 8570 APPLIED BEHAVIOR ANALYSIS 2 (3) LEC. 3. Applications of behavioral principles to the assessment and treatment of problem behavior.

PSYC 8700/8706 ADVANCED INDUSTRIAL PSYCHOLOGY (3) LEC. 3. Analysis of methods and content of industrial psychology.

PSYC 8710/8716 ADVANCED ORGANIZATIONAL PSYCHOLOGY (3) LEC. 3. Departmental approval. Analysis of major issues in organizational psychology.

PSYC 8730/8736 PERFORMANCE APPRAISAL (3) LEC. 3. Analysis of classical, contemporary, theoretical, and practical issues related to the appraisal of employee work performance.

PSYC 8750/8756 PROFESSIONAL ISSUES IN I/O PSYCHOLOGY (1) LEC. 1. Departmental approval. Analysis of contemporary professional issues in I/O psychology. Course may be repeated for a maximum of 6 credit hours.

PSYC 8760/8766 DECISION MAKING IN THE WORKPLACE AND ORGANIZATIONS (3) SEM. 3. The application of behavioral decision theory and research to problems in Industrial/Organizational Psychology.

PSYC 8770/8776 ORGANIZATIONAL CHANGE (3) SEM. 3. A conceptual overview of organizational change and organizational transformation and related specific topics.
PSYC 8780/8786 WORK AND FAMILY (3) SEM. 3. A survey of research and theory in work and family, a content area of organizational psychology.

PSYC 8790 SEMINAR IN INDUSTRIAL AND ORGANIZATIONAL PSYCHOLOGY (1) SEM. 1.5. SU. Examination of professional preparation issues and recent scientific developments relevant to careers in Industrial and Organizational Psychology. Enrollment in the Industrial and Organizational Psychology PhD program. Course may be repeated for a maximum of 3 credit hours.

PSYC 8910/8916 CLINICAL PRACTICUM (1-4) PRA. Pr. PSYC 8320 or PSYC 8410. Supervised practicum experience in clinical assessment and intervention techniques. Course may be repeated for a maximum of 30 credit hours, with 24 counting toward the degree.

PSYC 8920 INTERNSHIP (0) INT. Pr., PhD candidacy. Enrollment in full-time APA-approved 1-year pre-doctoral internship required for the PhD in Clinical Psychology. Student may not enroll in other course work.

PSYC 8930 DIRECTED STUDIES IN PSYCHOLOGY (3) IND. Pr., Approved PhD plan of study. Review of literature leading to the writing and defense of the Major Area Paper (written portion of the general PhD examination). Course may be repeated for a maximum of 9 credit hours.

PSYC 8970/8976 SPECIAL TOPICS (1-3) SEM. Departmental approval. In-depth study of issues related to selected specializations in psychology. Course may be repeated for a maximum of 18 credit hours.

PSYC 8990 RESEARCH AND DISSERTATION (1-10) DSR. Departmental approval. Pr., Course may be repeated for a maximum of 98 credit hours.

Curriculum in Psychology

Students must earn a grade of C or higher in all major courses.

Total Hours: 120

1. Students should meet with the psychology adviser to determine approved course listings for psychology electives and other electives. It is recommended that students take foundational courses (those listed in Groups A and B) in their junior year and advanced electives (those in Group C) in their senior year.

2. If Literature requirement was completed prior to Fall 2013, Core Humanities must cover SLO 3.

3. COMM 1000 fulfills SLO 7.

Take 1 additional 3000 level or above Psychology Course

Total Hours 15

Calculated GPA in the Minor (2.0 minimum). Students must earn a “C” grade or better in each course taken toward the minor.

* If PSYC 2010 or PSYC 2013 or PSYC 2017 was used to fulfill the Social Science core requirement, an additional psychology course is required to complete the minor.
** Students who wish to pursue a specialized minor should consult and obtain approval for minor coursework changes from the undergraduate program director before starting minor curriculum.
Sociology, Anthropology, and Social Work

The Department of Sociology, Anthropology, and Social Work offers three Bachelor of Arts degrees. Sociology graduates have found positions in law enforcement agencies such as the Drug Enforcement Agency, the military, and social service agencies. Some have chosen to pursue graduate or professional education in sociology, social work, criminology, and social forestry, among others. The Sociology major provides students a solid foundation within the discipline, particularly in theory, research methods and statistics, and human diversity. Anthropology graduates have found positions in cultural resource management and archaeology. Some have chosen to pursue graduate or professional education in anthropology and development studies. The Anthropology major takes a four-field approach, offering courses in archaeology, biological anthropology, cultural anthropology, and linguistic anthropology. Social Work graduates are trained to become beginning-level generalist practitioners eligible for licensure and to apply for advanced-standing social work graduate programs. The BA in Social Work is fully accredited by the Council on Social Work Education.

Sociology

To earn a BA in Sociology, students must meet these requirements:

• Students must earn a C or better in SOCY 1000, SOCY 3500, SOCY 4400 or 4700, SOCY 3700 or ANTH 2000, and PSYC 2130 in order to graduate. If they choose to take ANTH 2000 rather than SOCY 3700, they must earn a C in that course.

Social Work

Students must comply with these requirements to be admitted to the BA in Social Work:

• Students are required to apply for admission to the Social Work major.
• Their applications must include two letters of recommendation and a personal-statement essay not longer than four double-spaced pages.
• Students must earn a C or better in SOCY 1000, SOWO 2000, and SOWO 3910 and a combined Social Work GPA of 2.5 before applying to the program.

Once they are admitted, students have to meet these requirements to move through the Social Work major and graduate:

• Admission to the Social Work major is required before students can take SOWO 4060.
• Students must maintain a 2.5 GPA in all Social Work courses.
• Students must have a Social Work GPA of 2.5 to take SOWO 4920, which is required for graduation.

Majors

• Anthropology (p. 1077)
• Social Work (p. 1078)
• Sociology (p. 1079)

Minors

• Anthropology (p. 1077)
• Social Work (p. 1081)
• Sociology (p. 1081)

Anthropology Courses

ANTH 1000/1003 INTRODUCTION TO ANTHROPOLOGY (3) LEC. 3. Social Science I Core. Introduction to the study of human evolution, early civilizations, and globalization; linguistic and cultural problems using the four sub-fields of anthropology, including biological/physical anthropology, archaeology, cultural anthropology, and linguistics.

ANTH 1007 HONORS INTRODUCTION TO ANTHROPOLOGY (3) LEC. 3. Pr. Honors College. Social Science I Core. Introduction to the study of human evolution, early civilizations, and globalization: linguistic and cultural problems using the four sub-fields of anthropology, including biological/physical anthropology archaeology, cultural anthropology and linguistics. Credit will not be given for both ANTH 1000 and ANTH 1007.

ANTH 2000 ETHNOGRAPHIC METHODS (3) LEC. 3, AAB/LEC. 0. Pr. (ANTH 1000 or ANTH 1003 or ANTH 1007) or (SOCY 1000 or SOCY 1007) or GEOG 1100. Approaches, techniques, and strategies for carrying out ethnographic research and analyzing qualitative data in the social sciences.
ANTH 2500 ANTHROPOLOGY OF GLOBAL STUDIES (3) LEC. 3. Any Social Science Core course. Broad-based study of processes and problems that transcend national boundaries, including global historical processes, politics, migrations, trade, disease, environmental change, and sustainability.

ANTH 2600 MUSEUM STUDIES IN ANTHROPOLOGY (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003. Students will consider the history of museum anthropology and reflect on contemporary anthropological engagement in/of museums and other cultural institutions.

ANTH 2700 PEOPLES AND CULTURES OF ASIA (3) LEC. 3. Any Social Science Core course. Introduction to the traditions, religions, histories, and nation-states of the people of Asia, using a cultural approach.

ANTH 2800 ANTHROPOLOGY OF THE AFRICAN DIASPORA (3) LEC. 3. Any Social Science Core course. Anthropological perspectives on African Diasporas. Diaspora. Archaeological, ethnohistorical, and contemporary research exploring identity, symbols, power, and social relations in the lives of enslaved Africans and descendants in the Caribbean, Latin America and North America.

ANTH 2900 WORLD PREHISTORY (3) LEC. 3. Explore broad patterns in human prehistory over the past 10,000 years, including the origins of culture, religion, domestication and agriculture, writing, cities, and states.

ANTH 3000 CULTURE, MARRIAGE, AND THE FAMILY (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Role and meaning of kinship and its universal and particularistic features in human society.

ANTH 3100 LANGUAGE AND CULTURE (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Contemporary perspectives in cultural anthropology, emphasizing sociolinguistics, discourse, mythology, and folklore.

ANTH 3200 ANTHROPOLOGY OF GENDER (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Gender relations and representations in different cultures, historical periods, and discourses.

ANTH 3300 BIOLOGICAL ANTHROPOLOGY (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Overview of biological anthropology, including evolutionary theory and genetics, primatology, human origins, and biological variation of contemporary human populations. Concepts will be applied during in-class exercises and discussions.

ANTH 3310/3313 RACE AND HUMAN VARIATION (3) LEC. 3. Deconstructs the myths of biological races by examining human population variation from an anthropological and evolutionary perspective. Students will explore the social history of racism and contemporary issues related to race and human diversity.

ANTH 3400 ARCHAEOLOGICAL FIELD SCHOOL (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Field methods, including archaeological surveying and excavation procedures at selected locations. Course may be repeated for a maximum of 6 credit hours.

ANTH 3410 APPLIED & PRACTICING ANTHROPOLOGY (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Explores application and practice of anthropology in settings such as cultural resource management, museums, social and environmental policy, and healthcare. This course emphasizes how careers in anthropology contribute to resolving contemporary social problems.

ANTH 3500 ARCHAEOLOGY (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Archaeology is the study of human societies based on the material remains they left behind. This course explores the history, theories, methods, and applications of archaeology.

ANTH 3600 MEDICAL ANTHROPOLOGY (3) LEC. 3. Any Social Science Core course. Explores biological and cultural dimensions of global health from an anthropological perspective. Topics include the political economy of health, gendered health disparities, cross-cultural healing traditions, pluralistic medical systems, and evolutionary medicine.

ANTH 3610 FORENSIC ANTHROPOLOGY (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Explores standards of practice in forensic anthropology and analysis of case studies. May count either ANTH 3610 or ANTH 2600.

ANTH 3700 POLITICAL ECOLOGY (3) LEC. 3. SSCI and junior standing. Problems in ethnoecology, cultural ecology, political ecology and environmentalism.

ANTH 3810 NORTH AMERICAN ARCHAEOLOGY (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Explores archaeological evidence for the history of indigenous peoples in North America during the past 10,000 years.

ANTH 3850 ARCHAEOLOGY OF THE SOUTHEASTERN AND MIDWESTERN U.S. (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Diversity and complexity of late prehistoric cultures of the Southeastern and Midwestern United States.
ANTH 3900 BIOARCHAEOLOGY (3) LEC. 3. Pr. (ANTH 1000 or ANTH 1003 or ANTH 1007). Archaeologically-derived skeletal remains provide essential information for reconstructing broad patterns of human health and behavior over time. Students will learn to apply methods and theory in social bioarchaeology to understand demography, diet, disease, and physical activity in past populations.

ANTH 3950 CURATION (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. History, legislation, and ethical concerns associated with the accumulation and curation of archaeological collections.

ANTH 4310 ANTHROPOLOGICAL THEORY (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Major thinkers in anthropology and their theoretical models considered in historical perspective.

ANTH 4910 LABORATORY PROBLEMS (3) LEC. 1. LAB. 2. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007 and ANTH 2100. Investigation of specific archaeological problems, involving students in laboratory techniques and research.

ANTH 4920 INTERNSHIP IN ANTHROPOLOGY (3) AAB/INT. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Internship for practical work or research on anthropological problems, involving students in laboratory techniques and research.

ANTH 4930 FIELD PROBLEMS (3) LEC. 2. LAB. 1. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Practical investigation of a specific field problem in anthropology.

ANTH 4940 LABORATORY PRACTICUM (3) LEC. 2. LAB. 1. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007 and ANTH 2100. Analysis, preservation, cataloging, and restoration of archaeological materials. May count either ANTH 4940 or ANTH 3910.

ANTH 4960 SPECIAL PROBLEMS (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Specific topics in anthropology not covered in other courses. Course may be repeated for a maximum of 6 credit hours.

ANTH 4967 HONORS SPECIAL PROBLEMS (1-3) IND. 3. Pr. Honors College. ANTH 1000. Departmental approval. Specific topics in anthropology not covered in other courses. Course may be repeated for a maximum of 3 credit hours.

ANTH 4997 HONORS THESIS (1-3) IND. Pr. Honors College. ANTH 1000. Departmental approval. Course may be repeated for a maximum of 3 credit hours.

ANTH 5100 NORTH AMERICAN INDIANS (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007, or junior standing. Comparative anthropological, cultural, and ethnohistorical overview of Native American cultures of North America, emphasizing change and contact situations.

ANTH 5200 GENDER DEVELOPMENT AND CULTURE (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007, or junior standing. Role of gender and culture in Third World development from an anthropological perspective.

ANTH 5600 CULTURE, MEDICINE, AND POWER (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007, or junior standing. Power in the context of illness and healing at local, national, and international levels.

ANTH 5700 CRITIQUE OF DEVELOPMENT (3) LEC. 3. Pr. ANTH 3700. Meanings and structures of national and international development.

ANTH 5930 DIRECTED STUDIES (1-3) IND. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Directed study course in anthropology that allows students to explore concepts not covered in other courses. Course may be repeated for a maximum of 6 credit hours.

ANTH 5970 SPECIAL TOPICS IN ANTHROPOLOGY (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Examination of a specific problem in ethnographic methods, theory, and cultural analysis.

ANTH 6100 NORTH AMERICAN INDIANS (3) LEC. 3. Advanced comparative cultural and ethnohistorical overview of the Native American cultures of North America, emphasizing change and contact situations.

ANTH 6200 GENDER DEVELOPMENT AND CULTURE (3) LEC. 3. Role of gender and culture in Third World economic development from an anthropological perspective.

ANTH 6600 CULTURE MEDICINE AND POWER (3) LEC. 3. Power in the context of illness and healing at local, national, and international levels.
ANTH 6700 CRITIQUE OF DEVELOPMENT (3) LEC. 3. Meanings and structures of national and international development in historical perspective, including cultural values, power, inequality, and resistance.

ANTH 6930 DIRECTED STUDY (1-3) IND. Directed study course in anthropology that allows students to explore concepts not covered in other courses. Course may be repeated for a maximum of 6 credit hours.

ANTH 6970 SPECIAL TOPICS IN ANTHROPOLOGY (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Examination of a specific problem in ethnographic methods, theory, and cultural analysis.

Social Work Courses

SOWO 2000/2003 INTRODUCTION TO SOCIAL WORK (3) LEC. 3. Introduction to social work practice, examining career opportunities, history of the profession, practice settings, values, ethics, and types of clientele.

SOWO 2650/2653 HISTORY OF SOCIAL WELFARE (3) LEC. 3. Development of social welfare policies and programs in the United States, analysis of political, economic, and social factors involved.

SOWO 3500 CHILD WELFARE (3) LEC. 3. Pr. SOCY 1000 or SOWO 2000 or SOCY 1007. Social work practice in settings dealing with child abuse and neglect, foster care, child care, and adoption.

SOWO 3600 AGING ISSUES AND SERVICES (3) LEC. 3. Pr. SOCY 1000 or SOCY 1007. Introduction to social services and social work with the elderly, considering socio-cultural issues and impact on the elderly.

SOWO 3700 ADDICTIONS (3) LEC. 3. Pr. PSYC 2010 or PSYC 2017 or PSYC 2013. Addictions, theories of causality, social impact, and treatment approaches in today's society. Experiential component included.

SOWO 3850 HUMAN BEHAVIOR IN THE SOCIAL ENVIRONMENT II (3) LEC. 3. Pr. SOWO 3800. Lifespan approach to biopsychosocial examination of behavior from adulthood through old age, emphasizing role of gender, sexism and sexual orientation.

SOWO 3910 FIELD PRACTICUM SEMINAR (3) PRA. 3. Pr. SOWO 2000. Introduction to fields and settings of social work practice via placement in a selected social service agency. Includes a concurrent integrative seminar to analyze the experience.

SOWO 4060 SOCIAL WORK PRACTICE METHODS I (3) LEC. 3. Pr. SOWO 2000 and SOWO 3800 and SOWO 3910 and (SOCY 1000 or SOCY 1007). Introduction to generalist practice methods and skills in engagement, assessment, and goal setting with individual clients. Experiential component included.

SOWO 4070 SOCIAL WORK PRACTICE METHODS II (3) LEC. 3. Pr. SOWO 4060. Practice skills and perspectives required for work with families and groups. Experiential component included.

SOWO 4080 SOCIAL WORK PRACTICE METHODS III (3) LEC. 3. Pr. SOWO 4060. Generalist practice theory and skills as applied to communities, organizations, and oppressed populations, emphasizing issues of social justice and social action. Experiential component included.

SOWO 4090 SOCIAL WELFARE POLICY (3) LEC. 3. Pr. SOWO 2650. Critical analysis of policy issues and proposals in selected social welfare programs and their impact upon current social problems and social work values and ethics.

SOWO 4920 INTERNSHIP IN SOCIAL WORK (9) FLD. 9. SU. Pr. SOWO 4080. 480-hour field experience under joint supervision of agency and university. Application of generalist practice skills and research project required.

SOWO 4950 SENIOR INTEGRATIVE SEMINAR (3) SEM. 3. Pr. SOWO 4080. Coreq. SOWO 4920. and Enrollment in SOWO 4920. Integrating theory with practice through analysis of behavior and evaluation of practice skills.

SOWO 4967 HONORS SPECIAL PROBLEMS (1-3) IND. 3. Pr. Honors College or Departmental approval. Course varies based on faculty's and student's areas of interest and expertise. Course may be repeated for a maximum of 3 credit hours.

SOWO 4970 SOCIAL WORK SPECIAL TOPICS (3) LEC. 3. Timely and/or controversial topics related to social work. Course content will depend upon the designated topic.
SOWO 4997 HONORS THESIS (1-3) IND. Pr. Honors College or departmental approval. Course may be repeated for a maximum of 3 credit hours.

SOWO 7000 INTRODUCTION TO SOCIAL WORK AND SOCIAL WELFARE (3) LEC. 3. This course provides a review of the social work profession, history, and values and ethics. An overview of theory, practice, policy, and research are integrated in exploring the knowledge, values, and skills base of the social work profession.

SOWO 7010 ADVANCED CLINICAL PRACTICE (3) LEC. 3. Pr. SOWO 7020. This course provides intensive study on clinical interventions with individuals, families, and small groups across various fields of practice.

SOWO 7020/7026 PSYCHOPATHOLOGY (3) LEC. 3. This advanced practice course teaches students to recognize selected major mental health disorders in adults, children, and youth and to become familiar with social work practice approaches used in the treatment of these disorders.

SOWO 7030/7036 EVALUATION IN SOCIAL WORK PRACTICE (3) LEC. 3. This course examines quantitative and qualitative evaluation of agency programs and individual practice. Students will engage in hands-on individual and/or small-group research projects to experience all phases of the research process.

SOWO 7040/7046 SOCIAL WORK PRACTICE IN THE HEALTH CARE FIELD (3) LEC. 3. This course will focus on the development of social work practice skills relevant to health care settings, including assessment of the impact of illness, disability, treatment, and hospitalization on patients and families.

SOWO 7050 MENTAL HEALTH (3) LEC. 3. Pr. SOWO 7020. This course focuses on mental health social work practice with children, adolescents and adults, covering assessment and several theoretically based interventions with an emphasis on gaining practice skills. Special attention is given to strengths-based, evidence-based, and recovery-oriented practice models.

SOWO 7060 SOCIAL WORK PRACTICE WITH INDIVIDUALS AND FAMILIES (3) LEC. 3. This foundation course prepares students to apply a generalist perspective and systems framework to social work practice with individuals and families. It emphasizes the basics of communication, interviewing, relationship building, and practice skills essential to effective assessment, intervention, and evaluation.

SOWO 7070 SOCIAL WORK WITH GROUPS AND COMMUNITIES (3) LEC. 3. Pr. SOWO 7060. This macro social work course provides an advanced examination of social work practice in groups and larger systems. Students will develop knowledge, values, and skills in areas of: group practice, community assessment, social planning, community organization, and political strategies.

SOWO 7080 POLICY PRACTICE AND SOCIAL JUSTICE (3) LEC. 3. This course will critically apply conceptual frameworks and empirical research in the examination of social issues, policies, and services, focusing on how policies affect marginalized, oppressed and disadvantaged populations.

SOWO 7090 ADVANCED SOCIAL WELFARE POLICY (3) LEC. 3. The course will review the historical development of social welfare and social policies in the United States and explore their context and underlying values. This course builds knowledge and skills to analyze and make changes in social welfare policy.

SOWO 7100 GERONTOLOGY (3) LEC. 3. The course provides a clinical foundation for clinical social work practice with older adults and their families. Primary focus will be on understanding how diversity factors into the physiological, psychological, and social aspects of later life.

SOWO 7110 TRAUMA INFORMED PRACTICE (3) LEC. 3. This course examines social work practice theories and intervention approaches as they apply to practice with survivors of crisis and trauma. The course will focus on engagement, assessment, planning, intervention, evaluation and follow up on all social work practice levels.

SOWO 7120/7126 PSYCHOSOCIAL CONTEXT OF DISABILITY (3) LEC. 3. Prepares the social worker to be an effective practitioner for persons with disabilities by exploring the psychosocial context of the lives and experiences of persons with disabilities and their families from various perspectives.

SOWO 7130 SOCIAL WORK PRACTICE WITH CHILDREN AND ADOLESCENTS (3) LEC. 3. This course develops advanced clinical social work practice knowledge and skills to engage and intervene with children and adolescents with health and mental health risk and provides knowledge for community social workers serving children who are exposed to stress.

SOWO 7140 DIVERSITY AND DIFFERENCE IN PRACTICE (3) LEC. 3. Students must be admitted to the Masters of Social Work Program to enroll in this course.
SOWO 7700 FOUNDATIONS OF SOCIAL WORK RESEARCH (3) LEC. 3. This course provides a study of quantitative and qualitative research methods in order to build knowledge for social work practice. Students will be prepared to develop, implement and communicate ethical, empirically-based scientific knowledge.

SOWO 7800 HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT (3) LEC. 3. This graduate-level foundation course covers theories, themes, and issues that influence individual and group development across the life span in interaction with the environment- as it underlies social work practice and research.

SOWO 7920 GENERALIST FIELD (10) INT. 10. SU. This course prepares students for responsible, competent entry into the profession by providing opportunities to practice social work with a generalist perspective in agency settings under educational supervision. This course requires completion of 432 total hours in an agency setting.

SOWO 7930 ADVANCED FIELD (12) INT. 12. SU. Pr. SOWO 7920. This course provides upper level graduate social work students with opportunities to develop advanced generalist and clinical practice skills under the supervision of an MSW Field Instructor. Students complete 512 hours in an approved agency during this field experience. Course may be repeated for a maximum of 18 credit hours.

SOWO 7950 INTEGRATIVE SEMINAR (3) SEM. 3. Pr. SOWO 7020 and P/C SOWO 7930. This seminar course assists students in integrating and applying classroom learning with the advanced field placement. Opportunities are provided for case presentation, discussion and peer consultation.

SOWO 7970 GRANT WRITING (3) LEC. 3. Developing effective grant writing skills are essential to acquire competitive funding from government agencies and private foundations. Writing a successful grant proposal is a blend of art and science. It requires basic knowhow, content knowledge, writing proficiency, strong research skills, creativity, organizational ability, patience, and a great deal of luck. This course will provide students with the background necessary to develop a competitive funding proposal. Course may be repeated for a maximum of 6 credit hours.

Sociology Courses

SOCY 1007 HONORS SOCIOLOGY (3) LEC. 3. Pr. Honors College. Social Science I Core. Introduction to the study of social and cultural patterns in society.

SOCY 1050 AUBURN IN THE WORLD: SOCIETY AND CULTURE (4) LEC. 4. Auburn Global students. Part of the Auburn Global International Accelerator Program. The course will introduce students to American society and culture through core sociological concepts. May count either SOCY 1050 or HIST 1000.

SOCY 1100 CURRENT ISSUES IN RACE AND ETHNICITY (3) LEC. 3. An exploration of how race and ethnicity shape our daily lives and the world around us.

SOCY 2000 SOCIAL ISSUES (3) LEC. 3. Pr. SOCY 1000 or SOCY 1007. Exploration of the claims and conflicts of public issues and moral apprehensions, including crime, the environment, gender and racial inequality, various syndromes.

SOCY 2050 CRIME AND JUSTICE IN AMERICA (3) LEC. 3. Distribution and measurement of crime, different variations in criminal behavior, and handling crime in the American criminal justice system.

SOCY 2100 POPULATION AND SOCIETY (3) LEC. 3. Survey of theories and research of demographic processes and their interaction with the economy, education, family, medicine, science, and technology.

SOCY 2200 SOCIAL PSYCHOLOGY: SOCIOLOGICAL PERSPECTIVES (3) LEC. 3. Examination of collective influences on the person and the role the person plays in sustaining collective conditions.

SOCY 3000 CRIMINOLOGY (3) LEC. 3. Examination of etiological issues related to crime; major theories of crime causation from a wide variety of perspectives.

SOCY 3100 POLICE AND SOCIETY (3) LEC. 3. Pr. SOCY 1000 or SOCY 1007 or Departmental approval. Sociological overview of policing and current issues that relate to the police.

SOCY 3200 SPORTS IN AMERICA (3) LEC. 3. Sociological perspectives on sports in the social system; organization and culture of sports in relationship to social class, race, and gender; and the interconnections between sport and society.
SOCY 3250 SENTENCING AND CORRECTIONS (3) LEC. 3. Pr. SOCY 1000 or SOCY 1007 or Departmental approval. In-depth analysis of sentencing policies and the correction system.

SOCY 3300 SOCIOLOGY OF THE FAMILY (3) LEC. 3. Family as a major social institution, with emphasis on the American family; cross-cultural comparisons for perspective.

SOCY 3500 MINORITY GROUPS (3) LEC. 3. Pr. SOCY 1000 or SOCY 1007. Exploration of the sources and uses of minority representations in the United States addressing inequalities such as race, ethnicity, gender, and sexual orientation.

SOCY 3550 DELINQUENCY AND JUVENILE JUSTICE (3) LEC. 3. Pr. SOCY 1000 or SOCY 1003 or SOCY 1007 or Departmental approval. Nature and distribution of delinquency in the United States, as well as the various components of the juvenile justice system.

SOCY 35502 DELINQUENCY AND JUVENILE JUSTICE (3) LEC. 3. Pr. SOCY 1000 or SOCY 1003 or SOCY 1007.

SOCY 3700 METHODS OF SOCIAL RESEARCH (3) LEC. 3. Pr. SOCY 1000 or SOCY 1003 or SOCY 1007. Methodological approaches to data collection used by social scientists including logic of science, hypothesis formation, and research design.

SOCY 4000 SOCIALIZATION (3) LEC. 3. Examination of mind, self, society, and interaction as symbolic phenomena grounded in social process; covers major intellectual influences, concepts, and figures.

SOCY 4100 DEVIANCE (3) LEC. 3. Analysis of creation and reaction to deviance through theoretical approaches; examines several deviant groups.

SOCY 4200 MEDICAL SOCIOLOGY (3) LEC. 3. Nature and organization of medical practice and health delivery systems with special attention to the role of physicians, patients, and disease and to the relationship between culture, politics, and health.

SOCY 4300 FIELD INSTRUCTION (3) LEC. 3. Pr., Departmental approval. Supplementary instruction concurrent with experience in some field of work involving application of sociological perspectives to community life. Course may be repeated for a maximum of 6 credit hours.

SOCY 4400 CONTEMPORARY THEORY (3) LEC. 3. Survey of theorists from Comte to the present, emphasizing theory construction, theoretical analysis, and differences in theoretical approaches.

SOCY 4700 THEORIES OF CRIME AND CRIMINALITY (3) LEC. 3. Theories of crime causation with emphasis on theory construction, theory analysis, and differences in theoretical approaches.

SOCY 4800 SENIOR SEMINAR (3) LEC. 3. Building upon prior coursework in theory, methods, and statistics for an in-depth examination of substantive areas in sociology. Students must demonstrate proficiency in critical thinking and analysis and in written and oral communication.

SOCY 4960 SPECIAL PROBLEMS IN SOCIOLOGY (3) AAB/IND. 3. Pr., Departmental approval. Independent reading program under supervision, to allow pursuit of specific interests in sociology not covered in other course offerings. Course may be repeated for a maximum of 6 credit hours.

SOCY 4967 HONORS SPECIAL PROBLEMS (1-3) IND. 3. Pr. Honors College or Departmental approval. Independent reading program under supervision, to allow pursuit of specific interests in sociology not covered in other course offerings. Course may be repeated for a maximum of 3 credit hours.

SOCY 4997 HONORS THESIS (1-3) IND. Pr. Honors College or departmental approval. Course may be repeated for a maximum of 3 credit hours.

SOCY 5120 CRITICAL THINKING AND STRUCTURED ANALYSIS (3) LEC. 3. Pr. SOCY 1000 or SOCY 1007 or Departmental approval. Exploration of various methodological and analytical issues related to critical thinking and structured analysis.

SOCY 5200 SOCIOLOGY OF LAW (3) LEC. 3. Controversial and contemporary issues in criminal law from a sociological perspective.

SOCY 5300 INFORMATION METHODS AND CYBER ANALYSIS (3) LEC. 3. Pr. (SOCY 1000 or SOCY 1007) and SOCY 5120 or Departmental approval. Overview of various methods and techniques of open source information analysis in the private and public sectors.

SOCY 5310 ADVANCED METHODS OF INFORMATION AND CYBER ANALYSIS (3) LEC. 3. Pr. (SOCY 1000 or SOCY 1007) and SOCY 5120 or Departmental approval. Application of methods and techniques of information analysis and related report writing.
SOCY 5400 SOCIOLOGY OF MENTAL HEALTH (3) LEC. 3. Pr. SOCY 1000 or SOCY 1007. Social analysis of the nature, development, identification, and treatment of mental illness. Credit with not be given for both SOCY 5400 and SOCY 6400.

SOCY 5500 VICTIMOLOGY (3) LEC. 3. Impact of victimization upon the crime victim, offender, and society, as well as the dynamics of the victim-offender relationship. Credit with not be given for both SOCY 5500 and SOCY 6500.

SOCY 5600 SEX CRIMES (3) LEC. 3. Criminal sexual behavior, the social influences on what is defined as sexually deviant, and the ways the criminal justice system handles sex offenders. Credit with not be given for both SOCY 5600 and SOCY 6600.

SOCY 5650 DRUGS AND SOCIETY (3) LEC. 3. Context and correlates of drug use, relationship with crime and delinquency, and societal reaction to drug abuse. Credit with not be given for both SOCY 5650 and SOCY 6650.

SOCY 5670 SOCIOLOGY OF GENDER (3) LEC. 3. Pr. SOCY 1000 or SOCY 1007. Social definitions and implications of gender, with emphasis on work, media, law, and interpersonal relationships. Credit with not be given for both SOCY 5670 and SOCY 6670.

SOCY 5970 SPECIAL TOPICS IN SOCIOLOGY (3) LEC. 3. Pr., Departmental approval. Study of substantive areas sociology. Credit with not be given for both SOCY 5970 and SOCY 6970. Course may be repeated for a maximum of 6 credit hours.

SOCY 6120 CRITICAL THINKING AND STRUCTURED ANALYSIS (3) LEC. 3. Pr. SOCY 1000 or SOCY 1007 or Departmental approval. Exploration of various methodological and analytical issues related to critical thinking and structured analysis. Credit with not be given for both SOCY 5120 and SOCY 6120.

SOCY 6200 SOCIOLOGY OF LAW (3) LEC. 3. Controversial and contemporary issues in criminal law from a sociological perspective. Credit with not be given for both SOCY 5200 and SOCY 6200.

SOCY 6300 INFORMATION METHODS AND CYBER ANALYSIS (3) LEC. 3. Pr. SOCY 1000 or SOCY 1007 and (SOCY 5120 or SOCY 6120) or Departmental approval. Overview of various methods and techniques of open source information analysis in the private and public sectors. Credit will not be given for both SOCY 5300 and SOCY 6300.

SOCY 6310 ADVANCED METHODS OF INFORMATION AND CYBER ANALYSIS (3) LEC. 3. Pr. SOCY 1000 or SOCY 1007 and (SOCY 5120 or SOCY 6120) or Departmental approval. Application of methods and techniques of information analysis and related report writing. Credit will not be given for SOCY 5310 and SOCY 6310.

SOCY 6400 SOCIOLOGY OF MENTAL HEALTH (3) LEC. 3. Pr. SOCY 1000 or SOCY 1007. Social analysis of the nature, development, identification, and treatment of mental illness. Credit will not be given for both SOCY 5400 and SOCY 6400.

SOCY 6500 VICTIMOLOGY (3) LEC. 3. Impact of victimization upon the crime victim, offender, and society, as well as the dynamics of the victim-offender relationship. Credit with not be given for both SOCY 5500 SOCY 6500.

SOCY 6600 SEX CRIMES (3) LEC. 3. Criminal sexual behavior, the social influences on what is defined as sexually deviant, and the ways the criminal justice system handles sex offenders. Credit with not be given for both SOCY 5600 and SOCY 6600.

SOCY 6650 DRUGS AND SOCIETY (3) LEC. 3. Context and correlates of drug use, relationship with crime and delinquency, and societal reaction to drug abuse. Credit with not be given for both SOCY 5650 and SOCY 6650.

SOCY 6670 SOCIOLOGY OF GENDER (3) LEC. 3. Pr. SOCY 1000 or SOCY 1007. Social definitions and implications of gender, with emphasis on work, media, law, and interpersonal relationships. Credit with not be given for both SOCY 5670 and SOCY 6670.

SOCY 6970 SOCIOLOGY SPECIAL TOPICS (3) LEC. 3. Study of substantive areas of sociology. Credit with not be given for both SOCY 5970 and SOCY 6970. Course may be repeated for a maximum of 6 credit hours.

SOCY 7000 ADVANCED SOCIOLOGICAL THEORY (3) LEC. 3. Pr. SOCY 4400 or Departmental approval. Review of major types of sociological theory within the context of theoretical paradigms and significant theoretical issues that face the discipline.

SOCY 7100 STATISTICAL ANALYSIS OF SURVEY, AGGREGATE, AND LARGE DATA SOURCES (3) LEC. 3. Pr. STAT 2010 or STAT 2017 or Departmental approval. Techniques commonly used in multivariate statistical analysis of data sources such as surveys, archival records, and other large data sets. Credit will not be given for both SOCY 7100 and STAT 7100.

SOCY 7200 SEMINAR IN SOCIAL BEHAVIOR (3) SEM. 3. Research and theory concerning social and group influences on behavior.

SOCY 7250 SOCIOLOGY OF VIOLENCE (3) LEC. 3. In-depth coverage of various forms of violence from the sociological perspective.
SOCY 7800 MENTORING IN THE CLASSROOM (1) LEC. SU. Pr., Departmental approval. First-hand experience in building and planning a course, constructing lectures, tests, and syllabi, presenting and taping a lecture, critiquing performance, developing discussions, and other instructional techniques.

SOCY 7850 TECHNOLOGY AND TEACHING IN SOCIOLOGY (1) LEC. 1. SU. Pr., Departmental approval. Technology as a teaching tool sociology classes.

SOCY 7930 DIRECTED STUDIES (3) IND. 3. Pr., Departmental approval. Independent reading course under the supervision of a department faculty member. Course may be repeated for a maximum of 6 credit hours.

SOCY 7990 RESEARCH AND THESIS (1-10) MST. Preparation of a thesis. Course may be repeated with change in topics.

**Curriculum in Social Work**

The Bachelor of Arts in Social Work is fully accredited by the Council on Social Work Education. Graduates are trained to become beginning-level generalist practitioners eligible for licensure and to apply for advanced standing social work graduate programs. Admission to the program is required before enrolling in SOWO 4060. SOCY 1000, SOWO 2000 and SOWO 3910 must be completed with a C or better prior to application. Students must earn a C and maintain a 2.5 GPA in all major courses.

**Theatre**

Theatre has the potential to foster dialogue, alter perceptions, and inspire social change. The Auburn University Department of Theatre is dedicated to the education and professional training of theatre artists, scholars, and audiences within a liberal arts environment. The Department champions the interaction between theory and practice and produces citizen artists who advocate for the arts through
their own work in local, national, and international communities. Auburn University theatre students think critically, creatively, and collaboratively and carry their knowledge from rehearsal spaces and classrooms to stages, campuses, and communities worldwide.

Students graduating with degrees from the Department of Theatre find employment in a wide variety of fields including as actors, theatre technicians, administrators, community leaders, and/or educators. The Department of Theatre provides instruction and production experience for students interested in developing their talents in the theatre arts, whether as majors or non-majors. Consequently, a broad range of classroom, laboratory, and performance experiences is provided in acting, directing, devising, music theatre, dance, scenic and lighting design, costume design, theatre technology, construction and crafts, theatre history, dramatic literature, music theatre, theatre criticism, theatre administration, and management.

The Department of Theatre offers a Bachelor of Arts in Theatre and a Bachelor of Fine Arts in Theatre. The BA in Theatre is designed for students seeking to study theatre within the liberal arts curriculum. This degree is for students who choose to study theatre as a humanistic discipline or who wish to concentrate in theatre history, criticism, education, dramatic literature, dramaturgy, directing, and multiple other creative disciplines. It is excellent preparation for more specialized training in graduate school or a conservatory program or for careers in a wide variety of creative fields. The BFA in Theatre is designed for students who have specific professional goals in mind. It is for students seeking professional training in an intensive program in a single concentration—performance, music theatre, design/technology, or management.

**BA in Theatre**
To graduate with a BA in Theatre, students must earn a grade of C or higher in all theatre courses. Any course with a grade below a C must be repeated.

**BFA in Theatre**
Students must comply with these requirements to be admitted to the BFA in Theatre:

- Students must formally apply for admission to the BFA in Theatre.
- Students entering the BFA options in Design/Technology, Management, and Performance typically apply for admission in the spring of their sophomore year.
- Students entering the BFA option in Music Theatre audition in the fall semester prior to their freshman year.
- Application is through portfolio review (Design/Technology and Management options) or audition (Performance and Music Theatre options).

Once they are admitted to the BFA, students have to meet these requirements in order to graduate:

- Students must earn a grade of C or higher in all theatre courses. Any course with a grade below a C must be repeated.
- Continuance in the BFA degree tracks is subject to review each semester by faculty.
- Final recommendation for graduation is made after the successful presentation of a performance recital or the successful execution of a design or major production project during the student’s final year. The success of a performance recital, design, or production model is determined by the Department of Theatre faculty.

In all Fine Arts curricula, electives may include six hours Basic ROTC or Advanced ROTC. In curricula that do not allow for six hours of electives, ROTC may be taken in lieu of required courses with approval of the departmental adviser. University core courses may not be replaced by Basic or Advanced ROTC.

** Majors**
- Theatre (p. 1088)
- Theatre - Design / Technology (p. 1089)
- Theatre - Management (p. 1090)
- Theatre - Music Theatre (p. 1092)
- Theatre - Performance (p. 1093)

**Minors**
- Dance (p. 1095)
- Theatre (p. 1095)
Courses

THEA 1010 INTRODUCTION TO THEATRE FOR MAJORS I (3) LEC. 2, LLB. 2. Overview of all areas of theatrical collaboration intended specifically for the incoming theatre majors. Introduces theatre majors to academic skills they will need to pursue the theatre major at Auburn University. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 1110 INTRODUCTION TO THEATRE FOR MAJORS II (3) LEC. 2, LLB. 2. Pr. THEA 1010. Introduction to a variety of perspectives regarding theatrical practices, theories, and texts. Focus on productive working relationships and collaborative skills necessary for a successful life in the theatre. Course culminates in the creation of a new performance piece. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 1530 DANCE LAB 1 - TAP (1) LAB. 3. Introduction to traditional tap dance. Exploration of technical concepts, rhythm combinations, and improvisations designed to test and develop tap dance skills. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 2 credit hours.

THEA 1570 DANCE LAB 1 - BALLET (1) LAB. 4.5. Beginning studio introduction to ballet technique. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 2 credit hours.

THEA 1670 DANCE LAB 1 - JAZZ (1) LAB. 3. Studio introduction to and exploration of jazz technique. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 2 credit hours.

THEA 1910 PRODUCTION PRACTICUM I (1) STU. 4. Experience in the design/technical and management areas of production. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 2 credit hours.

THEA 2020/2023 AESTHETICS OF ACTING (3) LEC. 3. Fine Arts Core. An orientation to acting aesthetics as a means of understanding and engaging the arte of theatre.

THEA 2080 PERFORMANCE TECHNIQUES FOR THE CAMERA (3) LEC. 1, LST. 3. Theory and practice of specialized performance techniques for television and film. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 2110 VOICE AND MOVEMENT FUNDAMENTALS (2) STU. 4. Coreq. THEA 2111. Exploration and study of fundamental issues in vocal production, articulation, and movement. Introduction to vocal anatomy, breathing/relaxation/alignment techniques, and integrated vocal and movement exercises applied in a variety of texts. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 2111 VOICE AND MOVEMENT FUNDAMENTALS LAB (1) LAB. 2. Coreq. THEA 2110. Exploration and application of vocal and physical skills designed to enhance vocal production, physical flexibility and integrated execution of vocal and physical performance skills. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 2120 ACTING I (3) LEC. 2, LST. 2. Introduction to basic acting techniques, literature, and performance through improvisation, contemporary scene study and attendance at theatre performances. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 2300 STAGE MANAGEMENT (3) LEC. 3. Examination of the theories and techniques of stage management in the producing organization, including management, organization, auditions, rehearsal, safety practices, and production procedures. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 2310 THEATRE TECHNOLOGY I (3) LEC. 3. A comprehensive introduction to the study of technical theatre; theoretical and practical applications of equipment, materials, and techniques used in technical theatre. Theatre majors who do not earn a grade of "C" or higher must repeat this course.
THEA 2400 DESIGN AESTHETICS (3) LEC. 3. An exploration of the fundamental elements and principles of design, pictorial composition, and design theory, and their relationships and potential for application in scenic, costume, and lighting design. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 2570 DANCE LAB 2 - BALLET (1) LAB. 4.5. Pr. THEA 1570. Intermediate studio training in ballet technique. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 2 credit hours.

THEA 2610 COSTUME CONSTRUCTION (3) LEC. 1, LST. 3. Fundamentals of machine sewing techniques, pattern drafting and draping, fabric dyes, and craftwork as they relate to theatrical costuming. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 2650 STAGE MAKEUP (3) LEC. 1, LST. 3. Theories and techniques of stage makeup, practical design and execution of basic makeup techniques, special effects, and character makeups. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 2670 DANCE LAB 2 - JAZZ (1) LAB. 3. Pr. THEA 1670. Intermediate studio training in jazz technique. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 2 credit hours.

THEA 2700 TEXT ANALYSIS (3) LEC. 3. Script Analysis provides students with the tools to read and interpret scripts from a variety of perspectives with a focus upon implications for production. Students will analyze plays for character, plot, theme, action, given circumstances, and production requirements.

THEA 2810 THEATRE PRODUCTION I (3-6) STU. Departmental approval. Coreq. THEA 2820. Intensive study of theatre arts through participation in the Auburn University Summer Repertory Company, focusing mainly on technical work and design. Course may be repeated for a maximum of 12 credit hours.

THEA 2820 SUMMER REPERTORY THEATRE COMPANY I (3-6) STU. Departmental approval. Coreq. THEA 2810. Concentrated workshop experience in all aspects of theatre production through participation in rehearsal and performance. Course may be repeated for a maximum of 12 credit hours.

THEA 2840 BEGINNING DANCE TECHNIQUES (3) LEC. 1, LST. 3. Beginning level dance technique and theory, focusing on dance as an art form, including a survey of dance in different cultural and historical contexts. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 6 credit hours.

THEA 2910 PRODUCTION PRACTICUM II (1) STU. 4. Pr. THEA 1910. Experience in the design/technical and management areas of production. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 4 credit hours.

THEA 2940 APPLIED THEATRE I: ACTING (1) STU. 4. Pr., Cast in Auburn University Theatre production. Intensive applied work for students cast in Auburn University Theatre productions. Course may be repeated for a maximum of 4 credit hours.

THEA 3110 VOICE FOR THE ACTOR II (3) LEC. 2, LST. 2. Pr. THEA 2110. Continuing study of vocal production and articulation techniques in tests of increasing complexity. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3120 ACTING II (3) LEC. 2, LST. 2. Pr. THEA 2120. Exploration of internal and external acting theory and techniques in modern and classical scene study. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3140 MUSIC THEATRE ACTING (3) LEC. 3. LAB. 3. Pr., Admission into the (THMU major) or Departmental approval. Exploration of acting techniques and performance through music theatre scene and song study, analysis, and history of music theatre repertoire culminating in public performance. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3150 BFA PERFORMANCE STUDIO I (4) LEC. 3, LST. 5. Pr., Admission into the THPR or THMU majors. Intensive study and practice integrating advanced contemporary scene study, audition technique, and the Fitzmaurice Voicework system. Students who do not earn a grade of "C" or better must re-audition for the BFA program and repeat the course.

THEA 3160 BFA PERFORMANCE STUDIO II (4) LEC. 3, LST. 5. Pr. THEA 3150. Intensive study and practice integrating Shakespeare and scene study of poetic texts with continuing work in Fitzmaurice Voicework system. Must earn a grade of "C" or higher or re-audition for the BFA program and repeat THEA 3150 and THEA 3160.
THEA 3190 SINGING PRACTICUM (1) STU. 1. Group instruction in musical theatre singing. Students will be introduced to the primary principles of posture, breathing, resonance, vocal health, direction, interpretation, and repertoire selection. Theatre majors who do not earn a grade of "C" or higher must repeat. Course may be repeated for a maximum of 2 credit hours.

THEA 3210 THE BUSINESS OF THEATRE (3) LEC. 3. Pr. THEA 1010 and THEA 1110 and THEA 2300 and THEA 2310 and THEA 1910 and THEA 2910. Discussion, research, and implementation of the practices necessary to be successful as a freelance artist in the current performing arts field.

THEA 3220 ARTS MANAGEMENT (3) LEC. 3. Pr. THEA 2300. Exploration of arts organizational structures, budgeting for non-profit and for-profit arts organizations, basic business and marketing practices, historical principles and practices of arts and cultural organizations.

THEA 3320 THEATRE TECHNOLOGY II (3) LEC. 2, LST. 2. Pr. THEA 2310. Theoretical and practical applications of equipment and techniques in technical theatre. Topics include light, sound mechanics, theatre rigging, equipment, special effects, and computer applications. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3330 SCENE PAINTING (3) LEC. 2. LAB. 2. Pr. THEA 2400 or Departmental approval. Studio-oriented course introducing the principles, techniques, and media of the scenic artist. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3350 TECHNICAL DIRECTION/PRODUCTION MANAGEMENT (3) LEC. 3. Pr. THEA 2310 and THEA 3320 or Departmental approval. Exploration of the roles and responsibilities of the technical director and the production manager in the coordination and execution of technical elements for theatre productions. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3400 RENDERING FOR THE THEATRE (3) LEC. 2. LAB. 2. Pr. THEA 2400 or Departmental approval. Traditional drawing and rendering techniques and media that help the designer to communicate scenic, costume, and lighting designs. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3410 SCENE DESIGN I (3) LEC. 2, LST. 2. Pr. THEA 2400 or Departmental approval. Discussion, research, and execution of theory and practices of designing scenery for the stage. Emphasis on traditional style and methods of design and presentation for the proscenium theatre. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3420 PROPERTY DESIGN AND TECHNOLOGY (3) LEC. 2, LST. 2. Pr. THEA 3320 or Departmental approval. History, design, organization, application of materials, and techniques used in the design and construction of properties for the theatre, film, and television. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3450 DRAFTING FOR THE THEATRE I (3) LEC. 2, LST. 2. Pr. THEA 2310 or Departmental approval. A comprehensive study of the techniques and methods used in the graphic representation of stage scenery, equipment, and properties design. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3500 LIGHTING DESIGN (3) LEC. 2, LST. 2. Pr. THEA 2310 or Departmental approval. Studio course that explores the theory, research, and practice of stage lighting, practical illumination, and effects lighting. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3520 SOUND DESIGN (3) LEC. 2, LST. 2. Pr. THEA 3320 or Departmental approval. Equipment and techniques used in sound design, as both a design and a technical medium. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3570 DANCE LAB 3 - BALLET (1) LAB. 4.5. Pr. THEA 2570. Intermediate advanced studio in ballet technique. Course may be repeated for a maximum of 2 credit hours.

THEA 3610 ADVANCED COSTUME CONSTRUCTION (3) LEC. 2, LST. 2. Pr. THEA 2610 or Departmental approval. Historical pattern making and draping, millinery skills, and craft techniques, and their practical applications in theatre costuming. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3640 COSTUME DESIGN (3) LEC. 2, LST. 2. Pr. THEA 2400 or Departmental approval. Costume design and rendering as it relates to historical and original design for the theatre. Exploration of design for television, commercials, and rock stars. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3670 DANCE LAB 3 - JAZZ (1) LAB. 3. Pr. THEA 2670. Intermediate advanced studio training in jazz technique. Course may be repeated for a maximum of 2 credit hours.
THEA 3710 THEATRE HISTORY, THEORY AND CRITICISM II - BODY (3) LEC. 2, LST. 2. Examination of the history, literature, and theory of the theatre from prehistory to the present with an emphasis on the human body as a broad category for understanding a variety of issues and topics relevant to contemporary theatre practice. Areas of exploration include such topics as historical and theoretical perceptions of the social status of the actor, the actor's body as a medium of representation, and theatrical representations of gender and ethnicity. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3720 THEATRE HISTORY, THEORY AND CRITICISM III - SPACE (3) LEC. 2, LST. 2. Examination of the history, literature, and theory of the theatre from prehistory to the present with an emphasis on theatrical space as a broad category for understanding a variety of issues and topics relevant to contemporary theatre practice. Areas of exploration include ritual landscapes as they pertain to the origin of drama, the development of the western playhouse, the avant-garde reconceptualization of theatre space, and the development of such spatially oriented American institutions as Broadway and regional theatre. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3730 MUSIC THEATRE HISTORY (3) LEC. 3. Exploration of music theatre literature, performances, historical, analytical and critical trends from the early 20th century to the present day. Areas of exploration include music theatre as a work of art with unique conversations about aesthetics and form, as an entertainment media shaped by its historical and cultural context, and as a viable performance form for the 21st century. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3740 COSTUME HISTORY (3) LEC. 3. History of Western costume and its uses in the theatre from ancient times to the present. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3800 THEATRE EVENTS MANAGEMENT (3) SEM. 3. Pr. THEA 2300. THEA 2300 with a grade of "C" or higher. This course is an introduction to the researching, planning, coordinating, marketing, facilitation/management and assessment of special events, specifically as they relate to the performing arts. Through practical application, each student will gain experience in the basic entrepreneurial skills necessary to plan a public arts event.

THEA 3840 INTERMEDIATE DANCE TECHNIQUES I (3) LEC. 1, LST. 3. Pr. THEA 2840. Intermediate level dance technique and theory, with an emphasis on performance qualities including work on alignment, strength, flexibility, rhythm, musicality, and dynamics, as well as the study of select contemporary choreographers. THEA 3840 and THEA 3850 need not be taken in sequence. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 6 credit hours.

THEA 3850 INTERMEDIATE DANCE TECHNIQUES II (3) LEC. 1, LST. 3. Pr. THEA 2840. Further exploration into intermediate level dance technique and theory, with emphasis on aesthetics and contemporary topics in dance. THEA 3840 and THEA 3850 need not be taken in sequence. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 6 credit hours.

THEA 3860 MOVEMENT FOR THE ACTOR (3) STU. 4. Introduction to the basic concepts of movement as it relates to the actor. Integrative ways of connecting the body to text and space. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3910 PRODUCTION PRACTICUM III (1) STU. 4. Experience in the design/technical and management areas of production. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 2 credit hours.

THEA 3940 APPLIED THEATRE II: ACTING (1) STU. 4. Pr., Cast in Auburn University Theatre production. Intensive applied work for students cast in Auburn University Theatre productions. Course may be repeated for a maximum of 4 credit hours.

THEA 3950 DIRECTING SEMINAR (3) LEC. 2, LST. 2. Pr. THEA 2120. Study of fundamental skills and collaborative processes needed to direct live theatre, including blocking, script analysis, research methods, approaches to casting, and rehearsal techniques. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3960 DRAMATURGY SEMINAR (3) LEC. 3. Study of fundamental skills and collaborative processes needed to dramaturg a piece of live theatre including both production and new play dramaturgy, critical analysis, research, presentations, and performance. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 4150 BFA PERFORMANCE STUDIO III (4) LEC. 3, LST. 5. Pr. THEA 3160. Professional preparation with particular focus on individual rehearsal and performance techniques covering a broad spectrum of periods and styles geared toward graduate acting program placement and professional employment. Students who do not earn a grade of "C" or higher must re-audition for the BFA program and repeat THEA 3150, THEA 3160, and THEA 4150.
THEA 4160 BFA PERFORMANCE STUDIO IV (4) LEC. 3, LST. 5. Pr. THEA 4150. Special problems and topics in performance. Intensive work integrating and applying acting, voice, and movement techniques in an ensemble capstone recital of work in an adjudicated public performance. Students who do not earn a grade of "C" or higher must re-audition for the BFA program and repeat THEA 3150, THEA 3160, THEA 4150 and THEA 4160.

THEA 4420 SCENE DESIGN II (3) LEC. 2, LST. 2. Pr. THEA 3410 or Departmental approval. Advanced course in theory and practice of scenic and lighting design for theatre. Emphasis on experimental and non-traditional staging in a variety of space. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 4450 DRAFTING FOR THE THEATRE II (3) LEC. 2, LST. 2. Pr. THEA 3450. Comprehensive study of computer and digital techniques used in the graphic representation of stage scenery, equipment, and properties design. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 4510 LIGHTING DESIGN II (3) LEC. 3, LAB. 1. Pr. THEA 2400 and THEA 3510. Lighting Design II provides students with in-depth study of advanced stage lighting techniques, including integration of computer graphics and projections with conventional lighting instruments.

THEA 4570 DANCE LAB 4 - BALLET (1) LAB. 4.5. Pr. THEA 3570. Advanced studio training in ballet technique. Course may be repeated for a maximum of 2 credit hours.

THEA 4650 ADVANCED STAGE MAKEUP (3) LEC. 1, LST. 3. Pr. THEA 2650 or Departmental approval. Comprehensive study of specialized makeup, including film and television makeup, mask making, prosthesis, facial hair design, and wig making. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 4670 DANCE LAB 4 - JAZZ (1) LAB. 3. Pr. THEA 3670. Advanced studio training in jazz technique. Course may be repeated for a maximum of 2 credit hours.

THEA 4690 ARTISTS AND COMMUNITIES (3) SEM. 3. An in-depth analysis and exploration of the role and responsibility of the artist and art within communities. We will explore this idea from multiple perspectives: marketing, general management, artistic direction, performance, urban planning/creative placemaking, fundraising, and nonprofit management.

THEA 4750 PLAYWRITING (3) LEC. 3. Discussion of the principles of play construction, playwriting exercises, and completion of a one-act play. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 4770 CAPSTONE SENIOR DANCE LAB (1) LAB. 4. Pr. THEA 1530 and THEA 2570 and THEA 2670. Students must be in good standing in BFA Performance Program. Culminating exploration of, and enrichment in musical theatre dance technique ranging from Ballet to Jazz to Hip-hop. Course culminates in a public capstone dance outcome performance.

THEA 4810 THEATRE PRODUCTION II (3-6) STU. Concentrated workshop experience in all aspects of theatre production through participation in rehearsal and performance. Course may be repeated for a maximum of 12 credit hours.

THEA 4820 SUMMER REPERTORY THEATRE COMPANY II (3-6) STU. Intensive and concentrated study of production skills and techniques and studio/laboratory experiences. Course may be repeated for a maximum of 12 credit hours.

THEA 4840 ADVANCED DANCE TECHNIQUES (3) LEC. 1, LST. 3. Pr. THEA 3850. Intensive study of advanced dance techniques in theory and practice. Course often serves as a training and preparation for public performance. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 12 credit hours.

THEA 4910 PRODUCTION PRACTICUM IV (1-4) STU. Pr. THEA 3910. Or Admission into the THDT or THMN program and two semesters of THEA 3910 or departmental approval. Leadership experience in the design/technical and management areas of production. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 4 credit hours.

THEA 4920 PROFESSIONAL INTERNSHIP (1-8) INT. Pr., Departmental approval. Internship with professional or community theatre in the student's field of specialization. Each 10-hour work week equals one hour of credit. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 8 credit hours.

THEA 4930 DIRECTED STUDIES (1-3) IND. Pr., Departmental approval. Directed readings, creative and tutorial projects of interest to the advanced student. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 6 credit hours.
THEA 4940 THEATRE SPECIAL PROJECTS (3) AAB/STU. 4. Pr., Departmental approval. Selected projects related to realizing a theatrical production in public performance. Theatre majors who do not earn a grade of “C” or higher must repeat this course. Course may be repeated for a maximum of 9 credit hours.

THEA 4950 THEATRE LITERATURE AND THEORY SEMINAR (3) LEC. 3. Thorough examination of dramatic literature and theory from a narrow perspective (such as genre, style, or era.) Theatre majors who do not earn a grade of “C” or higher must repeat this course. Course may be repeated for a maximum of 6 credit hours.

THEA 4967 HONORS SPECIAL PROBLEMS (1-3) IND. Pr. Honors College. Subject areas to be determined between student and theatre instructor. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 6 credit hours.

THEA 4970 SPECIAL TOPICS (3) LEC. 3. Special Topics in Theatre or Dance. Course may be repeated for a maximum of 9 credit hours.

THEA 4980 SENIOR CAPSTONE PROJECT (3) LEC. 3. Capstone course to aid senior theatre majors in their transition to the professional world and/or graduate studies. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 4997 HONORS THESIS (1-6) IND. Pr. Honors College. Final projects of varying natures in theatre Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 6 credit hours.

BA Curriculum in Theatre

Theatre majors must earn a grade of C or higher in theatre courses, or they must repeat those courses for credit toward their degree.

BFA Curriculum in Theatre - Music Theatre

The BFA in Music Theatre is a four-year degree track that offers practical, pre-professional skills in acting, dancing, and singing for the student whose ambition is to be a professional actor and musical theatre artist. In the first two years of the program, students study voice in private sessions, music theory and skills, piano, speech, music theatre acting, ballet, jazz and tap. Both the Performance and Music Theatre degree tracks combine a liberal arts education with applied skills in performance that will serve the undergraduate actor seeking graduate school placement or professional employment.

All members of our acting faculty are professional actors with years of experience in the industry as well as terminal degrees in their field.

Theatre majors must earn a grade of C or higher in theatre courses, or they must repeat those courses for credit toward their degrees.

---

1. THEA 1110 and THEA 4980 fulfill SLO 7.
2. Students are required to complete a two-course history sequence or a two-course literature sequence. They are also required to complete one Core History or Core Literature in the discipline not chosen as the sequence.
3. If Literature requirement was completed prior to Fall 2013, Core Humanities must cover SLO 3.
4. To enroll in Senior Capstone Project, students must be senior theatre majors planning to graduate before the following fall semester.
5. Students must meet with their advisers to identify approved theatre, music, and other electives.

### BFA Curriculum in Theatre - Performance

Theatre majors must earn a grade of C or higher in theatre courses or they must repeat those courses for credit toward their degrees.

School of Communication & Journalism

Majors from the School of Communication and Journalism are employed news and sports reporters, anchors, film editors, cinematographers, producers, public relations specialists, not-for-profit managers, magazine writers, legislative aides, HR managers, event coordinators, account executives, research associates, project managers and public affairs directors. The School offers undergraduate degree programs in Communication, Journalism, Public Relations, and Media Studies. These programs offer students opportunities to create and understand the transmission and reception of messages within specific contexts.

Students must comply with these requirements to be admitted to any of the four majors in the School of Communication and Journalism:

**Communication (COMM)**

Students must apply for admission to the COMM major. Before applying, students must: 1) Have a minimum of a 2.3 GPA in ENGL 1120 and a core Social Science course (may not use a History course); 2) Complete ENGL 1120, CMJN 2100 or 2103, and a Core Social Science course with a C or better; 3) Successfully complete COMM 1000 or COMM 1003 with a B or better; 4) Successfully complete 30 hours of degree-applicable course credits (including AP and proficiency credits); and 5) Write a 300-word essay. Note: Students who transfer to Auburn University must apply to the COMM major and complete one semester at Auburn before applying for admission.

**Journalism (JRNL)**

Students must apply for admission to the JRNL major. Before applying, students must: 1) Have a minimum of a 2.3 GPA in ENGL 1120 and a Core Social Science course; 2) Complete ENGL 1120, CMJN 2100 or CMJN 2103, and a Core Social Science course with a C or better; 3) Successfully pass JRNL 1AA0 or JRNL 1100 with a “B” or better; 4) Complete JRNL 2210 or JRNL 2213 with a “C” or better; 5) Successfully complete 30 hours of degree-applicable course credits (including AP and proficiency credits); and 6) Write a 300-word essay. Note: Students who transfer to Auburn University must apply to the JRNL major and complete one semester at Auburn University before applying for admission.
Media Studies (MDIA or MDIV)

Students must apply for admission to the MDIA major. Before applying, students must: 1) Have a minimum of a 2.3 GPA in ENGL 1120 and a Core Social Science course; 2) Complete ENGL 1120, CMJN 2100 or CMJN 2103, and a Core Social Science course with a C or better; 3) Successfully complete COMM 1000 or COMM 1003 with a B or better; 4) Successfully complete 30 hours of degree-applicable course credits (including AP and proficiency credits); and 5) Write a 300-word essay. Note: Students who transfer to Auburn University must apply to the MDIA major and complete one semester at Auburn before applying for admission.

Public Relations (PRCM)

Students must apply for admission to the PRCM major. Before applying, students must: 1) Have a minimum of a 2.3 GPA in ENGL 1120 and a Core Social Science course; 2) Complete ENGL 1120, CMJN 2100 or CMJN 2103, and a Core Social Science course with a C or better; 3) Successfully pass JRNL 1AA0 or JRNL 1100 with a “B” or better; 4) Complete PRCM 2400 with a “C” or better; 5) Successfully complete 30 hours of degree-applicable course credits (including AP and proficiency credits; and 6) Write a 300-word essay. Note: Students who transfer to Auburn University must apply to the PRCM major and complete one semester at Auburn University before applying for admission.

Major

• Communication (p. 1118)
• Journalism (p. 1119)
• Public Relations (p. 1123)
• Media Studies (p. 1120)
• Media Studies — Visual Media Option (p. 1122)

Minor

• Communication (p. 1118)
• Intercultural Communication (p. 1124)
• Journalism (p. 1125)
• Sports Communication (p. 1126)

Communication and Journalism Courses

CMJN 2100/2103 CONCEPTS IN COMMUNICATIONS AND JOURNALISM (3) LEC. 2. LAB. 1. Introduction to the basic principles of various communication forms, the dominant communication theories, and communication industries. May count either CMJN 2100 or CMJN 2103.

CMJN 2910 COMMUNICATION AND JOURNALISM PRACTICUM (1-3) PRA. SU. Departmental Approval. Practical experiences in potential career fields gained while working in professional settings. One to three hours variable credit. Course may be repeated for a maximum of 3 credit hours.

CMJN 3110/3113 SPORTS MEDIA RELATIONS (3) LEC. 3. Pr. CMJN 2100 or CMJN 2103. Focuses on the major concepts and theories of the management of sports media relations. Will include discussion of issues, philosophies and cases. May count either sections CMJN 3110, CMJN 3113 or MDIA 4350.

CMJN 3210/3213 NEWS AND SPORTS ANNOUNCING (3) LEC. 3. Pr. CMJN 2100 or CMJN 2103. This class focuses on the theory and practical technique of studio and field announcing. Primary emphasis will be placed on announcing for news and sports. Additional attention will be given to voice over announcing.

CMJN 3350/3353 VISUAL COMMUNICATION (3) LEC. 3. Visual literacy, cognition, aesthetics, critical evaluation, and technology in human communication, with emphasis on impact of visual media in informative, interpretive, and persuasive message.

CMJN 3410/3413 INTRODUCTION TO SPORTS VIDEO PRODUCTION (3) LEC. 2. LST. 1. Introduction to multi-camera live sports production, video and audio editing techniques, how to operate equipment, create basic animated graphics, learn work crew positions and understand a script. Students will complete work for the SEC Network and War Eagle Productions.

CMJN 3510/3513 CONTROL ROOM OPERATIONS (3) LEC. 3. Introduction to various control room positions and equipment associated with a live broadcast. Students will learn the skills needed to set up, adjust and operate production equipment before and during broadcasts.
CMJN 3650/3653 RHETORIC OF SPORTS (3) LEC. 3. Examination of sports in the public sphere, using rhetorical theories to understand how sports contribute to social issues such as identity, community, ethnicity, gender, and politics. May count either CMJN 3650 or COMM 3650.

CMJN 4000/4003 MASS MEDIA LAW AND REGULATION (3) LEC. 3. Pr. CMJN 2100 or CMJN 2103. and junior or senior standing. Laws and regulations that govern journalists, media content and industries.

CMJN 4320/4323 SPORTS MEDIA MANAGEMENT (3) LEC. 3. Pr. CMJN 2100. Addresses principles and practices of managing sports media properties across multiple platforms.

CMJN 4340/4343 MASS COMMUNICATION AND FAMILY (3) LEC. 3. Examination of the relationship between the American family and the mass communication industry.

CMJN 4370/4373 MASS COMMUNICATION AND RELIGION (3) LEC. 3. Examines the relationship between mass communication and religion. Portrayals and influences will be analyzed.

CMJN 4400/4403 GENDER COMMUNICATION (3) LEC. 3. Examination of the ways in which gender is created, maintained, and/or changed through communication.

CMJN 4410/4413 ADVANCED SPORTS VIDEO PRODUCTION (3) LEC. 2, LST. 1. Pr. CMJN 3410. This course is designed to give students in-depth training that covers advanced video editing techniques and effects. In addition, students will gain experience with advanced camera operation and techniques, focusing on high-quality production throughout the process.

CMJN 4430/4433 SPORTS, MEDIA AND SOCIETY (3) LEC. 3. Cultural and professional implications of the relationship between sports and media. May count either CMJN 4430 or JRNL 4430.

CMJN 4510/4513 SPORTS STORYTELLING & VIDEO PROFILES (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (CMJN 3410 or CMJN 3413) and (JRNL 1100 or JRNL 1AA0) and (JRNL 2210 or JRNL 2213). Technology has changed the landscape of how sports stories are seen and ingested today. Students will explore the art of sports storytelling and learn the foundational skills needed to effectively use cameras, lighting, editing equipment and other industry-standard tools to tell a visual story.

CMJN 4610/4613 LIVE SPORTS PRODUCING (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (JRNL 1100 or JRNL 1AA0) and (JRNL 2210 or JRNL 2213) and CMJN 3510. Students will learn how to produce live events for broadcast and in-venue video boards. Students will gain the necessary knowledge and skills for producing a high-quality live event. This includes preparation, decision making skills and industry-standard terminology.

CMJN 4970/4973 SPECIAL TOPICS IN COMMUNICATION AND JOURNALISM (3) LEC. 3. Specialized topics related to the study and practice of Communication, Journalism, Media Studies and/or Public Relations. Course may be repeated for a maximum of 6 credit hours.

CMJN 5100 CMJN ABROAD (3) AAB. 3. Explores theory, research, and practice in the fields of communication, media, and public relations in an international context. May count either CMJN 5100 or CMJN 6100.

CMJN 6100 CMJN ABROAD (3) AAB. 3. Explores theory, research, and practice in the fields of communication, media, and public relations in an international context. May count either CMJN 5100 or CMJN 6100.

Communication Courses

COMM 1000/1003 PUBLIC SPEAKING (3) LEC. 3. Oral communication theory and practice in a public speaking setting, with emphasis on content, organization, delivery, and adaptation to the audience.

COMM 1007 HONORS PUBLIC SPEAKING (3) LEC. 3. Pr. Honors College. This course will focus on numerous elements of oral communication - public speaking, group communication and interpersonal communication. This is different from a typical speech class that focuses solely on public speaking. An emphasis will also be placed on debate(forescics).

COMM 2010/2013 COMMUNICATION IN SOCIETY (3) LEC. 3. Theory underlying the construction of rhetorical messages as well as critical perspectives for the analysis of public discourse. May count either COMM 2010 or COMM 2013.

COMM 2400/2403 INTRODUCTION TO WORKPLACE COMMUNICATION (3) LEC. 3. Communication in modern organizations, emphasizing practice in areas such as interviewing, managing meeting, and conducting professional presentations. May count either COMM 2400 or COMM 2403.
COMM 2410/2413 SMALL GROUP COMMUNICATION (3) LEC. 3. Theory and practice of competent communication in task-oriented small group settings such as committees. Topics include roles, leadership, decision making, problem solving, and conflict management. May count either COMM 2410 or COMM 2413.

COMM 3100/3103 ADVANCED PUBLIC SPEAKING (3) LEC. 3. Pr. COMM 1000 or COMM 1003. Refining the knowledge and skills necessary for communicating clearly and effectively in oral presentations. May count either COMM 3100 or COMM 3103.

COMM 3110/3113 PERSUASION (3) LEC. 3. Understanding and analyzing persuasive messages. Survey of theoretical approaches to attitude formation and change. Developing skills as a critical evaluator of persuasive messages. May count either COMM 3110 or COMM 3113.

COMM 3300/3303 COMMUNICATION AND CONFLICT (3) LEC. 3. Enhance awareness of and develop skills in managing conflict processes in interpersonal relationships. May count either COMM 3300 or COMM 3303.

COMM 3400/3403 ORGANIZATIONAL COMMUNICATION (3) LEC. 3. This course examines theory, approaches, and processes associated with organizational communication. May count either COMM 3400 or COMM 3403.

COMM 3450/3453 INTERCULTURAL COMMUNICATION (3) LEC. 3. Different types of problems encountered when communicating with different cultures. May count either COMM 3450 or COMM 3453.

COMM 3500/3503 FOUNDATIONS OF HUMAN COMMUNICATION (3) LEC. 3. Pr. CMJN 2100 or CMJN 2101. Theories examining the nature of human communication. May count either COMM 3500 or COMM 3503.

COMM 3510/3513 RESEARCH IN HUMAN COMMUNICATION (3) LEC. 3. Pr. CMJN 2100 or CMJN 2101. Introduction to and application of quantitative and qualitative methods of communication research. May count either COMM 3510 or COMM 3513.

COMM 3600/3603 FOUNDATIONS OF RHETORIC AND SOCIAL INFLUENCE (3) LEC. 3. Pr. CMJN 2100 or CMJN 2101. Rhetorical theory from its classical roots to contemporary thinkers. Relates rhetorical theory and analysis to understanding persuasive discourse in our society. May count either COMM 3600 or COMM 3603.

COMM 3610/3613 RESEARCH IN RHETORIC AND SOCIAL INFLUENCE (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2101). Exploration of how to perform a critical analysis of various rhetorical artifacts. May count either COMM 3610 or COMM 3613.

COMM 3700/3703 ARGUMENTATION (3) LEC. 3. Examination of the critical tools necessary to evaluate arguments in current public discourse. May count either COMM 3700 or COMM 3703.

COMM 3800/3803 FAMILY COMMUNICATION (3) LEC. 3. Examines communication theory and research as applied to the family context (broadly defined). May count either COMM 3800 or COMM 3803.

COMM 3970/3973 SPECIAL TOPICS IN COMMUNICATION (3-6) LEC. Topics that range beyond what is covered in other courses within the COMM curriculum. Specific subject matter is left up to the individual instructor. Course may be repeated for a maximum of 6 credit hours.

COMM 4100/4103 COMMUNICATION STRATEGIES OF SOCIAL MOVEMENTS (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2101) and (COMM 3500 or COMM 3503) and (COMM 3600 or COMM 3603) and (COMM 3510 or COMM 3513) and (COMM 3610 or COMM 3613). and Declared major in AGCO, COMM, JRNL, PRCM, MDIA, MDIV or Departmental approval. Examination of persuasive strategies used in social movements to attract members, solidify support, and effect social change. May count either COMM 4100 or COMM 4103.

COMM 4410/4413 THEORIES OF LEADERSHIP (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2101) and (COMM 3500 or COMM 3503) and (COMM 3600 or COMM 3603) and (COMM 3510 or COMM 3513) and (COMM 3610 or COMM 3613). and Declared major in AGCO, COMM, JRNL, PRCM, MDIA, MDIV or Departmental approval. Examination of theory and research in leadership as a communication variable and behavioral practice in small group and organizational settings. May count either COMM 4410 or COMM 4413.

COMM 4420/4423 COMMUNICATION AND CREATIVITY (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2101) and (COMM 3600 or COMM 3603) and (COMM 3500 or COMM 3503) and (COMM 3510 or COMM 3513) and (COMM 3610 or COMM 3613). Declared major in AGCO, COMM, JRNL, PRCM, MDIA, MDIV, or Departmental approval. This course examines creativity research and its practical applications, particularly in collaborative settings. May count either COMM 4420 or COMM 4423.
COMM 4430/4433 COMMUNICATION TRAINING AND CONSULTING (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3500 or COMM 3503) and (COMM 3600 or COMM 3603) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613). Declared major in AGCO, COMM, JRNL, PRCM, MDIA, MDIV, or Departmental approval. Introduction to theoretical and practical issues involved in communication training and consulting.

COMM 4480/4483 HEALTH PROMOTION MESSAGE AND DESIGN (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3600 or COMM 3603) and (COMM 3500 or COMM 3503) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613). and Declared major in AGCO, COMM, JRNL, PRCM, MDIA, MDIV, or Departmental approval. Introduction to theory, practice, and ethics of health message and design as related to health promotion and behavior change. May count either COMM 4480 or COMM 4483.

COMM 4490/4493 HEALTH MEDIA & COMMUNICATION (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3600 or COMM 3603) and (COMM 3500 or COMM 3503) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613) and Departmental approval. Introduction to theory, practice, and ethics of health media and communication as related to health promotion and behavior change. May count either COMM 4490 or COMM 4493.

COMM 4500/4503 COMMUNICATION AND COGNITION (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3600 or COMM 3603) and (COMM 3500 or COMM 3503) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613) and Departmental approval. Introduction to theory and research related to cognitive and affective influences on communication in interpersonal and social interactions. May count either COMM 4500 or COMM 4503.

COMM 4700/4703 LEGAL COMMUNICATION (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3600 or COMM 3603) and (COMM 3500 or COMM 3503) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613) and Departmental approval. Examination of communication processes in legal contexts. May count either COMM 4700 or COMM 4703.

COMM 4800/4803 INTERPERSONAL COMMUNICATION (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3500 or COMM 3503) and (COMM 3600 or COMM 3603) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613) and Departmental approval. Relationship between communication and the formation of self-identity and maintenance of relationships. May count either COMM 4800 or COMM 4803.

COMM 4810/4813 NONVERBAL COMMUNICATION (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3500 or COMM 3503) and (COMM 3600 or COMM 3613) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613) and Departmental approval. Theory of non-language based communication and the impact of these messages on the overall communication process. May count either COMM 4810 or COMM 4813.

COMM 4920 INTERNSHIP (3) INT. 200. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3500 or COMM 3503) and (COMM 3600 or COMM 3603) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613), and Admission to Internship Program. Declared major in COMM. Opportunity to apply classroom experience to career setting. Internship must be a supervised, closely monitored work experience, appropriate to the major, that takes place in a professional setting. Admission to Internship Program may be needed.

COMM 4930 DIRECTED STUDIES IN COMMUNICATION (3) IND. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3500 or COMM 3503) and (COMM 3600 or COMM 3603) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613) and Departmental approval. Independent study on a specific topic of interest not already addressed in any regular COMM course.

COMM 4967 HONORS SPECIAL PROBLEMS (1-3) IND. Pr. Honors College. COMM 3613. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3600 or COMM 3603) and (COMM 3500 or COMM 3503) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613) and Departmental approval. Honors level independent study on a specific topic of interest not already addressed in any regular COMM course. Course may be repeated for a maximum of 3 credit hours.

COMM 4970/4973 SPECIAL TOPICS IN COMMUNICATION (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3500 or COMM 3503) and (COMM 3600 or COMM 3603) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613) and Departmental approval. Topics in communication. Course may be repeated with a change in topic. Course may be repeated for a maximum of 6 credit hours.

COMM 4997 HONORS THESIS (1-3) IND. Pr. Honors College. COMM 3600 or COMM 3603 and COMM 3500 or COMM 3503. and CMJN 2100 or CMJN 2103, and COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3600 or COMM 3603) and (COMM 3500 or COMM 3503) and (COMM 3510 or or COMM 3513 or COMM 3610 or COMM 3613). and Declared major in AGCO, COMM, JRNL, PRCM, MDIA, MDIV or Departmental approval. 2.3 GPA. Departmental approval. Course may be repeated for a maximum of 3 credit hours.
COMM 5430/5433 GENDER, WORK, AND COMMUNICATION (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3600 or COMM 3603) and (COMM 3500 or COMM 3503) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613). History, theory, and concepts central to the study of gender, work, and communication. May count either COMM 5430 or COMM 5433.

COMM 5450/5453 COMMUNICATION & IMMIGRATION (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3600 or COMM 3603) and (COMM 3500 or COMM 3503) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613). History, theory, and concepts central to the study of immigration from a communication perspective. May count either COMM 5450 or COMM 5453.

COMM 5470/5473 HEALTH COMMUNICATION (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3600 or COMM 3603) and (COMM 3500 or COMM 3503) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613). History, theory, and concepts central to the study and practice of health communication. May count either COMM 5470 or COMM 5473.

COMM 5600/5603 POLITICAL COMMUNICATION (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3600 or COMM 3603) and (COMM 3500 or COMM 3503) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613). and Declared major in AGCO, COMM, JRNL, PRCM, MDIA, MDIV MDIV or Departmental approval. Examines communication strategies involved in the varied contexts of politics. Students will be exposed to relevant theories and ideas and asked to apply this knowledge to current political activity. May count either COMM 5600 or COMM 5603.

COMM 5700/5703 DISCOURSE IN SOCIAL LIFE (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3600 or COMM 3603) and (COMM 3500 or COMM 3503) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613). and Declared major in AGCO, COMM, JRNL, PRCM, MDIA, MDIV or Departmental approval. Examines the functions of language and social interaction as they reflect and shape our identity in various contexts. May count COMM 5700 or 5703 or 6700.

COMM 6300 SEX, GENDER, AND SPORT (3) LEC. 3. Focuses on sport, as a gendered institution. The course examines intersections of gender with age, sexual orientation, social class, gender identity, race and ethnicity and politics.

COMM 6430 GENDER, WORK, AND COMMUNICATION (3) LEC. 3. History, theory, and concepts central to the study of gender, work, and communication.

COMM 6470 HEALTH COMMUNICATION (3) LEC. 3. History, theory, and concepts central to the study and practice of health communication.

COMM 6600 POLITICAL COMMUNICATION (3) LEC. 3. This course will examine the communication strategies involved in the varied contexts of politics. Students will be exposed to relevant theories and ideas and asked to apply this knowledge to current political activity.

COMM 6700 DISCOURSE IN SOCIAL LIFE (3) LEC. 3. Advanced approaches to language and social interaction as they reflect and shape identity of self, relationships, and group memberships. Graduate students only

COMM 7000 COMMUNICATION THEORY (3) LEC. 3. Critical examination of contemporary theories in communication.

COMM 7010 QUALITATIVE METHODS OF COMMUNICATION RESEARCH (3) LEC. 3. Qualitative research in communication; emphasis on understanding and engaging in a variety of qualitative methods.

COMM 7020 QUANTITATIVE METHODS OF COMMUNICATION RESEARCH (3) LEC. 3. Quantitative research in communication; emphasis on understanding and doing empirical research.

COMM 7100 INSTRUCTIONAL COMMUNICATION THEORY & PRACTICE (3) SEM. 3. History, theory, and concepts central to the study and practice of instructional communication.

COMM 7230 RHETORICAL CRITICISM (3) LEC. 3. Advanced methods in rhetorical criticism, including tools for the analysis of persuasive messages.

COMM 7300 APPROACHES TO STUDYING LANGUAGE AND SOCIAL INTERACTION (3) LEC. 3. Major approaches to studying language and social interaction that collectively make up discourse analysis.

COMM 7410 DEVELOPMENT OF RHETORICAL THEORY (3) LEC. 3. Historical survey of rhetorical theory from ancient to contemporary era; special attention to the role of rhetoric in shaping attitudes towards persuasion.

COMM 7420 SEMINAR IN PERSUASION AND ATTITUDE CHANGE (3) LEC. 3. Critical examination of current theory and research in the persuasive act and its effects.
COMM 7430 SEMINAR IN AMERICAN PUBLIC ADDRESS (3) LEC. 3. Investigation of key issues and debates that have emerged in post-World War II America.

COMM 7440 SEMINAR IN ARGUMENTATION AND DEBATE (3) SEM. 3. Analysis of the fundamental theories of argumentation.

COMM 7450 SEMINAR IN INTRAPERSONAL PROCESSES IN COMMUNICATION (3) SEM. 3. Theories of cognitive and affective processing of information during speaking and listening.

COMM 7460 SEMINAR IN INTERPERSONAL COMMUNICATION (3) SEM. 3. Theories of the structure and function of interpersonal (dyadic) communication focusing on conversational behavior, traits, relationships, and persuasion.

COMM 7470 SEMINAR IN SMALL GROUP COMMUNICATION (3) SEM. 3. Advanced study of the principles of communication as they apply to the small group setting.

COMM 7480 SEMINAR IN ORGANIZATIONAL COMMUNICATION (3) SEM. 3. In-depth approach to the study of communication processes within the setting of modern organizations.

COMM 7490 HEALTH COMMUNICATION (3) LEC. 3. Examination and application of social science research approaches to the study of health communication.

COMM 7500 GENDER COMMUNICATION (3) LEC. 3. Exploration of current theories and research on the relationship between communication and gender.

COMM 7600 MASS COMMUNICATION THEORY (3) LEC. 3. Exploration of major areas of concern to the theoretical study of mass communication and the social impact of mediated messages.

COMM 7610 STUDIES IN POPULAR CULTURE AND MASS COMMUNICATION (3) LEC. 3. Critical approaches to identifying, interpreting and experiencing popular culture texts within historical, cultural and communication contexts.

COMM 7620 BROADCAST PROGRAMMING AND CRITICISM (3) LEC. 3. Exploration of critical, theoretical, and organizational issues relevant to programming and the production of culture within mass media environments.

COMM 7630 MEDIA MANAGEMENT (3) LEC. 3. In-depth analysis of current management issues specific to media managers in a multi-cultural world.

COMM 7640 SEMINAR IN FILM THEORY AND CRITICISM (3) SEM. 3. Exploration of classical and contemporary film theories and criticism.

COMM 7650 THE MASS MEDIA AND AMERICAN POLITICS (3) LEC. 3. Examination of the role of the mass communication system in the American political system.

COMM 7660 CULTURAL STUDIES IN MASS MEDIA (3) LEC. 3. Examination of communication research approaches to the study of culture and media.

COMM 7670 CONTEMPORARY ISSUES IN FIRST AMENDMENT LAW (3) LEC. 3. Exploration of controversial issues and cases in First Amendment Law that have been recently decided, are currently before courts, and have shaped the constitutional landscape in the United States.

COMM 7680 SPORTS, MEDIA, AND CULTURE (3) LEC. 3. Cultural implications of the relationship between sports and media.

COMM 7810 PUBLIC RELATIONS THEORY (3) LEC. 3. Current areas of concern in the theoretical study of public relations.

COMM 7820 PUBLIC RELATIONS CAMPAIGNS (3) LEC. 3. Application of public relations and communication concepts to campaign challenges.

COMM 7830 PUBLIC RELATIONS CASE STUDIES (3) LEC. 3. Examination of research on public relations case studies to provide a theoretical basis for analyzing similar situations in on the job.

COMM 7840 COMMUNICATION TRAINING AND CONSULTING (3) LEC. 3. Theory, concepts, and skills needed to be an effective communication trainer or consultant.
COMM 7850 PUBLIC RELATIONS ETHICS (3) LEC. 3. This course provides a framework for understanding ethics in public relations. We will discuss ethical behavior and thinking within the context of practicing public relations. Topics discussed will include relationships, accountability, responsibility, advocacy, truth, and transparency.

COMM 7930 DIRECTED STUDIES (1-3) IND. Conferences, readings, research, and reports in general communication, mass communication, or public relations. Course may be repeated for a maximum of 3 credit hours.

COMM 7970 SPECIAL TOPICS IN COMMUNICATION (3) SEM. 3. Advanced treatment of contemporary topics, trends, current research findings, and opportunities. Course may be repeated for credit with change in topic.

COMM 7980 NON-THESIS PROJECT IN COMMUNICATION (3-6) LEC. SU. Pr. COMM 7000 and COMM 7010 and COMM 7020. and Minimum 27 graduate hours. Professional experience in communication area of interest. Must include managerial experience. Only 3 hours will apply to the degree. Course may be repeated for a maximum of 6 credit hours.

COMM 7990 RESEARCH AND THESIS (1-6) MST. Course may be repeated with change in topics.

Journalism Courses

JRNL 1100/1103 JOURNALISM FUNDAMENTALS (3) LEC. 3. Emphasis on Associated Press Stylebook, word usage, and spelling for students interested in print, broadcast, public relations, and web-based writing.

JRNL 1AA0 JOURNALISM FUNDAMENTALS ENTRANCE EXAM (0) LAB. 1.5. SU. JRNL 1AA0 is an exam option for students who are required to take JRNL 1100. The course will test students on spelling, grammar, Associated Press Style and word usage to mirror content covered in the in-person course. This course is not repeatable.

JRNL 2210/2213 NEWSWRITING (3) LEC. 3. Pr. JRNL 1100 or JRNL 1AA0. With a minimum grade of “B” in JRNL 1100. Introduction to newswriting techniques, with emphasis on learning news values, recognizing parts of a story, and writing stories that meet standards of accuracy, grammar, style, spelling, law, and ethics.

JRNL 2310/2313 REPORTING (3) LEC. 3. Pr. JRNL 1100 or JRNL 1AA0 and JRNL 2210. With a minimum grade of ”B” in JRNL 1100. Preparation for careers in gathering and telling the news. Course emphasizes the writing of accurate, clear, and meaningful news stories for print and digital formats.

JRNL 2320/2323 ADVISING STUDENT PUBLICATIONS (3) LEC. 3. Primarily for non-journalism and non-communication majors. Role and responsibilities of the publication adviser in high school and college.

JRNL 3010/3013 BROADCAST & DIGITAL NEWS PRODUCTION (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and JRNL 1100 or JRNL 1AA0. with a minimum grade of “B” in JRNL 1100 and Declared major in AGCO, COMM, JRNL, PRCM, MDIA or MDIV. Introduction to the basics of digital video production. Emphasis on techniques used in producing newscasts for broadcast, web and mobile devices.

JRNL 3020/3023 BROADCAST & DIGITAL NEWS REPORTING (3) LEC. 3. Pr. JRNL 3010. with a minimum grade of “B” in JRNL 1100 and Declared major in AGCO, COMM, JRNL, PRCM, MDIA or MDIV. Writing and reporting digital news stories on deadline for broadcast, online, social media, and mobile outlets.

JRNL 3103 GLOBAL JOURNALISM AND MEDIA SYSTEMS (3) DSL. 3. The Internet and social media have created a world more connected than ever. Examines the economic, political, technological, and cultural changes that impact media and journalism globally.

JRNL 3110 INTRODUCTION TO APPLIED JOURNALISM (3) LEC. 3. Pr. JRNL 1100 or JRNL 1AA0 and JRNL 2210 and JRNL 2310 and (CMJN 2100 or CMJN 2103), with a minimum grade of “B” in JRNL 1100 and Declared major in AGCO, COMM, JRNL, PRCM, MDIV or MDIA. Introduction to how a media organization operates; provides an opportunity for students to gain practical, hands-on journalism experience.

JRNL 3220/3223 MAGAZINE AND FEATURE WRITING (3) LEC. 3. Pr. JRNL 1100 or JRNL 1AA0 and (CMJN 2100 or CMJN 2103) and JRNL 2210. with a minimum grade of ”B” in JRNL 1100 and Declared major in AGCO, COMM, JRNL, PRCM, MDIA or MDIV. Introduction to writing colorful, human-interest non-fiction pieces that illustrate drama and impact. Students will learn how to pitch their ideas to editors in print and digital markets.
JRNL 3410/3413 PHOTOJOURNALISM (3) LEC. 3. Pr. JRNL 1100 or JRNL 1AA0 and (CMJN 2100 or CMJN 2103) and JRNL 2210. with a minimum grade of "B" in JRNL 1100 and Declared major in AGCO, COMM, JRNL, PRCM, MDIA or MDIV. Uses, techniques, and processes of digital photography for the newspaper, magazine, and web-based industries. Operations of digital SLRs and Photoshop and techniques for variety of assignments are addressed.

JRNL 3470/3473 EDITING AND DESIGN (3) LEC. 3. Pr. JRNL 1100 or JRNL 1AA0 and JRNL 2210 and (CMJN 2100 or CMJN 2103). with a minimum grade of "B" in JRNL 1100 and Declared major in AGCO, COMM, JRNL, PRCM, MDIA or MDIV. Introduction to the basics of design, layout, headline writing, typography, use of color, and selection of images for visual impact. Students will learn how to design news, sports, and magazine layouts, using Adobe InDesign and Photoshop.

JRNL 3510/3513 MULTIMEDIA JOURNALISM (3) LEC. 3. Pr. JRNL 1100 or JRNL 1AA0 and (CMJN 2100 or CMJN 2103) and JRNL 2210. with a minimum grade of "B" in JRNL 1100 and Declared major in AGCO, COMM, JRNL, PRCM, MDIA or MDIV. Introduction to multimedia journalistic storytelling. Reporting and production course where students use various technologies to produce journalism stories for digital platforms.

JRNL 3530/3533 SPORTS REPORTING (3) LEC. 3. Pr. (JRNL 1100 or JRNL 1AA0) and JRNL 2210 and (CMJN 2100 or CMJN 2103). with a minimum grade of "B" in JRNL 1100 and Declared major in AGCO, COMM, JRNL, PRCM, MDIA or MDIV. Sports reporting for print, broadcast, and online media, with emphasis on interviewing athletes, covering sporting events, and learning about issues surrounding sports.

JRNL 4230/4233 ADVANCED REPORTING (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and JRNL 1100 or JRNL 1AA0 and JRNL 2210 and JRNL 2310 and (JRNL 3220 and JRNL 3020) or (JRNL 3220 and JRNL 3530) or (JRNL 3020 or JRNL 3530). with a minimum grade of "B" in JRNL 1100 and Declared major in AGCO, COMM, JRNL, PRCM, MDIA or MDIV. Developing and writing news stories under deadline pressure; investigative and interpretative reporting.

JRNL 4320/4323 ENTREPRENEURIAL JOURNALISM (3) LEC. 3. Pr. JRNL 1100 and (CMJN 2100 or CMJN 2103). with a minimum grade of "B" in JRNL 1100 and Declared major in AGCO, COMM, JRNL, PRCM, MDIA or MDIV. Emphasis on content, advertising, audience, and marketing in news organizations and applying entrepreneurial principles to journalism start-ups.

JRNL 4410/4413 JOURNALISM HISTORY (3) LEC. 3. Issues facing the American press, from colonial times to the present, with emphasis on regional and state issues.

JRNL 4417 HONORS JOURNALISM HISTORY (3) LEC. 3. Pr. Honors College. Issues facing the American press, from colonial times to the present, with emphasis on regional and state issues. Credit will not be given for both JRNL 4410 and JRNL 4417.

JRNL 4470/4473 ADVANCED MAGAZINE AND FEATURE WRITING (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and JRNL 1100 or JRNL 1AA0 and JRNL 2210 and JRNL 2310 and JRNL 3220 and (JRNL 3020 or JRNL 3530). with a minimum grade of "B" in JRNL 1100 and Declared major in AGCO, COMM, JRNL, PRCM, MDIA or MDIV. Emphasis on creating long-form, non-fiction articles for print and digital publications through graceful and innovative writing techniques and skillful reporting.

JRNL 4480/4483 ADVANCED PUBLICATION DESIGN (3) LEC. 3. Pr. JRNL 1100 or JRNL 1AA0 and CMJN 2100 or CMJN 2103 and JRNL 2210 and JRNL 3470. with a minimum grade of "B" in JRNL 1100 and Declared major in AGCO, COMM, JRNL, PRCM, MDIA, MDIV or Departmental approval. Desktop publishing to produce print publications, including brochures and newsletters, and with exposure to web page, advertising, and magazine design.

JRNL 4530 ADVANCED SPORTS REPORTING (3) LEC. 3. JRNL 4530 provides the capstone course experience for students in the sports journalism emphasis. Students will build skills in areas such as writing long form articles, personality features, enterprise reporting, oral history projects, and comprehensive game coverage, and working with tight deadlines.

JRNL 4870/4873 COMMUNITY JOURNALISM (3) LEC. 3. Pr. (JRNL 1100 or JRNL 1AA0) and JRNL 2210 and (CMJN 2100 or CMJN 2103). with a minimum grade of "B" in JRNL 1100. Civic role of community journalists.

JRNL 4920 JOURNALISM INTERNSHIP (3) INT. 3. Pr. (CMJN 2100 or CMJN 2103) and JRNL 1100 or JRNL 1AA0 and JRNL 2210 and JRNL 2310 and (JRNL 3020 or JRNL 3220 or JRNL 3530) and (JRNL 3010 or JRNL 3110 or JRNL 3410 or JRNL 3470 or JRNL 3510). With a minimum grade of "B" in JRNL 1100 and one specialized reporting course and one journalism production course and Declared major in JRNL. Opportunity to apply classroom experience to career setting. Internship must be a supervised, closely monitored work experience, appropriate to the major, that takes place in a professional setting. Admission to internship program.
JRNL 4930 DIRECTED STUDIES (1-4) IND. Research and analysis of specific areas of journalism. Course may be repeated for a maximum of 6 credit hours.

JRNL 4967 HONORS SPECIAL PROBLEMS (1-3) LEC. 3. Pr. Honors College or departmental approval. Course may be repeated for a maximum of 3 credit hours.

JRNL 4970 SPECIAL TOPICS IN JOURNALISM (3) AAB. 3. Pr. JRNL 1100 or JRNL 1AA0 and JRNL 2210. With a minimum grade of B in JRNL 1100 and Declared major in AGCO, COMM, JRNL, PRCM, MDIA or MDIV. Study of narrowly defined journalism topics not already covered in the current JRNL curriculum. Course may be repeated for a maximum of 6 credit hours.

JRNL 4997 HONORS THESIS (1-3) IND. Pr. Honors College or departmental approval. Course may be repeated for a maximum of 3 credit hours.

Media Studies Courses

MDIA 2350/2353 INTRODUCTION TO FILM STUDIES (3) LEC. 2. LAB. 2. Introduction to film analysis, modes of film practice and critical approaches to the study of cinema. May count either MDIA 2350/MDIA 2353 or RTVF 2350/RTVF 2353.

MDIA 2420/2423 INTRODUCTION TO FILMMAKING (3) STU. 3. Pr. CMJN 2100 or CMJN 2103. A studio course introducing students to the theory and practice of cinematography and editing for the short film.

MDIA 2700/2703 INTRODUCTION TO VISUAL MEDIA (3) STU. 3. Pr. CMJN 2100 or CMJN 2103. A studio course introducing students to concepts and techniques of digital image-making for the short film.

MDIA 3100/3103 INTERMEDIATE FILMMAKING (3) STU. 3. Pr. MDIA 2420 and MDIA 2700. An intermediate studio course in which students develop sound design skills for the short film.

MDIA 3110/3113 CINEMATOGRAPHY (3) STU. 3. Pr. MDIA 2420 and MDIA 2700. An intermediate studio course in which students explore the art of filmmaking through methods and techniques of cinematography for the short film. The course structure will emphasize short scene studies which focus on visual outcomes including cameras technology, motion, lighting, composition and post-production.

MDIA 3120/3123 FILM EDITING (3) STU. 3. Pr. MDIA 2700 and MDIA 2420. An intermediate studio course in which students explore the theory and practice of editing for the short film.

MDIA 3210/3213 SOUNDTRACKS, MUSIC AND MEDIA (3) LEC. 3. Historical, artistic, sociocultural and economic contexts of music and media.

MDIA 3300/3303 FOUNDATION OF MEDIA STUDIES (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (MDIA 2350 or MDIA 2353). This is a foundational course that provides students with a survey of the key theoretical approaches to studying the cultural, social, political and economic dimensions of entertainment media.

MDIA 3310 HISTORY OF NEW AND EMERGING MEDIA (3) LEC. 3. Pr. (MDIA 3300 or MDIA 3303) and (CMJN 2100 or CMJN 2103). This course examines the origins and development of the Internet and related platforms including USENET, the World Wide Web, and social media. In the process, the course addresses many of the social, political, economic, and industrial implications that have accompanied the use of the Internet as a communication technology.

MDIA 3320/3323 GENDER AND SEXUALITY IN MEDIA (3) LEC. 3. Pr. (MDIA 2350 or MDIA 2353) and (CMJN 2100 or CMJN 2103). This course is focused on the relationship between gender, sexuality, identity and the media, looking at key theories, representation, audience engagement and industrial imperatives.

MDIA 3350/3353 SCREENWRITING (3) LEC. 3. Pr. CMJN 2100 or CMJN 2103. A writing course introducing students to the basic concepts of screen storytelling and the craft of turning story ideas into screenplays. MDIA and MDIV majors only.

MDIA 3360/3363 AUDIO STORYTELLING AND PODCASTING (3) STU. 3. Pr. CMJN 2100 or CMJN 2103. Students will gain hands-on experience in producing audio stories and in designing and producing podcasts.

MDIA 3370/3373 GLOBAL MEDIA (3) LEC. 3. Pr. MDIA 2350 or MDIA 2353. Global media is focused on the complex global dimensions of media production, distribution and reception, with a primary focus on entertainment media.

MDIA 3580/3583 REPRODUCING POPULAR CULTURE (3) LEC. 3. Postmodern study on the widespread recycling of media artifacts. May count either MDIA 3580 or MDIA 3583 or RTVF 3580.
MDIA 3600/3603 FILM GENRES (3) LEC. 3. Pr. MDIA 2350 or MDIA 2352. A critical examination of popular film genres and how they have been used historically within the film industry, film studies, media criticism and popular culture.

MDIA 3650/3653 MEDIA INDUSTRIES (3) LEC. 3. Pr. MDIA 2350 or MDIA 2353. The course provides students a comprehensive overview of how the media industries work, why they work as they do, and the broader theoretical and practical implications of the media industries.

MDIA 3700/3703 AUDIENCES AND FAN CULTURE (3) LEC. 3. Pr. MDIA 2350 and MDIA 2353. This course explores theories of the audience in media and cultural studies, the history of studying media audiences, while also considering contemporary scholarship, technology, identity and fan communities.

MDIA 3750/3753 RACE AND AMERICAN FILM HISTORY (3) LEC. 3. Pr. MDIA 2350 or MDIA 2352. A critical examination of the historical and social constructions of race and ethnicity in popular U.S. films.

MDIA 3820/3823 SEQUENCE DESIGN (3) STU. 3. Pr. MDIA 2420 and MDIA 2700. An intermediate studio course in which students develop animation skills for title design.

MDIA 3970/3973 SPECIAL TOPICS (3) AAB. 3. Topics in Media Studies at the intermediate level. Course may be repeated for a maximum of 6 credit hours.

MDIA 4200/4203 CULTURAL HISTORY OF BROADCASTING (3) LEC. 3. Pr. (MDIA 3300 or MDIA 3303) and (CMJN 2100 or CMJN 2103). This course examines the social, political, industrial and cultural forces behind the development of U.S. broadcasting. We will consider broadcasting as an industry, cultural form, art form, and social institution.

MDIA 4210/4213 POPULAR CULTURE STUDIES (3) LEC. 3. Pr. (MDIA 3300 or MDIA 3303 or RTVF 3300 or RTVF 3303) and (CMJN 2100 or CMJN 2103). Examines myths, icons, rituals, heroes, celebrities, genres, narratives, stereotypes as experienced and presented within communication processes. Declared major in AGCO, COMM, JRNL, MDIA or PRCM. May count either MDIA 4210 or RTVF 4210.

MDIA 4250/4253 SCREEN CULTURE (3) LEC. 3. Pr. MDIA 3300 or MDIA 3303. A critical study of the historical development and the cultural meanings of dominant screen technologies (film screens, TVs, computer screens, mobile devices).

MDIA 4300/4303 BROADCAST PROGRAMMING AND CRITICISM (3) LEC. 3. Pr. (MDIA 3300 or MDIA 3303 or RTVF 3300 or RTVF 3303) and (CMJN 2100 or CMJN 2103). Introduces critical, theoretical, and organizational concepts, strategies, processes, and frameworks for programming for mass media systems. Declared major in AGCO, COMM, JRNL, MDIA, MIDIV or PRCM.

MDIA 4310/4313 MEDIA AND SOCIETY (3) LEC. 3. Pr. (MDIA 3300 or MDIA 3303 or RTVF 3300 or RTVF 3303) and (CMJN 2100 or CMJN 2103). Examination of the relationship between the mass communication industry and a mass society. Declared major in AGCO, COMM, JRNL, MDIA, MIDIV or PRCM.

MDIA 4350/4353 TELEVISION CRITICISM (3) LEC. 3. LAB. 1. Pr. MDIA 3303 or MDIA 3300. This course prepares students to critically analyze television with a deep study of the aesthetics of television coupled with an overview of critical approaches to television research.

MDIA 4390 FILM AUTHORS (3) LEC. 2. LAB. 1. Pr. (MDIA 3300 or MDIA 3303 or RTVF 3300 or RTVF 3303) and (CMJN 2100 or CMJN 2103). In-depth study of one or more filmmakers important to the development of film as a popular art form. Declared major in AGCO, COMM, JRNL, MDIA or PRCM. May count either MDIA 4390 or RTVF 4390.

MDIA 4400/4403 ADVERTISING AND CONSUMER CULTURE (3) LEC. 3. Pr. MDIA 3300 or MDIA 3303. This course is a critical examination of the relationship between the advertising industries and the media industries and how they have influenced each other as well as mainstream US culture.

MDIA 4420/4423 HISTORY OF MEDIA TECHNOLOGY (3) LEC. 3. Pr. (MDIA 3300 or MDIA 3303 or RTVF 3300 or RTVF 3303) and (CMJN 2100 or CMJN 2103). History of media technology from 18th-21st centuries. Declared major in AGCO, COMM, JRNL, MDIA or PRCM. May count either MDIA 4420 or RTVF 4420.

MDIA 4500/4503 CULTURE AND TECHNOLOGY (3) LEC. 3. Pr. MDIA 3300 or MDIA 3303 and CMJN 2100 or CMJN 2103. This course explores the complex interrelations, issues and impacts between culture and technology through a range of interdisciplinary academic, professional and global settings, contexts and texts.
MDIA 4580/4583 FAME, CELEBRITY, AND MEDIA CULTURE (3) LEC. 3. Pr. (MDIA 3300 or MDIA 3303 or RTVF 3300 or RTVF 3303) and CMJN 2100 or CMJN 2103. Examination of celebrity and fame as distinguishing cultural phenomena. Declared major in AGCO, COMM, JRNL, MDIA, MDIV or PRCM. May count either MDIA 4580 or MDIA 4583 or RTVF 4580.

MDIA 4600/4603 ADAPTATION FOR THE SHORT FILM (3) LEC. 3. Pr. MDIA 3100 or RTVF 3100 or RTVF 3103 or RTVF 3107. A survey of ways in which film can be adapted from pre-existing sources to create new works that stand on their own. Declared major in AGCO, COMM, JRNL, MDIA, MDIV or PRCM. May count either MDIA 4600 or MDIA 4603 or RTVF 4600.

MDIA 4920 INTERNSHIP (3) INT. 200. Pr. CMJN 2100 or CMJN 2103 and MDIA 3300 or MDIA 3303. Opportunity to apply classroom experience to career setting. Internship must be a supervised, closely monitored work experience, appropriate to the major, that takes place in a professional setting.

MDIA 4930/4933 DIRECTED STUDIES (3) IND. 3. Pr. (MDIA 3300 or MDIA 3303 or RTVF 3300 or RTVF 3303) and (CMJN 2100 or CMJN 2103). Study of narrowly-defined MDIA topic not already covered in the MDIA curriculum and under the direction of an MDIA faculty. May be repeated with a change in topic. Declared major in AGCO, COMM, JRNL, MDIA, MDIV or PRCM. May count either MDIA 4930 or MDIA 4933 or MDIA 4970 or RTVF 4970. Course may be repeated for a maximum of 6 credit hours.

MDIA 4940/4943 VISUAL MEDIA PROJECTS (3) STU. 3. Pr. MDIA 3100. Capstone course in which students work as a team on an advanced visual media project.

MDIA 4970/4973 SPECIAL TOPICS (3) LEC. 3. Pr. (MDIA 3300 or MDIA 3303) and (CMJN 2100 or CMJN 2103). Topics in Media Studies at the advanced level. Course may be repeated for a maximum of 6 credit hours.

Public Relations Commu Courses

PRCM 2400/2403 FOUNDATIONS OF PUBLIC RELATIONS (3) LEC. 3. This course is designed to be an overview of the functions, practices and growing application of public relations in both private industry and the public sector. May count either PRCM 2400 /PRCM 2043 or PRCM 3040/PRCM 3043.

PRCM 2500/2503 PUBLIC RELATIONS CASE STUDIES & ETHICS (3) LEC. 3. Pr. (JRNL 1100 or JRNL 1AA0) and (CMJN 2100 or CMJN 2103) and (PRCM 2400 or PRCM 2403). This is a course designed to provide Public Relations students with an understanding of both effective and ineffective methods of PR through studying actual cases from the field itself with special attention given to the ethical aspect of decision making.

PRCM 3000/3003 MULTIMEDIA WRITING FOR PUBLIC RELATIONS (3) LEC. 3. Pr. JRNL 1100 or JRNL 1AA0 and (PRCM 2500 or PRCM 2503) and (CMJN 2100 or CMJN 2103) and (PRCM 2400 or PRCM 2403 or PRCM 3040 or PRCM 3043). JRNL 1100 with a minimum grade of “B” in JRNL 1100. PRCM or AGCO major only. This course will have an emphasis on communication tactics; plan, write and produce public relations tools; audience and media selection; print and electronic media.

PRCM 3080/3083 INTERNATIONAL PUBLIC RELATIONS (3) LEC. 3. Pr. CMJN 2100 or CMJN 2103. Exploration of public relations theory, research, and practice in an international context.

PRCM 3090/3093 PUBLIC RELATIONS IN POLITICAL PROCESSES (3) LEC. 3. Pr. CMJN 2100 or CMJN 2103. Surveys of the intersection of politics and public relations, emphasizing theoretical and practical principles in political processes.

PRCM 3260/3263 STRATEGIC COMMUNICATION IN PUBLIC RELATIONS (3) LEC. 3. Pr. JRNL 1100 and (CMJN 2100 or CMJN 2103) and (PRCM 2400 or PRCM 2403). JRNL 1100 with a minimum grade of “B” in JRNL 1100. Framework for the strategy and integration of messages within public relations.

PRCM 3270/3273 PUBLIC RELATIONS IN THE NOT-FOR-PROFIT ARENA (3) LEC. 3. Pr. CMJN 2100 or CMJN 2103. Nonprofit organizations and foundations and the role of public relations within those organizations.

PRCM 3280/3283 SOCIAL MEDIA AND PUBLIC RELATIONS (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and JRNL 1100 or JRNL 1AA0 and (PRCM 2400 or PRCM 2403 or PRCM 3040 or PRCM 3043) and (PRCM 2500 or PRCM 2503). JRNL 1100 with a minimum grade of “B” in JRNL 1100. Declared major in AGCO or PRCM. Examination of how new social media impact public relations strategies.

PRCM 4020/4023 DIGITAL STYLE AND DESIGN IN PUBLIC RELATIONS MESSAGES (3) LEC. 3. Pr. JRNL 1100 or JRNL 1AA0 and (CMJN 2100 or CMJN 2103) and (PRCM 2400 or PRCM 2403 or PRCM 3040 or PRCM 3043) and (PRCM 2500 or PRCM 2503). JRNL 1100 with a minimum grade of “B” in JRNL 1100. PRCM or AGCO major only. Introduction to the use of style and design in public relations messages. Departmental approval or Declared major in AGCO or PRCM.
PRCM 4400/4403 PUBLIC RELATIONS RESEARCH (3) LEC. 3. Pr. JRNL 1100 or JRNL 1AA0 and (CMJN 2100 or CMJN 2103) and (PRCM 2400 or PRCM 2403) and (PRCM 2500 or PRCM 2503 or PRCM 3040 or PRCM 3043). JRNL 1100 with a minimum grade of "B" in JRNL 1100. PRCM or AGCO major only. Identifying, characterizing and evaluating stakeholder groups and alternative channels of communication; formal research procedures including sampling, instrument design, information gathering, data processing, analysis and reporting.

PRCM 4500/4503 PUBLIC RELATIONS CAMPAIGNS (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and JRNL 1100 or JRNL 1AA0 and (PRCM 2400 or PRCM 2403) and (PRCM 2500 or PRCM 2503 or PRCM 3040 or PRCM 3043) and PRCM 3000 and PRCM 4400. JRNL 1100 with a minimum grade of "B" in JRNL 1100. Application of theory, research data, and problem-solving techniques in the development of comprehensive public relations strategies.

PRCM 4920 INTERNSHIP (3) AAB/INT. 200. Pr. (CMJN 2100 or CMJN 2103) and (PRCM 2400 or PRCM 2403) and (PRCM 2500 or PRCM 2503 or PRCM 3040 or PRCM 3043). Opportunity to apply classroom experience in career setting. Internship must be a supervised, closely monitored work experience, appropriate to the major, that takes place in a professional setting.

PRCM 4930 DIRECTED STUDIES IN PUBLIC RELATIONS (3) LEC. 3. Pr. JRNL 1100 or JRNL 1AA0 and (PRCM 3040 or PRCM 3043) and (CMJN 2100 or CMJN 2103). with a minimum grade of "B" in JRNL 1100. Independent Study on a specific topic of interest not already addressed in any regular PRCM course.

PRCM 4970/4973 SPECIAL TOPICS IN PUBLIC RELATIONS (3) LEC. 3. Pr. JRNL 1100 and (PRCM 3040 or PRCM 3043) and (CMJN 2100 or CMJN 2103) and (PRCM 2500 or PRCM 2503). with a minimum grade of "B" in JRNL 1100. Focus on narrowly defined PRCM topics not already covered in the current PRCM curriculum.

Communication and Journalism Courses

CMJN 2100/2103 CONCEPTS IN COMMUNICATIONS AND JOURNALISM (3) LEC. 2. LAB. 1. Introduction to the basic principles of various communication forms, the dominant communication theories, and communication industries. May count either CMJN 2100 or CMJN 2103.

CMJN 2910 COMMUNICATION AND JOURNALISM PRACTICUM (1-3) PRA. SU. Departmental Approval. Practical experiences in potential career fields gained while working in professional settings. One to three hours variable credit. Course may be repeated for a maximum of 3 credit hours.

CMJN 3110/3113 SPORTS MEDIA RELATIONS (3) LEC. 3. Pr. CMJN 2100 or CMJN 2103. Focuses on the major concepts and theories of the management of sports media relations. Will include discussion of issues, philosophies and cases. May count either sections CMJN 3110, CMJN 3113 or MDIA 4350.

CMJN 3210/3213 NEWS AND SPORTS ANNOUNCING (3) LEC. 3. Pr. CMJN 2100 or CMJN 2103. This class focuses on the theory and practical technique of studio and field announcing. Primary emphasis will be placed on announcing for news and sports. Additional attention will be given to voice over announcing.

CMJN 3350/3353 VISUAL COMMUNICATION (3) LEC. 3. Visual literacy, cognition, aesthetics, critical evaluation, and technology in human communication, with emphasis on impact of visual media in informative, interpretive, and persuasive message.

CMJN 3410/3413 INTRODUCTION TO SPORTS VIDEO PRODUCTION (3) LEC. 2, LST. 1. Introduction to multi-camera live sports production, video and audio editing techniques, how to operate equipment, create basic animated graphics, learn work crew positions and understand a script. Students will complete work for the SEC Network and War Eagle Productions.

CMJN 3510/3513 CONTROL ROOM OPERATIONS (3) LEC. 3. Introduction to various control room positions and equipment associated with a live broadcast. Students will learn the skills needed to set up, adjust and operate production equipment before and during broadcasts.

CMJN 3650/3653 RHETORIC OF SPORTS (3) LEC. 3. Examination of sports in the public sphere, using rhetorical theories to understand how sports contribute to social issues such as identity, community, ethnicity, gender, and politics. May count either CMJN 3650 or COMM 3650.

CMJN 4000/4003 MASS MEDIA LAW AND REGULATION (3) LEC. 3. Pr. CMJN 2100 or CMJN 2103. and junior or senior standing. Laws and regulations that govern journalists, media content and industries.

CMJN 4320/4323 SPORTS MEDIA MANAGEMENT (3) LEC. 3. Pr. CMJN 2100. Addresses principles and practices of managing sports media properties across multiple platforms.
CMJN 4340/4343 MASS COMMUNICATION AND FAMILY (3) LEC. 3. Examination of the relationship between the American family and the mass communication industry.

CMJN 4370/4373 MASS COMMUNICATION AND RELIGION (3) LEC. 3. Examines the relationship between mass communication and religion. Portrayals and influences will be analyzed.

CMJN 4400/4403 GENDER COMMUNICATION (3) LEC. 3. Examination of the ways in which gender is created, maintained, and/or changed through communication.

CMJN 4410/4413 ADVANCED SPORTS VIDEO PRODUCTION (3) LEC. 2, LST. 1. Pr. CMJN 3410. This course is designed to give students in-depth training that covers advanced video editing techniques and effects. In addition, students will gain experience with advanced camera operation and techniques, focusing on high-quality production throughout the process.

CMJN 4430/4433 SPORTS, MEDIA AND SOCIETY (3) LEC. 3. Cultural and professional implications of the relationship between sports and media. May count either CMJN 4430 or JRNL 4430.

CMJN 4510/4513 SPORTS STORYTELLING & VIDEO PROFILES (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (CMJN 3410 or CMJN 3413) and (JRNL 1100 or JRNL 1AA0) and (JRNL 2210 or JRNL 2213). Technology has changed the landscape of how sports stories are seen and ingested today. Students will explore the art of sports storytelling and learn the foundational skills needed to effectively use cameras, lighting, editing equipment and other industry-standard tools to tell a visual story.

CMJN 4610/4613 LIVE SPORTS PRODUCING (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (JRNL 1100 or JRNL 1AA0) and (JRNL 2210 or JRNL 2213) and CMJN 3510. Students will learn how to produce live events for broadcast and in-venue video boards. Students will gain the necessary knowledge and skills for producing a high-quality live event. This includes preparation, decision making skills and industry-standard terminology.

CMJN 4970/4973 SPECIAL TOPICS IN COMMUNICATION AND JOURNALISM (3) LEC. 3. Specialized topics related to the study and practice of Communication, Journalism, Media Studies and/or Public Relations. Course may be repeated for a maximum of 6 credit hours.

CMJN 5100 CMJN ABROAD (3) AAB. 3. Explores theory, research, and practice in the fields of communication, media, and public relations in an international context. May count either CMJN 5100 or CMJN 6100.

CMJN 6100 CMJN ABROAD (3) AAB. 3. Explores theory, research, and practice in the fields of communication, media, and public relations in an international context. May count either CMJN 5100 or CMJN 6100.

Communication Courses

COMM 1000/1003 PUBLIC SPEAKING (3) LEC. 3. Oral communication theory and practice in a public speaking setting, with emphasis on content, organization, delivery, and adaptation to the audience.

COMM 1007 HONORS PUBLIC SPEAKING (3) LEC. 3. Pr. Honors College. This course will focus on numerous elements of oral communication - public speaking, group communication and interpersonal communication. This is different from a typical speech class that focuses solely on public speaking. An emphasis will also be placed on debate(forensics).

COMM 2010/2013 COMMUNICATION IN SOCIETY (3) LEC. 3. Theory underlying the construction of rhetorical messages as well as critical perspectives for the analysis of public discourse. May count either COMM 2010 or COMM 2013.

COMM 2400/2403 INTRODUCTION TO WORKPLACE COMMUNICATION (3) LEC. 3. Communication in modern organizations, emphasizing practice in areas such as interviewing, managing meeting, and conducting professional presentations. May count either COMM 2400 or COMM 2403.

COMM 2410/2413 SMALL GROUP COMMUNICATION (3) LEC. 3. Theory and practice of competent communication in task-oriented small group settings such as committees. Topics include roles, leadership, decision making, problem solving, and conflict management. May count either COMM 2410 or COMM 2413.

COMM 3100/3103 ADVANCED PUBLIC SPEAKING (3) LEC. 3. Pr. COMM 1000 or COMM 1003. Refining the knowledge and skills necessary for communicating clearly and effectively in oral presentations. May count either COMM 3100 or COMM 3103.

COMM 3110/3113 PERSUASION (3) LEC. 3. Understanding and analyzing persuasive messages. Survey of theoretical approaches to attitude formation and change. Developing skills as a critical evaluator of persuasive messages. May count either COMM 3110 or COMM 3113.
COMM 3300/3303 COMMUNICATION AND CONFLICT (3) LEC. 3. Enhance awareness of and develop skills in managing conflict processes in interpersonal relationships. May count either COMM 3300 or COMM 3303.

COMM 3400/3403 ORGANIZATIONAL COMMUNICATION (3) LEC. 3. This course examines theory, approaches, and processes associated with organizational communication. May count either COMM 3400 or COMM 3403.

COMM 3450/3453 INTERCULTURAL COMMUNICATION (3) LEC. 3. Different types of problems encountered when communicating with different cultures. May count either COMM 3450 or COMM 3453.

COMM 3500/3503 FOUNDATIONS OF HUMAN COMMUNICATION (3) LEC. 3. Pr. CMJN 2100 or CMJN 2103. Theories examining the nature of human communication. May count either COMM 3500 or COMM 3503.

COMM 3510/3513 RESEARCH IN HUMAN COMMUNICATION (3) LEC. 3. Pr. CMJN 2100 or CMJN 2103. Introduction to and application of quantitative and qualitative methods of communication research. May count either COMM 3510 or COMM 3513.

COMM 3600/3603 FOUNDATIONS OF RHETORIC AND SOCIAL INFLUENCE (3) LEC. 3. Pr. CMJN 2100 or CMJN 2103. Rhetorical theory from its classical roots to contemporary thinkers. Relates rhetorical theory and analysis to understanding persuasive discourse in our society. May count either COMM 3600 or COMM 3603.

COMM 3610/3613 RESEARCH IN RHETORIC AND SOCIAL INFLUENCE (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103). Exploration of how to perform a critical analysis of various rhetorical artifacts. May count either COMM 3610 or COMM 3613.

COMM 3700/3703 ARGUMENTATION (3) LEC. 3. Examination of the critical tools necessary to evaluate arguments in current public discourse. May count either COMM 3700 or COMM 3703.

COMM 3800/3803 FAMILY COMMUNICATION (3) LEC. 3. Examines communication theory and research as applied to the family context (broadly defined). May count either COMM 3800 or COMM 3803.

COMM 3970/3973 SPECIAL TOPICS IN COMMUNICATION (3-6) LEC. Topics that range beyond what is covered in other courses within the COMM curriculum. Specific subject matter is left up to the individual instructor. Course may be repeated for a maximum of 6 credit hours.

COMM 4100/4103 COMMUNICATION STRATEGIES OF SOCIAL MOVEMENTS (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3500 or COMM 3503) and (COMM 3600 or COMM 3603) and (COMM 3500 or COMM 3503 or COMM 3610 or COMM 3613) and Declared major in AGCO, COMM, JRNL, PRCM, MDIA, MDIV or Departmental approval. Examination of persuasive strategies used in social movements to attract members, solidify support, and effect social change. May count either COMM 4100 or COMM 4103.

COMM 4410/4413 THEORIES OF LEADERSHIP (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3500 or COMM 3503) and (COMM 3600 or COMM 3603) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613) and Declared major in AGCO, COMM, JRNL, PRCM, MDIA, MDIV or Departmental approval. Examination of theory and research in leadership as a communication variable and behavioral practice in small group and organizational settings. May count either COMM 4410 or COMM 4413.

COMM 4420/4423 COMMUNICATION AND CREATIVITY (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3600 or COMM 3603) and (COMM 3500 or COMM 3503) and (COMM 3500 or COMM 3503 or COMM 3610 or COMM 3613) and Declared major in AGCO, COMM, JRNL, PRCM, MDIA, MDIV, or Departmental approval. This course examines creativity research and its practical applications, particularly in collaborative settings. May count either COMM 4420 or COMM 4423.

COMM 4430/4433 COMMUNICATION TRAINING AND CONSULTING (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3500 or COMM 3503) and (COMM 3600 or COMM 3603) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613) and Declared major in AGCO, COMM, JRNL, PRCM, MDIA, MDIV, or Departmental approval. Introduction to theoretical and practical issues involved in communication training and consulting.

COMM 4480/4483 HEALTH PROMOTION MESSAGE AND DESIGN (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3600 or COMM 3603) and (COMM 3500 or COMM 3503) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613) and Declared major in AGCO, COMM, JRNL, PRCM, MDIA, MDIV, or Departmental approval. Introduction to theory, practice, and ethics of health message and design as related to health promotion and behavior change. May count either COMM 4480 or COMM 4483.
COMM 4490/4493 HEALTH MEDIA & COMMUNICATION (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3600 or COMM 3603) and (COMM 3500 or COMM 3503) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613) or departmental approval. Explores the quality and accuracy of mediated health messages, their effect on public understanding of disease and health, and their influence on individual health behaviors and interactions. Must have a declared major in AGCO, COMM, JRNL, PRCM, MDIA, MDIV.

COMM 4500/4503 COMMUNICATION AND COGNITION (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3600 or COMM 3603) and (COMM 3500 or COMM 3503) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613). and Declared major in AGCO, COMM, JRNL, PRCM, MDIA, MDIV or Departmental approval. Explores theory and research related to cognitive and affective influences on communication in interpersonal and social interactions. May count either COMM 4450 or COMM 4503.

COMM 4700/4703 LEGAL COMMUNICATION (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3600 or COMM 3603) and (COMM 3500 or COMM 3503) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613). and Declared major in AGCO, COMM, JRNL, PRCM, MDIA, MDIV, or Departmental approval. Examination of communication processes in legal contexts. May count either COMM 4700 or COMM 4703.

COMM 4800/4803 INTERPERSONAL COMMUNICATION (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3500 or COMM 3503) and (COMM 3600 or COMM 3603) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613). and Declared major in AGCO, COMM, JRNL, PRCM, MDIA, or Departmental approval. Relationship between communication and the formation of self-identity and maintenance of relationships. May count either COMM 4800 or COMM 4803.

COMM 4810/4813 NONVERBAL COMMUNICATION (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3500 or COMM 3503) and (COMM 3600 or COMM 3613) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613). and Declared major in AGCO, COMM, JRNL, PRCM, MDIA, MDIV or Departmental approval. Theory of non-language based communication and the impact of these messages on the overall communication process. May count either COMM 4810 or COMM 4813.

COMM 4920 INTERNSHIP (3) INT. 200. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3500 or COMM 3503) and (COMM 3600 or COMM 3603) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613). and Admission to Internship Program. Declared major in COMM. Opportunity to apply classroom experience to career setting. Internship must be a supervised, closely monitored work experience, appropriate to the major, that takes place in a professional setting. Admission to Internship Program may be needed.

COMM 4930 DIRECTED STUDIES IN COMMUNICATION (3) IND. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3500 or COMM 3503) and (COMM 3600 or COMM 3603) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613). and Declared major in AGCO, COMM, JRNL, PRCM, MDIA, MDIV, or Departmental approval. Independent study on a specific topic of interest not already addressed in any regular COMM course.

COMM 4967 HONORS SPECIAL PROBLEMS (1-3) IND. Pr. Honors College. COMM 3613. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3600 or COMM 3603) and (COMM 3500 or COMM 3503) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613). and Declared major in AGCO, COMM, JRNL, PRCM, MDIA, MDIV or Departmental approval. Honors level independent study on a specific topic of interest not already addressed in any regular COMM course. Course may be repeated for a maximum of 3 credit hours.

COMM 4970/4973 SPECIAL TOPICS IN COMMUNICATION (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3500 or COMM 3503) and (COMM 3600 or COMM 3603) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613). and Declared major in AGCO, COMM, JRNL, PRCM, MDIA, MDIV or Departmental approval. Topics in communication. Course may be repeated with a change in topic. Course may be repeated for a maximum of 6 credit hours.

COMM 4997 HONORS THESIS (1-3) IND. Pr. Honors College. COMM 3600 or COMM 3603 and COMM 3500 or COMM 3503. and CMJN 2100 or CMJN 2103. and COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3600 or COMM 3603) and (COMM 3500 or COMM 3503) and (COMM 3510 or or COMM 3513 or COMM 3610 or COMM 3613). and Declared major in AGCO, COMM, JRNL, PRCM, MDIA, MDIV or Departmental approval. Topics in communication. Course may be repeated with a change in topic. Course may be repeated for a maximum of 3 credit hours.

COMM 5430/5433 GENDER, WORK, AND COMMUNICATION (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3600 or COMM 3603) and (COMM 3500 or COMM 3503) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613). History, theory, and concepts central to the study of gender, work, and communication. May count either COMM 5430 or COMM 5433.

COMM 5450/5453 COMMUNICATION & IMMIGRATION (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3600 or COMM 3603) and (COMM 3500 or COMM 3503) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613). History, theory, and concepts central to the study of immigration from a communication perspective. May count either COMM 5450 or COMM 5453.
COMM 5470/5473 HEALTH COMMUNICATION (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3600 or COMM 3603) and (COMM 3500 or COMM 3503) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613). History, theory, and concepts central to the study and practice of health communication. May count either COMM 5470 or COMM 5473.

COMM 5600/5603 POLITICAL COMMUNICATION (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3600 or COMM 3603) and (COMM 3500 or COMM 3503) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613) and Declared major in AGCO, COMM, JRNL, PRCM, MDIA, MDIV or Departmental approval. Examines communication strategies involved in the varied contexts of politics. Students will be exposed to relevant theories and ideas and asked to apply this knowledge to current political activity. May count either COMM 5600 or COMM 5603.

COMM 5700/5703 DISCOURSE IN SOCIAL LIFE (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (COMM 3500 or COMM 3503) and (COMM 3600 or COMM 3603) and (COMM 3510 or COMM 3513 or COMM 3610 or COMM 3613). and Declared major in AGCO, COMM, JRNL, PRCM, MDIA, MDIV or Departmental approval. Examines the functions of language and social interaction as they reflect and shape our identity in various contexts. May count COMM 5700 or 5703 or 6700.

COMM 6300 SEX, GENDER, AND SPORT (3) LEC. 3. Focuses on sport, as a gendered institution. The course examines intersections of gender with age, sexual orientation, social class, gender identity, race and ethnicity and politics.

COMM 6430 GENDER, WORK, AND COMMUNICATION (3) LEC. 3. History, theory, and concepts central to the study of gender, work, and communication.

COMM 6470 HEALTH COMMUNICATION (3) LEC. 3. History, theory, and concepts central to the study and practice of health communication.

COMM 6600 POLITICAL COMMUNICATION (3) LEC. 3. This course will examine the communication strategies involved in the varied contexts of politics. Students will be exposed to relevant theories and ideas and asked to apply this knowledge to current political activity.

COMM 6700 DISCOURSE IN SOCIAL LIFE (3) LEC. 3. Advanced approaches to language and social interaction as they reflect and shape identity of self, relationships, and group memberships. Graduate students only

COMM 7000 COMMUNICATION THEORY (3) LEC. 3. Critical examination of contemporary theories in communication.

COMM 7010 QUALITATIVE METHODS OF COMMUNICATION RESEARCH (3) LEC. 3. Qualitative research in communication; emphasis on understanding and engaging in a variety of qualitative methods.

COMM 7020 QUANTITATIVE METHODS OF COMMUNICATION RESEARCH (3) LEC. 3. Quantitative research in communication; emphasis on understanding and doing empirical research.

COMM 7100 INSTRUCTIONAL COMMUNICATION THEORY & PRACTICE (3) SEM. 3. History, theory, and concepts central to the study and practice of instructional communication.

COMM 7230 RHETORICAL CRITICISM (3) LEC. 3. Advanced methods in rhetorical criticism, including tools for the analysis of persuasive messages.

COMM 7300 APPROACHES TO STUDYING LANGUAGE AND SOCIAL INTERACTION (3) LEC. 3. Major approaches to studying language and social interaction that collectively make up discourse analysis.

COMM 7410 DEVELOPMENT OF RHETORICAL THEORY (3) LEC. 3. Historical survey of rhetorical theory from ancient to contemporary era; special attention to the role of rhetoric in shaping attitudes towards persuasion.

COMM 7420 SEMINAR IN PERSUASION AND ATTITUDE CHANGE (3) LEC. 3. Critical examination of current theory and research in the persuasive act and its effects.

COMM 7430 SEMINAR IN AMERICAN PUBLIC ADDRESS (3) LEC. 3. Investigation of key issues and debates that have emerged in post-World War II America.

COMM 7440 SEMINAR IN ARGUMENTATION AND DEBATE (3) SEM. 3. Analysis of the fundamental theories of argumentation.

COMM 7450 SEMINAR IN INTRAPERSONAL PROCESSES IN COMMUNICATION (3) SEM. 3. Theories of cognitive and affective processing of information during speaking and listening.
COMM 7460 SEMINAR IN INTERPERSONAL COMMUNICATION (3) SEM. 3. Theories of the structure and function of interpersonal (dyadic) communication focusing on conversational behavior, traits, relationships, and persuasion.

COMM 7470 SEMINAR IN SMALL GROUP COMMUNICATION (3) SEM. 3. Advanced study of the principles of communication as they apply to the small group setting.

COMM 7480 SEMINAR IN ORGANIZATIONAL COMMUNICATION (3) SEM. 3. In-depth approach to the study of communication processes within the setting of modern organizations.

COMM 7490 HEALTH COMMUNICATION (3) LEC. 3. Examination and application of social science research approaches to the study of health communication.

COMM 7500 GENDER COMMUNICATION (3) LEC. 3. Exploration of current theories and research on the relationship between communication and gender.

COMM 7600 MASS COMMUNICATION THEORY (3) LEC. 3. Exploration of major areas of concern to the theoretical study of mass communication and the social impact of mediated messages.

COMM 7610 STUDIES IN POPULAR CULTURE AND MASS COMMUNICATION (3) LEC. 3. Critical approaches to identifying, interpreting and experiencing popular culture texts within historical, cultural and communication contexts.

COMM 7620 BROADCAST PROGRAMMING AND CRITICISM (3) LEC. 3. Exploration of critical, theoretical, and organizational issues relevant to programming and the production of culture within mass media environments.

COMM 7630 MEDIA MANAGEMENT (3) LEC. 3. In-depth analysis of current management issues specific to media managers in a multi-cultural world.

COMM 7640 SEMINAR IN FILM THEORY AND CRITICISM (3) SEM. 3. Exploration of classical and contemporary film theories and criticism.

COMM 7650 THE MASS MEDIA AND AMERICAN POLITICS (3) LEC. 3. Examination of the role of the mass communication system in the American political system.

COMM 7660 CULTURAL STUDIES IN MASS MEDIA (3) LEC. 3. Examination of communication research approaches to the study of culture and media.

COMM 7670 CONTEMPORARY ISSUES IN FIRST AMENDMENT LAW (3) LEC. 3. Exploration of controversial issues and cases in First Amendment Law that have been recently decided, are currently before courts, and have shaped the constitutional landscape in the United States.

COMM 7680 SPORTS, MEDIA, AND CULTURE (3) LEC. 3. Cultural implications of the relationship between sports and media.

COMM 7810 PUBLIC RELATIONS THEORY (3) LEC. 3. Current areas of concern in the theoretical study of public relations.

COMM 7820 PUBLIC RELATIONS CAMPAIGNS (3) LEC. 3. Application of public relations and communication concepts to campaign challenges.

COMM 7830 PUBLIC RELATIONS CASE STUDIES (3) LEC. 3. Examination of research on public relations case studies to provide a theoretical basis for analyzing similar situations in on the job.

COMM 7840 COMMUNICATION TRAINING AND CONSULTING (3) LEC. 3. Theory, concepts, and skills needed to be an effective communication trainer or consultant.

COMM 7850 PUBLIC RELATIONS ETHICS (3) LEC. 3. This course provides a framework for understanding ethics in public relations. We will discuss ethical behavior and thinking within the context of practicing public relations. Topics discussed will include relationships, accountability, responsibility, advocacy, truth, and transparency.

COMM 7930 DIRECTED STUDIES (1-3) IND. Conferences, readings, research, and reports in general communication, mass communication, or public relations. Course may be repeated for a maximum of 3 credit hours.

COMM 7970 SPECIAL TOPICS IN COMMUNICATION (3) SEM. 3. Advanced treatment of contemporary topics, trends, current research findings, and opportunities. Course may be repeated for credit with change in topic.
COMM 7980 NON-THESIS PROJECT IN COMMUNICATION (3-6) LEC. SU. Pr. COMM 7000 and COMM 7010 and COMM 7020. Minimum 27 graduate hours. Professional experience in communication area of interest. Must include managerial experience. Only 3 hours will apply to the degree. Course may be repeated for a maximum of 6 credit hours.

COMM 7990 RESEARCH AND THESIS (1-6) MST. Course may be repeated with change in topics.

Journalism Courses

JRNL 1100/1103 JOURNALISM FUNDAMENTALS (3) LEC. 3. Emphasis on Associated Press Stylebook, word usage, and spelling for students interested in print, broadcast, public relations, and web-based writing.

JRNL 1AA0 JOURNALISM FUNDAMENTALS ENTRANCE EXAM (0) LAB. 1.5. SU. JRNL 1AA0 is an exam option for students who are required to take JRNL 1100. The course will test students on spelling, grammar, Associated Press Style and word usage to mirror content covered in the in-person course. This course is not repeatable.

JRNL 2210/2213 NEWSWRITING (3) LEC. 3. Pr. JRNL 1100 or JRNL 1AA0. With a minimum grade of "B" in JRNL 1100. Introduction to newswriting techniques, with emphasis on learning news values, recognizing parts of a story, and writing stories that meet standards of accuracy, grammar, style, spelling, law, and ethics.

JRNL 2310/2313 REPORTING (3) LEC. 3. Pr. JRNL 1100 or JRNL 1AA0 and JRNL 2210. With a minimum grade of "B" in JRNL 1100. Preparation for careers in gathering and telling the news. Course emphasizes the writing of accurate, clear, and meaningful news stories for print and digital formats.

JRNL 2320/2323 ADVISING STUDENT PUBLICATIONS (3) LEC. 3. Primarily for non-journalism and non-communication majors. Role and responsibilities of the publication adviser in high school and college.

JRNL 3010/3013 BROADCAST & DIGITAL NEWS PRODUCTION (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and JRNL 1100 or JRNL 1AA0. With a minimum grade of "B" in JRNL 1100 andDeclared major in AGCO, COMM, JRNL, PRCM, MDIA or MDIV. Introduction to the basics of digital video production. Emphasis on techniques used in producing newscasts for broadcast, web and mobile devices.

JRNL 3020/3023 BROADCAST & DIGITAL NEWS REPORTING (3) LEC. 3. Pr. JRNL 3010. With a minimum grade of "B" in JRNL 1100 andDeclared major in AGCO, COMM, JRNL, PRCM, MDIA or MDIV. Writing and reporting digital news stories on deadline for broadcast, online, social media, and mobile outlets.

JRNL 3103 GLOBAL JOURNALISM AND MEDIA SYSTEMS (3) DSL. 3. The Internet and social media have created a world more connected than ever. Examines the economic, political, technological, and cultural changes that impact media and journalism globally.

JRNL 3110 INTRODUCTION TO APPLIED JOURNALISM (3) LEC. 3. Pr. JRNL 1100 or JRNL 1AA0 and JRNL 2210 and JRNL 2310 and (CMJN 2100 or CMJN 2103). With a minimum grade of "B" in JRNL 1100 and Declared major in AGCO, COMM, JRNL, PRCM, MDIA or MDIV. Introduction to how a media organization operates; provides an opportunity for students to gain practical, hands-on journalism experience.

JRNL 3220/3223 MAGAZINE AND FEATURE WRITING (3) LEC. 3. Pr. JRNL 1100 or JRNL 1AA0 and (CMJN 2100 or CMJN 2103) and JRNL 2210. With a minimum grade of "B" in JRNL 1100 and Declared major in AGCO, COMM, JRNL, PRCM, MDIA or MDIV. Introduction to writing colorful, human-interest non-fiction pieces that illustrate drama and impact. Students will learn how to pitch their ideas to editors in print and digital markets.

JRNL 3410/3413 PHOTOJOURNALISM (3) LEC. 3. Pr. JRNL 1100 or JRNL 1AA0 and (CMJN 2100 or CMJN 2103) and JRNL 2210. With a minimum grade of "B" in JRNL 1100 and Declared major in AGCO, COMM, JRNL, PRCM, MDIA or MDIV. Uses, techniques, and processes of digital photography for the newspaper, magazine, and web-based industries. Operations of digital SLRs and Photoshop and techniques for variety of assignments are addressed.

JRNL 3470/3473 EDITING AND DESIGN (3) LEC. 3. Pr. JRNL 1100 or JRNL 1AA0 and JRNL 2210 and (CMJN 2100 or CMJN 2103). With a minimum grade of "B" in JRNL 1100 and Declared major in AGCO, COMM, JRNL, PRCM, MDIA or MDIV. Introduction to the basics of design, layout, headline writing, typography, use of color, and selection of images for visual impact. Students will learn how to design news, sports, and magazine layouts, using Adobe InDesign and Photoshop.
JRNL 3510/3513 MULTIMEDIA JOURNALISM (3) LEC. 3. Pr. JRNL 1100 or JRNL 1AA0 and (CMJN 2100 or CMJN 2103) and JRNL 2210. with a minimum grade of "B" in JRNL 1100 and Declared major in AGCO, COMM, JRNL, PRCM, MDIA or MDIV. Introduction to multimedia journalistic storytelling. Reporting and production course where students use various technologies to produce journalism stories for digital platforms.

JRNL 3530/3533 SPORTS REPORTING (3) LEC. 3. Pr. (JRNL 1100 or JRNL 1AA0) and JRNL 2210 and (CMJN 2100 or CMJN 2103). with a minimum grade of "B" in JRNL 1100 and Declared major in AGCO, COMM, JRNL, PRCM, MDIA or MDIV. Sports reporting for print, broadcast, and online media, with emphasis on interviewing athletes, covering sporting events, and learning about issues surrounding sports.

JRNL 4230/4233 ADVANCED REPORTING (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and JRNL 1100 or JRNL 1AA0 and JRNL 2210 and JRNL 2310 and (JRNL 3220 and JRNL 3530) or (JRNL 3220 and JRNL 3530) or (JRNL 3020 or JRNL 3530), with a minimum grade of "B" in JRNL 1100 and Declared major in AGCO, COMM, JRNL, PRCM, MDIA or MDIV. Developing and writing news stories under deadline pressure; investigative and interpretative reporting.

JRNL 4320/4323 ENTREPRENEURIAL JOURNALISM (3) LEC. 3. Pr. JRNL 1100 and (CMJN 2100 or CMJN 2103), with a minimum grade of "B" in JRNL 1100 and Declared major in AGCO, COMM, JRNL, PRCM, MDIA or MDIV, or Departmental approval. Emphasis on content, advertising, audience, and marketing in news organizations and applying entrepreneurial principles to journalism start-ups.

JRNL 4410/4413 JOURNALISM HISTORY (3) LEC. 3. Issues facing the American press, from colonial times to the present, with emphasis on regional and state issues.

JRNL 4417 HONORS JOURNALISM HISTORY (3) LEC. 3. Pr. Honors College. Issues facing the American press, from colonial times to the present, with emphasis on regional and state issues. Credit will not be given for both JRNL 4410 and JRNL 4417.

JRNL 4470/4473 ADVANCED MAGAZINE AND FEATURE WRITING (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and JRNL 1100 or JRNL 1AA0 and JRNL 2210 and JRNL 2310 and (JRNL 3220 and JRNL 3530) and (JRNL 3020 or JRNL 3530), with a minimum grade of "B" in JRNL 1100 and Declared major in AGCO, COMM, JRNL, PRCM, MDIA or MDIV. Emphasis on creating long-form, non-fiction articles for print and digital publications through graceful and innovative writing techniques and skillful reporting.

JRNL 4480/4483 ADVANCED PUBLICATION DESIGN (3) LEC. 3. Pr. JRNL 1100 or JRNL 1AA0 and CMJN 2100 or CMJN 2103 and JRNL 2210 and JRNL 2310. with a minimum grade of "B" in JRNL 1100 and Declared major in AGCO, COMM, JRNL, PRCM, MDIA, MDIV or Departmental approval. Desktop publishing to produce print publications, including brochures and newsletters, and with exposure to web page, advertising, and magazine design.

JRNL 4530 ADVANCED SPORTS REPORTING (3) LEC. 3. JRNL 4530 provides the capstone course experience for students in the sports journalism emphasis. Students will build skills in areas such as writing long form articles, personality features, enterprise reporting, oral history projects, and comprehensive game coverage, and working with tight deadlines.

JRNL 4870/4873 COMMUNITY JOURNALISM (3) LEC. 3. Pr. (JRNL 1100 or JRNL 1AA0) and JRNL 2210 and (CMJN 2100 or CMJN 2103), with a minimum grade of "B" in JRNL 1100. Civic role of community journalists.

JRNL 4920 JOURNALISM INTERNSHIP (3) INT. 3. Pr. (CMJN 2100 or CMJN 2103) and JRNL 1100 or JRNL 1AA0 and JRNL 2210 and JRNL 2310 and (JRNL 3020 or JRNL 3530) and (JRNL 3010 or JRNL 3110 or JRNL 3410 or JRNL 3470 or JRNL 3510). With a minimum grade of "B" in JRNL 1100 and one specialized reporting course and one journalism production course and Declared major in JRNL. Opportunity to apply classroom experience to career setting. Internship must be a supervised, closely monitored work experience, appropriate to the major, that takes place in a professional setting. Admission to internship program.

JRNL 4930 DIRECTED STUDIES (1-4) IND. Research and analysis of specific areas of journalism. Course may be repeated for a maximum of 6 credit hours.

JRNL 4967 HONORS SPECIAL PROBLEMS (1-3) LEC. 3. Pr. Honors College or departmental approval. Course may be repeated for a maximum of 3 credit hours.

JRNL 4970 SPECIAL TOPICS IN JOURNALISM (3) AAB. 3. Pr. JRNL 1100 or JRNL 1AA0 and JRNL 2210. with a minimum grade of B in JRNL 1100 and Declared major in AGCO, COMM, JRNL, PRCM, MDIA or MDIV. Study of narrowly defined journalism topics not already covered in the current JRNL curriculum. Course may be repeated for a maximum of 6 credit hours.
JRNL 4997 HONORS THESIS (1-3) IND. Pr. Honors College or departmental approval. Course may be repeated for a maximum of 3 credit hours.

**Media Studies Courses**

**MDIA 2350/2353** INTRODUCTION TO FILM STUDIES (3) LEC. 2. LAB. 2. Introduction to film analysis, modes of film practice and critical approaches to the study of cinema. May count either MDIA 2350/MDIA 2353 or RTVF 2350/ RTVF 2353.

**MDIA 2420/2423** INTRODUCTION TO FILMMAKING (3) STU. 3. Pr. CMJN 2100 or CMJN 2103. A studio course introducing students to the theory and practice of cinematography and editing for the short film.

**MDIA 2700/2703** INTRODUCTION TO VISUAL MEDIA (3) STU. 3. Pr. CMJN 2100 or CMJN 2103. A studio course introducing students to concepts and techniques of digital image-making for the short film.

**MDIA 3100/3103** INTERMEDIATE FILMMAKING (3) STU. 3. Pr. MDIA 2420 and MDIA 2700. An intermediate studio course in which students develop sound design skills for the short film.

**MDIA 3110/3113** CINEMATOGRAPHY (3) STU. 3. Pr. MDIA 2420 and MDIA 2700. An intermediate studio course in which students explore the art of filmmaking through methods and techniques of cinematography for the short film. The course structure will emphasize short scene studies which focus on visual outcomes including cameras technology, motion, lighting, composition and post-production.

**MDIA 3120/3123** FILM EDITING (3) STU. 3. Pr. MDIA 2700 and MDIA 2420. An intermediate studio course in which students explore the theory and practice of editing for the short film.

**MDIA 3210/3213** SOUNDTACKS, MUSIC AND MEDIA (3) LEC. 3. Historical, artistic, sociocultural and economic contexts of music and media.

**MDIA 3300/3303** FOUNDATION OF MEDIA STUDIES (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and (MDIA 2350 or MDIA 2353). This is a foundational course that provides students with a survey of the key theoretical approaches to studying the cultural, social, political and economic dimensions of entertainment media.

**MDIA 3310** HISTORY OF NEW AND EMERGING MEDIA (3) LEC. 3. Pr. (MDIA 3300 or MDIA 3303) and (CMJN 2100 or CMJN 2103). This course examines the origins and development of the Internet and related platforms including USENET, the World Wide Web, and social media. In the process, the course addresses many of the social, political, economic, and industrial implications that have accompanied the use of the Internet as a communication technology.

**MDIA 3320/3323** GENDER AND SEXUALITY IN MEDIA (3) LEC. 3. Pr. (MDIA 2350 or MDIA 2353) and (CMJN 2100 or CMJN 2103). This course is focused on the relationship between gender, sexuality, identity and the media, looking at key theories, representation, audience engagement and industrial imperatives.

**MDIA 3350/3353** SCREENWRITING (3) LEC. 3. Pr. CMJN 2100 or CMJN 2103. A writing course introducing students to the basic concepts of screen storytelling and the craft of turning story ideas into screenplays. MDIA and MDIV majors only.

**MDIA 3360/3363** AUDIO STORYTELLING AND PODCASTING (3) STU. 3. Pr. CMJN 2100 or CMJN 2103. Students will gain hands-on experience in producing audio stories and in designing and producing podcasts.

**MDIA 3370/3373** GLOBAL MEDIA (3) LEC. 3. Pr. MDIA 2350 or MDIA 2353. Global media is focused on the complex global dimensions of media production, distribution and reception, with a primary focus on entertainment media.

**MDIA 3580/3583** REPRODUCING POPULAR CULTURE (3) LEC. 3. Postmodern study on the widespread recycling of media artifacts. May count either MDIA 3580 or MDIA 3583 or RTVF 3580.

**MDIA 3600/3603** FILM GENRES (3) LEC. 3. Pr. MDIA 2350 or MDIA 2352. A critical examination of popular film genres and how they have been used historically within the film industry, film studies, media criticism and popular culture.

**MDIA 3650/3653** MEDIA INDUSTRIES (3) LEC. 3. Pr. MDIA 2350 or MDIA 2353. The course provides students a comprehensive overview of how the media industries work, why they work as they do, and the broader theoretical and practical implications of the media industries.

**MDIA 3700/3703** AUDIENCES AND FAN CULTURE (3) LEC. 3. Pr. MDIA 2350 and MDIA 2353. This course explores theories of the audience in media and cultural studies, the history of studying media audiences, while also considering contemporary scholarship, technology, identity and fan communities.
MDIA 3750/3753 RACE AND AMERICAN FILM HISTORY (3) LEC. 3. Pr. MDIA 2350 or MDIA 2352. A critical examination of the historical and social constructions of race and ethnicity in popular U.S. films.

MDIA 3820/3823 SEQUENCE DESIGN (3) STU. 3. Pr. MDIA 2420 and MDIA 2700. An intermediate studio course in which students develop animation skills for title design.

MDIA 3970/3973 SPECIAL TOPICS (3) AAB. 3. Topics in Media Studies at the intermediate level. Course may be repeated for a maximum of 6 credit hours.

MDIA 4200/4203 CULTURAL HISTORY OF BROADCASTING (3) LEC. 3. Pr. (MDIA 3300 or MDIA 3303) and (CMJN 2100 or CMJN 2103). This course examines the social, political, industrial and cultural forces behind the development of U.S. broadcasting. We will consider broadcasting as an industry, cultural form, art form, and social institution.

MDIA 4210/4213 POPULAR CULTURE STUDIES (3) LEC. 3. Pr. (MDIA 3300 or MDIA 3303 or RTVF 3300 or RTVF 3303) and (CMJN 2100 or CMJN 2103). Examines myths, icons, rituals, heroes, celebrities, genres, narratives, stereotypes as experienced and presented within communication processes. Declared major in AGCO, COMM, JRNL, MDIA or PRCM. May count either MDIA 4210 or RTVF 4210.

MDIA 4250/4253 SCREEN CULTURE (3) LEC. 3. Pr. MDIA 3300 or MDIA 3303. A critical study of the historical development and the cultural meanings of dominant screen technologies (film screens, TVs, computer screens, mobile devices).

MDIA 4300/4303 BROADCAST PROGRAMMING AND CRITICISM (3) LEC. 3. Pr. (MDIA 3300 or MDIA 3303 or RTVF 3300 or RTVF 3303) and (CMJN 2100 or CMJN 2103). Introduces critical, theoretical, and organizational concepts, strategies, processes, and frameworks for programming for mass media systems. Declared major in AGCO, COMM, JRNL, MDIA, MDIV or PRCM.

MDIA 4310/4313 MEDIA AND SOCIETY (3) LEC. 3. Pr. (MDIA 3300 or MDIA 3303 or RTVF 3300 or RTVF 3303) and (CMJN 2100 or CMJN 2103). Examination of the relationship between the mass communication industry and a mass society. Declared major in AGCO, COMM, JRNL, MDIA, MDIV or PRCM.

MDIA 4350/4353 TELEVISION CRITICISM (3) LEC. 3. LAB. 1. Pr. MDIA 3303 or MDIA 3300. This course prepares students to critically analyze television with a deep study of the aesthetics of television coupled with an overview of critical approaches to television research.

MDIA 4390 FILM AUTHORS (3) LEC. 2. LAB. 1. Pr. (MDIA 3300 or MDIA 3303 or RTVF 3300 or RTVF 3303) and (CMJN 2100 or CMJN 2103). In-depth study of one or more filmmakers important to the development of film as a popular art form. Declared major in AGCO, COMM, JRNL, MDIA or PRCM. May count either MDIA 4390 or RTVF 4390.

MDIA 4400/4403 ADVERTISING AND CONSUMER CULTURE (3) LEC. 3. Pr. MDIA 3300 or MDIA 3303. This course is a critical examination of the relationship between the advertising industries and the media industries and how they have influenced each other as well as mainstream US culture.

MDIA 4420/4423 HISTORY OF MEDIA TECHNOLOGY (3) LEC. 3. Pr. (MDIA 3300 or MDIA 3303 or RTVF 3300 or RTVF 3303) and (CMJN 2100 or CMJN 2103). History of media technology from 18th-21st centuries. Declared major in AGCO, COMM, JRNL, MDIA or PRCM. May count either MDIA 4420 or RTVF 4420.

MDIA 4500/4503 CULTURE AND TECHNOLOGY (3) LEC. 3. Pr. MDIA 3300 or MDIA 3303 and CMJN 2100 or CMJN 2103. This course explores the complex interrelations, issues and impacts between culture and technology through a range of interdisciplinary academic, professional and global settings, contexts and texts.

MDIA 4580/4583 FAME, CELEBRITY, AND MEDIA CULTURE (3) LEC. 3. Pr. (MDIA 3300 or MDIA 3303 or RTVF 3300 or RTVF 3303) and CMJN 2100 or CMJN 2103. Examination of celebrity and fame as distinguishing cultural phenomena. Declared major in AGCO, COMM, JRNL, MDIA or PRCM. May count either MDIA 4580 or MDIA 4583 or RTVF 4580.

MDIA 4600/4603 ADAPTATION FOR THE SHORT FILM (3) LEC. 3. Pr. MDIA 3100 or RTVF 3100 or RTVF 3103 or RTVF 3107. A survey of ways in which film can be adapted from pre-existing sources to create new works that stand on their own. Declared major in AGCO, COMM, JRNL, MDIA, MDIV or PRCM. May count either MDIA 4600 or MDIA 4603 or RTVF 4600.

MDIA 4920 INTERNSHIP (3) INT. 200. Pr. CMJN 2100 or CMJN 2103 and MDIA 3300 or MDIA 3303. Opportunity to apply classroom experience to career setting. Internship must be a supervised, closely monitored work experience, appropriate to the major, that takes place in a professional setting.
MDIA 4930/4933 DIRECTED STUDIES (3) IND. 3. Pr. (MDIA 3300 or MDIA 3303 or RTVF 3300 or RTVF 3303) and (CMJN 2100 or CMJN 2103). Study of narrowly-defined MDIA topic not already covered in the MDIA curriculum and under the direction of an MDIA faculty. May be repeated with a change in topic. Declared major in AGCO, COMM, JRNL, MDIA, MDIV or PRCM. May count either MDIA 4930 or MDIA 4933 or MDIA 4970 or RTVF 4970. Course may be repeated for a maximum of 6 credit hours.

MDIA 4940/4943 VISUAL MEDIA PROJECTS (3) STU. 3. Pr. MDIA 3100. Capstone course in which students work as a team on an advanced visual media project.

MDIA 4970/4973 SPECIAL TOPICS (3) LEC. 3. Pr. (MDIA 3300 or MDIA 3303) and (CMJN 2100 or CMJN 2103). Topics in Media Studies at the advanced level. Course may be repeated for a maximum of 6 credit hours.

Public Relations Commu Courses

PRCM 2400/2403 FOUNDATIONS OF PUBLIC RELATIONS (3) LEC. 3. This course is designed to be an overview of the functions, practices and growing application of public relations in both private industry and the public sector. May count either PRCM 2400 /PRCM 2043.

PRCM 2500/2503 PUBLIC RELATIONS CASE STUDIES & ETHICS (3) LEC. 3. Pr. (JRNL 1100 or JRNL 1AA0) and (CMJN 2100 or CMJN 2103) and (PRCM 2400 or PRCM 2403). This is a course designed to provide Public Relations students with an understanding of both effective and ineffective methods of PR through studying actual cases from the field itself with special attention given to the ethical aspect of decision making.

PRCM 3000/3003 MULTIMEDIA WRITING FOR PUBLIC RELATIONS (3) LEC. 3. Pr. JRNL 1100 or JRNL 1AA0 and (CMJN 2100 or CMJN 2103) and (PRCM 2400 or PRCM 2403). This is a course designed to provide Public Relations students with an understanding of both effective and ineffective methods of PR through studying actual cases from the field itself with special attention given to the ethical aspect of decision making.

PRCM 3080/3083 INTERNATIONAL PUBLIC RELATIONS (3) LEC. 3. Pr. CMJN 2100 or CMJN 2103. Exploration of public relations theory, research, and practice in an international context.

PRCM 3090/3093 PUBLIC RELATIONS IN POLITICAL PROCESSES (3) LEC. 3. Pr. CMJN 2100 or CMJN 2103. Surveys of the intersection of politics and public relations, emphasizing theoretical and practical principles in political processes.

PRCM 3260/3263 STRATEGIC COMMUNICATION IN PUBLIC RELATIONS (3) LEC. 3. Pr. JRNL 1100 and (CMJN 2100 or CMJN 2103) and (PRCM 2400 or PRCM 2403). JRNL 1100 with a minimum grade of "B" in JRNL 1100. PRCM or AGCO major only. This course will have an emphasis on communication tactics; plan, write and produce public relations tools; audience and media selection; print and electronic media.

PRCM 3270/3273 PUBLIC RELATIONS IN THE NOT-FOR-PROFIT ARENA (3) LEC. 3. Pr. CMJN 2100 or CMJN 2103. Nonprofit organizations and foundations and the role of public relations within those organizations.

PRCM 3280/3283 SOCIAL MEDIA AND PUBLIC RELATIONS (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and JRNL 1100 or JRNL 1AA0 and (PRCM 2400 or PRCM 2403 or PRCM 3040 or PRCM 3043) and (PRCM 2500 or PRCM 2503). JRNL 1100 with a minimum grade of "B" in JRNL 1100. Declared major in AGCO or PRCM. Examination of how new social media impact public relations strategies.

PRCM 4020/4023 DIGITAL STYLE AND DESIGN IN PUBLIC RELATIONS MESSAGES (3) LEC. 3. Pr. JRNL 1100 or JRNL 1AA0 and (CMJN 2100 or CMJN 2103) and (PRCM 2400 or PRCM 2403 or PRCM 3040 or PRCM 3043) and (PRCM 2500 or PRCM 2503). JRNL 1100 with a minimum grade of "B" in JRNL 1100. PRCM or AGCO major only. Introduction to the use of style and design in public relations messages. Departmental approval or Declared major in AGCO or PRCM.

PRCM 4400/4403 PUBLIC RELATIONS RESEARCH (3) LEC. 3. Pr. JRNL 1100 or JRNL 1AA0 and (CMJN 2100 or CMJN 2103) and (PRCM 2400 or PRCM 2403 or PRCM 3040 or PRCM 3043) and (PRCM 2500 or PRCM 2503). JRNL 1100 with a minimum grade of "B" in JRNL 1100. PRCM or AGCO major only. Identifying, characterizing and evaluating stakeholder groups and alternative channels of communication; formal research procedures including sampling, instrument design, information gathering, data processing, analysis and reporting.

PRCM 4500/4503 PUBLIC RELATIONS CAMPAIGNS (3) LEC. 3. Pr. (CMJN 2100 or CMJN 2103) and JRNL 1100 or JRNL 1AA0 and (PRCM 2400 or PRCM 2403) and (PRCM 2500 or PRCM 2503 or PRCM 3040 or PRCM 3043) and PRCM 3000 and PRCM 4400. JRNL 1100 with a minimum grade of "B" in JRNL 1100. Application of theory, research data, and problem-solving techniques in the development of comprehensive public relations strategies.
PRCM 4920 INTERNSHIP (3) AAB/INT. 200. Pr. (CMJN 2100 or CMJN 2103) and (PRCM 2400 or PRCM 2403) and (PRCM 3000 or PRCM 3003). Opportunity to apply classroom experience in career setting. Internship must be a supervised, closely monitored work experience, appropriate to the major, that takes place in a professional setting.

PRCM 4930 DIRECTED STUDIES IN PUBLIC RELATIONS (3) LEC. 3. Pr. JRNL 1100 or JRNL 1AA0 and (PRCM 3040 or PRCM 3043) and (CMJN 2100 or CMJN 2103), with a minimum grade of “B” in JRNL 1100. Independent Study on a specific topic of interest not already addressed in any regular PRCM course.

PRCM 4970/4973 SPECIAL TOPICS IN PUBLIC RELATIONS (3) LEC. 3. Pr. JRNL 1100 and (PRCM 3040 or PRCM 3043) and (CMJN 2100 or CMJN 2103) and (PRCM 2500 or PRCM 2503), with a minimum grade of “B” in JRNL 1100. Focus on narrowly defined PRCM topics not already covered in the current PRCM curriculum.

Additional twelve hours of courses in COMM. 12

Total Hours 18

1 Minimum 9 hours at 3000-level or above

2 Students must earn at least a 2.0 in the minor to successfully complete it.

See advisor for approved list of courses and suggested emphasis areas.

### Curriculum in Communication

Students must apply for admission to the COMM major. All applicants must have successfully completed 30 hours of degree-applicable course credits (including AP and proficiency credits); earn a B or better in COMM 1000, and a C or better in (CMJN 2100 or CMJN 2103), ENGL 1120 and a core Social Science course (may not use a History course); and earn a minimum 2.3 GPA in ENGL 1120 and the Core Social Science course. See the School Director or the Associate Director for Communication for further information.

Students who transfer to Auburn University’s COMM major are required to take a minimum of 21 credit hours in the AU Program.

Total Hours: 120

1. COMM 1000 fulfills SLO 7.
2. If Literature requirement was completed prior to Fall 2013, Core Humanities must cover SLO 3.
3. Students must see their advisers for approved course listings for Groups 1, 2, 3, and 4.
4. Students must see their advisers for approved Supporting Area courses.
5. The internship may be taken part time for 3 credit hours or full time for 6 credit hours.

**Curriculum in Journalism**

Students must apply for admission to the JRNL major. Before applying, students must: 1) Have a minimum of a 2.3 GPA in ENGL 1120 and a Core Social Science course*; 2) Complete ENGL 1120, CMJN 2100 or 2103, and a Core Social Science course* with a C or better; 3) Successfully pass JRNL 1AA0 or JRNL 1100 with a “B” or better; 4) Complete JRNL 2210 with a “C” or better; 5) Successfully complete 30 hours of degree-applicable course credits (including AP and proficiency credits; and 6) Write a 300-word essay explaining how the applicant expects to contribute to the field of Journalism and his/her career goals. See the School adviser or the associate director for Journalism for further information. Students who transfer to Auburn University must apply to the JRNL major and complete one semester at Auburn University before applying for admission. Transfer students are required to take a minimum of 24 hours in the AU JRNL program.

* May not use a History course to fulfill the Core Social Science requirement

1. Students are required to complete a two-course history sequence or a two-course literature sequence. They are also required to complete one Core History or Core Literature in the discipline not selected as the sequence.

2. COMM 1000/1003 fulfills SLO 7

3. If students do not pass the JRNL 1AA0 Journalism Fundamentals Entrance Exam, they must take JRNL 1100 Journalism Fundamentals as a Group 3 course.

4. Students should meet with their advisers about appropriate courses from Groups 1, 2 and 3.

5. Electives must be selected from courses outside the School of Communication and Journalism. Students must see their advisers for appropriate electives.

**Curriculum in Media Studies**

Students must apply for admission to the MDIA major. Before applying, students must: 1) Have a minimum of a 2.3 GPA in ENGL 1120 and a Core Social Science course; 2) Complete ENGL 1120, CMJN 2100 or 2103, and a Core Social Science course with a C or better; 3) Successfully complete COMM 1000 or COMM 1003 with a B or better; 4) Successfully complete 30 hours of degree-applicable course credits (including AP and proficiency credits); and 5) Write a 300-word essay explaining how the applicant expects...
to contribute to the field of Media Studies and his/her career goals. See the School adviser or the associate director for Media Studies for further information. Students who transfer to Auburn University must apply to the MDIA major and complete one semester at Auburn before applying for admission. Transfer students are required to take a minimum of 24 hours in the AU MDIA program.

*May not use a History course to fulfill the Core Social Science requirement

### Intercultural Communication Minor

**Minor in Intercultural Communication**

The 18 hour Intercultural Communication minor is designed to provide students with a comprehensive understanding of the nature of communication and culture in order to prepare them for living and working in a diverse and complex society. The minor is open to all undergraduates students with the exception of those majoring in programs housed within the School of Communication and Journalism.

**Required Courses (6 hours):**

¹ Students may take the JRNL 1100 for 3 credit hours or the zero-credit JRNL 1AA0 exam. Students who pass the JRNL 1AA0 Journalism Fundamentals Entrance Exam with a B or higher will select an additional 3-hour elective from the list to complete the 18-hour minor.

² This minor requires 9 hours of foundations course work and 9 hours of course work from the list. Students must talk with their advisers to identify appropriate area course work and ensure that they meet the prerequisites for each course.

Students must earn at least a 2.0 in the minor to successfully complete it.

**Media Studies Minor**

The 18-hour Minor in Media Studies is designed to provide students with an in-depth approach to the study of film, television, music, and digital media grounded in the humanities tradition. Students will learn how to analyze and interpret media critically as well as situate it within its historical, industrial, and cultural context. The minor is open to all undergraduates students with the exception of those majoring in programs housed within the School of Communication and Journalism.

**Required Courses:** (9 hours)
CMJN 2100
MDIA 2350
MDIA 3300

And nine additional hours in MDIA at 3000 level or higher: 9

Total hours: 18

Students must earn at least a 2.0 in the minor to successfully complete it.

Public Relations Minor

The 18 hour Public Relations minor is designed to provide students with a comprehensive understanding of essential elements of the public relations process. The minor is open to all undergraduate students with the exception of those majoring in programs housed within the School of Communication and Journalism.

Required Courses:

<table>

</tbody>
</table>

Total Hours 18

Students should visit with their advisers to identify appropriate area course work and ensure that they meet the prerequisites for each course. Students must earn at least a 2.0 in the minor to successfully complete it.

Sport Communication Minor

Sport Communication is a rapidly growing area of study in colleges and universities. The billion dollar industry is demanding professionals with a full set of competencies to provide news and information to their growing public. The Sport Communication minor will prepare students in public relations, strategic communication, media writing, sports announcing and sports producing. The minor will engage students in problem-solving and critical writing through the variety of sports-related writing assignments given in courses offered through the School of Communication and Journalism. Students will also gain an understanding of the critical issues affecting society as they relate to professional, collegiate and recreational sports. Students will learn the methods and techniques for communicating about sports in a variety of formats and media.

This minor requires 6 hours of foundations course work and 12 hours from the course work from the list below. Students must talk with their advisers to identify appropriate area course work and ensure that they meet the prerequisites for each course.

Students must earn at least a 2.0 in the minor to successfully complete it.

Select 9 hours from the following: 9
Interdisciplinary University Studies (IDSC)

The Bachelor of Science in Interdisciplinary University Studies allows students to attain a broad education and acquire diverse skill sets unique to a profession they desire to enter. Students seeking an Interdisciplinary University Studies degree have the opportunity to create a personalized academic program by customizing a curriculum that demonstrates proficiency in broad skills as well as discipline-specific knowledge.

Students enter the program as pre-majors. Admission to the major requires successful completion of the following pre-requisites: a student must first (1) complete Life, Career, and Everything (IDSC 1010) with a grade of C or better, (2) complete Foundations of Interdisciplinary University Studies (IDSC 2190/IDSC 2193) with a grade of C or better, and (3) complete an approved individualized curriculum plan. Students must be admitted to the major before enrolling in Advanced Interdisciplinary Problem Solving IDSC 3210. Students with more than 90 hours of coursework must receive special permission to be admitted to the major.

Students must also earn a grade of C or better in Public Speaking (COMM 1000), and in one written communication class to be selected from Technical Writing (ENGL 3040), Business Writing (ENGL 3080) or Advanced Composition (ENGL 4000). Students may elect to use COMM 1000 to meet 3 hours of the Humanities Core requirements. Students admitted during Fall 2017 and after must take IDSC 3210 before they will be allowed to take the Capstone course. IDSC 3210 cannot be taken until the student has passed IDSC 2190/IDSC 2193 with a grade of C or better. All students must also complete a capstone experience (IDSC 4930 or IDSC 4920) with a grade of C or better. In the capstone experience, students integrate acquired knowledge through a research project (IDSC 4930), or an internship program (IDSC 4920). Students must earn 3 hours of capstone credit and may earn a maximum of 6 hours of capstone credit. Students electing to take the capstone course twice must use elective hours for the additional three hours.

The student creates two or three identifiable areas of emphasis using coursework from two or three different Schools or Colleges. The major must have a total of 45 hours of approved coursework. The IDSC faculty review committee will not approve a combination of minors or areas of emphasis that substantially recreates an existing degree program in those areas. If a student elects to have two areas of emphasis they must have at least 21 hours of coursework in one emphasis (the majority of which is from one college or school) and up to 24 hours in the other (the majority of which is from the second college or school) for a total of 45 hours. Twenty-seven of the 45 hours in the major must be at or above the 3000 level. If a student elects to have three areas of emphasis they must have 15 hours of coursework in each emphasis. Students with three areas of emphasis may use existing minors as emphasis areas or they may work with the departmental representative in a specific area to develop an emphasis. Within the 15 hour emphasis plan, at least nine-hours of each emphasis must be 3000 level or above coursework. If a student elects to use existing minors and a minor requiring more than 15 hours is selected the student must complete the entire minor. Students electing to use minors are subject to all rules of those minors, for example, minimum grades to count courses in the minor will also apply to the Interdisciplinary Studies degree plan. Minors used as emphases become part of the Interdisciplinary Studies degree and will not be listed on the official transcript or the diploma.

Additional information about this major can be found at Interdisciplinary Studies (https://cla.auburn.edu/idsc/).

Major Course Hours 45

Prerequisites/Major Supporting Courses/Electives Varies

Minimum Number of Required Hours 120

1. Must have grade of C or better.
2. Oral Communication (COMM 1000) may be used to satisfy 3 hours of Humanities in the University Core Curriculum.
3. Major course hours are used to calculate the GPA in the major.
4. The Individual Plan of Study will include a total of 45 hours selected across two emphases (at least 21 hours in one emphasis and no more than 24 hours in the second emphasis) or across three emphases (each with 15 hours). Emphases must be selected from at least two different Schools or Colleges. Approval of the appropriate academic advisor, faculty advisor, program director or department head for courses in each emphasis is required; a plan of study substantially recreating an existing degree program in one of these areas will not be approved. Students may use existing minors for emphases and they must follow all rules for those minors. Students must receive a grade of C or better in IDSC coursework to successfully progress to the upper level IDSC courses.
5. Total number of prerequisite/major supporting course/elective hours varies depending on choices made. Students who elect to use existing minors with more than 15 hours must use elective hours to complete the minor; students who elect to take a second capstone must use elective hours for the second course. Elective hours may also be used to allow the student to complete a minor outside of their areas of emphasis and must be used to bring the total number of hours in the students degree plan to 120. The minors used as emphases become part of the Interdisciplinary Studies degree and will not be listed on the official transcript or diploma.

Majors

Minors

Options

Engineering

This program provides for enrollment in the Liberal Arts Curriculum and in the Samuel Ginn College of Engineering. Two degrees will be awarded: a bachelor of arts degree in the liberal arts major and a bachelor's degree in the designated engineering field. Students should receive dual advising through the Colleges of Liberal Arts and Engineering. Typically, five to six academic years are necessary to complete dual requirements.

Pre-Law

Most majors and curricula are accepted as preparation for the study of law, but students interested in attending law school should also consider majoring in Law and Justice. Courses deemed useful, and which may be taken as electives, in majors, and in some cases to fulfill certain core requirements, are available from the pre-law program, located in 7002 Haley Center, where students receive advice on preparing for law school admission and the study of law.

Pre-Health

Most majors and curricula in Liberal Arts are accepted as preparation for professional degrees in health, including advanced degrees from schools of medicine, dentistry, optometry, physical therapy, occupational therapy and others. Generally, particular courses in the sciences, mathematics and philosophy should be taken in the University Core. Additional sciences and mathematics may be needed as electives. The university’s pre-health advisor should be consulted for elective and core course guidance and for assistance in applying
to graduate/professional schools. The liberal arts advisor is available for all other matters related to the student's undergraduate studies.
School of Nursing

Gregg E. Newschwander, Dean
Caralise W. Hunt, Associate Dean for Academic Affairs

THE SCHOOL OF NURSING, established in 1979, offers a program of study leading to the Bachelor of Science in Nursing. The nursing curriculum prepares beginning professional nurse generalists and licensed associate degree nurse to function as members of the healthcare team in providing care for individuals and groups in diverse settings. The program also provides an educational base for advancement in formal study, research, and practice. The facilities and resources of the university are used to provide a broad academic background in the humanities and sciences.

Nursing prerequisites are required of students seeking admission to the professional curriculum. The first two years of course work are designated Pre-Nursing (PNUR). The Professional Curriculum requires five terms that include classroom, laboratory, and clinical experiences. Graduates are eligible to make application to the NCLEX-RN examination to become registered nurses.

Licensed associate degree nurses seeking the Bachelor of Science in Nursing complete the required prerequisites followed by the three semester professional program.

Admission

Pre-Nursing Program

Freshman eligibility is determined by the Office of Enrollment Services. Admission requirements are stated elsewhere in this Bulletin. High school mathematics, chemistry and biology courses are strongly recommended, along with other college preparatory courses in social science, history, literature and English composition. Students are strongly encouraged to see an academic advisor in the School of Nursing on a regular basis.

Transfers from other institutions must apply through the Office of Enrollment Services. Review of transcripts by the School of Nursing will determine the amount of credit allowed for the pre-nursing requirements. Students planning to transfer from other universities are encouraged to contact the School of Nursing as soon as possible for advisement on transfer of credits.

Technical Standards and Requirements

Acquire and interpret information (AACN Essentials I, IV, V)

- Ability to acquire and interpret information, including, but not limited to information conveyed through coursework, lecture, group activities, written documents, computer systems, and laboratory, simulation, and clinical experiences.

Communicate with others in oral and written form (AACN Essentials IV, VI)

- Ability to communicate effectively and sensitively through various mediums with a variety of individuals including patients, families, healthcare team members, faculty and peers of diverse ethnic, religious, and cultural backgrounds.
- Ability to elicit information from patients, family members, and healthcare team members to effectively evaluate and plan patient care.
- Ability to comprehend and use standard professional nursing and medical terminology.
- Ability to convey information to patients, families, and the healthcare team including health teaching and explaining care.

Integrate knowledge to demonstrate clinical judgment (AACN Essentials II, III, VII)

- Ability to assess, interpret, respond to, and evaluate patient health needs.
- Ability to critically think, problem-solve, and apply clinical judgment to care for patients, families, and/or communities across the health continuum in diverse care environments.

Exhibit professional behaviors and attitudes (AACN Essentials VIII, IX)

- Ability to exercise proper judgment and complete responsibilities in a timely and accurate manner.
- Ability to demonstrate concern for others, integrity, accountability, interest, and motivation.
• Possess the emotional health necessary to function under stress and adapt to changing environments within the context of classroom and clinical settings.

Utilize motor skills  (AACN Essentials IX)
• Ability to obtain accurate information from patients using gross and fine motor skills appropriate to the technique.
• Possess psychomotor skills and endurance necessary to provide holistic nursing care.
• Practice in a safe manner using universal precautions.
• Provide timely and appropriate care in urgent and emergent situations.

Professional Program
Admission to the professional program occurs in both Summer and Fall. Pre-nursing students must formally apply for admission to the professional program, typically during the sophomore year, and meet the deadlines and requirements for the admission cycle. To be eligible for consideration for an interview and admission, applicants must have completed at least 3 of the 5 required science courses in the pre-nursing curriculum and have no more than 18 hours of pre-nursing coursework outstanding. Criteria considered for admission include unadjusted pre-nursing GPA, science GPA, number of hours completed at Auburn, successful completion (C or higher) of all pre-nursing requirements and interview score. While the GPA to be considered for an interview is an overall unadjusted GPA of 2.5 or higher, interviews will be granted based on the overall unadjusted GPA of the pool of applicants and in reality a higher GPA may be required to interview. Applicant interviews will be conducted once per year in February. Due to limited enrollment, all students who meet minimum requirements may not be interviewed or admitted.

Students will be notified of admission decisions in writing by March 1. Those applicants admitted must successfully complete all pre-nursing courses with a C or higher before entering the upper division.

Application for RN Licensure
Following successful completion of the registered nursing program, the graduate will apply for RN Licensure in Alabama or another state and follow all procedures as stipulated by the state board of nursing.

RN to BSN Program
Applicants to the RN to BSN program must apply to Auburn University, have a minimum GPA of 2.5 and a C or higher in all required prerequisite courses, have no more than 6 credit hours of outstanding prerequisites, have completed all science and statistics prerequisite courses, and maintain a current unencumbered RN license throughout the program.

Academic Regulations
Advanced placement credit in pre-nursing courses is granted according to university policies stated elsewhere in the Bulletin. Proficiency examinations or Advanced Placement (CEEB), with accepted score, may be used for advanced placement.

A minimum grade of C is required in pre-nursing courses. Transfer credit will not be granted for courses in which a grade less than C is earned.

In the professional program, a minimum grade of C, or Satisfactory in all courses, must be achieved. An overall GPA of 2.0 must be maintained for progression through the professional program. Because the professional nursing curriculum is designed for progressive development of nursing knowledge and skills, students who earn an Unsatisfactory or grade less than C in a professional program course are not allowed to progress to the next clinical course. The course in which the student earns a grade less than C or Unsatisfactory may be repeated one time only. Students who earn a grade less than C or Unsatisfactory in two or more professional program courses or whose GPA falls below a 2.0 will be dropped from the professional program and are not eligible for readmission. Transfer credit is not generally allowed for courses in the professional program.

The Professional Program
Facilities
The School of Nursing is housed in the nursing building located at 710 South Donahue Drive. Clinical nursing experiences are conducted at acute care, community and long-term care facilities in a variety of locations. Students are responsible for complying with policies and procedures required by agencies in which clinical experiences are completed.
Expenses
Students accepted into the professional program should expect to incur additional expenses including a professional fee associated with the clinical courses. Uniforms, equipment, expenses related to travel to clinical sites, smart phone devices with the capability of retrieving required information, laptop with designated specifications, standardized exams and software, NCLEX reviews, a health examination and liability and health insurance coverage are among the requirements. Students are required to have a current drug screen and background check. The costs of such requirements will be the responsibility of the student. An updated Detailed Expenses by Semester sheet can be located on the School of Nursing website.

Accreditation
The baccalaureate degree in nursing program, master's degree in nursing program, Doctor of Nursing Practice program, and the post-graduate APRN certificate program at Auburn University School of Nursing are accredited by the Commission on Collegiate Nursing Education (http://www.ccneaccreditation.org). The AUSON prelicensure BSN program is approved by the Alabama Board of Nursing.

Program
• Nursing - Traditional (p. 1137)
• RN - BSN (p. 1139)

Program
• Nursing - MSN (https://cws.auburn.edu/Nursing/pm/msn-progr-overview/)
• Primary Care Nurse Practitioner - Graduate Certificate (https://cws.auburn.edu/nursing/pm/PMCertificateOverview/)
• Nurse Educator - Graduate Certificate (https://cws.auburn.edu/nursing/pm/PMCertificateOverview/)
• Doctor of Nursing Practice (http://bulletin.auburn.edu/thegraduateschool/graduatedegreesoffered/nursingdoctor_major/)

Courses
NURS 2023 DOSAGE CALCULATION AND MEDICAL TERMINOLOGY FOR HEALTHCARE PROFESSIONALS (1) DSL. Provides fundamental dosage calculation and medical terminology concepts essential for professional nursing and/or healthcare practice. Course may be repeated for a maximum of 2 credit hours.

NURS 2120 CONTEMPORARY TOPICS IN WOMEN’S HEALTH (3) LEC. 3. This course will provide an overview of health issues affecting women. Topics will include sexually transmitted infections, contraception, childbirthing, mental health, domestic violence, human trafficking, and menopause.

NURS 3110 THEORETICAL CONCEPTS OF PROFESSIONAL NURSING PRACTICE (3) LEC. 3. Coreq. NURS 3141 and NURS 3130. Exploration of essential professional nursing concepts.

NURS 3120 NURSING PATHOPHYSIOLOGY (3) LEC. 3. Coreq. NURS 3130 and NURS 3141. Admission to the School of Nursing Upper Division. Pathophysiological concepts that guide nursing professionals in the assessment, planning, implementation and evaluation of care for patients across the lifespan.

NURS 3130 EVIDENCE BASED SKILLS, ASSESSMENT, AND HEALTH PROMOTION (4) LEC. 4. Coreq. NURS 3141 and NURS 3110. Integration of current evidence to guide nursing skills, assessment, and health promotion.

NURS 3141 CONCEPTS AND EVIDENCE BASED SKILLS FOR PROFESSIONAL CLINICAL PRACTICE (3) LAB. 9. SU. Coreq. NURS 3130 and NURS 3110. Application of foundational nursing concepts, skills, and assessment across the lifespan in diverse settings with emphasis on health promotion.

NURS 3210 CLINICAL PHARMACOLOGY (3) LEC. 3. Pr. NURS 3120 or NURS 3123. Nurse's role in therapeutic pharmacology.

NURS 3630 PROFESSIONAL NURSING LEADERSHIP IN MICROSYSTEMS (2) LEC. 2. Pr. NURS 3230 and NURS 3231. The study of leadership and management concepts for direct patient care. Nursing Science only

NURS 3730 PROFESSIONAL NURSING CONCEPTS: MENTAL HEALTH ACROSS THE LIFESPAN (2) LEC. 2. Pr. NURS 3110 and NURS 3130 and NURS 3141. Coreq. NURS 3330 and NURS 3731. Concepts inherent in the delivery of nursing care for mentally ill individuals, families, and communities across the lifespan.

NURS 3731 PROFESSIONAL NURSING CONCEPTS: MENTAL HEALTH ACROSS THE LIFESPAN CLINICAL (2) LAB. 2. SU. Pr. NURS 3110 and NURS 3130 and NURS 3141. Coreq. NURS 3730. Clinical application of concepts inherent in the delivery of nursing care for mentally ill individuals, families, and communities across the lifespan.

NURS 3813 HOLISTIC NURSING PATHOPHYSIOLOGY & HEALTH ASSESSMENT (6) DSL. 6. Coreq. NURS 3843. Pathophysiological concepts that guide professional nurses in assessment, planning, implementation and evaluation of holistic care for patients across the lifespan.

NURS 3843 FORMATION OF PROFESSIONAL NURSING PRACTICE (5) DSL. 5. Coreq. NURS 3813. Admission to the School of Nursing RN to BSN Program. Examines concepts, theories, and competencies fundamental to the formation of professional nursing practice.

NURS 3940 HEALTHCARE AND LEADERSHIP IN NURSING ABROAD (3) LEC. 45. LAB. 0. Pr. NURS 3230 and NURS 3330. Study abroad learning opportunity to explore healthcare, culture, cultural values, nursing leadership, and nursing regulation in Seville, Spain.

NURS 3970 SPECIAL TOPICS IN NURSING (3) LEC. 3. Focused study plan designed for students who are out of sequence in the professional nursing curriculum. Course may be repeated for a maximum of 6 credit hours.

NURS 4120 HEALTH SCIENCE CAMP EXPERIENCE (3) LAB. 0. Clinical experience in the care of children with chronic conditions in a camp setting.

NURS 4230 PROFESSIONAL NURSING CONCEPTS: CHRONIC AND COMPLEX CONDITIONS (5) LEC. 5. Pr. (NURS 3330 and NURS 3331 and NURS 3730 and NURS 3731 and NURS 3231) and P/C NURS 4231. Concepts inherent in the delivery of nursing care for individuals, families, and populations with chronic and/or complex conditions.

NURS 4231 PROFESSIONAL NURSING CONCEPTS: CHRONIC AND COMPLEX CONDITIONS - CLINICAL (5) LAB. 15. SU. Pr. (NURS 3230 and NURS 3330 and NURS 3331 and NURS 3730 and NURS 3731) and P/C NURS 4230. Applications of concepts inherent in the delivery of nursing care for individuals, families, and populations with chronic and/or complex conditions.

NURS 4240 CULTURAL EXPEDITIONS IN HEALTH CARE (2) LEC. 2. Pr., Senior-level student in Nursing. Hands-on experience with different aspects of culture including an overnight stay in a replica of a third world global village.

NURS 4270 PERIOPERATIVE NURSING (2) LEC. 1. LAB. 1. Pr. NURS 3230 and NURS 3231. This course is designed to give the student a broad knowledge base for the specialty of perioperative nursing and the multiple factors that will impact patient care from the preoperative phase through the recovery phase. The course will cover concepts of care that span all ages and types of surgical procedures.

NURS 4280 ANIMAL-ASSISTED THERAPY (2) LEC. 2. Theoretical foundations and guidelines for practice of animal-assisted therapy.

NURS 4290 EVIDENCE BASED PRACTICE (2) LEC. 2. Pr. NURS 3230. Application of appropriate research findings and other evidence to influence nursing practice.
NURS 4833 LEADERSHIP AND MANAGEMENT IN PROFESSIONAL NURSING (3) DSL. 3. Pr. NURS 3813 and NURS 3843. Coreq. NURS 3833. Admission into Online RN-to-BSN Program. Addresses evidence-based leadership/management competencies for the professional nurse working with interprofessional team.

NURS 4843 TRANSITION TO PROFESSIONAL NURSING PRACTICE (6) DSL. 6. Pr. NURS 4833 and NURS 3833. Coreq. NURS 4853. Admission into Online RN-to-BSN Program. Integrate past nursing practice and acquired knowledge, skills, and attitudes for transition to the professional nursing role.

NURS 4900 INDEPENDENT STUDY IN NURSING (1-6) IND. Directed readings and/or clinical study in student-selected areas related to nursing. Course may be repeated for a maximum of 6 credit hours.

NURS 4920 TRANSITION TO PROFESSIONAL NURSING PRACTICE (4) LEC. 4. Pr. NURS 4230 and NURS 4231. Coreq. NURS 4921. Provides the content and learning experiences designed to help students synthesize the essential concepts for successful transition into professional nursing. Course may be repeated for a maximum of 8 credit hours.

NURS 4921 TRANSITION TO NURSING PRACTICE (7) LAB. 7. SU. Pr. NURS 4230 and NURS 4231. Coreq. NURS 4920. Application of essential concepts for transition into professional nursing practice.

NURS 4930 COMMUNITY ASSESSMENT PROJECT (1) LEC. 1. LAB. 14. Pr. (NURS 4230 and NURS 4231) and P/C NURS 4290. Capstone course for a community assessment project completed throughout the nursing program.

NURS 4970 SPECIAL TOPICS IN NURSING (1-4) STU. SU. Focused study plan designed for students who have not met an identified curricular benchmark. Course may be repeated for a maximum of 4 credit hours.

NURS 4997 HONORS THESIS (1-3) IND. Pr. Honors College. Course may be repeated for a maximum of 3 credit hours.

NURS 7110/7116 ADVANCED PHYSICAL ASSESSMENT/APPLIED CLINICAL CONCEPTS I (3) LEC. 2, LEC. 4. Departmental approval. Focus is on assessment, knowledge and techniques required for master's level prepared nurses in a clinical setting. Admission to the MSN Program

NURS 7120/7126 QUALITY IMPROVEMENT/PROCESS MGT. FOR APNS (3) LEC. 3. Addresses elements of quality improvements and organizational responsibilities related to quality assurance. May count either NURS 7120 or NURS 7126.

NURS 7210/7216 TEACHING STRATEGIES: METHODS, DESIGN, AND TECHNOLOGY (2) LEC. 2. In this course, students will develop an understanding of how to facilitate learning and learner development through the use of various teaching strategies and instructional technology. Students will focus on selection, design, use, and evaluation of teaching methods, instructional materials, and current and emerging learning technologies.

NURS 7220/7226 ROLES AND ISSUES OF THE PRIMARY CARE PRACTITIONER (3) LEC. 3. Departmental approval. This course explores the complex process of role development for the advanced practice nurse within current health care systems. Competencies and role development issues of advanced nursing practice are included. Role transition and strategies for facilitating role acquisition and implementation including social, legal and ethical issues governing advanced practice in primary health care are addressed. Admission to the MSN Program

NURS 7230/7236 ADVANCED PATHOPHYSIOLOGY (3) LEC. 3. Admission to the MSN Program or permission of MSN faculty. In-depth understanding of Pathophysiology associated with complex conditions to determine treatment options and prevention strategies across the lifespan.

NURS 7240/7246 ADVANCED PHARMACOLOGY (3) LEC. 3. Pr. NURS 7230 or NURS 7236. Admission to the MSN Program or permission of MSN faculty. Provides a process for students to think pharmacotherapeutically which is identifying a disease process, select a treatment based on the treatment goals, and how to adjust therapy.

NURS 7250/7256 HEALTHCARE POLICY AND ETHICS FOR THE NURSE LEADER (3) LEC. 3. Departmental approval. This course addresses the U.S. health care delivery system at micro and macro levels, problems, principles and the alternatives for managing problems in a systematic manner. Health policy, economic, and ethical principles and the relationship of these concepts to advocacy and leadership roles are explored. Admission to the MSN Program
NURS 7260/7266 TRANSITION FROM CLINICIAN TO NURSE EDUCATOR (2) LEC. 2. This course provides the nurse educator student with a basic understanding regarding the nature of the nurse educator role. The student will explore dynamics influencing the development of the students' role and attaining success in higher education, different career paths, and issues shaping their perception of higher education.

NURS 7310/7316 TRANSITION TO ADVANCED PRACTICE NURSING (2) LEC. 2. This course is designed to introduce the Masters student to scholarly writing and inquiry for evidence-based practice. The principles of synthesis in writing and understanding of research are addressed. Course may be repeated for a maximum of 4 credit hours.

NURS 7320/7326 CURRICULUM DEVELOPMENT AND EVALUATION (4) LEC. 4. Pr. NURS 7346 or NURS 7340 or departmental approval. Analysis and evaluation of curriculum construction, selection of teaching strategies for diverse groups and individuals, and evaluation of learning outcomes in education of patients, health providers, and nursing students. Admission to the MSN Program

NURS 7330/7336 DIAGNOSTIC REASONING AND CLINICAL MANAGEMENT (3) LEC. 3. Pr. NURS 7110 or NURS 7116. Focus is on the process of collecting data and arriving at diagnostic and therapeutic conclusions to guide clinical management for patients. Preq: NSG 6671, NSG 6649, NURS 7110.

NURS 7340/7346 ADVANCED THEORETICAL FOUNDATIONS OF NURSING (3) LEC. 3. Departmental approval. Students explore the theoretical foundations of advanced nursing practice. The roles of the Master's prepared nurse are explored, along with central concepts inherent to nursing practice. Theories from nursing and related disciplines are examined with emphasis on application of theory to nursing practice. Admission to the MSN Program

NURS 7350/7356 QUALITY, SAFETY, AND PREVENTION USING TECHNOLOGY (3) LEC. 3. Departmental approval. This course examines the concepts of clinical illness prevention, population health, quality and safety in health care, and the use of information technologies. Admission to the MSN Program

NURS 7360/7366 EVIDENCE-BASED PRACTICE I (2) LEC. 2. Departmental approval. This course is designed to introduce the Master's student to evidence-based practice. The foundations of EBP are explored including search strategies, research critique, and applications of EBP in advanced practice. Synthesis and evaluation of evidence using various models will be discussed. Admission to the MSN Program

NURS 7370/7376 EVIDENCE-BASED PRACTICE II (2) LEC. 2. Pr. NURS 7360 or NURS 7366 or departmental approval. This course focuses on the concepts necessary for implementation and evaluation of an EBP project. Data collection tools, data analysis, and the presentation of data will be explored. Students will discuss change strategies, protection of human subjects, and the development of measurable outcomes. Admission to the MSN Program

NURS 7430/7436 EVIDENCE BASED NURSING PRACTICE (2) LEC. 2. Pr. NURS 7316 or NURS 7310. This course is designed to introduce the Masters student to evidence-based practice (EBP). The foundations of EBP are explored including evidence-based models, search strategies, synthesis, and evaluation of research and other evidence, and application of EBP in advanced practice. Course may be repeated for a maximum of 4 credit hours.

NURS 7440/7446 PRIMARY CARE I: WOMEN AND CHILDREN (3) LEC. 1, SEM. 2. Pr. NURS 7330 or NURS 7336. Admission to the MSN Program, completion of pre-requisites, or departmental approval. Focus is on the primary care nurse practitioner's role in managing common acute and chronic health problems in the women and pediatric population in a variety of primary care settings.

NURS 7540/7546 IMPLEMENTATION AND EVALUATION OF EVIDENCE-BASED NURSING PRACTICE (2) LEC. 2. Pr. NURS 7436 or NURS 7430. This course focuses on the concepts necessary for implementation and evaluation of an evidence-based practice project. Data collection tools, data analyses, and interpretation of data analysis will be explored. Students will discuss change strategies, development of measurable outcomes and dissemination of any results. Course may be repeated for a maximum of 4 credit hours.

NURS 7550/7556 PRIMARY CARE II: ADULTS AND ELDERLY (3) LEC. 1, SEM. 2. Pr. NURS 7330 or NURS 7336. Admission to the MSN Program, completion of pre-requisites, or departmental approval. Focus is on the primary care nurse practitioner's role in managing common acute and chronic health problems in the adult and geriatric population in a variety of primary care settings.
NURS 7810/7816 NURSING EDUCATION PRACTICUM (3) PRA. 3. Pr. (NURS 7346 or NURS 7340) and (NURS 7356 or NURS 7350) and (NURS 7316 or NURS 7310) and (NURS 7266 or NURS 7260) and (NURS 7216 or NURS 7210) and (NURS 7236 or NURS 7230) and (NURS 7256 or NURS 7250) or (NURS 7436 or NURS 7430) or (NURS 7326 or NURS 7320) and (P/C NURS 7246 or P/C NURS 7240) and (P/C NURS 7116 or P/C NURS 7110) and (P/C NURS 7546 or P/C NURS 7540) and (P/C NURS 7246 or P/C NURS 7240) and (P/C NURS 7116 or P/C NURS 7110) and (P/C NURS 7546 or P/C NURS 7540). Synthesis of educational theories, research, and strategies in applying the roles of the educator in teaching clients, students, or healthcare providers. Selected educational settings provide opportunities to practice the roles of educator under guidance of a qualified preceptor. The practicum includes 120 academic clinical and 60 healthcare facility clinical based direct care hours.

NURS 7920/7926 PRIMARY CARE PRACTICUM (7) LEC. 1, LEC. 6. Pr. (NURS 7440 or NURS 7446) and (NURS 7550 or NURS 7556) or departmental approval. This course focus is on the application of knowledge and skills in the transition to the role of the primary care nurse practitioner. Admission to the MSN Program, completion of pre-requisites,

NURS 7940/7946 EVIDENCE-BASED PRACTICE III (2) LEC. 2. Pr. (NURS 7370 or NURS 7376) and (NURS 7360 or NURS 7366) or departmental approval. The focus of this course is the application of evidenced based practice concepts in advanced nursing practice. EBP III is a practicum course in which the student may implement the project proposed in EBP I & II or prepare a manuscript from that project that synthesizes the evidence and submit to a national refereed professional journal. Admission to the MSN Program

NURS 8320/8326 INFORMATICS AND MANAGEMENT OF HEALTH OUTCOMES (3) LEC. 3. Admission to DNP Program. Provides the DNP student with knowledge and skills to to access and utilize health care data. May count either NURS 8320 or NURS 8326.

NURS 8330/8336 QUANTITATIVE METHODS FOR EVIDENCE-BASED PRACTICE (3) LEC. 3. Admission to DNP Program. Provides the DNP student with clinical data management and outcome skills with an essential component of any EBP. May count either NURS 8330 or NURS 8336.

NURS 8410/8416 THEORY APPLICATION FOR ADVANCED PRACTICE (3) LEC. 3. Admission to DNP Program. The course is the basis for the Doctor of Nursing Practice (DNP) project by identifying and investigating the various phenomena of interest in student's practice area. May count either NURS 8410 or NURS 8416.

NURS 8420/8426 POPULATION HEALTH OUTCOMES (3) LEC. 3. Admission to DNP Program or permission of instructor. Provides the graduate student with knowledge and skills to examine population health issues across the lifespan, globally and regionally. May count either NURS 8420 or NURS 8426.

NURS 8430/8436 FINANCIAL MANAGEMENT FOR ADVANCED PRACTICE (3) LEC. 3. Admission to DNP Program. Provides DNP student with the knowledge and skills necessary to identify, evaluate, and consider costs associated with implementing and sustaining change. May count either NURS 8430 or NURS 8436.

NURS 8440/8446 LEADERSHIP FOR ADVANCED HEALTH POLICY (3) LEC. 3. Admission to DNP Program. Provides the DNP student with the knowledge and skills to be a leader in health care and to influence health policies at multiple levels. May count either NURS 8440 or NURS 8446.

NURS 8510/8516 FOUNDATION FOR EVIDENCE-BASED PRACTICE (3) LEC. 3. Admission to DNP Program. Provides the DNP student with the methodological basis for translating evidence into practice systems in a variety of health care environments. May count either NURS 8440 or NURS 8446.

NURS 8540/8546 ADVANCED PRACTICE PRACTICUM (2) LEC. 2. Provides the DNP student with opportunity to synthesize advanced practice knowledge and role behaviors in a advanced practice role. May count either NURS 8540 or NURS 8546. Course may be repeated for a maximum of 6 credit hours.

NURS 8710/8716 TRANSITIONAL SKILLS FOR DNP PRACTICE (2) LEC. 2. Admission to DNP Program. Provides the DNP student with the knowledge and skills to develop their DNP role as a leader in health care improvement efforts. May count either NURS 8710 or NURS 8716.

NURS 8720/8726 HEALTH INNOVATIONS AND CLINICAL OUTCOMES IMPROVEMENTS (3) LEC. 3. Admission to DNP Program. Provides the DNP student with knowledge and skills to develop, implement, and evaluate programs that improve health. May count either NURS 8720 or NURS 8726.
NURS 8930/8936 DNP PROJECT PRACTICUM I : DEVELOPMENT (3) LEC. 3. Pr. (NURS 8410 or NURS 8416) and (NURS 8510 or NURS 8516) and (NURS 8710 or NURS 8716) and (NURS 8720 or NURS 8726) and (P/C NURS 8330 or P/C NURS 8336). First in a three-course sequence which provides the DNP student with the tools and direction needed to develop a comprehensive project proposal. May count either NURS 8930 or NURS 8936. Student must be admitted to DNP Program.

NURS 8940/8946 DNP PROJECT PRACTICUM II : IMPLEMENTATION (4) LEC. 4. Pr. NURS 8516 and NURS 8716. Second in a three-course sequence for the DNP student to execute the project plan in collaboration with the agency site. May count either NURS 8940 or NURS 8946.

NURS 8950/8956 DNP PROJECT PRACTICUM III : EVALUATION AND PRESENTATIONS (4) LEC. 4. Pr. NURS 8516 and NURS 8716. Third in a three-course sequence for the DNP student finalize, evaluate, and disseminate their DNP project. May count either NURS 8950 or NURS 8956.

Total Hours: 31

¹ These courses include clinical practice hours
James Harrison School of Pharmacy

RICHARD HANSEN, Dean
PAUL JUNGNICKEL, Associate Dean for Academic Programs
DANIEL SURRY, Associate Dean for Faculty Affairs and Strategic Initiatives
KIMBERLY BRAXTON-LLOYD, Associate Dean for Clinical Affairs and Outreach
KAREN MARLOWE, Assistant Dean for Mobile Campus

THE AUBURN Doctor of Pharmacy (PharmD) degree program is a four-year course of study that requires the completion of the pre-pharmacy curriculum prior to enrollment. The curriculum is designed to facilitate the development of those abilities necessary for entry-level practitioners in various practice settings. Consistent with accreditation standards and guidelines, the School’s fully integrated curriculum provides an appropriate balance of course work in the following areas: biomedical sciences (basic and clinical); pharmaceutical sciences; behavioral, social, and administrative pharmacy sciences; pharmacy practice; and pharmacy practice experience. The goal of the curriculum is to prepare students who are ready to enter practice at the time of graduation and are lifelong learners. To help accomplish this, the curriculum involves students in sequenced patient care responsibilities beginning in the first professional year. Students also participate as active, self-directed learners in interprofessional teaching models. Team-based learning is extensively utilized.

Admission Requirements

Course requirements for admission to the James Harrison School of Pharmacy may be satisfied by completing the Pre-Professional Curricula in either the College of Sciences and Mathematics (Biomedical Sciences Option) or the College of Human Sciences (Nutrition Sciences Option). Any or all of these requirements may also be met by transfer of appropriate credit from other institutions.

Admission is limited and is contingent upon available facilities and faculty. To be considered for admission the applicant must have a satisfactory GPA and satisfactory scores on the Pharmacy College Admissions Test (PCAT). A grade of D in any prerequisite course will not be accepted. Students are matriculated into the James Harrison School of Pharmacy only during Fall Semester. All pre-pharmacy course work must be completed by the end of the summer term before the professional program begins at the start of Fall Semester.

Applicants must apply to the James Harrison School of Pharmacy through the Pharmacy College Application Service (PharmCAS). The James Harrison School of Pharmacy admits students using a rolling admissions process and student applications are prioritized in the order in which they are received. The final deadline for receipt of all application materials is posted on the PharmCAS Website. Students who are successful in meeting the school’s initial screening criteria are required to come to the campus for a personal interview in order to be further considered for admission.

The James Harrison School of Pharmacy’s Doctor of Pharmacy Program admits students to two campuses: the main Auburn Campus and the Mobile Campus located at the University of South Alabama. Students may express a preference for a specific campus, but assignments are made based on available space. Admitted students are notified of their campus assignment at the time an offer of admission is made.

Prospective students may obtain application information, which further outlines policies and procedures, from the school’s website at www.pharmacy.auburn.edu or by contacting the Office of Academic and Student Affairs, 2316 Walker Building, Auburn, AL 36849-5501, 334-844-8348. Applications through PharmCAS are submitted online at http://www.pharmcas.org/.

The James Harrison School of Pharmacy offers an Early Admission Program to highly qualified individuals admitted as undergraduate students to Auburn University or the University of South Alabama. Further information may be obtained from the School’s Website or Office of Academic and Student Affairs.

Prerequisite Requirements

Prerequisite requirements for the Doctor of Pharmacy Program

The prerequisite academic work required for entry into the Harrison School of Pharmacy’s (HSOP) Doctor of Pharmacy (Pharm.D.) program consists of a minimum of 87 semester hours distributed as follows.
Humanities and Social Sciences (30 hours)*

English Composition (6 hours)

Social Sciences (6 hours)

Additional Courses (18 hours) – Courses that are acceptable for meeting this requirement include, but are not limited to, History, Literature, Fine Arts, Philosophy, Religion, Foreign Languages, Ethics, Speech, Communications, and Additional Social Sciences.

*Applicants that will enter the HSOP with a baccalaureate degree are required to complete English Composition (6 hours) and Social Sciences (6 hours), but may be waived from additional Humanities and Social Science requirements.

Science and Math Core (38-42 hours)

General Biology (4 hours)

General Chemistry with Laboratory (8 hours)

Organic Chemistry with Laboratory (8 hours)

Human Anatomy and Physiology (8 hours) OR Upper Division Physiology (4 hours)**

Microbiology (4 hours)

Calculus (4 hours)

Statistics (3 hours)

Biochemistry (3 hours)

**Acceptable courses include Mammalian, Vertebrate, Human, or Animal Physiology.

Additional courses (15-19 hours) – Applicants can use coursework in various subjects (both science and non-science) to fulfill this requirement. As part of its holistic admissions process, the HSOP’s Admissions Committee will particularly consider the successful completion of additional science coursework in the following areas:

- Physics
- Biological sciences (e.g., Genetics/Genomic Biology, Immunology, Physiology, Cell Biology, Advanced Microbiology, Histology, Virology, Comparative Anatomy)
- Chemistry (e.g., Physical Chemistry, Analytical Chemistry, Enzymology)
- Advanced Mathematics – beyond Calculus I

1Students seeking baccalaureate degrees from their undergraduate colleges/universities should follow appropriate plans of study as directed by their advisers.

The following is the Pre-Pharmacy Plan of Study for students seeking the Bachelor of Science Degree in Biomedical Sciences:

**Academic Performance Standards**

The implementation of all guidelines will be in addition to those existing policies and standards of the University.

To remain in good standing, students are required to achieve a James Harrison School of Pharmacy GPA of at least 2.25. GPAs will be calculated only from professional course work, which is defined as core pharmacy courses approved by the faculty and listed in the Doctor of Pharmacy curriculum.

James Harrison School of Pharmacy students with semester or cumulative GPAs below 2.25, or who receive Ds and Fs in required courses, may be dismissed from the James Harrison School of Pharmacy or required to undergo a remedial plan of study as directed by the Committee on Academic Requirements and Professionalism. The remedial plan of study may require students to retake courses in which they received grades of less than C. Policies concerning academic progression, probation, and dismissal are specified in the James Harrison School of Pharmacy’s Academic Performance Standards, and other Standards and Policies. Copies of Standards and Policies may be obtained from the James Harrison School of Pharmacy’s Office of Academic and Student Affairs or from the School’s website.

Students must observe pre-requisites and co-requisites stated in the current Auburn University Bulletin.

**Notes:**

- Students are required to file an application with the Alabama State Board of Pharmacy for registration as an intern at the time they are enrolled in the James Harrison School of Pharmacy. Information and intern registration forms may be obtained from the Alabama State Board of Pharmacy, 111 Village Street, Hoover, AL 35242, or at www.albop.com. Students must maintain a valid Alabama Internship License as a condition of continued enrollment in the James Harrison School of Pharmacy.
- Upon entering pharmacy school, and at the beginning of each academic year, students are required to furnish documentation of professional liability insurance, current CPR and First Aid certification, personal medical insurance and up-to-date immunizations. Students who fail to maintain documentation will be dis-enrolled and will not be allowed to re-enroll until current documentation has been provided.
- Pharmacy students are required to attend the Professional Seminar Series.
- Students in the Doctor of Pharmacy program are required to own a laptop computer that meets the school’s specifications. Questions about computer specifications should be directed to the School’s Office of Information Technology. Computer literacy must be demonstrated upon entry to pharmacy school.
- Students are required to adhere to all of the James Harrison School of Pharmacy’s codes, policies, and professional requirements. The School will take disciplinary action against those students who violate such codes, policies, and professional requirements.
- Students will be required to periodically take examinations and other assessments to assess their ability to integrate the knowledge, skills, and attitudes learned to date. Students may be required to complete remedial work should their performance be unsatisfactory.
- Consistent with the policies of Auburn University, The James Harrison School of Pharmacy reserves the right to make changes at any time in its academic programs, codes, policies, and professional requirements.
- Students will be notified of their site assignments for Introductory and Advanced Practice Experiences at the earliest feasible time, to enable them to make housing arrangements. Rotation sites are located throughout Alabama, western Georgia, the Mississippi Gulf Coast, and the Florida panhandle. Although students may request specific sites, each site has a limited enrollment and students may be assigned to sites they do not request. Students are responsible for procuring housing, including the assessment of its safety and living conditions. Students are also responsible for housing and other living expenses incurred when assigned to rotation sites away from the Auburn and Mobile campuses.
Degrees

- Health Outcomes Research and Policy - MS (p. 1562)
- Health Outcomes Research and Policy - PhD (p. 1606)
- Medicinal Chemistry - MS (p. 1592)
- Medicinal Chemistry - PhD (p. 1593)
- Pharmaceutics - MS (p. 1606)
- Pharmaceutics - PhD (p. 1606)
- Pharmacology - MS (p. 1608)
- Pharmacology - PhD (p. 1608)

Drug Discovery and Development Courses

**DRDD 5800 SURVEY OF MULTI-MODALITY MOLECULAR IMAGING (2) LEC. 2.** Departmental approval. State-of-the-art survey of molecular imaging techniques that are available and their use to monitor the progression of various human diseases.

**DRDD 6800 SURVEY OF MULTI-MODALITY MOLECULAR IMAGING (2) LEC. 2.** Departmental approval. State-of-the-art survey of molecular imaging techniques that are available and their use to monitor the progression of various human diseases.

**DRDD 7000 INTRODUCTION TO GRANT WRITING (3) LEC. 3.** Departmental approval. Course will train students to prepare NIH RO1 grant applications. Students will prepare mock applications on topics of their choosing.

**DRDD 7010 PHARMACOKINETICS (4) LEC. 4.** Departmental approval. Pharmacokinetic and pharmacodynamic principles and methods used to study the absorption, distribution, metabolism and excretion of drugs.

**DRDD 7020 SCIENCE AND TECHNOLOGY OF TABLETING (2) LEC. 2.** Pr. (PYPS 7030 or DRDD 7030) or Departmental approval. Formulation, compression, coating and evaluation of tablets.

**DRDD 7021 SCIENCE AND TECHNOLOGY OF TABLETING LAB (2) LAB. 6.** Pr. (PYPS 7020 or DRDD 7020). Actual formulation, compression, coating and evaluation of tablets.

**DRDD 7030 DRUG PRODUCTS AND BIOPHARM (4) LEC. 4.** Departmental approval. Formulation, evaluation, and use of various pharmaceutical dosage forms including biopharmaceutical aspects.

**DRDD 7040 PHYSICAL PHARMACY (4) LEC. 4.** Departmental approval. Application of physical chemical principles to dosage form design and evaluation.

**DRDD 7050 NOVEL DOSAGE FORMS (3) LEC. 3.** Pr. PYPS 7030 or DRDD 7030 or Departmental approval. Theoretical basis and design of controlled release and site specific drug delivery systems.

**DRDD 7060 FORMULATION AND DELIVERY OF PEPTIDE/PROTEIN DRUGS (3) LEC. 3.** Pr. PYPS 7030 or DRDD 7030 or Departmental approval. Formulation and delivery problems unique to peptide/protein pharmaceuticals and strategies to overcome such problems.

**DRDD 7070 TRANSPORT PHENOMENA IN PHARMACEUTICAL SYSTEMS (3) LEC. 3.** Departmental approval. Mechanisms of drug transport in various pharmaceutical dosage forms and biological systems. Elucidation of methods to characterize drug transport phenomena. Correlation of transport phenomena with drug disposition in the body. Emphasis on peptide, protein, and oligonucleotide drugs.

**DRDD 7080 ADVANCED BIOPHARMACEUTICS (3) LEC. 3.** Pr. PYPS 7010 or DRDD 7010. The mathematical and pharmacokinetic relationships between physical and chemical properties of a drug and its dosage form and biological effects.

**DRDD 7090 PHARMACEUTICAL SCIENCE I: TARGETS (4) LEC. 4.** Departmental Approval. Study of nature and function of drug targets, advanced molecular mechanisms by which drugs interact with these targets and the basic principles of drug design.

**DRDD 7100 PHARMACEUTICAL SCIENCE II: ADME (4) LEC. 4.** Departmental Approval. Study of the mechanisms of drug absorption, distribution, metabolism and elimination with an advanced study of drug design strategies and methods to optimize these processes.
DRDD 7110 STABILITY KINETICS OF PHARMACUTICALS (3) LEC. 3. Pr. PYPS 7030 or DRDD 7030 or Departmental approval. Principles of chemical kinetics as applied to the unique stability problems of the various pharmaceutical dosage forms.

DRDD 7230 ADVANCED MEDICINAL CHEMISTRY I (3) LEC. 3. Departmental approval. Explanation of the principles of Medicinal Chemistry progressing to qualitative and quantitative descriptions of the synthesis, influence of physical and chemical properties of chemical substances on biological activity and biodisposition.

DRDD 7240 ADVANCED MEDICINAL CHEMISTRY II (3) LEC. 3. Pr. PYPS 7230. Departmental approval. Advanced study of organic medicinal agents featuring organic synthesis, chemical and pharmacological properties and current literature topics.

DRDD 7250 DRUG ACTION AND DESIGN (3) LEC. 3. Pr. (PYPS 7230 or DRDD 7230) and (PYPS 7240 or DRDD 7240). Modern molecular modeling methods with emphasis on computer-aided drug design, quantitative structure activity relationships and combinatorial chemistry.

DRDD 7260 SEPARATION SCIENCE (4) LEC. 4. Departmental approval. A survey of modern separation science with emphasis on analytical scale techniques including gas chromatography, liquid chromatography and electrokinetic separations.

DRDD 7270 MASS SPECTROMETRY OF ORGANIC COMPOUNDS (4) LEC. 4. Departmental approval. A survey of modern techniques in mass spectrometry with emphasis on fragmentation chemistry and structure education.

DRDD 7280 NEUROSCIENCE METHODS (3) LEC. 3. This course is designed to provide a conceptual and practical understanding of several of the most common techniques in neuroscience. The interactive lectures will serve to illustrate the ways in which various experimental approaches have been used to advance specific areas of neuroscience, particularly in the context of neuropsychological diseases or processes.

DRDD 7290 NEUROPHARMACOLOGY OF DRUG ABUSE (2) LEC. 2. Departmental approval. An in-depth study of drugs of abuse, including mechanisms of action, pharmacokinetics, addiction, physical dependence and the effects of drug use during pregnancy. Substance abuse treatment strategies will also be discussed.

DRDD 7300 NEUROPHARMACOLOGY (3) LEC. 3. Neurochemical mechanisms related to the pharmacological actions of medicinal agents affecting the central nervous system.

DRDD 7310 PSYCHOPHARMACOLOGY I (3) LEC. 3. Discussions on anxiety, depression and related disorders.

DRDD 7320 PSYCHOPHARMACOLOGY II (3) LEC. 3. Discussions on schizophrenia, Alzheimer’s disease, experimental methods and animal models of disorders.

DRDD 7330 PHARMACOLOGY RESEARCH METHODS (3) LEC. 1. LAB. 9. Experimental design, research methods and data analysis in pharmacology.

DRDD 7340 ORGAN SYSTEMS PHARMACOLOGY I (3) LEC. 3. The course will evaluate the basic principles and rationale for current and novel pharmacological therapeutics for various disease states.

DRDD 7350 ORGAN SYSTEMS PHARMACOLOGY II (3) LEC. 3. The course will evaluate the mechanism of action and rationale for current and novel pharmacological therapeutics for various disease states.

DRDD 7360 CELLULAR & MOLECULAR PHARMACOLOGY & TOXICOLOGY I (3) LEC. 3. Cellular biology course integrated with pharmaceutical sciences for the study of pharmacologically related mechanisms at the molecular and cellular levels.

DRDD 7370 CELLULAR & MOLECULAR PHARMACOLOGY & TOXICOLOGY II (3) LEC. 3. Pr. PYPS 7360 or DRDD 7360. Cellular biology course integrated with pharmaceutical sciences for the study of pharmacologically related mechanisms at the molecular and cellular levels. This is a continuation of PYPS 7360/DRDD 7360.

DRDD 7380 DRUG DISCOVERY (3) LEC. 3. This course is a survey of modern approaches to drug discovery. It is designed to familiarize students with different steps of drug discovery from target identification to the development of clinical candidates. (Clinical trials, and approval process will be covered in Drug Development class, which will be offered in spring 2020.) We will discuss the techniques used at the different stages of drug discovery process in the course are also widely used in basic biomedical research laboratories.

DRDD 7500 METABOLISM AND DISPOSITION XENOBIOTICS (2) LEC. 2. Portals of entry, absorption, distribution and elimination of drugs and xenobiotics. Metabolic mechanisms relevant to chemical structure and principles of pharmacokinetics will be emphasized.
DRDD 7510 ENVIRONMENTAL TOXICOLOGY (3) LEC. 3. Mechanisms of action of agricultural and industrial chemicals, drugs, radiation, metals, gases, air particulates, food additives, plant and food poisons in the environment.

DRDD 7600 HETEROCYCLIC MEDICINAL CHEMISTRY (3) LEC. 3. Pr. CHEM 7220. Departmental approval. A survey of chemical nature of heterocyclic moieties of medicinal substances with emphasis on methods of synthesis of medicinally important compounds containing a heterocyclic ring.

DRDD 7930 DIRECTED STUDIES IN PHARMACAL SCIENCES (1-3) LEC. Departmental approval. Selected laboratory research topics in the pharmaceutical sciences. Course may be repeated for a maximum of 98 credit hours.

DRDD 7950 SEMINAR (1) SEM. 1. SU. 1 CR; may be repeated multiple times for credit. Course may be repeated for a maximum of 6 credit hours.

DRDD 7960 SPEC PROB IN PHARM SCIE (1-3) IND. At least 6 credits each with a minimum grade of B in DRDD 7000-7999 Selected study topics in the pharmaceutical sciences. Departmental approval and 6 hours of 7000-level courses. Course may be repeated for a maximum of 6 credit hours.

DRDD 7980 NON-THESIS RESEARCH (1-3) RES. Non-thesis research project, to be determined by faculty advisor and student's graduate advisory committee. Course may be repeated for a maximum of 14 credit hours.

DRDD 7990 RESEARCH AND THESIS (1-10) MST. Research And Thesis. Course may be repeated with change in topics.

DRDD 8930 DIRECTED STUDIES IN PHARMACAL SCIENCES (1-3) LEC. Departmental approval. Selected laboratory research topics in the pharmaceutical sciences. Course may be repeated for a maximum of 6 credit hours.

DRDD 8950 SEMINAR (1) SEM. 1. SU. 1 CR; may be repeated multiple times for credit. Course may be repeated for a maximum of 10 credit hours.

DRDD 8960 DIRECTED READINGS IN PHARMACAL SCIENCES (1-3) IND. Pr. At least 6 credits each with a minimum grade of B in DRDD 7000-7999. Selected study topics in the pharmaceutical sciences. Course may be repeated for a maximum of 6 credit hours.

DRDD 8990 RESEARCH AND DISSERTATION (1-10) DSR. Research for doctoral students. Course may be repeated with change in topics.

Health Outcomes Research Pol Courses

HORP 7510 HEALTH SERVICES DELIVERY AND EVALUATION (3) LEC. 3. Enrollment in the MS or PhD Program in Pharmaceutical Science with Health Outcomes Research and Policy Option or Departmental approval. Introduction to basic methods and frameworks for undertaking research and program evaluation within health services organizations and systems.

HORP 7520 SOCIAL AND BEHAVIORAL THEORY IN HEALTH (3) LEC. 3. Enrollment in the MS or PhD Program in Pharmaceutical Science with Health Outcomes Research and Policy Option. Introduction to the basic theories of behavior and intervention used in practice and research to evaluate changes in health, humanistic, and economic outcomes among patients.

HORP 7530 PHARMACEUTICAL ECONOMICS, OUTCOMES, AND POLICY (3) LEC. 3. Enrollment in the MS or PhD Program in Pharmaceutical Science with Health Outcomes Research and Policy Option or Departmental approval. The graduate-level course is intended to introduce students to concepts relevant to pharmaceutical outcomes, economics, and policy. The course provides foundational knowledge surrounding healthcare.

HORP 7540 PHARMAOEPIEMIOLOGY: METHODS AND APPLICATIONS (3) LEC. 3. Enrollment in the MS or PhD Program in Pharmaceutical Science with Health Outcomes Research and Policy Option or Departmental approval. STAT 6110 or equivalent SAS training. The course covers topics in pharmacoepidemiology focusing on the methods and applications of analyzing large healthcare claims databases and electronic medical records.

HORP 7720 MOTIVATIONAL INTERVIEWING FOR HEALTH BEHAVIORS (3) LEC. 2, IND/LEC. 1. Enrollment in the MS or PhD Program in Pharmaceutical Science with Health Outcomes Research and Policy Option or Departmental approval. Concepts, current research applications, and intervention development training in motivational interviewing for health behavior change interventions.

HORP 7820 RESEARCH METHODS AND DESIGN HEALTH SCIENCE I (2) LEC. 2. Departmental approval. Application of scientific methods in health care.
HORP 7830 RESEARCH METHODS IN THE HEALTH SCIENCES (3) LEC. 3. Pr. PYPC 7820 or HORP 7820. Application of the principles and concepts obtained in PYPC 7820/HORP 7820.

HORP 7840 MEDICATION INFORMATION SYSTEMS (3) LEC. 3. Health system informatics theories and methodologies. Demonstration of how information reduces uncertainty in health-care decision-making.

HORP 7860 THE PHARMACIST’S ROLE IN IMPROVING PATIENT ADHERENCE (3) LEC. 3. Pr. PYPC 7820. Theories and methodologies involved in adherence to medication regimens.

HORP 7870 SOCIAL, BEHAVIORAL, AND ADMINISTRATIVE ASPECTS OF PHARMACY PRACTICE (3) LEC. 3. Theories and applications in social, behavioral, and administrative aspects of pharmacy practice and medication use systems.

HORP 7950 SEMINAR (1) SEM. 1. SU. 1 CR; may be repeated multiple times for credit. Required of all Pharmaceutical Science MS students with Health Outcomes Research and Policy Option. Course may be repeated for a maximum of 6 credit hours.

HORP 7960 SPECIAL PROBLEMS IN PHARMACY CARE SYSTEMS (2-3) LEC. Departmental approval. Special problems. Course may be repeated for a maximum of 6 credit hours.

HORP 7980 NON-THESIS RESEARCH (1-3) RES. SU. Pharmaceutical Sciences Non-Thesis MS Graduate Student and approval from the Graduate Program Coordinator. The specific research topic and its credit hour(s) will be decided by the student’s research advisor, in collaboration with the student and the student’s research advisory committee. Course may be repeated for a maximum of 4 credit hours.

HORP 7990 RESEARCH AND THESIS (1-10) MST. Credit hours to be arranged. Course may be repeated with change in topics.

HORP 8950 SEMINAR (1) SEM. 1. SU. 1 CR; may be repeated multiple times for credit. Required of all Pharmaceutical Science PhD students with Health Outcomes Research and Policy Option. Course may be repeated for a maximum of 10 credit hours.

HORP 8960 SPECIAL PROBLEMS IN PHARMACY CARE SYSTEMS (1-3) LEC. Departmental approval. Credit hours to be arranged. Course may be repeated for a maximum of 6 credit hours.

HORP 8990 RESEARCH AND DISSERTATION (1-10) DSR. Credit hours to be arranged. Course may be repeated with change in topics.

Interdept Pharmacy Courses

PYDI 4980 INTRODUCTION TO UNDERGRADUATE RESEARCH IN PHARMACY (1-3) IND. SU. Departmental approval. Individual problems course. Students will work under the direction of a faculty member on some problem of mutual interest. Course may be repeated for a maximum of 6 credit hours.

PYDI 9000/9006 DRUGS AND DISEASES I (5) LEC. 5. Integrated study of pathophysiology and chemical, pharmacological, biotechnology, and pharmacokinetic principles to explain the action of drugs. Fall.

PYDI 9010/9016 PATIENT CENTERED SKILLS (2) LEC. 2. Development of methods for developing positive, therapeutic relationships with patients through the application of communications skills (empathy, assertiveness training, effective listening, etc.) and other behavioral interventions. Fall.

PYDI 9020 CONTEMPORARY ASPECTS OF PHARMACY PRACTICE I (2) LAB. 6. This course integrates the skills necessary for the provision of pharmaceutical care. Source material introduces and integrates knowledge and skills focusing on patient assessment and communication. Fall.

PYDI 9100/9106 DRUGS AND DISEASES II (5) LEC. 5. Pr. PYDI 9000 or PYDI 9006 or PYDI 5000 or PYDI 5000. Presents, in an integrated manner, pathophysiology and chemical, pharmacological and biotechnology principles to explain the action of drugs; continuation of PYDI 9000/PYDI9006. Spring.

PYDI 9110/9116 PHARMACY LAW AND ETHICS (2) LEC. 2. Basic legal and ethical principles of pharmaceutical care and their effect on the patient drug use process. Spring.

PYDI 9120 CONTEMPORARY ASPECTS OF PHARMACY PRACTICE II (2) LAB. 6. Pr. PYDI 9020 or PYDI 5020. This course integrates pharmaceutical care skills. Source material introduces and integrates knowledge and skills focusing on pharmaceutical calculations, communication, physical assessment and use of clinical literature. Spring.
PYDI 9136 DRUG LITERATURE EVALUATION (2) DSL. 2. Development of the ability to effectively and efficiently retrieve drug information and critically evaluate and interpret studies published in medical and pharmaceutical literature. Spring.

PYDI 9140/9146 PRINCIPLES OF PHARMACOKINETICS (3) LEC. 3. Pr. PYDI 9000 or PYDI 9006 or PYDI 5000. To prepare students to use pharmacokinetic information and measurements to evaluate drug therapy and recommend appropriate dosing strategies for drug administration and monitoring. Spring.

PYDI 9200/9206 DRUGS AND DISEASES III (8) LEC. 8. Pr. (PYDI 9100 or PYDI 9106 or PYDI 5100) and (PYDI 9140 or PYDI 9146 or PYDI 5140). Presentation in an integrated manner of pathophysiology chemical, pharmacological, biotechnology, and pharmacokinetic principles to explain the action of drugs. Continuation of PYDI 9100/PYDI 9106. Fall.

PYDI 9210/9216 PHARMACY PRACTICE DEVELOPMENT, MANAGEMENT, AND EVALUATION I (3) LEC. 3. Overview of the development, management, and evaluation of systems that support the provision of pharmaceutical care for patients in multiple health systems. Fall.

PYDI 9220 CONTEMPORARY ASPECTS OF PHARMACY PRACTICE III (2) LAB. 6. Pr. PYDI 9120 or PYDI 5120. Integrates the provision of pharmaceutical care and pharmacy-specific skills related to drug-related problems. Supportive skills for the pharmaceutical sciences and other integrated skills are a major emphasis. Fall.

PYDI 9230/9236 DRUG PRODUCTS I (3) LEC. 3. Pr. (PYDI 9100 or PYDI 5100 or PYDI 9106 or PYDI 5106) and (PYDI 9120 or PYDI 5120). Physical-chemical and biopharmaceutical principles and technologies used in the preparation of pharmaceutical dosage forms and novel drug delivery systems. Fall.

PYDI 9290 PHARMACY PRACTICE EXPERIENCE III (2) PRA. 2. SU. Pr. PYDI 9190 or PYDI 5190. Third in six-course sequence of introductory practice experience in which pharmaceutical care is provided to moderately complex community based patients.

PYDI 9300/9306 DRUGS AND DISEASES IV (8) LEC. 8. Pr. PYDI 9200 or PYDI 9206 or PYDI 5200. Presentation, in an integrated manner, of pathophysiology and chemical, pharmacological, biotechnology, and pharmacokinetic principles to explain the action of drugs. Continuation of PYDI 9200/PYDI 9206. Spring.

PYDI 9310/9316 PHARMACY PRACTICE DEVELOPMENT, MANAGEMENT, AND EVALUATION II (3) LEC. 3. Pr. PYDI 9210 or PYDI 9216 or PYPC 5210. An overview of the development, management, and evaluation of systems that support the provision of pharmaceutical care for patients in multiple health systems. Continuation of PYDI 9210/PYDI 9216. Spring.

PYDI 9320 CONTEMPORARY ASPECTS OF PHARMACY PRACTICE IV (2) LAB. 6. Pr. PYDI 9220 or PYDI 5220. Continuation of PYDI 9220. Spring.

PYDI 9330/9336 DRUG PRODUCTS II (3) LEC. 3. Pr. (PYDI 9230 or PYDI 9236 or PYPS 5230) and PYDI 9200 or PYDI 5200 or PYDI 9206 and PYDI 9220 or PYDI 5220. Physical-chemical and biopharmaceutical principles and technologies used in the preparation of pharmaceutical dosage forms and novel drug delivery systems. Continuation of PYDI 9230/PYDI 9236. Spring.

PYDI 9390 PHARMACY PRACTICE EXPERIENCE IV (2) PRA. 2. SU. Pr. PYDI 9290. Fourth in a six-course sequence of introductory practice experience in which pharmaceutical care is provided to moderately complex community based patients. Spring.

PYDI 9420 CONTEMPORARY ASPECTS OF PHARMACY PRACTICE V (2) LAB. 6. Continuation of PYDI 9320 Fall.

PYDI 9470 INTEGRATED PHARMACOTHERAPY I (6) RCT. 6. Application of the basic, clinical, and socio-behavioral sciences to identifying, preventing and solving health and drug related problems. Fall.

PYDI 9480 INTEGRATED PHARMACOTHERAPY II (6) RCT. 6. Continuation of PYDI 9470. Fall.

PYDI 9490 PHARMACY PRACTICE EXPERIENCE V (2) PRA. 2. SU. Fifth in a six-course sequence of introductory practice experiences in which pharmaceutical care is provided to increasingly complex community based patients along with patient care team management responsibilities. Fall.

PYDI 9510 GERIATRIC CARE (2) LEC. 25. This course focuses on environmental, psychological, and physiological characteristics that are unique to, or more prevalent among, geriatric patients. Students will be required to evaluate how pharmacists can impact care through interprofessional teams while optimizing the patient's quality of life.

PYDI 9520 CONTEMPORARY ASPECTS OF PHARMACY PRACTICE VI (2) LAB. 6. Pr. PYDI 9420 or PYDI 5420. Continuation of PYDI 9420.
PYDI 9570 INTEGRATED PHARMACOTHERAPY III (6) RCT. 6. Pr. PYDI 5480 or PYDI 9480. Continuation of PYDI 9480. Spring.
PYDI 9580 INTEGRATED PHARMACOTHERAPY IV (6) RCT. 6. Pr. PYDI 5480 or PYDI 9480. Continuation of PYDI 9570. Spring.
PYDI 9590 PHARMACY PRACTICE EXPERIENCE VI (2) PRA. 2. Pr. PYDI 9490 or PYDI 5490. Sixth in a six-course sequence of introductory practice experiences in which pharmaceutical care is provided to increasingly complex community based patients along with patient care team management responsibilities. Spring.
PYDI 9600 DRUG INFORMATION-SELECTIVE (5) PRA. 5. Advanced practice experience in providing drug information services to health care providers. Fall, Spring, Summer.
PYDI 9610 COMMUNITY PHARMACEUTICAL CARE (5) PRA. 5. Advanced Practice Experience in a community pharmacy practice setting that provides pharmaceutical care services such as disease management and other advanced patient care activities. Fall, Spring, Summer.
PYDI 9620 MEDICINE I (5) PRA. 5. Advanced practice experience in providing Inpatient Pharmaceutical Care. Fall, Spring, Summer.
PYDI 9630 MEDICINE II - SELECTIVE (5) PRA. 5. Advanced practice experience in providing Inpatient Pharmaceutical Care. Additional experience beyond PYDI 9620. Fall, Spring, Summer.
PYDI 9640 PRIMARY/AMBULATORY CARE I (5) PRA. 5. Advanced practice experience in providing care to patients as they initially access the health care system. Fall, Spring, Summer.
PYDI 9650 PRIMARY/AMBULATORY CARE II (5) PRA. 5. Advanced practice experience in providing pharmaceutical Care to patients as they initially access the health care system. Continuation of PYDI 9640. Fall, Spring, Summer.
PYDI 9660 HEALTH SYSTEM PRACTICE (5) PRA. 5. Advanced practice experience in a health system setting that prepares the student to adapt and function within systems of integrated pharmaceutical care services. Fall, Spring, Summer.
PYDI 9670 PRACTICE ELECTIVE I (5) PRA. 5. Elective experience in an advanced practice experience setting in which the student establishes personal learning goals and responsibilities. Fall, Spring, Summer.
PYDI 9680 PRACTICE ELECTIVE II (5) PRA. 5. Elective experience in an advanced practice experience setting in which the student establishes personal learning goals and responsibilities. Fall, Spring, Summer.
PYDI 9690 PROFESSIONAL SEMINAR (1) PRA. 2. SU. Student will demonstrate the ability to evaluate and synthesize pertinent literature, and effectively communicate pharmacotherapy-related material in one platform (seminar) presentation. Spring.
PYDI 9700 ADVANCED PRACTICE EXPERIENCE PROFESSIONAL COMMUNICATION (0) PRA. SU. Students will synthesize pertinent literature, and communicate pharmacotherapy-related material in patient, journal club, in-service, and written presentations. Spring.
PYDI 9720/9726 MOTIVATIONAL INTERVIEWING (2) LEC. 2. Pr. PYDI 9010 or PYDI 9016 or PYPC 5010 or PYPC 5016. Basic and advanced training and exploration of motivational interviewing. Fall
PYDI 9730/9736 DRUGS IN PREGNANCY (2) LEC. 2. Medication issues related to pregnancy and lactation. Fall.
PYDI 9740/9746 PEDIATRIC PHARMACOTHERAPY (2) LEC. 2. Medication issues related to the pediatric population. Fall.
PYDI 9750/9756 ANTITHROMBOTIC/THROMBOLYTIC THERAPY (2) LEC. 2. Provides the student with a working knowledge of both basic and advanced pharmacotherapeutics issues related to antithrombotic and thrombolytic therapy. Spring.
PYDI 9770/9776 WOMEN'S HEALTH ISSUES (2) LEC. 2. Understanding factors that affect women's premature morbidity and mortality.
PYDI 9780/9786 ACUTE CARE PHARMACOTHERAPY (2) LEC. 2. This course is designed to orient the pharmacy student to the acute care environment and familiarize them with patient disease states and pharmacotherapy associated with the acutely ill patient. Spring.
PYDI 9790/9796 PSYCHIATRIC PHARMACOTHERAPY (2) LEC. 2. To expose pharmacy students to psychiatry and to develop a working knowledge of both basic and advanced pharmacotherapeutic issues related to psychopharmacology. Spring.

PYDI 9800 SURVEY OF MULTI-MODALITY MOLECULAR IMAGING FOR PHARM.D. (2) LEC. 2. State-of-the-art survey of molecular imaging techniques and clinical imaging modalities that are available and their use to monitor the progression of various human diseases.

PYDI 9810/9816 EVIDENCE-BASED PHARMACOTHERAPY (2) LEC. 2. Student pharmacists will become more proficient at literature evaluation and application of evidence-based pharmacotherapy/medicine to patient care. Spring.

PYDI 9960/9966 SPECIAL PROBLEMS IN PHARMACY (1-3) IND. Independent study of problems related to pharmacy under the direction of a faculty member. Departmental approval. Fall, Spring. Course may be repeated for a maximum of 6 credit hours.

PYDI 9970/9976 SPECIAL TOPICS IN PHARMACY (1-3) LEC. 1-3. Instruction and discussion in a selected current topic in Pharmacy. Fall, Spring. Course may be repeated for a maximum of 3 credit hours.

Pharmacy PharmD Courses

PYPD 9000 ORIENTATION (1) WSP. 12.5. This one week course introduces the expectations for a student in the Harrison School of Pharmacy's Practice Ready Curriculum. The course introduces aspects of the role of the pharmacist in healthcare including team member, interprofessional practice, and continual professional development.

PYPD 9010/9016 DRUGS IN PREGNANCY AND LACTATION (1) LEC. 1. The purpose of this course is to introduce pharmacy students to the concepts of teratogenicity, pregnancy and lactation. Non-pharmacological and pharmacological therapy is focused to common pregnancy disease states and lactation issues.

PYPD 9020/9026 FOUNDATIONS OF LEADERSHIP WITHIN THE PHARMACY PROFESSION (1) LEC. 1. This course will allow students to identify leadership skills, traits and values. Leadership tools and resources will be discussed. Students will be exposed to leadership within the practice of pharmacy as well as pharmacy organizations.

PYPD 9030/9036 INTRODUCTION TO PEDIATRICS (1) LEC. 1. The purpose of this course is to introduce students to the basic concepts regarding pediatric development and care including but not limited to normal growth and development, pediatric calculations, community based care, counseling skills, and common disease states.

PYPD 9040/9046 KIDNEYS, DRUGS AND ELIMINATION: WHAT PHARMACISTS NEED TO KNOW (1) LEC. 1. Students will gain in-depth knowledge of how declining kidney function and renal replacement modalities affect biopharmaceutics and develop experience in evaluating drug information related to renal dosing.

PYPD 9050/9056 ONCOLOGY CARE (1) LEC. 1. This course will provide student pharmacists with a working knowledge of cancer as a disease state, as well as the pharmacotherapeutics of chemotherapy, targeted therapy, and biologic therapy. Additionally, students will explore aspects of supportive care, ADR and drug interaction management, chemotherapy administration, and drug monitoring. The structure of the course is highly collaborative and interactive. Students are expected to participate in group activities with a professional and collegial spirit.

PYPD 9060/9066 SELF-CARE AND NONPRESCRIPTION PHARMACOTHERAPY (1) LEC. 1. This course will introduce students to nonprescription pharmacotherapy and other self-care measures used in the outpatient setting to treat minor medical problems. As the most accessible health care professionals, pharmacists are often approached by members of the community to recommend treatments for common ailments. It is important for pharmacists to quickly and accurately assess patients to determine if they are an appropriate self-care candidate or if referral to another health care provider is warranted. This course will expand upon self-care and nonprescription pharmacotherapy topics introduced in the required curriculum, introduce students to self-care issues specific to various special populations, and allow students to learn from one another through group presentations and case discussions.

PYPD 9070 STUDENT EXPERIENCES IN PHARMACY SERVICES (STEPS) (1-3) CLN. 3. SU. This course is a longitudinal introductory pharmacy practice experience (IPPE) that students will complete during either the Fall or Spring of the P1 year. During this course, practical concepts related to pharmaceutical care and the pharmacists’ patient care process are introduced through the provision of basic care to community-based patients. Students will earn 15 IPPE hours from the successful completion of the course. Earning of IPPE hours will be done through multiple formats including traditional in-home patient encounters as well as other practical experiences in collaboration with community partners. Admission into the Doctor of Pharmacy Program.
PYPD 9080 POPULATION HEALTH IPPE (2) CLN. 2. SU. This course is a longitudinal introductory pharmacy practice experience (IPPE) that students will complete during the P2 year. During this course, practical concepts related to pharmaceutical care and the pharmacists' patient care process are re-enforced through the provision of basic care to community based patients. Students will earn 10 IPPE hours from the successful completion of the course. Earning of IPPE hours will be done through multiple formats including traditional in-home patient encounters, patient care simulations, as well as other practical experiences in collaboration with community partners.

PYPD 9090 STUDENT EXPERIENCES IN PHARMACY SERVICES (STEPS) III (3) CLN. 3. SU. Pr. PYPD 9070 and PYPD 9080. This course is a longitudinal introductory pharmacy practice experience (IPPE) that students will complete during either the Fall or Spring of the P3 year. During this course, practical concepts related to pharmaceutical care and the pharmacists' patient care process are re-enforced through the provision of basic care to community based patients. Students will earn 15 IPPE hours from the successful completion of the course. Earning of IPPE hours will be done through multiple formats including traditional in-home patient encounters as well as other practical experiences in collaboration with community partners. P3 students will provide peer mentoring to P1 students.

PYPD 9100 PHARMACY PRACTICE EXPERIENCE I (2) PRA. 2. SU. First of a six-course sequence of introductory practice experience in which the concept of pharmaceutical care is introduced by the provision of basic care to community based patients. Fall.

PYPD 9110 PHARMACY PRACTICE EXPERIENCE II (2) PRA. 2. SU. Pr. (PYPD 9100 or PYDI 9090 or PYDI 5090). Second of a six-course sequence of introductory practice experience in which the concept of pharmaceutical care is introduced by the provision of basic care to community-based patients. Spring.

PYPD 9120 PHARMACY PRACTICE EXPERIENCE III (2) PRA. 2. SU. Pr. (PYPD 9110 or PYDI 9190 or PYDI 5190). Third in six-course sequence of introductory practice experience in which pharmaceutical care is provided to moderately complex community based patients.

PYPD 9130 PHARMACY PRACTICE EXPERIENCE IV (2) PRA. 2. SU. Pr. (PYPD 9120 or PYDI 9290). Fourth in a six-course sequence of introductory practice experience in which pharmaceutical care is provided to moderately complex community based patients. Spring.

PYPD 9140 PHARMACY PRACTICE EXPERIENCE V (2) PRA. 2. SU. Pr. PYDI 9330 or PYDI 9130. Fifth in a six-course sequence of introductory practice experiences in which pharmaceutical care is provided to increasingly complex community based patients along with patient care team management responsibilities. Fall.

PYPD 9150 PHARMACY PRACTICE EXPERIENCE VI (2) PRA. 2. SU. Pr. (PYDI 9140 or PYDI 9490 or PYDI 5490). Sixth in a six-course sequence of introductory practice experiences in which pharmaceutical care is provided to increasingly complex community based patients along with patient care team management responsibilities. Spring.

PYPD 9160 COMMUNITY PHARMACY IPPE (2) LEC. 2. SU. Students will be exposed to a community pharmacy setting in which they will gain experience in the drug distribution process, patient counseling, and interprofessional collaboration. Students will have opportunities to apply concepts and clinical knowledge learned during their P1 year. Admission into the Doctor of Pharmacy Program or Permission of the Associate Dean for Academic Programs.

PYPD 9170 HEALTH SYSTEM PHARMACY IPPE (1) LEC. 1. SU. Students will have opportunities to apply concepts and clinical knowledge previously learned to patient care in the setting of a functioning institutional pharmacy. They will participate in patient care through the drug distribution process, prospective drug review, drug monitoring, and interprofessional interactions. Admission into the Doctor of Pharmacy Program or Permission of the Associate Dean for Academic Programs.

PYPD 9180 CLINICAL PHARMACY IPPE (1) LEC. 1. SU. This is an introductory pharmacy practice experience (IPPE) course focused on providing pharmaceutical care to patients in a primary/ambulatory care or acute care setting. Admission into the Doctor of Pharmacy Program or Permission of the Associate Dean for Academic Programs.
**PYPD 9190 HEALTH AND WELLNESS INTRODUCTORY PHARMACY PRACTICE EXPERIENCE (1)** CLN. 1. SU. This is an Introductory Pharmacy Practice Experience (IPPE) that students will complete during a one-week block in their P2 year. Students will receive 40 IPPE hours upon completing the course. Students will build upon their initial exposure to the community pharmacy setting that occurred during their three-week Community Pharmacy IPPE in the Summer after their P1 year and focused on the medication distribution process. The focus of the Health and Wellness rotation experience is providing clinical services to patients within the community pharmacy setting. Students have opportunities to apply concepts and clinical knowledge learned during their P1 and P2 years to the community pharmacy setting. Students will be engaged in determining patients’ immunization status and making appropriate recommendations. Students will educate patients on immunizations and administer immunizations under the supervision of their licensed pharmacist preceptor. Another area of emphasis during this experience will be screening patients for hypertension and diabetes by performing blood pressure and blood glucose measurements. Students will interpret and explain results of health screenings to patients and educate them on the importance of self-monitoring. Admission into the Doctor of Pharmacy Program or approval of the Associate Dean for Academic Affairs.

**PYPD 9200/9206 INTEGRATED LEARNING EXPERIENCE I (6)** LEC. 12.5. Students will acquire foundational knowledge of Hypertension, Diabetes Mellitus, Obesity Management, Diarrhea and Constipation, Fluid and Electrolytes, and Hypersensitivity. These disease states will provide context for students to develop knowledge and skills of various aspects of the Patient Care Process.

**PYPD 9210/9216 INTEGRATED LEARNING EXPERIENCE II (6)** LEC. 12.5. Admission into the Doctor of Pharmacy Program or Permission of the Associate Dean for Academic and Student Affairs. Students will acquire foundational knowledge of Lipids, Depression, Alzheimer’s/Dementia, Hypothyroid, Asthma, Chronic obstructive pulmonary disease (COPD), and Smoking Cessation. These disease states will provide context for students to develop knowledge and skills of various aspects of the PPCP.

**PYPD 9220/9226 INTEGRATED LEARNING EXPERIENCE III (6)** LEC. 12.5. Pr. PYPD 9200 or PYPD 9206 and PYPD 9210 or PYPD 9216. Admission into the Doctor of Pharmacy Program or Permission of the Associate Dean for Academic and Student Affairs. This six-week course integrates biomedical sciences, pharmaceutical sciences, social/behavioral/administrative sciences, and clinical sciences. Students will acquire foundational knowledge related to Pain, Osteoarthritis (OA), Seizures, Gastroesophageal reflux disease (GERD), Stable ischemic heart disease (SIHD), Stroke, Thromboembolism, and Heart Failure.

**PYPD 9230/9236 INTEGRATED LEARNING EXPERIENCE IV (6)** LEC. 12.5. Pr. (PYPD 9200 or PYPD 9206) and (PYPD 9210 or PYPD 9216). This six-week course will focus on knowledge and skills related to various aspects of the Pharmacists’ Patient Care Process such as collecting information, conducting assessments, developing and implementing a plan including patient counseling, and documenting patient information. The course includes an introduction to pharmaceutical compounding and foundational knowledge related to over-the-counter treatment of cough, cold, and various dermatologic conditions.

**PYPD 9240/9246 INTEGRATED LEARNING EXPERIENCE V (6)** LEC. 12.5. Pr. (PYPD 9220 or PYPD 9226) and (PYPD 9230 or PYPD 9236). This six-week course integrates biomedical sciences, pharmaceutical sciences, social/behavioral/administrative sciences, and clinical sciences to provide students with the knowledge, skills, behaviors, and attitudes necessary for developing into a practice ready pharmacist. During this ILE, students will acquire foundational knowledge related to generalized anxiety disorder; bipolar disorder/schizophrenia; dementia; Parkinson’s disease, attention-deficit/hyperactivity disorder (ADHD); sleep disorders; hepatitis and cirrhosis; pancreatitis; and hyperthyroidism.

**PYPD 9250/9256 INTEGRATED LEARNING EXPERIENCE VI (6)** LEC. 12.5. Pr. (PYPD 9220 or PYPD 9226) and (PYPD 9230 or PYPD 9236). This six-week course integrates biomedical sciences, pharmaceutical sciences, social/behavioral/administrative sciences, and clinical sciences to provide students with the knowledge, skills, behaviors, and attitudes necessary for developing into a practice ready pharmacist. During this ILE, students will acquire foundational knowledge related to diabetic ketoacidosis (DKA)/ hyperosmolar hyperglycemic state (HHS); acid-base disturbances; nausea and vomiting; dehydration; chronic kidney disease (CKD) and secondary complications; acute kidney injury (AKI); nutrients/nutrition; and iron deficiency.
**PYPD 9260/9266 INTEGRATED LEARNING EXPERIENCE VII (6) LEC. 12.5. Pr. (PYPD 9240 or PYPD 9246) and (PYPD 9250 or PYPD 9256).** Students will acquire foundational knowledge related to HIV/AIDS, fungal and opportunistic infections, upper respiratory tract infections, allergic rhinitis, viral infections, meningitis, and sepsis. Students will increase the depth of disease states and medications encountered in ILE 4 including: skin and soft-tissue infections, pneumonia, urinary tract infections, sexually transmitted diseases, cough and cold, and dermatologic conditions. The disease states will be integrated to allow student understanding of the relationship between the disease states and medications used to treat these disorders. These disease states will provide context for students to apply knowledge and skills of various aspects of the Pharmacists’ Patient Care Process such as collecting information, conducting assessments, developing and implementing a plan including patient counseling, and documenting patient care plans in the SOAP format and/or in the electronic health record (EHR). Students will explore the relationship between medicinal chemistry and the physical and chemical properties which affect ADME, as well as how these relate to differences within and between drugs and drug classes. ILE 7 will reinforce previous competencies introduced in ILEs 1-6, allowing students to apply what was learned in a different context (varying disease states and/or more complex situations).

**PYPD 9270/9276 INTEGRATED LEARNING EXPERIENCE VIII (6) LEC. 6. Pr. (PYPD 9240 or PYPD 9246) and (PYPD 9250 or PYPD 9256).** During this learning experience, students will acquire foundational knowledge related to cardiology, rheumatology, men’s and women’s health, and neurology. Students will increase the depth of disease states and medications encountered earlier in the program including: stable ischemic heart disease, venous thromboembolism, stroke, heart failure, osteoarthritis, pain, and epilepsy. Admission into the Doctor of Pharmacy Program or Permission of the Associate Dean for Academic and Student Affairs

**PYPD 9280/9286 INTEGRATED LEARNING EXPERIENCE IX (6) LEC. 12.5. Pr. (PYPD 9260 or PYPD 9266) and (PYPD 9270 or PYPD 9276).** In this course, students will acquire and/or reinforce knowledge related to inflammatory bowel disease, fluids and electrolytes, nutrition support services, hematology, oncology, sepsis, endocarditis, fungal infections, sedation, delirium of critical illness, glomerulonephritis, diabetic ketoacidosis, acid-base disturbances, and type 1 diabetes. This course reinforces competencies related to using subjective and objective information to determine patient-specific healthcare needs and the formulation of an assessment. The content will reinforce organizing and prioritizing information gathered, assessing the appropriateness of therapy based on efficacy and safety, determining the relevance of medication allergies and interactions, and preventing hospital admissions. The development and implementation of an evidence-based, patient-centered care plan that incorporates the assessment of patient-specific factors and medications will be emphasized throughout. Professional communication, focusing on communicating with patients or healthcare providers when there is an educational need, will be reinforced. Admission into the Doctor of Pharmacy Program or Permission of the Associate Dean for Academic and Student Affairs.

**PYPD 9290/9296 INTEGRATED LEARNING EXPERIENCE X (6) LEC. 12.5. Pr. (PYPD 9260 or PYPD 9266) and (PYPD 9270 or PYPD 9276).** This course reinforces competencies related to collecting and using subjective and objective information to determine patient specific healthcare needs and the formulation of an assessment and plan. The content will reinforce organizing and prioritizing information gathered, assessing appropriateness of therapy based on efficacy and safety, determining the relevance of medication allergies and interactions, preventing hospital admissions, and knowing when self-treatment is appropriate versus conditions that need a referral. The development and implementation of an evidence-based, patient-centered care plan that incorporates the assessment of patient-specific factors and medications will be emphasized throughout. Professional communication, focusing on communicating with patients or healthcare providers will be reinforced with emphasis on cultural awareness and barriers in education.

**PYPD 9300/9306 INTEGRATED LEARNING EXPERIENCE XI (6) LEC. 12.5. Pr. (PYPD 9280 or PYPD 9286) and (PYPD 9290 or PYPD 9296).** This course reinforces competencies related to collecting and using subjective and objective information to determine patient specific healthcare needs and the formulation of an assessment and plan. The content will reinforce organizing and prioritizing information gathered, conducting medication reconciliation, assessing appropriateness of therapy based on efficacy and safety, determining the relevance of medication allergies, and knowing when self-treatment is appropriate versus conditions that need a referral. The development and implementation of an evidence-based, patient-centered care plan that incorporates the assessment of patient-specific factors and medications will be emphasized throughout. The legal requirements for medication distribution will be emphasized for processing medication orders as well as medication safety reporting and documentation.
PYPD 9310/9316 INTEGRATED LEARNING EXPERIENCE XII (6) LEC. 12.5. Pr. (PYPD 9280 or PYPD 9286) and (PYPD 9290 or PYPD 9296). This course reinforces competencies related to collecting and using subjective and objective information to determine patient specific healthcare needs and the formulation of an assessment and plan. The content will reinforce the interpretation, verification, processing, and labeling of medications orders in different healthcare settings with increasing complexity, complying with all federal, state, and local laws; collecting, reviewing, and assessing subjective and objective information; identifying and correcting drug-related problems; utilizing appropriate medical and medication informational resources and applying the knowledge of study design and literature analysis; performing calculations; communicating with and educating patients, caregivers and stakeholders; and identifying resources for patient’s healthcare needs. The students will further develop an understanding of the relationship between patient-specific factors, including pharmacogenomics, on drug selection and monitoring. Drug interactions will be explored more in-depth as students understand how to predict and resolve drug-drug and drug-disease interactions based on drug-specific and patient-specific factors. Cases will emphasize various patient populations, such as adolescent, pregnancy, and older adult. Immunization assessment and plan will be incorporated in each patient case. Admission into the Doctor of Pharmacy Program or Permission of the Associate Dean for Academic Programs.

PYPD 9320/9326 LONGITUDINAL EXPERIENCE I (3) LEC. 2.5. This semester-long course focuses on navigating the health care system. Learners will explore key issues related to patient education / public health, communication, assessment, advocacy, and management.

PYPD 9330/9336 LONGITUDINAL EXPERIENCE II (3) LEC. 2.5. Pr. (PYPD 9320 or PYPD 9326). Admission into the Doctor of Pharmacy Program or Permission of the Associate Dean for Academic and Student Affairs. This semester long course integrates multiple disciplines, including social/behavioral/administrative sciences and clinical sciences to introduce students to issues related to public health, population health, and individual health and wellness.

PYPD 9340/9346 LONGITUDINAL EXPERIENCE III (3) LEC. 2.5. Pr. (PYPD 9330 or PYPD 9336). This longitudinal experience will introduce students to topics related to strategic marketing strategies for pharmacists’ services and will expose students to different types of innovative pharmacy services in different practice settings. The overall goal of this longitudinal experience is to teach students the pertinent skills and decision-making tools needed to establish a new non-dispensing pharmacy service and justify its existence through both financial and intangible values, as well as to design systems and processes that will foster effective and appropriate communication between the pharmacist and patients, other healthcare providers, and stakeholders.

PYPD 9350/9356 LONGITUDINAL EXPERIENCE IV (3) LEC. 2.5. Pr. PYPD 9340 or PYPD 9346. This Longitudinal experience will build on prior courses with a focus on incorporating and improving a given service within a pharmacy, within the context of services and products. Thus, the Longitudinal will have a Pharmacy Operations Management and Continuous Quality Improvement (CQI) emphasis. Students will be introduced to the CQI process and principles to enable them to ‘improve’ existing operations and clinical services. The use of a variety of examples will provide opportunities to apply principles to support recommendations regarding pharmacy operations. This will involve data collection and creation of an improvement plan. To complete the exploration of operations and CQI topics, financial considerations will be incorporated, focusing on the entire pharmacy program, including the role of payers. Admission into the Doctor of Pharmacy Program or Permission of the Associate Dean for Academic and Student Affairs

PYPD 9360/9366 LONGITUDINAL EXPERIENCE V (3) LEC. 2.5. Pr. PYPD 9350 or PYPD 9356. This course will focus on the planning and sustainability of pharmacy services through billing, contract, and inventory management along with personnel and formulary management. The emphasis on formulary management will be to assist the Pharmacy and Therapeutics (P&T) committee’s decision making regarding which drugs to put on the formulary. The medication use process will also be discussed and applied. The Longitudinal will also prepare students to meet future needs of the pharmacy profession by engaging students in thinking about non-traditional services and ideas.

PYPD 9370/9376 LONGITUDINAL EXPERIENCE VI (3) LEC. 2.5. Pr. PYPD 9360 or PYPD 9366. This semester-long course focuses on providing learners with learning opportunities related to their personal and professional goals. Learners will explore key issues related to drug information / evidence-based medicine, leadership, professionalism, and professional development.

PYPD 9380/9386 GERIATRIC CARE I (1) LEC. 1. This study of geriatric health focuses on geriatric patient assessment and interprofessional care of the older adult patient. Students will be required to evaluate how pharmacists can impact these sequelae through interprofessional care teams while optimizing patient's health-related quality of life. This course focuses on those environmental, psychological, and physiological characteristics that are unique to, or more prevalent among, geriatric patients. Admission into the Doctor of Pharmacy program or permission of the Associate Dean for Academic Programs.
PYPD 9390/9396 GERIATRIC CARE II (1) LEC. 1. This study of geriatric health focuses on geriatric patient assessment and management of common pharmacotherapy issues in the older adult patient. Students will be required to evaluate how pharmacists can impact these sequelae through pharmacotherapy management while optimizing patient's health-related quality of life. This course focuses on those pharmacodynamic and pharmacokinetic characteristics that are unique to, or more prevalent among, geriatric patients. Admission into the Doctor of Pharmacy program or permission of the Associate Dean for Academic Programs.

PYPD 9400/9406 WORKSHOP I (1) LEC. 12.5. In this workshop, will explore the use of drug information resources and related to the use of drug information resources and population levels.

PYPD 9410/9416 WORKSHOP II (1) LEC. 12.5. Pr. PYPD 9400 or PYPD 9406. Admission into the Doctor of Pharmacy Program or Permission of the Associate Dean for Academic and Student Affairs. This is a focused, intensive, one week workshop where students will acquire theoretical and practical knowledge related to the Pharmacists' Patient Care Process.

PYPD 9420/9426 WORKSHOP III (1) LEC. 12.5. Pr. PYPD 9410 or PYPD 9416. This is a focused, intensive, one-week workshop where students will acquire theoretical and practical knowledge related to a contemporary issue in the field of pharmacy. In this workshop, students will explore the provision of pharmacy-based immunization services utilizing the APhA Pharmacy-Based Immunization Delivery course materials and additional supplemental instructional materials. At the end of this workshop students will have the knowledge and skills related to the development and provision of pharmacy-based immunization services, will know how to serve as a vaccine advocate, and will receive a certificate of completion for the APhA Pharmacy-Based Immunization Delivery course.

PYPD 9430/9436 WORKSHOP IV (1) LEC. 1. Pr. PYPD 9420 or PYPD 9426. This workshop builds upon concepts taught across the first two years in the ILE’s and will utilize information the students have developed from a series of self paced videos designed to teach the basic science concepts of pharmacokinetics. The students will also be expected to incorporate knowledge related to previously covered diseases and medications. The focus of the workshop will be to show the students the application of pharmacokinetic knowledge related to A, D, M, and E in multiple settings (retail, hospital, long term care) of pharmacy practice in a case based setting. Admission into the Doctor of Pharmacy Program or Permission of the Associate Dean for Academic and Student Affairs.

PYPD 9440/9446 WORKSHOP V (1) LEC. 12.5. Pr. PYPD 9430 or PYPD 9436. This is a focused, intensive, one week workshop where students will acquire theoretical and practical knowledge related to pharmacoeconomics and its application to the economic evaluation of pharmaceuticals and the overall healthcare system.

PYPD 9450/9456 WORKSHOP VI (1) LEC. 12.5. Pr. PYPD 9440 or PYPD 9446. In this focused, intensive, one week workshop students will review and update their patient care skills, determine their own long term career goals, and develop a plan for achieving those goals.

PYPD 9460/9466 FINANCES FOR THE PHARMACIST (1) LEC. 1. Pharmacy students need specific advice to prepare for life after pharmacy school in relation to financial planning including managing debt, credit, budgeting, and banking. After graduation from pharmacy school, the majority of students have high amounts of debt and enter the workforce with a higher income that they are likely unaware of how to manage. Equipping students with skills and knowledge to manage their finances will help them be more productive and avoid pitfalls and anxiety related to finances. Admission into the Doctor of Pharmacy Program or permission of the Associate Dean for Academic Programs.

PYPD 9470/9476 PRINCIPLES OF FUNCTIONAL MEDICINE – A PATIENT CENTERED APPROACH (1) LEC. 1. Students will be introduced to the concept of Functional Medicine and the pharmacist’s role in chronic disease state management using Functional Medicine principles. Students will also examine the impact of holistic healing as a path to overall health and wellness through investigation of their own health and wellness. Students will utilize evidence-based medicine as a framework for these principles and will apply the information learned in this course to patient care. Admission into the Doctor of Pharmacy Program or permission of the Associate Dean for Academic Programs.

PYPD 9480/9486 ADVANCED PHARMACOKINETICS I (1) LEC. 1. SU. Pr. PYPD 9430 or PYPD 9436. The purpose of this course is to build upon basic pharmacokinetic concepts introduced earlier in the curriculum to develop the skills and expertise necessary to create an individualized plan for dosing and monitoring vancomycin and aminoglycoside antibiotics.

PYPD 9500/9506 AMBULATORY CARE ANTICOAGULATION (1) LEC. 12.5. Currently enrolled in the Doctor of Pharmacy program or permission of the Associate Dean for Academic and Student Affairs. This course will provide students with a working knowledge of pharmacotherapeutic issues related to anticoagulation therapy in the out-patient setting including an introduction to the various roles of pharmacists in the management of anticoagulation therapy.
PYPD 9510/9516 EXPLORING DIABETES CARE FROM THE PATIENT PERSPECTIVE (1) LEC. 12.5. Pr. (PYPD 9200 or PYPD 9206 and PYPD 9210 or PYPD 9216) and permission of the Associate Dean for Academic and Student Affairs. This course will provide students with a working knowledge of the current trends in drugs of abuse, the public health implications from abuse of these drugs, and the role of different community stakeholders in the fight against this epidemic.

PYPD 9520/9526 DRUGS OF ABUSE AND MISUSE (1) LEC. 12.5. Currently enrolled in the Doctor of Pharmacy program or permission of the Associate Dean for Academic and Student Affairs. This course will provide students with a working knowledge of the current trends in drugs of abuse, the public health implications from abuse of these drugs, and the role of different community stakeholders in the fight against this epidemic.

PYPD 9530/9536 RESEARCH METHODS IN HEALTH SERVICES I (1) LEC. 12.5. Currently enrolled in the Doctor of Pharmacy program or permission of the Associate Dean for Academic and Student Affairs. The course is designed to provide a comprehensive introduction to the primary research methods used in clinical and health services research. It will focus on an introduction to various research designs including experimental and non-experimental, as well as quantitative and qualitative research methods. This course is ideal for student pharmacists and graduate students who want to acquire research knowledge and skills enabling them to participate in clinical and translational research teams and to evaluate programs/services at their clinical/pharmacy sites. It will serve as a research resource for their future research projects.

PYPD 9540/9546 RESEARCH METHODS IN HEALTH SERVICES II (1) LEC. 12.5. PYPD 9530 or enrolled in PYPD 9530 during the same semester. Currently enrolled in the Doctor of Pharmacy program or permission of the Associate Dean for Academic and Student Affairs. This course is ideal for student pharmacists and graduate students who want to acquire research knowledge and skills enabling them to participate in clinical and translational research teams and to evaluate programs/services at their clinical/pharmacy sites. It will serve as a research resource for their future research projects.

PYPD 9550/9556 ACUTE CARE PHARMACOTHERAPY I (1) LEC. 12.5. Currently enrolled in the Doctor of Pharmacy program or permission of the Associate Dean for Academic and Student Affairs. This course is designed to orient the pharmacy student to the acute care environment and familiarize the student with patient disease states and pharmacotherapy issues associated with the acutely ill patient in an inpatient setting.

PYPD 9570/9576 HISTORY OF PHARMACY (1) LEC. 12.5. Currently enrolled in the Doctor of Pharmacy program or permission of the Associate Dean for Academic and Student Affairs. History influences nearly everything we do and that is certainly the case for the profession of pharmacy. Every course taught can provide historical contexts for the information and application. A general course in pharmacy history can give a firm foundation for any student and graduate to fully embrace their chosen profession, understand its beginnings and development, and be a competent practitioner. The intent of this course is to provide that background so that the student has an appreciation for what has come before and an understanding of the many symbols and advances of the profession that surround any pharmacy practitioner. This ranges from the Rx to the patient counseling booth to the pharmacokinetic consult.

PYPD 9580/9586 PALLIATIVE CARE AND END OF LIFE (1) LEC. 12.5. Students will be introduced to the pharmacist's role in hospice/palliative care and symptoms experienced by the dying with an emphasis on interdisciplinary care. Students will also examine the impact of multicultural aspects of providing care in palliative and hospice care.

PYPD 9596 ADVANCED TRAINING IN DIABETES CARE FROM THE PROVIDER'S PERSPECTIVE (1) LEC. 1. Pr. PYPD 9200 or PYPD 9206 and PYPD 9210 or PYPD 9216 and PYPD 9220 or PYPD 9226 and PYPD 9230 or PYPD 9236 and PYPD 9240 or PYPD 9246 and PYPD 9250 or PYPD 9256 and PYPD 9260 or PYPD 9266 and PYPD 9270 or PYPD 9276. Course will emphasize completion of necessary steps for achieving The Pharmacist and Patient-Centered Diabetes Care certificate by the American Pharmacists Association, which will include but is not limited to: small group exercises, class discussions, simulated patient counseling (medication, lifestyle and devices). Permission of the Associate Dean for Academic Programs may be needed.

PYPD 9610 COMMUNITY PHARMACEUTICAL CARE (5) PRA. 62.5. Advanced Practice Experience in a community pharmacy practice setting that provides pharmaceutical care services such as disease management and other advanced patient care activities. Fall, Spring, Summer.

PYPD 9620 MEDICINE I (5) PRA. 62.5. Advanced practice experience in providing Inpatient Pharmaceutical Care. Fall, Spring, Summer.

PYPD 9630 MEDICINE II - SELECTIVE (5) PRA. 62.5. Advanced practice experience in providing Inpatient Pharmaceutical Care. Additional experience beyond PYDI 9620. Fall, Spring, Summer.
PYPD 9640 PRIMARY/AMBULATORY CARE I (5) PRA. 62.5. Advanced practice experience in providing care to patients as they initially access the health care system. Fall, Spring, Summer.

PYPD 9650 PRIMARY/AMBULATORY CARE II (5) IND/PR1. 62.5. This culminating course will require a comprehensive review and application of knowledge gained throughout the first 3 years of the PharmD Curriculum. Through case, problem and project based learning, learners will apply didactic and clinical knowledge/skills in a self-directed manner.

PYPD 9660 HEALTH SYSTEM PRACTICE (5) PRA. 62.5. Advanced practice experience in a health system setting that prepares the student to adapt and function within systems of integrated pharmaceutical care services. Fall, Spring, Summer.

PYPD 9670 PRACTICE ELECTIVE I (5) PRA. 62.5. Elective experience in an advanced practice experience setting in which the student establishes personal learning goals and responsibilities. Fall, Spring, Summer.

PYPD 9680 PRACTICE ELECTIVE II (5) PRA. 62.5. Elective experience in an advanced practice experience setting in which the student establishes personal learning goals and responsibilities. Fall, Spring, Summer.

PYPD 9690 DRUG INFORMATION-SELECTIVE (5) PRA. 62.5. Status of a 4th Year Doctor of Pharmacy Student (P4) or Permission of the Associate Dean for Academic and Student Affairs. Advanced practice experience in providing drug information services to health care providers. Fall, Spring, Summer.

PYPD 9700 SUMMATIVE EXPERIENCE (3) IND. 37.5. This culminating course will require a comprehensive review and application of knowledge gained throughout the first 3 years of the PharmD Curriculum. Through case, problem and project based learning, learners will apply didactic and clinical knowledge/skills in a self-directed manner.

PYPD 9710/9716 COMMUNITY PHARMACY PRACTICE I (1) LEC. 12.5. Currently enrolled in the Doctor of Pharmacy program or permission of the Associate Dean for Academic and Student Affairs. This course will focus on legal and business aspects of community pharmacy practice. Students will be paired with a mentor for this course who will provide real world examples of these aspects of community pharmacy.

PYPD 9720/9726 COMMUNITY PHARMACY PRACTICE II (1) LEC. 12.5. This course will focus on the development and implementation of clinical services within the community pharmacy setting. Students will receive training on concept development through implementation of medication therapy management services in this setting.

PYPD 9730/9736 INFECTIOUS DISEASES I (1) LEC. 1. This course will provide the student with an in depth exposure to the treatment of bacterial infectious diseases, with a particular focus on antimicrobial stewardship and the treatment of multidrug-resistant organisms.

PYPD 9740/9746 INFECTIOUS DISEASES II (1) LEC. 1. This course will provide the student with an in depth exposure to the treatment of different viral, fungal, and bacterial infectious diseases not covered in depth in other portions of the curriculum. Admission into the Doctor of Pharmacy program or permission of the Associate Dean for Academic Programs

PYPD 9750/9756 ADVANCED MOTIVATIONAL INTERVIEWING (1) LEC. 1. Motivational interviewing (MI) is an evidence-based method for facilitating voluntary health behavior change with patients and with providers. Target behaviors for patients engaged in comprehensive disease management may include outcome enhancing behaviors like medication taking, healthy eating, monitoring, physical activity, sleep management, smoking cessation, among others. This course will 1) explore the conceptual basis for why motivational interviewing is effective in facilitating health behavior change, and 2) provide basic and advanced training and practice for using motivational interviewing to help patients with self-management of their health conditions. This course is intended and designed to support and build student self-efficacy for using MI in patient encounters within a health/disease management context. MI principles and micro skills will be applied by the instructor in the process of helping facilitate student learning. It is hoped that the student will come away from the course encouraged, not discouraged, about using MI for improved patient outcomes in future practice/research.

PYPD 9760/9766 POST-GRADUATE TRAINING PREPARATION (1) LEC. 1. This course will review post-graduate education opportunities for pharmacists with a focus on pharmacy residency training. Students will learn about post-graduate opportunities within pharmacy and develop skills and tools necessary in securing a position after graduation.

PYPD 9770/9776 ACUTE CARE ANTITHROMBOTIC (1) LEC. 1. This course will provide students with a working knowledge of pharmacotherapeutic issues related to antithrombotic therapy in the inpatient setting including an introduction to roles and responsibilities of pharmacists in the management of antithrombotic therapy in this setting. Admission into the Doctor of Pharmacy program or permission of the Associate Dean for Academic Programs.
PYPD 9780/9786 TOXICOLOGY AND POISONS (1) LEC. 1. Toxicology is the science of poisons and their antidotes. Almost any substance has the ability to cause noxious effects on living beings. The Toxicology and Poisons course is designed to introduce the Doctor of Pharmacy student to the role of the pharmacist in the management of poisonous substances and intentional and unintentional drug overdoses. Admission into the Doctor of Pharmacy program or permission of the Associate Dean for Academic Program.

PYPD 9796 THERAPEUTIC USE OF OPIOIDS (1) LEC. 1. Opioids as a class of medications are a high risk class of medications. As such, it is important that pharmacists learn to be systematic in their approach to dosing these medications and to recognize common mistakes made in their dosing. This course will provide an in-depth approach to dosing these medications. Each week will focus on a different area of dosing using patient cases to allow students to practice calculations and making recommendations. Status as a 3rd year student in the Doctor of Pharmacy program or permission of the Associate Dean of Academic Programs.

PYPD 9810/9816 ADVANCED PEDIATRICS (1) LEC. 1. The purpose of this course is to expose students to advanced pediatric topics regarding disease states, therapeutics (acute and chronic therapy) and pharmacogenomics. Concepts from the Introduction to Pediatrics course will be incorporated. Admission into the Doctor of Pharmacy program or permission of the Associate Dean for Academic Programs.

PYPD 9820 INTERPROFESSIONAL PEDIATRICS (1) LEC. 1. Course will expose students to advanced pediatric topics regarding disease states, pharmacokinetics, and therapeutics. Admission into the Doctor of Pharmacy program or permission of the Associate Dean for Academic Programs.

PYPD 9830 ACUTE CARE SELECTIVE II (5) LEC. 5. Advanced practice experience in providing pharmaceutical care to patients in an additional acute care setting. General medicine (acute care) experiences provide comprehensive, evidence-based, individualized, patient-centered care to adult inpatients typically located on a general medicine floor. Pharmacists are expected to be accountable for the patient’s drug therapy outcomes and practice as an integrated member of the inter-professional health care team. Typical patients present with the following medical problems: cardiac, pulmonary, renal, hepatic, neurologic, gastrointestinal, endocrine and infectious diseases. The experience incorporates all elements of care from medication reconciliation, medication therapy recommendations and monitoring, discharge counseling, and transitions of care. Doctor or Pharmacy program or permission of the Associate Dean for Academic Programs.

PYPD 9850 PRIMARY CARE SELECTIVE II (5) LEC. 5. Advanced practice experience in providing pharmaceutical care to patients as they initially access the health care system. This is an additional opportunity for students to train in a primary care setting. Primary care experiences provide evidence-based, patient-centered collaborative care in the outpatient setting to meet the medication management needs of patients in the treatment of chronic disease. These pharmacists promote health and wellness, disease prevention and education, and medication management of chronic illnesses such as diabetes, hypertension, coronary artery disease / dyslipidemia, asthma / chronic obstructive pulmonary disease, and heart failure. Other chronic diseases encountered by the ambulatory care pharmacist may include chronic kidney disease, chronic infectious diseases, and other chronic diseases responsive to infusion therapy that do not require hospitalization. Pharmacist delivered ambulatory care occurs in institutional health system-based clinics, community-based clinics, government-funded clinics, and managed care organizations as well as the community pharmacy setting where comparable care is provided. 4th year Doctor of Pharmacy Students or the permission of the Associate Dean for Academic Programs.

PYPD 9980 PHARMACY RESEARCH (1-3) LEC. 1-3. The student will be expected to learn to conduct independent research activity. The specific research topic will lie within the scope of the School of Pharmacy writ large and will be decided by the student’s faculty research advisor. Course may be repeated for a maximum of 6 credit hours.
College of Sciences and Mathematics

NICHOLAS J GIORDANO, Dean
ROBERT S BOYD, Associate Dean for Academic Affairs
EDWARD THOMAS, Associate Dean for Research

THE COLLEGE OF SCIENCES AND MATHEMATICS provides programs in the physical sciences, life sciences, and mathematics at the undergraduate and graduate levels. The college also offers scientific and mathematical service courses for students enrolled in all of the other colleges and schools. The college includes the departments of Biological Sciences, Chemistry and Biochemistry, Geosciences, Mathematics and Statistics, and Physics. The Arboretum and the Leach Science Center are also included in the College of Sciences and Mathematics.

Undergraduate Degrees

1. Four-year bachelor’s degree programs are offered in two areas:
   a. Departmental curricula are available in actuarial sciences, biomedical sciences, biochemistry, chemistry, clinical laboratory and medical sciences, geography, geology, microbiology, molecular biology, marine biology, mathematics, applied mathematics, organismal biology, and physics.
   b. Pre-professional curricula are offered in pre-dentistry, pre-medicine, pre-optometry, pre-physical therapy, pre-pharmacy, pre-physician assistant and pre-veterinary medicine.
   Embodied in these curricula are the requirements of the University Core Curriculum.
   2. Admission - The academic requirements and demands on majors in sciences and mathematics necessitate a high school preparation of high intellectual quality. The following courses are recommended as minimum preparation: English, four units; mathematics (including algebra, geometry, trigonometry and pre-calculus), four units; chemistry, one unit; biology, one unit; history, literature, social science, two or three units. Both physics and foreign language are highly recommended.

Students not prepared for MATH 1610 must first take a lower-numbered course. See advisor for details.

On-campus transfers may declare a major in the College of Sciences and Mathematics if they: (1) have a cumulative Auburn grade-point average of at least 2.0 (on all work attempted) and (2) have completed at least 10 hours of Auburn University course work in the desired major with at least a 2.0 grade-point average in all such courses. Courses in the major are those carrying the appropriate prefix(es) of the specific curriculum. Students not meeting these standards may enroll in the Undeclared Sciences and Mathematics (UNSM) curriculum if they have not reached senior standing. Students in the UNSM curriculum may declare a Sciences and Mathematics major after satisfying the above requirements. A student who enters the UNSM curriculum because he or she is not qualified to declare a major can remain in UNSM for a maximum of one year or until senior standing is reached. After this, if the student is still not qualified to declare a major, he or she will be disenrolled from the College of Sciences and Mathematics.

Graduate Degrees

Master of science and doctor of philosophy degrees are offered in the College of Sciences and Mathematics. Degree programs are described in this Bulletin.

Web Page

Additional information about the College of Sciences and Mathematics can be found at: http://www.auburn.edu/cosam/.

General Sciences and Mathematics Curriculum (UNSM)

This curriculum is primarily for freshmen who have not decided on a specific major field of study and for transfer students having deficiencies which preclude their acceptance in a degree program. Freshmen entering this curriculum must declare a major by the end of their first year. Transfer students must complete a specific approved program to clear their admission to a major field of study.

**Departmental Curricula**

Departmental curricula leading to the bachelor’s degree include actuarial sciences, biomedical sciences, biochemistry, chemistry, clinical laboratory and medical sciences, geography, geology, microbiology, molecular biology, marine biology, mathematics, applied mathematics, organismal biology, and physics.

**Majors**

- Applied Mathematics (p. 1288)
- Applied Mathematics - Actuarial Science Option (p. 1286)
- Applied Mathematics - Applied Discrete Mathematics Option (p. 1287)
- BA Chemistry (p. 1247)
- BA Chemistry - Pre-professional concentration in:
  - Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1245)
- BS Chemistry (p. 1249)
- Biochemistry (p. 1246)
- Biomedical Sciences - Pre-professional concentrations in:
  - Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1299)
  - Pre-Pharmacy (p. 1301)
  - Pre-Physical Therapy, Pre-Physician Assistant (p. 1302)
- Geography (p. 1261)
- Geology (p. 1262)
- Geology - Earth System Science Option (p. 1264)
- Laboratory Sciences (p. 1250)
- Marine Biology (p. 1226)
- Mathematics (p. 1285)
- Medical Laboratory Sciences (p. 1251)
- Microbial, Cellular and Molecular Biology Microbiology Option (MCMB) (p. 1234)
- Microbial, Cellular and Molecular Biology Cell & Molecular Biology Option (MCCM) (p. 1233)
- Microbiology - pre-professional concentrations in:
  - Pre-Medical, Pre-Dental, Pre-Optometry (p. 1231)
  - Pre-Physical Therapy, Pre-Physician Assistant (p. 1232)
  - Pre-Veterinary (p. 1304)
- Organismal Biology - Conservation & Biodiversity Option (p. 1237)
- Organismal Biology - Ecology, Evolution & Behavior Option (p. 1235)
- Organismal Biology - Integrative Biology Option (p. 1227)
- Organismal Biology - pre-professional concentrations in:
  - Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1228)
  - Pre-Physical Therapy, Pre-Physician Assistant (p. 1230)
  - Pre-Veterinary Medicine (p. 1307)
- Physics (p. 1293)
• Physics - pre-professional concentrations in:
  • Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1294)
  • Pre-Physical Therapy, Pre-Physician Assistant (p. 1295)

• Certificate in Geographic Information Systems (GIS) (http://bulletin.auburn.edu/undergraduate/collegeofsciencesandmathematics/Certificate-GIS/)

Minors

• Mathematics (p. 1286)
• Statistics (p. 1289)
• Physics (p. 1296)
• Geography (p. 1266)
• Geology (p. 1266)

Program

• Biological Sciences - MS, PhD, Graduate Certificate (p. 1455)
• Biomedical Sciences - MS, PhD (p. 1457)
• Chemistry and Biochemistry - MS, PhD (p. 1468)
• Data Science and Engineering - MS (http://bulletin.auburn.edu/theschoolof.graduatedegreesoffered/data scienceandengineering_major/)
• Geography, ABM (p. 1561)
• Geography - MS (p. 1560)
• Geology, ABM (http://bulletin.auburn.edu/theschoolof.graduatedegreesoffered/geology_abm/)
• Geology - MS (p. 1562)
• Interdisciplinary PhD program in Earth System Science - PhD (http://bulletin.auburn.edu/theschoolof.graduatedegreesoffered/interdisciplinaryprograminearthsystem_phd/)
• Mathematics and Statistics - MS, MAM, MPS, PhD (p. 1589)
• Physics - MS, PhD (p. 1610)
• Statistics - MS, MPS (p. 1638)

Biochemistry Courses

BCHE 3180 NUTRITIONAL BIOCHEMISTRY (3) LEC. 3. Pr. CHEM 2030 or CHEM 2080 or CHEM 2087. Departmental approval. Fundamental pathways of carbohydrate, lipid, and amino acid metabolism in human beings. Credit will not be given for both BCHE 3180 and BCHE 3200.

BCHE 3200 PRINCIPLES OF BIOCHEMISTRY (3) LEC. 3. Pr. (BIOL 1010 or BIOL 1020 or BIOL 1030 or BIOL 1027 or BIOL 1037) and (CHEM 2030 or CHEM 2070 or CHEM 2077 or CHEM 2080 or CHEM 2087). Structure and function of biomolecules, enzyme catalysis, processing of genetic information, bioenergetics and metabolism, and regulatory mechanisms in cellular processes.

BCHE 3201 PRINCIPLES OF BIOCHEMISTRY LABORATORY (1) LAB. 2. Coreq. BCHE 3200. Fundamental theory and techniques used in the isolation, characterization, and study of biomolecules.

BCHE 5180 BIOCHEMISTRY I (3) LEC. 3. Pr. CHEM 2080 or CHEM 2087. Fundamentals of metabolism, focusing on the design and regulation of the major catabolic and biosynthetic metabolic pathways. Bioenergetics.

BCHE 5181 BIOCHEMISTRY I LABORATORY (1) LAB. 3. Pr. P/C BCHE 5180 or P/C CHEM 5180. Laboratory techniques required for identification and quantification of compounds of important biochemical classes.

BCHE 5190 BIOCHEMISTRY II (3) LEC. 3. Pr. BCHE 5180 or BCHE 6180. Fundamentals of metabolism, focusing on the design and regulation of the major catabolic and biosynthetic metabolic pathways.

BCHE 5191 BIOCHEMISTRY II LABORATORY (1) LAB. 3. Pr. P/C BCHE 5190 or P/C CHEM 5190. Laboratory techniques required for partial purification, kinetic studies, and characterization of enzymes and nucleotides from various plants, animals and bacteria.
BCHE 5250 PLANT METABOLIC PATHWAYS (3) LEC. 3. Pr. CHEM 2080 or CHEM 2087. Fundamental processes of metabolism specific to plants.

BCHE 6180 BIOCHEMISTRY I (3) LEC. 3. Pr. CHEM 2080 or CHEM 2087. Departmental approval. Fundamentals of the classification, structure, and reactions of the major constituents of living matter and evaluation of binding phenomena and bioenergetics.

BCHE 6181 BIOCHEMISTRY I LABORATORY (1) LAB. 3. Pr. P/C BCHE 6180 or P/C CHEM 6180. Laboratory techniques required for identification and quantification of compounds of important biochemical classes.

BCHE 6190 BIOCHEMISTRY II (3) LEC. 3. Pr. BCHE 6180. Departmental approval. Fundamentals of metabolism, focusing on the design and regulation of the major catabolic and biosynthetic metabolic pathways.

BCHE 6191 BIOCHEMISTRY II LABORATORY (1) LAB. 3. Pr. P/C CHEM 6190. Laboratory techniques required for partial purification, kinetic studies, and characterization of enzymes and nucleotides from various plants, animals, and bacteria.

BCHE 6250 PLANT METABOLISM (3) LEC. 3. Pr. CHEM 2080 or CHEM 2087. Fundamental processes of metabolism specific to plants.

BCHE 7200 ADVANCED BIOCHEMISTRY I (3) LEC. 3. Graduate credit will not be given for both BCHE 6190 and BCHE 7200.

BCHE 7210 ADVANCED BIOCHEMISTRY II (3) LEC. 3. Structure and function of macromolecules participating in the flow of molecular information. Graduate credit will not be given for both BCHE 6180 and BCHE 7210. Or equivalent.

BCHE 7220 PRINCIPLES OF CELLULAR AND MOLECULAR ENZYMEOLOGY (3) LEC. 3. Pr. BCHE 6190 or CHEM 6190 or BCHE 7200. Departmental approval. The principles of enzyme chemistry including the physical, chemical, and catalytic properties of enzymes.

BCHE 7250 BIOCHEMISTRY OF LIPIDS AND LIPOPROTEINS (3) LEC. 3. Pr. BCHE 7200. Departmental approval. The regulation of lipid and lipoprotein metabolism, role of lipid mediators in signaling pathways and protein modification, assembly and dynamics of lipoproteins and biomembranes.

BCHE 7260 BIOINFORMATICS (3) LEC. 3. Pr. BCHE 7210. Departmental approval. Advanced study of main concepts and tools of genomics and proteomics.

BCHE 7270 BIOCHEMICAL RESEARCH TECHNIQUES (3-6) LEC. Pr. BCHE 6190 or CHEM 6190. Departmental approval. Modern biochemical laboratory techniques. Course may be repeated for a maximum of 6 credit hours.

BCHE 7280 TOPICS IN BIOCHEMISTRY (1-3) LEC. Pr. BCHE 7210. Directed studies in biochemistry. Departmental approval and BCHE 7210 or equivalent. Course may be repeated for a maximum of 3 credit hours.

Biology Courses

BIOL 1000/1003 INTRODUCTION TO BIOLOGY (3) LEC. 3. Science Core. Introduction to biological principles relevant to human society. Designed for non-science majors. Credit will not be given for both BIOL 1000 and BIOL 1020 or BIOL 1027.

BIOL 1001 INTRODUCTION TO BIOLOGY LABORATORY (1) LAB. 2. Pr. P/C BIOL 1000 or P/C BIOL 1003. Laboratory course for BIOL 1000 or BIOL 1003.

BIOL 1010/1013 A SURVEY OF LIFE (3) LEC. 3. Pr. BIOL 1000 or BIOL 1020 or BIOL 1023 or BIOL 1027 or SCMH 1010 or SCMH 1013 or SCMH 1017 or SCMH 1020 or SCMH 1023 or SCMH 1027. Science Core. Emphasis on contrasting strategies employed by organisms to meet similar biological needs. Credit will not be given for both BIOL 1010 and BIOL 1030 or BIOL 1037.

BIOL 1011 A SURVEY OF LIFE LABORATORY (1) LAB. 2. Pr. P/C BIOL 1010 or P/C BIOL 1013. Laboratory course for BIOL 1010.

BIOL 1020/1023 PRINCIPLES OF BIOLOGY (3) LEC. 3. Science Core. Introduction to the physical, chemical, and biological principles common to all organisms. Credit will not be given for both BIOL 1020 and BIOL 1000 or BIOL 1027.

BIOL 1021 PRINCIPLES OF BIOLOGY LABORATORY (1) LAB. 2. Pr. P/C BIOL 1020 or P/C BIOL 1023. Laboratory Course for BIOL 1020.
BIOL 1027 HONORS BIOLOGY (4) LEC. 3. LAB. 2. Pr. Honors College. Science Core. Introduction to the physical, chemical, and biological principles common to all organisms. Credit will not be given for both BIOL 1027 and BIOL 1000 or BIOL 1020.

BIOL 1030 ORGANISIMAL BIOLOGY (3) LEC. 3. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027. Science Core. Principles and fundamentals of biology at the organismal level. Credit will not be given for both BIOL 1030 and BIOL 1010 or BIOL 1037.

BIOL 1031 ORGANISIMAL BIOLOGY LABORATORY (1) LAB. 2. Pr. P/C BIOL 1030. Laboratory Course for BIOL 1030.

BIOL 1037 HONORS ORGANISIMAL BIOLOGY (4) LEC. 3. LAB. 1. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027. Science Core. Principles and fundamentals of biology at the organismal level. Credit will not be given for both BIOL 1037 and BIOL 1010 or BIOL 1030.

BIOL 2100 PROFESSIONAL DEVELOPMENT (1) LEC. 1. Introduction to career opportunities and student development options for majors in biological sciences. Students will investigate post-graduation academic and professional options, develop writing skills by creating resumes and ePortfolios, and explore course and research options with the department.

BIOL 2425 MARINE BIOLOGY (4) LEC. 4. Pr. BIOL 1030 or BIOL 1037. Departmental approval. The invertebrates, vertebrates and marine plants as communities with emphasis on local examples. Taught only at Dauphin Island Sea Lab. (DISL).

BIOL 2500/2503 HUMAN ANATOMY AND PHYSIOLOGY I (3) LEC. 3. Pr. (BIOL 1000 or BIOL 1020 or BIOL 1023 or BIOL 1027) and P/C BIOL 2501. Study of the structure and function of the human body. First half of two-part sequence with BIOL 2510, concentrating on tissues, muscle, and nervous system.

BIOL 2501 HUMAN ANATOMY AND PHYSIOLOGY I LABORATORY (1) LEC. 1. Pr. (BIOL 1000 or BIOL 1020 or BIOL 1027) and (P/C BIOL 2500 or P/C BIOL 2503). Lab course for study of the structure and function of the human body. First half of two-part sequence with BIOL 2510, concentrating on tissues, muscle, and nervous system.

BIOL 2510 HUMAN ANATOMY AND PHYSIOLOGY II (3) LEC. 3. Pr. (BIOL 2500 or BIOL 2503) and BIOL 2501. Study of the structure and function of the human body. Second half of two-part sequence with BIOL 2500/2501, concentrating on cardiovascular, respiratory, digestive, urinary, reproductive, and endocrine systems.

BIOL 2511 HUMAN ANATOMY AND PHYSIOLOGY II LABORATORY (1) LEC. 1. Pr. (BIOL 2500 or BIOL 2503) and BIOL 2501. Coreq. BIOL 2510. Lab course for study of the structure and function of the human body. Second half of two-part sequence with BIOL 2500, concentrating on the individual organ systems.

BIOL 3000/3003 GENETICS (3) LEC. 3. Pr. (BIOL 1020 or BIOL 1023 or BIOL 1027). An overview of theoretical principles of transmission, cytological, molecular, and population genetics. Problem solving will be emphasized. May count either BIOL 3000 or BIOL 3003 or AGRI 3000.

BIOL 3001 GENERAL GENETICS LABORATORY (1) LAB. 2. Pr. (BIOL 1020 or BIOL 1023 or BIOL 1027) and (P/C BIOL 3000 or P/C BIOL 3003). Laboratory provides practical experience in the areas of transmission, cytological, molecular, and population genetics. Problem solving is emphasized throughout analysis of simulated and real genetics data sets.

BIOL 3010/3013 COMPARATIVE ANATOMY (4) LEC. 3. LAB. 1. Pr. BIOL 1030 or BIOL 1037. We will examine evolution of anatomical structures from early chordates through vertebrates (both living and extinct). Students will learn the main vertebrate taxa and how each anatomical system appears in them. Students will also examine the linkage of these systems through all vertebrates. The phylogenetic tree (evolutionary relationships of the vertebrates) will be the backbone on which we explore the diversity of anatomy. In lab, students will use and develop their integrative skills by examining the anatomy of a wide variety of organisms.

BIOL 3011 COMPARATIVE ANATOMY LABORATORY (1) LAB. 1. Pr. P/C BIOL 1030 or BIOL 1037. Laboratory to accompany Comparative Anatomy Lecture. This lab course will explore the diverse morphologies of vertebrates.

BIOL 3020 GENOMIC BIOLOGY (4) LEC. 3. LAB. 2. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 or BIOL 3000 or BIOL 3003 or AGRI 3000. An overview of genes, genomes, and genomic and proteomic approaches and methodology. Application of principles of biology at the genomic level. Includes an introduction to bioinformatic approaches to genomic problems in a computer laboratory setting.

BIOL 3030/3033 EVOLUTION AND SYSTEMATICS (3) LEC. 3. Pr. BIOL 1030 or BIOL 1037. An introduction to evolutionary processes, classification, of organisms and scientific nomenclature.

BIOL 3040 BIOLOGY OF MARINE SYSTEMS (3) LEC. 3. Pr. (BIOL 1020 or BIOL 1023 or BIOL 1027) and (BIOL 1030 or BIOL 1037). Introduction to marine systems and biological investigations of coastal, near shore and open ocean organisms and processes.
BIOL 3060 ECOLOGY (4) LEC. 3. LAB. 3. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037. Interactions of organisms with their environments and characteristics of populations, communities, and ecosystems. 8 hours of Biology.

BIOL 3075 INTRODUCTION TO OCEANOGRAPHY (4) LEC. 4. Pr. (MATH 1150 or MATH 1153) and (CHEM 1110 or CHEM 1117 or CHEM 1030 or CHEM 1033) and PHYS 1500. Departmental approval. The physics, chemistry, biology, and geology of the oceans. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 3100 PLANT BIOLOGY (4) LEC. 4. LAB. 1. Pr. (BIOL 1030 or BIOL 1037) and CHEM 1010 or CHEM 1030 or CHEM 1033 or CHEM 1110 or CHEM 1117. Introduction to the morphology, anatomy, physiology and classification of plants with laboratory.

BIOL 3200/3203 GENERAL MICROBIOLOGY (3) LEC. 3. Pr. (BIOL 1020 or BIOL 1023 or BIOL 1027) and CHEM 1030 or CHEM 1033 or CHEM 1110 or CHEM 1117. Introduction to the science of microbiology, emphasizing cell structure, systematics, growth, genetics, and the role in human affairs.

BIOL 3201 GENERAL MICROBIOLOGY LABORATORY (1) LAB. 2. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and CHEM 1030 or CHEM 1033 or CHEM 1110 or CHEM 1117 and P/C BIOL 3200 or P/C BIOL 3203. Fundamental laboratory techniques required to safely handle, enumerate, identify, and provide basic biochemical characterization of microorganisms.

BIOL 4000/4003 HISTOLOGY (3) LEC. 3. Pr. (BIOL 1030 or BIOL 1037) and BIOL 1031. Morphology and classification of tissues; arrangement of tissues in organs and systems of vertebrate animals.

BIOL 4001 HISTOLOGY LABORATORY (1) LAB. 2.8. Pr. (BIOL 1030 or BIOL 1037) and (P/C BIOL 4000 or P/C BIOL 4003). Laboratory investigation of the morphology and classification of tissues using prepared slides to reveal the arrangement of tissues in organs and organ systems of vertebrate animals.

BIOL 4010 INVERTEBRATE BIODIVERSITY (4) LEC. 3. LAB. 3. Pr. BIOL 1030 or BIOL 1037. Survey of the phyla of invertebrates with emphasis on morphology, anatomy, ecology, evolution, and systematics.

BIOL 4015 BIOLOGY AND CONSERVATION OF MARINE TURTLES (2) LEC. 15. LAB. 45. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and BIOL 3040. OR permission of Marine Biology coordinator. An introductory overview of the biology of marine turtles. Topics include: identification, distribution, nesting & migratory behavior, feeding, population biology, development, paleontology and conservation. Extensive laboratory and field studies of multiple species of turtles. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4025 ECOLOGY OF THE FLORIDA EVERGLADES (2) LEC. 15. LAB. 45. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and BIOL 3040. Examines the natural history, ecology and evolution, and human impact on the Everglades. Includes intensive lectures and a more than 1-week long campsite based field trip in the Everglades. Multiple short trips to various locales within the Everglades. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4033 HISTOLOGY LABORATORY (1) DSL. 3. Pr. (BIOL 1030 or BIOL 1037) and (P/C BIOL 4000 or P/C BIOL 4003). Laboratory investigation of the morphology and classification of tissues using prepared digital slides to reveal the arrangement of tissues in organs and organ systems of vertebrate animals.

BIOL 4035 INTRODUCTION TO MARINE ANIMAL NEUROBIOLOGY (3) LEC. 15. LAB. 60. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037. The neuroanatomy and neurophysiology of marine invertebrates and vertebrates. Lectures and labs on neurons, glia, resting and action potentials, synapses and neurotransmitters, muscle contraction, sensorimotor integration; neurophysiological bases of behavior; labs include computer simulation of cellular neurobiology. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4045 MARINE MAMMAL BIOLOGY (4) LEC. 30. LAB. 60. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and BIOL 3040. Introduction to the evolution, taxonomy and classification, anatomy, physiology, behavior, conservation and management issues of marine mammals, including cetaceans, pinnipeds, mustelids, sirenians and the polar bear. Lab and field research methods used to study marine mammals will be covered. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4065 MARINE CONSERVATION BIOLOGY (4) LEC. 45. LAB. 30. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and (BIOL 3040 or BIOL 3060). Study of major threats to marine biodiversity as and potential solutions to the threats. Students discuss current topics in marine conservation biology and critically debate marine conservation literature. Field trips to impacted and pristine sites will demonstrate principles. Taught only at Dauphin Island Sea Lab (DISL).
BIOL 4085 HURRICANES OF THE GULF OF MEXICO (2) LEC. 30. An introductory survey with emphasis on Gulf of Mexico hurricanes. Hurricane features. Basic principles of the atmosphere, review of Gulf, Atlantic and Caribbean hurricanes, El Nino, changes in the Atlantic circulation, hurricane formation, development, features, movement, steering and forecasting. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4095 COASTAL BIRDS OF ALABAMA (2) LEC. 15. LAB. 30. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and BIOL 3040. Behavior and ecology-oriented avian field biology. Identification, banding, record/broadcast, other survey methods. Emphasis on behavioral ecology. Extensive field effort along the Gulf Coast and in the Mobile/Alabama/Tombigbee/Tensaw River Delta, other riparian environments, and salt marshes. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4100/4103 CELL BIOLOGY (3) LEC. 3. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and BIOL 3040. Behavior and ecology-oriented avian field biology. Identification, banding, record/broadcast, other survey methods. Emphasis on behavioral ecology. Extensive field effort along the Gulf Coast and in the Mobile/Alabama/Tombigbee/Tensaw River Delta, other riparian environments, and salt marshes. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4101 CELL BIOLOGY LABORATORY (2) LAB. 4. Pr. P/C BIOL 4100 or P/C BIOL 4103. Light/electron microscopy, cell structure, origins of life, centrifugation, protein/nucleic acid electrophoresis, and blotting, motility, DNA purification, chromatography, pH, fluorescence microscopy.

BIOL 4135 MARINE BEHAVIORAL ECOLOGY (4) LEC. 30. LAB. 60. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and BIOL 3040. Animal behavior in the context of the marine environment. Students study the ecological and evolutionary significance of behavior in a marine setting. Topics include principles of marine behavioral ecology, techniques for observing behavior, conducting behavior experiments, and data collection. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4150 HUMAN GENETICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or AGRI 3000 or FISH 3000 or AGRI 3000) and (BIOL 1030 or BIOL 1037. Introduction to cellular structure and processes, including evolution, organization, physiology, molecular biology of cells, membranes, cytoplasm, and organelles as well as energy, transport, motility, cell division, signaling, transcription, and translation.

BIOL 4410 VERTEBRATE DEVELOPMENT (5) LEC. 3. LAB. 4. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Morphogenesis and organogenesis of frog, chick, pig, and human from a descriptive and analytical viewpoint.

BIOL 4415 SHARK AND RAY BIOLOGY (2) LEC. 15. LAB. 45. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and BIOL 3040. An introduction to the biology of sharks and rays with special emphasis on regional shark fauna and field technique. Topics: chondrichthyan origin, systematics, sensory biology, trophic ecology, reproductive biology, life history, ecology, fisheries and conservation. Extensive lab and field work. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4425 MARINE FISHERIES MANAGEMENT (4) LEC. 4. Departmental approval. Fisheries management philosophy, objectives, problems, and principles involved in management decisions. Taught at Gulf Coast Research Laboratory.

BIOL 4435 SPECIAL TOPICS IN MARINE SCIENCE (1-6) LEC. Departmental approval. An opportunity for students to study in an area in which GCRL offers no formal course; not research oriented. Taught at Gulf Coast Research Laboratory. Course may be repeated for a maximum of 6 credit hours.

BIOL 4445 SPECIAL PROBLEMS IN MARINE SCIENCE (1-6) AAB/LEC. Departmental approval. Individualized research-oriented experience. Taught at Gulf Coast Research Laboratory. Course may be repeated for a maximum of 6 credit hours.

BIOL 4465 PARASITES OF MARINE ANIMALS (6) LEC. 3. LAB. 6. Pr. BIOL 5110. Departmental approval. A study of the parasites of marine estuarine animals with emphasis on morphology, taxonomy, life histories, and host-parasite relationships. Taught at Gulf Coast Research Laboratory.

BIOL 4475 MARINE ICHTHYOLOGY (6) LEC. 6. Departmental approval. Biology of the major piscine taxa in Mississippi Sound. Principles involved in classification and evolutionary relationships of these organisms. Taught at Gulf Coast Research Laboratory.

BIOL 4485 MARINE ECOLOGY (5) LEC. 5. Pr. BIOL 4010. The relationship of marine organisms to their environment and the effects of environment on abundance and distribution on marine organisms. Taught at Gulf Coast Research Laboratory, Departmental approval and 16 hours of Biological Science including BIOL 4010.
BIOL 4515 MARINE INVERTEBRATE ZOOLOGY (4) LEC. 4. Pr. At least 10 credits in BIOL 2000-8990. Departmental approval. The natural history, systematics, and morphology of marine invertebrates from the Gulf of Mexico; oriented toward a field and laboratory approach. Participation in extended field trips is part of the course. Taught at DISL.

BIOL 4525 DOLPHINS AND WHALES (2) LEC. 2. Pr. BIOL 1030 or BIOL 1037. Departmental approval. Classification, anatomy, and ecology of the cetaceans. Taught at DISL.

BIOL 4535 COASTAL ZONE MANAGEMENT (2) LEC. 2. Pr. BIOL 1030 or BIOL 1037. Departmental approval. Management of shorelines and flood plains, and current legislation. Water quality and ecosystem quality management. Taught at DISL.

BIOL 4545 COASTAL ORNITHOLOGY (3) LEC. 3. Pr. BIOL 4020. Departmental approval. Coastal and pelagic birds with emphasis on ecology, taxonomy, and distribution. Taught at GCRL.

BIOL 4555 MARINE VERTEBRATE ZOOLOGY (4) LEC. 4. Pr. BIOL 1030 or BIOL 1037. Departmental approval. Systematics, zoogeography and ecology of marine fishes, reptiles, and mammals. Taught at DISL. May not be substituted for BIOL 4020.

BIOL 4565 MARINE ECOLOGY (4) LEC. 4. Pr. BIOL 1030 or BIOL 1037. Departmental approval. Experimental ecological theory and its application to interactions of marine organisms with each other and the environment. Includes laboratory, extensive field trip experience. Taught at DISL.

BIOL 4575 MARINE ECOLOGY (4) LEC. 4. Pr. BIOL 2000-8990. Prerequisites: BIOL1020 or marine biology. Departmental approval. Experimental ecological theory and its application to interactions of marine organisms with each other and the environment. Includes laboratory, extensive field trip experience. Taught at DISL.

BIOL 4585 PLANKTON BIOLOGY (2) LEC. 15. LAB. 45. Pr. (BIOL 1020 and BIOL 1021 or BIOL 1023 or BIOL 1027) and (BIOL 1030 and BIOL 1031 or BIOL 1037). Students will learn about the biology of all forms of plankton and the methods for their study including optical, chemical and molecular techniques. Students will understand the basic methods of study and be able to sight-identify major groups. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4920 INTERNSHIP IN BIOLOGY (1-4) INT. SU. Application of biology concepts and skills in a professional experience. 12 credit hours in 3000-level or higher BIOL courses. Departmental approval. Student must be enrolled in a major offered by the Department of Biological Sciences. Course may be repeated for a maximum of 4 credit hours.

BIOL 4950 SENIOR SEMINAR (1) LEC. 1. Departmental approval. Oral presentation and discussion of recent scientific publications from a selected area of biological sciences. One hour is required for all majors. Course may be repeated for a maximum of 3 credit hours.

BIOL 4967 HONORS SPECIAL PROBLEMS (1-3) LEC. Pr. Honors College. Departmental approval and membership in the Honor College. Course may be repeated for a maximum of 3 credit hours.

BIOL 4970 SPECIAL TOPICS (1-4) AAB. Departmental approval. Instruction and discussion in a selected current topic in Biological Sciences. Course may be repeated for a maximum of 8 credit hours.

BIOL 4980 UNDERGRADUATE RESEARCH (2-4) AAB/IND. Directed research in an area of specialty within the department. Course may be repeated for a maximum of 6 credit hours.

BIOL 4997 HONORS THESIS (1-3) IND. Pr. Honors College. Undergraduate research and thesis. Course may be repeated for a maximum of 3 credit hours.

BIOL 4AA0 PROFESSIONAL DEVELOPMENT II (0) PRA. SU. Students enrolled in this course will complete the ePortfolio that they began developing as Freshmen, in BIOL 2100 - Professional Development I. Successfully designing and completing a professional ePortfolio will provide students with: 1. An opportunity to create a unified, polished and coherent educational and professional history of themselves. 2. A platform to organize their thinking about skills and experiences and the opportunity to connect them to the next step in career development. 3. A place to collect, present and reflect on evidence of professional development and growth during the undergraduate experience.

BIOL 5020 DEVELOPMENTAL BIOLOGY (3) LEC. 3. Pr. BIOL 4100 and BIOL 4410. Consideration of induction, constancy of the genome, pathfinding by migrating cells, morphogenetic movements, and other developmental processes.

BIOL 5050 FUNDAMENTALS OF BIOPHYSICS (2) LEC. 2. Pr. PHYS 1510 or BIOL 4100. Introduction to use of theories and methods of physics in biology, illustrated by discussion of organism size, metabolism, physiology, vision, hearing, cell cellular and molecular processes and medicine, physiology and molecular biology.

BIOL 5090 CONSERVATION BIOLOGY (3) LEC. 3. Pr. BIOL 3060. This course is an overview of ethical, economic and biological aspects of conservation biology at scales ranging from local to global. Credit will not be given for both BIOL 5090 and BIOL 6090.
BIOL 5110 PARASITOLOGY (4) LEC. 3. LAB. 3. Pr. BIOL 1030 or BIOL 1037 or BIOL 2500 or BIOL 2503. Students must have Junior or Senior standing. Development, identification, host-parasite relationships, and medical significance of parasitic protozoa, helminthes, and arthropods that infect humans, domestic animals and wildlife. May count either BIOL 5110 or LABT 4050.

BIOL 5120 SYSTEMATIC BOTANY (4) LEC. 3. LAB. 3. Pr. (BIOL 1030 or BIOL 1037). Classification, nomenclature, distribution, systematics, and evolution of vascular plants.

BIOL 5130 ADVANCED PLANT PHYSIOLOGY (3) LEC. 3. Pr. BIOL 3100 and (CHEM 2030 or CHEM 2080 or CHEM 2087). Physiological and biochemical processes affecting plant growth and development including water relations, photosynthesis, respiration, and hormones.

BIOL 5131 ADVANCED PLANT PHYSIOLOGY LABORATORY (1) LAB. 3. Pr. BIOL 3100 and (CHEM 2081 or BIOL 5130). Laboratory exercises in plant physiology. Including water relations, metabolism and growth, and development.

BIOL 5140 PLANT ECOLOGY (4) LEC. 3. LAB. 4. Pr. (BIOL 1030 or BIOL 1037) and BIOL 3060. Exploration of ecological interactions between plants and their environment. Field trips emphasize Southeastern habitats/plant examples. Includes 3-day weekend field trip.

BIOL 5150 COMMUNITY ECOLOGY (3) LEC. 3. Pr. BIOL 3060. Dynamics of ecological communities, including niches, species interactions, succession, island biogeography, biodiversity and food webs. May count BIOL 5150 or BIOL 6150.

BIOL 5160 FIELD BIOLOGY AND ECOLOGY (3-15) LEC. 3. Prereq. 15 hours of biology. Intensive classroom and field studies of an area outside Alabama. Course may be repeated for a maximum of 15 credit hours.

BIOL 5190 CELL AND MOLECULAR SIGNAL TRANSDUCTION (3) LEC. 3. Pr. BIOL 4100 and BIOL 5220. Study of cellular communication and regulation with emphasis on integration between cellular, molecular, genetic, and biochemical approaches.

BIOL 5200 CLINICAL MICROBIOLOGY (5) LEC. 3. LAB. 4. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201. Isolation, cultivation, identification, classification and pathogenesis of infectious agents with emphasis on bacteria; includes clinical materials, Eubacteria, Mycoplasmata, Rickettsiae and Spirochetes. May count either BIOL 5200 or BIOL 6200.

BIOL 5210 MICROBIAL PHYSIOLOGY (3) LEC. 3. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201 and (CHEM 2030 or CHEM 2080 or CHEM 2087). General physiology of microbial cells emphasizing fermentation, respiration, photosynthesis, nitrogen fixation, cell wall synthesis, membranes, and macromolecular synthesis.

BIOL 5220 INTRODUCTORY MOLECULAR GENETICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000) and (BIOL 3200 or BIOL 3203) and BIOL 3201. Principles of gene expression including replication, transcription, and translation; structure and regulation of genes; concepts and techniques in recombinant DNA.

BIOL 5230 VIROLOGY (3) LEC. 3. Pr. (P/C BIOL 5220 or P/C BIOL 6220) or (P/C BIOL 5260 or P/C BIOL 6260). Biology of viruses, including structure, entry, replication, assembly and release, pathogenesis, and epidemiology of viral infections. May count BIOL 5230 or BIOL 6230.

BIOL 5240 ANIMAL PHYSIOLOGY (4) LEC. 3. LAB. 3. Pr. BIOL 4100 or (CHEM 2030 or CHEM 2070 or CHEM 2077). General overview of the function of the major systems in animals, including evolution and adaptation to specific environments.

BIOL 5250 MICROBIAL EVOLUTION AND DIVERSITY (4) LEC. 3. LAB. 2. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000 and (BIOL 3200 or BIOL 3203) and BIOL 3201. Introduction to microbial evolutionary history and theory, and survey of microbial diversity. Credit will not be given for both BIOL 5250 and BIOL 6250.

BIOL 5260 PROKARYOTIC MOLECULAR GENETICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000 and (BIOL 3200 or BIOL 3203) and BIOL 3201. Molecular principles of bacterial genetics including gene structure, genetic organization, regulation of gene expression, acquisition and loss of genes leading to microbial evolution. Credit will not be given for both BIOL 5260 and BIOL 6260.

BIOL 5270 HOST-MICROBE INTERACTIONS (3) LEC. 3. Pr. (BIOL 3200 or BIOL 3203) and (BIOL 3201) and (BIOL 5220 or BIOL 5260). This course will explore interactions between microbes and their hosts including plants, insects and animals. Credit will not be given for both BIOL 5270 and 6270.

BIOL 5280 GENETHICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Twenty-first century biotechnology and related ethical issues, including human cloning, stem cells, neuroenhancement, age retardation, genetic enhancement, and nanobiology. May count BIOL 5280 or 6280.
BIOL 5300 PLANT ANATOMY AND DEVELOPMENT (4) LEC. 3. LAB. 4. Pr. BIOL 3100. Investigation of the various levels of plant organization from subcellular to organ through use of light and scanning electron microscopes.

BIOL 5320 PLANT GENE EXPRESSION (4) LEC. 4. Pr. BIOL 3100. Departmental approval. Genetic expression of genetic elements in plants from the recent literature.

BIOL 5330 DEVELOPMENTAL GENETICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or AGRI 3000 or FISH 3000. Study of the genetics and genetic mechanisms behind developmental processes occurring in a range of species. May count either BIOL 5330 or BIOL 6330.

BIOL 5340 PROTOZOOLOGY (4) LEC. 3. LAB. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Life history, identification, cell biology, and evolution of free-living and parasitic protozoa of the major groups. Laboratory includes techniques for microscopy.

BIOL 5350 BEHAVIORAL ECOLOGY (3) LEC. 3. Pr. (BIOL 3030 or BIOL 3033) and BIOL 3060. Evolution of behaviors via natural, sexual, and kin selections; evolutionary influences on social groups, mating systems, cooperative breeding, and other interactions.

BIOL 5360 POPULATION ECOLOGY (3) LEC. 3. Pr. BIOL 3060 and (MATH 1610 or MATH 1613 or MATH 1617). Quantitative study of populations, including life tables, Leslie matrices, exponential and logistic models, metapopulations, and life-history theory.

BIOL 5370 MOLECULAR ECOLOGY (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000) and BIOL 3060. General overview of the concepts and techniques regarding the application of molecular variation in answering questions pertaining to populations and communities of organisms. Credit will not be given for both BIOL 5370 and BIOL 6370.

BIOL 5380 GENERAL ICHTHYOLOGY (4) LEC. 3. LAB. 4. Pr. BIOL 1030 or BIOL 1037. Survey of the biodiversity of world and local fishes with an overview of ecology, behavior, biology, and conservation of fishes.

BIOL 5425 MARINE BOTANY (4) LEC. 4. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027. Departmental approval. Pr. BIOL 1020 or equiv. Survey of microscopic and macroscopic algae, salt marsh vegetation, sea grasses, mangroves and maritime forests with regard to identification, distribution, structure, ecology and physiology. Field trips and laboratory work. Taught at DISL.

BIOL 5465 MARINE MICROBIOLOGY (5) LEC. 3. LAB. 2. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201. Departmental approval. The role of microorganisms in marine environments.

BIOL 5500 IMMUNOLOGY (3) LEC. 3. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201 and (BIOL 3000 or BIOL 3003 or BIOL 3020). The cellular and molecular basis of the immune response, including antigen presentation, immunogenetics, effector mechanisms, and medical immunology. May count either BIOL 3500 or BIOL 5500.

BIOL 5501 IMMUNOLOGY LAB (2) LAB. 4. Pr. P/C BIOL 5500 or P/C BIOL 3500. Techniques illustrating principles of antigen-antibody interactions and their application in immunoassays, identification of leukocytes, cellular interactions, and antibody production.

BIOL 5510 BIOGEOGRAPHY (3) LEC. 3. Patterns and processes associated with the distribution of living and fossil organisms.

BIOL 5521 GENE EXPRESSION AND RECOMBINANT DNA LABORATORY (2) LEC. 2. LAB. 4. Pr. P/C BIOL 5220 or P/C BIOL 5260. Laboratory experiences demonstrating concepts and techniques in recombinant DNA.

BIOL 5525 MARINE BEHAVIORAL ECOLOGY (4) LEC. 3. LAB. 3. Departmental approval. Study of animal behavior and the influence by and interaction with the environment and the ecological and evolutionary significance of these behaviors. Prereq. Vertebrate and Invertebrate Zoology. Taught at DISL.

BIOL 5535 MARINE CONSERVATION BIOLOGY (4) LEC. 3. LAB. 3. Departmental approval. Major threats to marine biodiversity, current topics in marine conservation biology and critical examination of the literature. Pr. General or Marine Ecology course. Taught DISL.

BIOL 5550 NANOMEDICINE (2) LEC. 2. Pr. PHYS 1510 and CHEM 2080 and BCHE 5180. Nanomedicine is a branch of medicine that applies the knowledge and tools of nanotechnology to the prevention and treatment of disease. It involves the use of nanoscale materials, such as biocompatible nanoparticles, nanorobots and nanosensors, for diagnosis, drug delivery, and sensing in living organisms.

BIOL 5600 MAMMALIAN PHYSIOLOGY (BIOMEDICAL PHYSIOLOGY) (5) LEC. 4.25. LAB. 2.75. Pr. (BIOL 1030 or BIOL 1037) or (BIOL 2500 or BIOL 2503) and BIOL 2501 and (CHEM 2030 or CHEM 2070 or CHEM 2077). An in-depth investigation of the physiology of the major mammalian organ systems.
BIOL 5650 ETHOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 1030 or BIOL 1037) and BIOL 3060. Animal behaviors, analysis of their adaptive value, development, and evolution.

BIOL 5660 FOOD MICROBIOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201. Introduction to basic and applied microbiology in food, including how bacteria, viruses, parasites, yeasts and mold affect and in turn are affected by foods both positively and negatively. May count either FDSC 5660, BIOL 5660, FDSC 6600, or BIOL 6600.

BIOL 5700 APPLIED AND ENVIRONMENTAL MICROBIOLOGY (4) LEC. 3. LAB. 2. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201. Introduction to the ecology, systematics, interrelationships, and role of micro-organisms in geochemical cycles, bioremediation and pharmaceutical production.

BIOL 5750 ORNITHOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 3030 or BIOL 3033) and BIOL 3060. Taxonomy, evolution, ecology, and behavior of birds.

BIOL 5760 MAMMALOGY (4) LEC. 3. LAB. 3. Characteristics, origins, ecology, behavior, reproduction, physiology, and diversity of mammals. Labs include survey or current literature, field trips, data analysis, and report preparation.

BIOL 5800 INTRODUCTION TO COMPUTATIONAL BIOLOGY (3) LEC. 2. LAB. 1. Pr. STAT 2510. Overview of computational approaches to biological data analysis. Additionally, students will learn basic statistical and graphical analysis. May count either BIOL 5800 or BIOL 6800.

BIOL 5850 FUNCTIONAL GENOMICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or BIOL 3020 or FISH 3000 or AGRI 3000) and BIOL 4100 and BIOL 5800. An active-learning course to study the functional aspects of the genome emphasizing gene regulation and functional genetic variation. May count either BIOL 5850 or BIOL 6850.

BIOL 5860 BIOINFORMATICS AND GENOME ANALYSIS (3) LEC. 2. LAB. 1. Pr. (BIOL 3000 or BIOL 3003 or BIOL 3020 or FISH 3000 or AGRI 3000) and BIOL 5800. Overview of informatic approaches to biological data analysis. Students will use the scientific method to investigate key questions in model organisms through emerging ‘omics fields. May count either BIOL 5860 or BIOL 6860.

BIOL 6020 DEVELOPMENTAL BIOLOGY (3) LEC. 3. Pr. BIOL 4100 and BIOL 4410. Consideration of induction, constancy of the genome, pathfinding by migrating cells, morphogenetic movements, and other developmental processes.

BIOL 6050 FUNDAMENTALS OF BIOPHYSICS (2) LEC. 2. Pr. PHYS 1510 or BIOL 4100. Introduction to use of theories and methods of physics in biology, illustrated by discussion of organism size, metabolism, physiology, vision, hearing, cell cellular and molecular processes and medicine, physiology and molecular biology.

BIOL 6090 CONSERVATION BIOLOGY (3) LEC. 3. Pr. BIOL 3060. This course is an overview of ethical, economic and biological aspects of conservation biology at scales ranging from local to global. Credit will not be given for both BIOL 5090 and BIOL 6090.

BIOL 6110 PARASITOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 1030 or BIOL 1037) or (BIOL 2500 or BIOL 2503) and BIOL 2501. Development, identification, host-parasite relationships, and medical significance of parasitic protozoa, helminthes, and arthropods that infect humans, domestic animals, and wildlife.

BIOL 6120 SYSTEMATIC BOTANY (4) LEC. 3. LAB. 3. Pr. (BIOL 1030 or BIOL 1037). Classification, nomenclature, distribution, systematics, and evolution of vascular plants.

BIOL 6130 ADVANCED PLANT PHYSIOLOGY (3) LEC. 3. Pr. BIOL 3100 and (CHEM 2030 or CHEM 2080 or CHEM 2087). Physiological and biochemical processes affecting plant growth and development including water relations, photosynthesis, respiration, and hormones.

BIOL 6131 ADV PLANT PHYSIOLOGY LAB (1) LAB. 3. Pr. BIOL 3100 and (CHEM 2081 or CHEM 2088). Laboratory exercises in plant physiology. Including water relations, metabolism, and growth and development.

BIOL 6140 PLANT ECOLOGY (4) LEC. 3. LAB. 4. Pr. (BIOL 1030 or BIOL 1037) and BIOL 3060. Departmental approval. Exploration of ecological interactions between plants and their environment. Field trips emphasize Southeastern habitats/plant examples. Includes 3-day weekend field trip.

BIOL 6150 COMMUNITY ECOLOGY (3) LEC. 3. Pr. BIOL 3060. Dynamics of ecological communities, including niches, species interactions, succession, island biogeography, biodiversity and food webs. May count BIOL 5150 or BIOL 6150.
Auburn University

BIOL 6160 FIELD BIOLOGY AND ECOLOGY (3-15) LEC. 3. Pr. At least 15 credits each with a minimum grade of C in BIOL 1000-8990. Intensive classroom and field studies of an area outside Alabama. Course may be repeated for a maximum of 15 credit hours. Departmental approval and 15 hours of biology.

BIOL 6190 CELL AND MOLECULAR SIGNAL TRANSDUCTION (3) LEC. 3. Pr. BIOL 4100 and BIOL 5220 and (CHEM 2080 or CHEM 2087). Study of cellular communication and regulation with emphasis on integration between cellular, molecular, genetic, and biochemical approaches.

BIOL 6200 CLINICAL MICROBIOLOGY (5) LEC. 3. LAB. 4. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201. Isolation, cultivation, identification, classification and pathogenesis of infectious agents with emphasis on bacteria; includes clinical materials, Eubacteria, Mycoplasmata, Rickettsiae and Spirochetes. May count either BIOL 5200 or BIOL 6200.

BIOL 6210 MICROBIAL PHYSIOLOGY (3) LEC. 3. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201 and (CHEM 2030 or CHEM 2080 or CHEM 2087). General physiology of microbial cells emphasizing fermentation, respiration, photosynthesis, nitrogen fixation, cell wall synthesis, membranes, and macromolecular synthesis.

BIOL 6220 INTRODUCTORY MOLECULAR GENETICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or AGRI 3000) and (BIOL 3200 or BIOL 3203) and BIOL 3201. Advanced principles of gene expression including replication, transcription and translation; structure and regulation of genes; detailed concepts and techniques in recombinant DNA. Credit will not be given for both BIOL 6220 and CMBL 6220.

BIOL 6230 VIROLOGY (3) LEC. 3. Pr. (P/C BIOL 5220 or P/C BIOL 6220) or (P/C BIOL 5260 or P/C BIOL 6260). Biology of viruses, including structure, entry, replication, assembly and release, pathogenesis, and epidemiology of viral infections. May count BIOL 5230 or BIOL 6230.

BIOL 6240 ANIMAL PHYSIOLOGY (4) LEC. 3. LAB. 3. Pr. BIOL 4100 or CHEM 2030 or CHEM 2070 or CHEM 2077. General overview of the function of the major systems in animals, including evolution and adaptation to specific environments.

BIOL 6250 MICROBIAL EVOLUTION AND DIVERSITY (4) LEC. 3. LAB. 2. Pr. (BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000) and (BIOL 3200 or BIOL 3203) and BIOL 3201. Introduction to microbial evolutionary history and theory, and survey of microbial diversity. Credit will not be given for both BIOL 5250 and BIOL 6250.

BIOL 6260 PROKARYOTIC MOLECULAR GENETICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000) and (BIOL 3200 or BIOL 3203) and BIOL 3201. Molecular principles of bacterial genetics including gene structure, genetic organization, regulation of gene expression, acquisition and loss of genes leading to microbial evolution. Course will not be given for both BIOL 5260 and BIOL 6260.

BIOL 6270 HOST-MICROBE INTERACTIONS (3) LEC. 3. Pr. (BIOL 3200 or BIOL 3203) and (BIOL 3201) and (BIOL 5200 or BIOL 5260). This course will explore interactions between microbes and their hosts including plants, insects and animals. Credit will not be given for both BIOL 5270 and BIOL 6270.

BIOL 6280 GENETHICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Twenty-first century biotechnology and related ethical issues, including human cloning, stem cells, neuroenhancement, age retardation, genetic enhancement, and nanobiology. May count BIOL 5280 or 6280.

BIOL 6300 PLANT ANATOMY AND DEVELOPMENT (4) LEC. 2. LAB. 4. Pr. BIOL 6130. The study of the structure and ontogeny of plant cells, tissues, and organs. Fall.

BIOL 6320 PLANT GENE EXPRESSION (4) LEC. 4. Pr. BIOL 5320. Departmental approval. Genetic expression of genetic elements in plants from the recent literature. Credit will not be given for both BIOL 6320 and CMBL 6320.

BIOL 6330 DEVELOPMENTAL GENETICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Study of the genetics and genetic mechanisms behind developmental processes occurring in a range of species. May count either BIOL 6330 or BIOL 5330.

BIOL 6340 PROTOZOOLOGY (4) LEC. 3. LAB. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Life history, identification, cell biology, and evolution of free-living and parasitic protozoa of the major groups. Laboratory includes techniques for microscopy.

BIOL 6350 BEHAVIORAL ECOLOGY (3) LEC. 3. Pr. (BIOL 3030 or BIOL 3033) and BIOL 3060. Evolution of behaviors via natural, sexual, and kin selections; evolutionary influences on social groups, mating systems, cooperative breeding, and other interactions.
BIOL 6360 POPULATION ECOLOGY (3) LEC. 3. Pr. BIOL 3060. Departmental approval. Quantitative study of populations, including life tables, Leslie matrices, exponential and logistic models, metapopulations, and life-history theory.

BIOL 6370 MOLECULAR ECOLOGY (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000 and BIOL 3060 and BIOL 6800. General overview of the concepts and techniques regarding the application of molecular variation in answering questions pertaining to populations and communities of organisms. Credit will not be given for both BIOL 5370 and BIOL 6370.

BIOL 6380 GENERAL ICHTHYOLOGY (4) LEC. 3. LAB. 4. Pr. BIOL 1030 or BIOL 1037. Survey of the biodiversity of world and local fishes with an overview of ecology, behavior, biology, and conservation of fishes.

BIOL 6425 MARINE BOTANY (4) LEC. 4. Departmental approval. Identification, distribution, structure, ecology and physiology of microscopic and macroscopic algae, sea grasses, salt marsh vegetation, mangroves and maritime forests. Experimental manipulation of these organisms. Taught at DISL.

BIOL 6465 MARINE MICROBIOLOGY (5) LEC. 3. LAB. 2. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201. Departmental approval. The role of microorganisms in marine environments.

BIOL 6500 IMMUNOLOGY (3) LEC. 3. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201 and (BIOL 3000 or BIOL 3003 or FISH 3000 or BIOL 3020) and P/C BIOL 6501. The cellular and molecular basis of the immune response, including antigen presentation, immunogenetics, effector mechanisms, and medical immunology.

BIOL 6501 IMMUNOLOGY LABORATORY (2) LAB. 4. Pr. P/C BIOL 5500 or P/C BIOL 6500. Techniques illustrating principles of antigen-antibody interactions and their application in immunoassays, identification of leukocytes, cellular interactions, and antibody production.

BIOL 6510 BIOGEOGRAPHY (3) LEC. 3. Departmental approval. Patterns and processes associated with the distribution of living and fossil organisms.

BIOL 6521 GENE EXPRESSION AND RECOMBINANT DNA LABORATORY (2) LEC. 2. LAB. 4. Pr. P/C BIOL 5220 or BIOL 6220 or BIOL 5260 or BIOL 6260. Laboratory experiences demonstrating concepts and techniques in recombinant DNA.

BIOL 6525 MARINE BEHAVIORAL ECOLOGY (4) LEC. 3. LAB. 3. Study of animal behavior and the influence by and interaction with the environment and the ecological and evolutionary significance of these behaviors. Vertebrate and Invertebrate Zoology required. Taught at DISL.

BIOL 6535 MARINE BEHAVIORAL ECOLOGY (4) LEC. 3. LAB. 3. Departmental approval. Examination of conservation biology based on previous study of marine ecology. General or Marine Ecology course required. Taught at DISL.

BIOL 6550 NANOMEDICINE (2) LEC. 2. LAB. 0. Pr. PHYS 1510 and CHEM 2080 and BCHE 5180. Nanomedicine is a branch of medicine that applies the knowledge and tools of nanotechnology to the prevention and treatment of disease. It involves the use of nanoscale materials, such as biocompatible nanoparticles, nanorobots and nanosensors, for diagnosis, drug delivery, and sensing in living organisms.

BIOL 6600 MAMMALIAN PHYSIOLOGY (BIOMEDICAL PHYSIOLOGY) (5) LEC. 4.25. LAB. 2.75. Pr. (BIOL 1030 or BIOL 1037) or (BIOL 2500 or BIOL 2503) and BIOL 2501 and (CHEM 2030 or CHEM 2070 or CHEM 2077). An in-depth investigation of the physiology of the major mammalian organ systems.

BIOL 6650 ETHOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 1030 or BIOL 1037) and BIOL 3060. Animal behaviors, analysis of their adaptive value, development, and evolution.

BIOL 6660 FOOD MICROBIOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201. Introduction to basic and applied microbiology in food, including how bacteria, viruses, parasites, yeasts and mold affect and in turn are affected by foods both positively and negatively. May count either FDSC 5660, BIOL 5660, FDSC 6600, or BIOL 6600.

BIOL 6700 APPLIED AND ENVIRONMENTAL MICROBIOLOGY (4) LEC. 3. LAB. 2. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201. An advanced treatment of bacteria comprising the Kingdom Prokaryotae, emphasizing ecology, systematics, interrelationships, geochemical cycles, and bioremediation.

BIOL 6750 ORNITHOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 3030 or BIOL 3033) and BIOL 3060. Departmental approval. An intensive investigation of the current literature and relevant research dealing with birds.
BIOL 6760 MAMMALOGY (4) LEC. 3. LAB. 3. Characteristics, origins, ecology, behavior, reproduction, physiology, and diversity of mammals. Labs include survey or current literature, fieldtrips, data analysis and report preparation. Instructor approval.

BIOL 6800 INTRODUCTION TO COMPUTATIONAL BIOLOGY (3) LEC. 2. LAB. 1. Pr. STAT 2510. Overview of computational approaches to the analysis of biological data. Students will learn basic statistical and graphical analysis. May count either BIOL 5800 or BIOL 6800.

BIOL 6850 FUNCTIONAL GENOMICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or BIOL 3020 or FISH 3000 or AGRI 3000) and BIOL 4100 and BIOL 5800. Active-learning course to study the functional aspects of the genome emphasizing gene regulation and functional genetic variation. May count either BIOL 5850 or BIOL 6850.

BIOL 6860 BIOINFORMATICS AND GENOME ANALYSIS (3) LEC. 2. LAB. 1. Pr. (BIOL 3000 or BIOL 3003 or BIOL 3020 or FISH 3000 or AGRI 3000) and BIOL 5800. Overview of informatic approaches to biological data analysis. Students will use the scientific method to investigate key questions in model organisms through emerging 'omics fields. May count either BIOL 5860 or BIOL 6860.

BIOL 7000 ADVANCED PARASITOLOGY (3) LEC. 3. Pr. BIOL 6110 or BIOL 5110. Departmental approval. Interactions of organisms with their environments and characteristics of populations, communities, and ecosystems. Eight hours of Biology.

BIOL 7010 FUNDAMENTALS OF TEACHING BIOLOGY (1) LEC. 1. SU. Course may be repeated for a maximum of 6 credit hours.

BIOL 7035 MARINE ANIMAL NEUROBIOLOGY (4) LEC. 30. LAB. 60. Pr. BIOL 1020 or BIOL 1023 and BIOL 1021 and BIOL 1030 and BIOL 1031 and BIOL 4100. Biophysical neurobiology of marine invertebrates and vertebrates. Lectures and labs on neurons, glia, resting and action potentials, synapses, neurotransmitters, muscle contraction, sensorimotor integration, computer simulation and extensive technical methods: extra-, intracellular, patch recording, molecular neuroimmunology, confocal fluorescence microscopy. Evening/Saturday classes.

BIOL 7060 ADVANCED MAMMALOGY (4) LEC. 3. LAB. 3. Pr. BIOL 6760. Current literature in mammalogy, collections management, and professional aspects of mammalogy. Labs include preparing specimens, curating research collections, fieldtrips, library work, data analysis, and report preparation.

BIOL 7075 INTRODUCTION TO OCEANOGRAPHY (4) LEC. 30. LAB. 60. Pr. MATH 1150 or MATH 1153 and CHEM 1030 or CHEM 1033 or CHEM 1110 or CHEM 1117 and PHYS 1500 and BIOL 3040. An in-depth examination of the physics, chemistry, geology and biology of the oceans. Lectures cover the interrelationships of these components to each other. Field and lab work will introduce students to research on oceanographic processes of the Gulf of Mexico. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 7170 POPULATION GENETICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Examination of the theories relating to maintenance of variation in natural populations of plants and animals.

BIOL 7180 SCRIPTING FOR BIOLOGISTS (3) LEC. 2. LAB. 1. Pr. BIOL 6800 and STAT 7000. or Instructor approval. A hands-on course to teach students concepts, applications, and best practices of utilizing computer scripting languages in the life sciences.

BIOL 7200 EVOLUTIONARY BIOLOGY (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000 and (BIOL 3200 or BIOL 3203) and BIOL 3201. Topics of current interest in evolution. Readings and presentation required.

BIOL 7210 EVOLUTIONARY ECOLOGY (3) LEC. 2.5, LEC/PR1. 1. The Evolutionary Ecology research paradigm is a key approach to the study of behavioral, evolutionary, and ecological processes in the context of realistic or natural environmental settings. We will investigate a number of current “hot” research topics in Evolutionary Ecology, discuss the leading hypotheses being developed and how they are cast as statistical models, and practice the published statistical techniques. An emphasis will be placed on practical application of computational and statistical approaches to parameter estimation and hypothesis testing. Students will come away with both a broader and deeper knowledge of current avenues of research in behavioral, ecological, and evolutionary programs as well as a practical skill set for analyzing data in the field of evolutionary ecology.

BIOL 7250 PRACTICAL DATA ANALYSIS AND COMPUTATION FOR THE LIFE SCIENCES (3) LEC. 2. LAB. 3. Pr. STAT 7020 or WILD 7150. or equivalent; or permission of the instructor. Data from the life sciences and advanced statistical techniques for data analyses and computation are brought together through a cross-fertilization of graduate student students in the life sciences, statistics, and mathematics. Focus on production of publication-quality research on student-identified projects. May count either BIOL 7250 or STAT 7250.

BIOL 7280 PLANT HORMONES (2) LEC. 2. Pr. BIOL 6130. Synthesis, physiology, and mode of action of the major plant hormones including abscisic acid, auxins, cytokinins, ethylene, and gibberellins.
BIOL 7290 EVOLUTIONARY GENETICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000 and BIOL 6170. Departmental approval. The role of population processes as mechanisms for evolution; and evolution at the molecular level. Credit will not be given for both BIOL 7290 and CMBL 7290.

BIOL 7370 STREAM ECOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 1030 or BIOL 1037) and BIOL 3060. Physical, chemical, and biological aspects of stream ecosystems emphasizing effects of natural environmental factors and human influences on stream biota, and quantitative methods used to study stream ecology.

BIOL 7440 ADVANCED CELL BIOLOGY (3) LEC. 3. Pr. BIOL 4100. Examination of current areas of research in cell and developmental biology by directed reading and discussion. Credit will not be given for both BIOL 7440 and CMBL 7440.

BIOL 7470 GENOME EVOLUTION (3) LEC. 3. Provides a broad evolutionary perspective on the origin, composition, and architecture of eukaryotic genomes. Students will participate in a literature-driven discussion format and will complete weekly writing assignments.

BIOL 7485 ADVANCED MARINE ECOLOGY (4) LEC. 2. LAB. 2. Pr. (BIOL 1020 or BIOL 1023) and BIOL 1021 and BIOL 1030 and BIOL 1031 and (BIOL 3060 or BIOL 3040). An advanced course open only to MS or PhD students. Interactions between marine organisms and the environment. In-depth discussion of ecological theory with emphasis on the latest research, using extensive reference to the literature. Lecture, lab and overnight field trips.

BIOL 7490 PHYSIOLOGICAL ECOLOGY (3) LEC. 3. Pr. BIOL 3060. A study of the physiological adaptations that allow animals to survive in unusual environments. A course in ecology required.

BIOL 7500 STRESS PHYSIOLOGY (2) LEC. 2. Pr. (BIOL 4100 or BIOL 5240 or BIOL 5600). This course is a discussion-based course focusing on physiological stress responses at various levels of organization and communication among them, from molecules, cells, organ, to whole organism.

BIOL 7510 NATURAL HISTORY MUSEUM PRACTICUM (1) LAB. 3. Practical methods in natural history museum curation. Students will assist in curating collections at the Auburn University Museum of Natural History. Course may be repeated for a maximum of 4 credit hours.

BIOL 7525 MARINE INVERTEBRATES (4) LEC. 2. LAB. 2. Morphology, natural history, physiology, evolution and ecology. Students examine modern literature and develop an advanced presentation on invertebrate biology involving problem solving in an area such as sensory biology, molecular evolution or management. Term paper, classroom presentation and lecture.

BIOL 7530 ADVANCED SYSTEMATIC BOTANY (3) LEC. 3. Morphological and molecular approaches to modern systematics of plants.

BIOL 7540 PROFESSIONAL ASPECTS OF BIOLOGY (3) LEC. 3. Departmental approval. Instruction on practical aspects of a career in biological sciences.

BIOL 7550 PHYSIOLOGICAL ECOLOGY OF REPRODUCTION (3) LEC. 3. This course focuses on physiological ecology of reproduction by identifying key physiological mechanisms linking the environmental change, reproductive constraints, and reproductive performance and describing how variation in reproductive performance are impacted by ecological and evolutionary processes.

BIOL 7560 PLANT/ANIMAL INTERACTIONS (3) LEC. 3. Pr. BIOL 3100 and BIOL 3060. Departmental approval. Overview of ecological and evolutionary interrelationships between animals and plants, including pollination biology, dispersal ecology, carnivory, and plant-herbivore interactions.

BIOL 7620 MICROBIOLOGY OF EPIDEMICS (3) LEC. 3. Departmental approval. Epidemics of communicable disease outbreaks are analyzed according to the hosts, modes of transmission, environment, and pathogenesis of the agents.

BIOL 7705 TROPICAL BIOLOGY: ECOLOGICAL APPROACH (8) LEC. 4. LAB. 12. Pr. At least 15 credits each with a minimum grade of C in BIOL 6000-8990. An in-depth introduction to the principles of ecology in the tropics. Orientation and introductory lecture in San Jose, Costa Rica, followed by field work during an 8 week period. 15 hours of graduate level biological science.

BIOL 7720 PROKARYOTIC GENE REGULATION (3) LEC. 3. Pr. BIOL 6210 or CHEM 6180. Discussion of gene expression in bacteria using the current literature.

BIOL 7880 MITONUCLEAR ECOLOGY (2) LEC. 2. Pr. BIOL 3030. This course will explore the implications of the necessity of mitonuclear coadaptation for the evolution of quintessential eukaryotic characteristics, including sex and two sexes, a sequestered germ line, senescence, discrete species, mate choice, and adaptation. Permission of instructor may be needed.
BIOL 7950 MASTERS THESIS SEMINAR (1) LEC. 1. SU. Departmental approval. Oral presentation and discussion of research in the field of specialization. Course may be repeated for a maximum of 2 credit hours.

BIOL 7960 SPECIAL PROBLEMS (1-4) LEC. Pr. P/C BIOL 6220. Oral presentation and discussion of recent scientific publications from a selected area molecular biology. Credit will not be given for both BIOL 7960 and CMBL 7960. Course may be repeated for a maximum of 4 credit hours.

BIOL 7970 SPECIAL TOPICS (1-4) AAB. Departmental approval. Instruction and discussion in a selected current topic in botany, microbiology, molecular biology, or zoology. A different topic for advanced study will be selected each semester this course is offered. Course may be repeated for a maximum of 8 credit hours.

BIOL 7990 RESEARCH AND THESIS (1-10) MST. Course may be repeated with change in topic.

BIOL 8950 DOCTORAL SEMINAR (1) SEM. 1. SU. Oral presentation and discussion of research in the field of specialization. Course may be repeated for a maximum of 3 credit hours.

BIOL 8990 RESEARCH AND DISSERTATION (1-10) DSR. Course may be repeated with change in topic.

Cell and Molecular Biology Courses

CMBL 4150 HUMAN GENETICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003) and BIOL 4100 and (CHEM 2080 or CHEM 2087). Study of the biological interaction of genes, effects of mutation and changes in gene frequency in human populations. Emphasis on molecular approach to study evolutionary changes in human gene pools.

CMBL 5190 CELL AND MOLECULAR SIGNAL TRANSDUCTION (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003) and BIOL 4100 and BIOL 4220 and CHEM 2090. The study of cellular communication and regulation with emphasis on integration between cellular, molecular, genetic and biochemical approaches.

CMBL 5500 IMMUNOLOGY (3) LEC. 3. Pr. BIOL 3200 and (BIOL 3000 or BIOL 3003). The cellular and molecular basis of the immune response, including antigen presentation, immunogenetics, effector mechanisms and medical immunology.

CMBL 5501 IMMUNOLOGY LAB (2) LAB. 4. Coreq. BIOL 5500. Techniques illustrating principles of antigen-antibody interactions and their application in immunoassays, identification of leukocytes, cellular interactions and antibody production.

CMBL 6190 CELL AND MOLECULAR SIGNAL TRANSDUCTION (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003) and BIOL 4100 and BIOL 4050 and CHEM 2090. Study of cellular communication and regulation with emphasis on integration between cellular, molecular, genetic and biochemical approaches. Credit will not be given for both CMBL 6190 and BIOL 6190.

CMBL 6200 INTRODUCTION TO MOLECULAR GENETICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003) and BIOL 4510. Advanced principles of gene expression including replication, transcription and translation; structure and regulation of genes; detailed concepts and techniques in recombinant DNA. Credit will not be given for both CMBL 6200 and BIOL 6230.

CMBL 6230 VIROLOGY (4) LEC. 4. Pr. (BIOL 3000 or BIOL 3003) and BIOL 3200 and BIOL 4520. Molecular mechanisms of virus biology including virus-cell replication, assembly and release pathogens. Credit will not be given for both CMBL 6230 and BIOL 6230.

CMBL 6320 PLANT GENE EXPRESSION (4) LEC. 4. Pr. BIOL 5320. Departmental approval. Genetic expression of genetic elements in plants from the recent literature. Credit will not be given for both BIOL and CMBL 6320.

CMBL 6500 IMMUNOLOGY (3) LEC. 3. Pr. BIOL 3200 and (BIOL 3000 or BIOL 3003). The cellular and molecular basis of the immune response, including antigen presentation, immunogenetics, effector mechanisms, and medical immunology.

CMBL 6501 TECHNIQUES IN IMMUNOLOGY (2) LAB. 4. Coreq. BIOL 6500. Techniques illustrating principles of antigen-antibody interactions and their application in immunoassays, identification of leukocytes, cellular interactions and antibody production.

CMBL 7070 PLANT BIOTECHNOLOGY (4) LEC. 2. LAB. 4. Pr. BIOL 3000 or BIOL 3003. Plant biotechnology, including plant tissue culture technologies and genetic transformation and applications to horticultural crop improvement.

CMBL 7080 MOLECULAR ENDOCRINOLOGY (2) LEC. 2. Pr. VBMS 7070. Departmental approval. Examination of the literature of hormonal synthesis, secretion and mechanism of action with emphasis on receptors, second messenger systems and gene regulation.
CMBL 7270 ULTRASTRUCTURE OF PLANT CELLS AND MICROBES (5) LEC. 3. LAB. 4. Departmental approval. Theory and practice of transmission and scanning electron microscopy and their application to the biological sciences. Credit will not be given for both CMBL 7270 and BIOL 7290.

CMBL 7290 EVOLUTIONARY GENETICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003) and BIOL 6170. Departmental approval. Examines two major topics: the role of population processes as mechanisms for evolution; and evolution at the molecular level. Credit will not be given for both CMBL 7290 and BIOL 7290.

CMBL 7330 MOLECULAR BIOLOGY OF PLANT DEVELOPMENT (2) LEC. 2. Pr. BIOL 6130 and BIOL 7280. Departmental approval. Physiological, biochemical and molecular aspects of plant growth and development. Credit will not be given for both CMBL 7330 and BIOL 7330.

CMBL 7400 PLANT VIROLOGY (4) LEC. 3. LAB. 2. Pr. (PLPA 3000 or PLPA 3003 or PLPA 6000) and CHEM 6180. Departmental approval. Introduction to plant viruses and the diseases they cause; virus particle structure and replication strategies; disease identification by symptoms and detection of pathogen; transmission, ecology, epidemiology and control.

CMBL 7440 ADVANCED CELL BIOLOGY (3) LEC. 3. Pr. BIOL 4100. Examination of current areas of research in cell and developmental biology by directed reading and discussion. Credit will not be given for both CMBL 7440 and BIOL 7440.

CMBL 7460 BACTERIAL PATHOGENESIS (3) LEC. 3. Pr. VBMS 7510 or BIOL 4520. Departmental approval. Molecular and cellular basis of virulence of bacterial pathogens of animals.

CMBL 7480 METHODS IN IMMUNOLOGY (5) LEC. 1. LAB. 8. Departmental approval. Theoretical concept underlying immunological methods combined with practical hands-on immunological experimentation focused on application to research in the biological sciences.

CMBL 7510 MOLECULAR GENETICS I (5) LEC. 5. Pr. CHEM 7200. Bacterial, bacteriophage, and eukaryotic genetics, with a focus on gene structure, and molecular mechanisms regulation expression. Critical review of current literature will be emphasized.

CMBL 7520 MOLECULAR GENETICS II (5) LEC. 5. Pr. VBMS 7510. Genetic mechanisms by which eukaryotic cells replicate, communicate and differentiate. Current literature will be used extensively.

CMBL 7530 ADVANCED SYSTEMATIC BOTANY (3) LEC. 3. Pr. BIOL 6120. Morphological and molecular approaches to modern systematics of plants.

CMBL 7540 CURRENT TOPICS IN MOLECULAR VIROLOGY (3) LEC. 3. Pr. VBMS 7510 and VBMS 7520. Viral gene expression and evasion of host defense mechanisms.

CMBL 7660 MOLECULAR GENETICS AND BIOTECHNOLOGY (4) LEC. 3. LAB. 3. Pr. BIOL 3000 or BIOL 3003. Departmental approval. Principles and applications of DNA fingerprinting technologies, gene mapping, genetic information and analysis using internet tools, transgenic technologies. Credit will not be given for both CMBL 7660 and FISH 7660.

CMBL 7960 READINGS IN MOLECULAR BIOLOGY (1) RCT. 1. Pr. P/C BIOL 7220. Oral presentation and discussion of recent scientific publications from a selected area of molecular biology. Credit will not be given for both CMBL 7960 and BIOL 7960. Course may be repeated for a maximum of 4 credit hours.

CMBL 8160 LABORATORY TECHNIQUES IN MOLECULAR VIROLOGY (4) LEC. 1. LAB. 9. Pr. BIOL 4520 and BIOL 4530. Isolation, purification, and identification of viral nucleic acids and proteins. Credit will not be given for both CMBL 8160 and POUL 8160.

CMBL 8880 PHYSIOLOGICAL AND MOLECULAR PLANT PATHOLOGY (3) LEC. 2. LAB. 2. Pr. PLPA 6000 and CHEM 6180 and BIOL 4230. Comprehensive coverage of physiology and molecular biology of plant-pathogen interactions.

Chemistry Courses

CHEM 1010 SURVEY OF CHEMISTRY I (3) LEC. 3. Science Core. Survey of important topics from general and organic chemistry. Atomic and bonding theory, chemical reactions and stoichiometry, gas laws, solutions, acids and bases, hydrocarbons, alcohols, ethers and amines.
CHEM 1011 SURVEY OF CHEMISTRY I LABORATORY (1) LAB. 3. Pr. P/C CHEM 1010. Science Core. Laboratory experiments emphasizing course material in CHEM 1010.

CHEM 1020 SURVEY OF CHEMISTRY II (3) LEC. 3. Pr. CHEM 1010. Science Core. Survey of important topics from organic and biochemistry. Aldehydes and ketones, carboxylic acids, carbohydrates, lipids, proteins, enzymes, extracellular fluids, metabolism, nucleic acids, radioactivity.

CHEM 1021 SURVEY OF CHEMISTRY II LABORATORY (1) LAB. 3. Pr. P/C CHEM 1020 and CHEM 1011. Science Core. Laboratory experiments emphasizing course material in CHEM 1020.

CHEM 1030/1033 FUNDAMENTALS CHEMISTRY I (3) LEC. 3. Science Core. Atomic and molecular theory, chemical equations, stoichiometry, gas laws, thermochemistry, bonding, electronic structure, molecular geometries, solids, liquids, properties of solutions, problem-solving techniques. Credit will not be given for both CHEM 1030 and CHEM 1110 or CHEM 1117.

CHEM 1031 FUNDAMENTAL CHEMISTRY I LABORATORY (1) LAB. 3. Pr. P/C CHEM 1030 or P/C CHEM 1033. Science Core. Laboratory experiments emphasizing course material in CHEM 1030. Credit will not be given for both CHEM 1031 and CHEM 1111 or CHEM 1118.

CHEM 1040/1043 FUNDAMENTAL CHEMISTRY II (3) LEC. 3. Pr. CHEM 1030 or CHEM 1033 or CHEM 1110 or CHEM 1117. Science Core. Chemical kinetics; chemical equilibrium; acids and bases; calculations of pH; equilibrium constants and thermodynamical properties; electrochemistry; descriptive chemistry. Credit will not be given for both CHEM 1040 and CHEM 1120 or CHEM 1127.

CHEM 1041 FUNDAMENTAL CHEMISTRY II LABORATORY (1) LAB. 3. Pr. (P/C CHEM 1040 or P/C CHEM 1043) and (CHEM 1031 or CHEM 1111 or CHEM 1118). Science Core. Laboratory experiments emphasizing course material in CHEM 1040. Credit will not be given for both CHEM 1041 and CHEM 1121 or CHEM 1128.

CHEM 1110 GENERAL CHEMISTRY I (3) LEC. 3. Pr. P/C MATH 1610 or P/C MATH 1613 or P/C MATH 1617. Science Core. Chemical principles for chemistry and related majors. Atomic and molecular theory, periodicity, chemical reactions, Stoichiometry, gases, thermochemistry, bonding, molecular geometries, liquids, solids, and solutions. Credit will not be given for both CHEM 1110 and CHEM 1030 or CHEM 1117.

CHEM 1111 GENERAL CHEMISTRY I LABORATORY (1) LAB. 3. Pr. P/C CHEM 1110 or P/C CHEM 1117. Science Core. Laboratory experiments emphasizing course material in CHEM 1110. Credit will not be given for both CHEM 1111 and CHEM 1031 or CHEM 1118.

CHEM 1117 HONORS GENERAL CHEMISTRY I (3) LEC. 3. Pr. Honors College. Science Core. General chemistry for students in the honors program. Topics similar to CHEM 1110, but covered in more depth. Credit will not be given for both CHEM 1117 and CHEM 1030 or CHEM 1110.

CHEM 1118 HONORS GENERAL CHEMISTRY I LABORATORY (1) LAB. 3. Pr. Honors College. CHEM 1117. Science Core. Laboratory experiments emphasizing course material in CHEM 1117. Credit will not be given for both CHEM 1118 and CHEM 1031 or CHEM 1111.

CHEM 1120 GENERAL CHEMISTRY FOR SCIENTISTS AND ENGINEERS II (3) LEC. 3. Pr. CHEM 1110 or CHEM 1117. Science Core. Continuation of CHEM 1110. Chemical kinetics, chemical equilibrium, acids and bases, thermodynamics, electrochemistry, representative element and transition metal chemistry. Credit will not be given for both CHEM 1120 and CHEM 1040 or CHEM 1127.

CHEM 1121 GENERAL CHEMISTRY II LABORATORY (1) LAB. 3. Pr. (P/C CHEM 1120 or P/C CHEM 1127) and CHEM 1111 or CHEM 1118. Science Core. Laboratory experiments emphasizing course material in CHEM 1120. Credit will not be given for both CHEM 1121 and CHEM 1041 or CHEM 1128.

CHEM 1127 HONORS GENERAL CHEMISTRY II (3) LEC. 3. Pr. Honors College. CHEM 1117. Science Core. General chemistry for students in the honors program. Topics similar to CHEM 1120, but covered in more depth. Credit will not be given for both CHEM 1127 and CHEM 1040 or CHEM 1120.

CHEM 1128 HONORS GENERAL CHEMISTRY II LABORATORY (1) LAB. 3. Pr. Honors College. Science Core. Laboratory experiments emphasizing course material in CHEM 1127. Credit will not be given for both CHEM 1128 and CHEM 1041 or CHEM 1121.
CHEM 2030 SURVEY OF ORGANIC CHEMISTRY (3) LEC. 3. Pr. CHEM 1040 or CHEM 1120 or CHEM 1127. Structure, nomenclature and reactions of the functional group classes of organic compounds polymers, and molecules of biological interest. Credit will not be given for both CHEM 2030 and CHEM 2070.

CHEM 2070 ORGANIC CHEMISTRY I (3) LEC. 3. Pr. CHEM 1040 or CHEM 1043 or CHEM 1120 or CHEM 1127. In-depth study of organic chemistry including structure, nomenclature, reactions, reaction mechanisms, stereochemistry, synthesis and spectroscopic structure determination organized by the functional group approach. Considers alkanes, alkenes, alkynes, alkyl halides, alcohols, ethers, and aromatic compounds. Credit will not be given for both CHEM 2070 and CHEM 2030.

CHEM 2071 ORGANIC CHEMISTRY I LABORATORY (1) LAB. 3. Pr. (P/C CHEM 2070 or P/C CHEM 2077) and (CHEM 1041 or CHEM 1128 or CHEM 1121). Laboratory for CHEM 2070.

CHEM 2077 HONORS ORGANIC CHEMISTRY I (3) LEC. 3. Pr. Honors College. Organic chemistry for students in the honors program and Chemistry & Biochemistry majors. Topics similar to CHEM 2070, but covered in more depth. Additional credit will not be given for CHEM 2070. Member of the Honors College or CHEM 1110 with grade of A or B or CHEM 1040 with grade of A.

CHEM 2078 HONORS ORGANIC CHEMISTRY I LABORATORY (1) LAB. 3. Pr. P/C CHEM 2070 or P/C CHEM 2077. Laboratory experiments emphasizing course material in CHEM 2077. Additional credit will not be given for CHEM 2071. Course may be repeated for a maximum of 3 credit hours.

CHEM 2080 ORGANIC CHEMISTRY II (3) LEC. 3. Pr. CHEM 2070 or CHEM 2077. Continuation of CHEM 2070. Aldehydes, ketones, amines, carboxylic acids, esters, amides, anhydrides, polymers, carbohydrates and amino acids.

CHEM 2081 ORGANIC CHEMISTRY II LABORATORY (1) LAB. 1. Pr. (CHEM 2070 or CHEM 2077) and (CHEM 2071 or CHEM 2078) and (P/C CHEM 2080 or P/C CHEM 2087). Laboratory for CHEM 2080.

CHEM 2087 HONORS ORGANIC CHEMISTRY II (3) LEC. 3. Pr. Honors College or departmental approval. Organic chemistry for students in the honors program and Chemistry & Biochemistry majors. Topics similar to CHEM 2080, but covered in more depth. Additional credit will not be given for CHEM 2080. Member of the Honors College or CHEM 2077

CHEM 2088 HONORS ORGANIC CHEMISTRY II LABORATORY (1) LAB. 3. Pr. P/C CHEM 2080 or P/C CHEM 2087. Laboratory experiments emphasizing course material in CHEM 2087. Additional credit will not be given for CHEM 2081. May count either CHEM 2081 or CHEM 2088. Course may be repeated for a maximum of 3 credit hours.

CHEM 2100 PROFESSIONAL DEVELOPMENT (1) LEC. 1. This course is designed to introduce students to the many opportunities available in chemistry, both as a career choice and while as a student. Students will have the opportunity to investigate available options, will reflect on what career success means to the student, and will chart a pathway to student professional success.

CHEM 2980 INTRODUCTION TO UNDERGRADUATE RESEARCH IN CHEMISTRY (1-3) LAB. SU. Individual problems course. Students will work under the direction of a staff member on some problem of mutual interest. Departmental approval required. Only Freshman or Sophomore. Course may be repeated for a maximum of 6 credit hours.

CHEM 3000 CHEMICAL LITERATURE (1) LEC. 1. Pr. CHEM 2080 or CHEM 2087. Chemical literature with emphasis on primary and secondary sources and the various computer data bases available.

CHEM 3050 ANALYTICAL CHEMISTRY (3) LEC. 3. Pr. CHEM 1040 or CHEM 1120 or CHEM 1127. Theory and application of volumetric, potentiometric and photometric chemical analysis.

CHEM 3051 ANALYTICAL CHEMISTRY LABORATORY (1) LAB. 3. Pr. P/C CHEM 3050. Analytical techniques applied to chemical analysis.

CHEM 3160 SURVEY OF PHYSICAL CHEMISTRY (3) LEC. 3. Pr. CHEM 1040 or (CHEM 1120 or CHEM 1127). The principles of physical chemistry.

CHEM 4070 PHYSICAL CHEMISTRY I (3) LEC. 3. Pr. CHEM 1040 or (CHEM 1120 or CHEM 1127) and (MATH 2630 or MATH 2637) and MATH 2650 and (PHYS 1610 or PHYS 1617). Principles of chemical thermodynamics, principles of application to problems of chemical interest.

CHEM 4071 PHYSICAL CHEMISTRY I LABORATORY (1) LAB. 3. Pr. P/C CHEM 4070.
CHEM 4080 PHYSICAL CHEMISTRY II (3) LEC. 3. Pr. CHEM 1040 or (CHEM 1120 or CHEM 1127) and (MATH 2630 or MATH 2637) and MATH 2650 and (PHYS 1610 or PHYS 1617). Principles of quantum mechanics and spectroscopy; application in molecular structure and in statistical thermodynamics.

CHEM 4081 PHYSICAL CHEMISTRY II LABORATORY (1) LAB. 3. Pr. P/C CHEM 4080. Laboratory for CHEM 4080.

CHEM 4100 INORGANIC CHEMISTRY (3) LEC. 3. Pr. CHEM 4080 or CHEM 3160. Principles of inorganic chemistry emphasizing periodic properties, bonding, structure and symmetry, the solid state, acid-base theory and coordination chemistry.

CHEM 4101 INORGANIC CHEMISTRY LABORATORY (1) LAB. 3. Pr. P/C CHEM 4100. Synthesis and characterization of a variety of inorganic compounds.

CHEM 4110 INORGANIC CHEMISTRY II (3) LEC. 3. Pr. CHEM 4100. Departmental approval. Survey of main group, transition metal and organometallic chemistry.

CHEM 4111 INORGANIC CHEMISTRY LABORATORY II (1) LAB. 3. Pr. CHEM 4101 and P/C CHEM 4110. Laboratory for CHEM 4110.

CHEM 4130 INSTRUMENTAL ANALYSIS (3) LEC. 3. Pr. P/C CHEM 3050. Fundamental concepts used in instrumental analytical chemistry emphasizing spectrophotometric, electroanalytical and chromatographic analysis.

CHEM 4131 INSTRUMENTAL ANALYSIS LABORATORY (1) LAB. 3. Pr. P/C CHEM 4130. Laboratory for CHEM 4130.

CHEM 4950 UNDERGRADUATE SEMINAR (1) LEC. 1. Oral presentation and discussion of research in the area of specialization.

CHEM 4980 UNDERGRADUATE RESEARCH IN CHEMISTRY (3) LAB. 9. Departmental approval. This is an individual problem course. Each student will work under the direction of a staff member on some problem of mutual interest. Course may be repeated for a maximum of 9 credit hours.

CHEM 4997 HONORS THESIS (1-3) LEC. 3. Pr. Honors College. Departmental approval. Honors College Members Only; Course may be repeated for a maximum of 6 credit hours.

CHEM 5180 BIOCHEMISTRY I (3) LEC. 3. Pr. CHEM 2080 or CHEM 2087. Molecular Structure: classification, structure and reactions of the major constituents of living matter. Also includes binding phenomena and bioenergetics. Credit will not be given for both CHEM 5180 and BCHE 5180.

CHEM 5181 BIOCHEMISTRY I LABORATORY (1) LEC. 3. Pr. P/C CHEM 5180 or P/C BCHE 5180. Identification and quantification of compounds from the important biochemical classes. Examples include amino acid chromatography, dipeptide sequencing, glucose concentration etc. Credit will not be given for both CHEM 5181 and BCHE 5181.

CHEM 5190 BIOCHEMISTRY II (3) LEC. 3. Pr. CHEM 5180. Metabolism: survey of design and regulation of the major catabolic and biosynthetic (including photosynthesis) metabolic pathways. An overview of the flow of genetic information. Credit will not be given for both CHEM 5190 and BCHE 5190.

CHEM 5191 BIOCHEMISTRY II LABORATORY (1) LEC. 3. Pr. P/C CHEM 5190 or P/C BCHE 5190. Partial purification, Kinetic studies and characterization of enzymes and nucleotides from various plants, animals and bacteria. Credit will not be given for both CHEM 5191 and BCHE 5191.

CHEM 5280 COMPUTATIONAL CHEMISTRY (4) LEC. 3. LAB. 3. Pr. (CHEM 2080 or CHEM 2087) and CHEM 4080. Modern computational chemistry including molecular mechanics and quantum mechanical calculations.

CHEM 5310 LEARNING ASSISTANT PEDAGOGY (1) ST1. 1. Departmental approval. The Learning Assistant Pedagogy course is a special topics course reserved for students (undergraduate or graduate) serving as learning assistants in active learning classrooms. This seminar style class incorporates literature on student-centered learning with reflective writing and discussion.

CHEM 5450 FOUNDATIONS OF R FOR DBER (3) LEC. 3. R is an open-source statistical software that allows nearly limitless data manipulation, statistical analysis, and advance data visualizations for both the social and physical sciences required for quality research in discipline-based education research (DBER). This course will dedicate approximately one half to learning the basics of coding in R for many common tasks found in DBER (focusing on how to independently find and apply new functions as only a portion of functions can possibly be discussed) and the second half on applying these principles into real data from students’ thesis or dissertation (or data can be provided by instructor).
CHEM 6180 BIOCHEMISTRY I (3) LEC. 3. Pr. CHEM 2080 or CHEM 2087. Molecular Structure: classification, structure and reactions of the major constituents of living matter. Also includes binding phenomena and bioenergetics. Credit will not be given for both CHEM 6180 and BCHE 6180.

CHEM 6190 BIOCHEMISTRY II (3) LEC. 3. Pr. CHEM 6180. Departmental approval. Metabolism: survey of design and regulation of the major catabolic and biosynthetic (including photosynthesis) metabolic pathways. An overview of the flow of genetic information. Credit will not be given for both CHEM 6190 and BCHE 6190.

CHEM 6280 COMPUTATIONAL CHEMISTRY (4) LEC. 3. LAB. 3. Pr. (CHEM 2080 or CHEM 2087) and CHEM 4080. Modern computational chemistry including molecular mechanics and quantum mechanical calculations.

CHEM 6450 FOUNDATIONS OF R FOR DBER (3) LEC. 3. R is an open-source statistical software that allows nearly limitless data manipulation, statistical analysis, and advance data visualizations for both the social and physical sciences required for quality research in discipline-based education research (DBER). This course will dedicate approximately one half to learning the basics of coding in R for many common tasks found in DBER (focusing on how to independently find and apply new functions as only a portion of functions can possibly be discussed) and the second half on applying these principles into real data from students' thesis or dissertation (or data can be provided by instructor).

CHEM 7100 ADVANCED INORGANIC CHEMISTRY (3) LEC. 3. Departmental approval. Current concepts of inorganic chemistry with an emphasis on theory, structure, bonding and reactivity.

CHEM 7110 PHYSICAL METHODS IN INORGANIC CHEMISTRY (3) LEC. 3. Pr. CHEM 7100. Or equivalent. Theory and application of techniques for obtaining information inorganic compounds including magnetism, multinuclear nmr, mass spectrometry, x-ray diffraction, vibrational and electronic spectroscopies.

CHEM 7120 ORGANOMETALLIC CHEMISTRY (3) LEC. 3. Pr. CHEM 7100. Departmental approval. Main group and transition metal organometallic chemistry.

CHEM 7160 ADVANCED TOPICS IN INORGANIC CHEMISTRY (3) LEC. 3. Pr. CHEM 7100. Departmental approval. Currently active research areas in inorganic chemistry. Course may be repeated for a maximum of 12 credit hours.

CHEM 7200 PHYSICAL ORGANIC CHEMISTRY (3) LEC. 3. This course will combine the foundations of undergraduate organic chemistry reactions and add to this the physical properties of chemical reactions as affected by real laboratory applications.

CHEM 7210 STRUCTURE ELUCIDATION OF ORGANIC COMPOUNDS (3) LEC. 3. Pr. CHEM 7200 or CHEM 7220. The early stages of this course will focus on the identification of functional groups, saturated, unsaturated and cyclic compounds using IR and NMR spectroscopy, as well as mass spectrometry. Detailed analyses of 1H NMR spectra, i.e., chemical shift, multiplet shape, and coupling constants will demonstrate the power of these methods in ascertaining atom connectivity in simple organic molecules. More advanced two-dimensional NMR techniques such as COSY, HSQC and HMBC will be discussed and used for determining the structures of more complex organic molecules. The determination of absolute and relative stereochemistry using Mosher ester analyses and NOESY, respectively, in chiral molecules will also be covered. Most of the structures that will be discussed and analyzed will be stereochemically complex systems and polycyclic molecules that require a combination of multiple one-dimensional and two-dimensional NMR techniques.

CHEM 7220 ORGANIC REACTIONS (3) LEC. 3. Pr. (CHEM 2070 or CHEM 2073 or CHEM 2077) and (CHEM 2080 or CHEM 2083 or CHEM 2087). Organic reactions are described in the context of oxidation; reduction; C-C, C-N, C-O bond forming; olefination; aldol (and related) condensations; pericyclic, fragmentation, ring-expansion and ring-contraction reactions; and, named organic reactions and their reaction mechanisms and their application to chemical synthesis. Concurrent enrollment with CHEM 7200 is highly recommended.

CHEM 7230 COMPLEX MOLECULE SYNTHESIS (3) LEC. 3. Pr. CHEM 7220. This class is focused on target-oriented chemical synthesis of complex organic molecules. The main objective is to teach students how to use retrosynthetic analysis, a method for disconnecting a complex molecule into simpler starting materials, as well classical and modern organic reactions to plan syntheses of organic compounds that are biologically relevant and important in the development of better pharmaceuticals. During the course of the semester, students will be introduced to important classes of natural products including terpenes, terpenoids, alkaloids, macrolides, polycyclic ethers, as well as designed molecules that are biologically relevant, but not natural products themselves. Identifying key structural components (i.e., retrons), stereogenic centers, and substructures that can be derived from the chiral pool will be emphasized in synthesis planning. All lecture content will come from the current literature, with only manuscripts published in the past 12 months being discussed in class. Students will be responsible for reading Classics in Total Synthesis on their own and tested on the content of this book as well as assigned current literature in class. Emphasis will be placed on identifying economical and streamlined synthetic protocols that can employ cascade or domino reaction sequences.
CHEM 7260 SPECIAL TOPICS IN ORGANIC CHEMISTRY (1-3) LEC. Pr. CHEM 7200. Advanced course in a research area in organic chemistry which is of mutual interest to graduate students and the instructor. Course may be repeated for a maximum of 6 credit hours.

CHEM 7270 SUPRAMOLECULAR CHEMISTRY: SYNTHESIS, STRUCTURES, AND APPLICATIONS (3) ST1. 3. Pr. CHEM 2080. Supramolecular Chemistry bridges organic, inorganic, surface science, and analytical chemistries. It is a topical area that explores synthesis, spatial organization, weak bonding interactions, hydrogen bonding or covalent bonding, and is interest for numerous industrial or pharmacy applications.

CHEM 7300 ADVANCED PHYSICAL CHEMISTRY (3) LEC. 3. Topics of general and current interest; may vary from year to year.

CHEM 7330 CHEMICAL KINETICS (3) LEC. 3. Theoretical and experimental aspects of reaction rates. The mathematics and characterization of chemically reacting systems.

CHEM 7350 QUANTUM AND STATISTICAL MECHANICS (3) LEC. 3. Pr. CHEM 7300. A quantum mechanical and statistical approach to molecular structure and chemistry.

CHEM 7370 SPECIAL TOPICS IN PHYSICAL CHEMISTRY (1-3) LEC. 3. Pr. CHEM 7300. Modern topics in advanced physical chemistry. Course may be repeated for a maximum of 3 credit hours.

CHEM 7380 MOLECULAR SPECTROSCOPY (3) LEC. 3. Pr. CHEM 7300. Theory and application of optical and magnetic resonance spectroscopy.

CHEM 7410 A DBER APPROACH TO TEACHING AND LEARNING IN CHEMISTRY (3) LEC. 3. Pr. CHEM 1030 and CHEM 1040. Discipline-based education research (DBER) theory and trends, consuming and evaluating DBER research, active learning in advanced chemistry topics, action research, review of pedagogical tools, assessment. This course will be of use to chemistry graduate students aiming for careers in academia, masters education students looking to take a chemistry course for the fulfillment of their degree requirements, and other fields that want to know more about evaluating and critiquing current DBER literature and methods.

CHEM 7500 ADVANCED ANALYTICAL CHEMISTRY (3) LEC. 3. Analytical principles, applications and methods, mathematical interpretations and current developments.

CHEM 7510 ELECTROANALYTICAL CHEMISTRY (3) LEC. 3. Pr. CHEM 7500. Analytical applications of electrochemistry.

CHEM 7520 SURFACE CHEMISTRY (3) LEC. 3. Pr. CHEM 7500. Basic concepts in surface chemistry and surface analytical methods.

CHEM 7530 ADVANCES IN BIOANALYTICAL CHEMISTRY (3) LEC. 3. Pr. CHEM 7500. Analytical Chemistry of microfluidic devices and "Lab on a chip." New methods of miniaturization of separations and analysis with emphasis on bioanalytical applications.

CHEM 7540 FLUORESCENCE IN BIOANALYTICAL CHEMISTRY: SPECTROSCOPY AND IMAGING (3) LEC. 3. Pr. CHEM 7500. Modern fluorescence-based bioanalytical methods as well as an advanced study of related literature. Standard approaches such as biosensors, nucleic acid analysis will be covered, as well as modern techniques such as Fluorescence microscopy, FRET, immunoassays, ELISAs and single-molecule detection.

CHEM 7610 BIOCHEMISTRY AND BIOPHYSICS TECHNIQUES (3) LEC. 3. Fundamental concepts in biochemistry, molecular microbiology, and principles of physics will be introduced. This will be followed by presentations on the theory and practical application of common biophysical techniques. The techniques discussed will include, but will not be limited to: Raman, NMR, and Mass Spectrometry of biological molecules, X-ray Diffraction, Ion Mobility, Fluorescence Microscopy, Single-Molecule Approaches, EM/Cryo-EM, and Nano-particle techniques.

CHEM 7750 FORMAL PRESENTATIONS IN MODERN CHEMISTRY (1) LEC. 1. Oral presentations skills will be developed with a focus on the dissemination of new discoveries in the field of Chemistry. Course may be repeated for a maximum of 6 credit hours.

CHEM 7930 DIRECTED INDIVIDUAL STUDY (1-15) IND. Credit to be arranged. Course may be repeated for a maximum of 15 credit hours.

CHEM 7950 SEMINAR (1) SEM. 1. SU. Course may be repeated for a maximum of 6 credit hours.

CHEM 7990 RESEARCH AND THESIS (1-10) MST. Course may be repeated with change in topics.

CHEM 8990 RESEARCH AND DISSERTATION (1-10) DSR. Course may be repeated with change in topics.
Geography Courses

GEOG 1010/1013 GLOBAL GEOGRAPHY (3) LEC. 3. Social Science I Core. Spatial and locational context for analyzing change in the contemporary world, including elements of both physical and cultural environments.

GEOG 1017 HONORS GLOBAL GEOGRAPHY (3) LEC. 3. Pr. Honors College. Spatial and locational context for analyzing change in the contemporary world, including elements of both physical and cultural environments.

GEOG 2000 PROFESSIONAL DEVELOPMENT (1) LEC. 1. Introduction to career opportunities in the Geosciences; goal selection and charting a pathway to success as a professional. Includes writing skills, research and funding opportunities, internships, creation of resumes and ePortfolios, and job applications.

GEOG 2010 HUMAN GEOGRAPHY (3) LEC. 3. Spatial perspectives on modern society such as population change, economics, politics, urban development, and local culture, and geography's approach to solving problems using case studies and issues.

GEOG 2020 PHYSICAL GEOGRAPHY (3) LEC. 3. Selected elements of the earth's physical system to include such items as landforms, basic weather elements, soils and vegetation.

GEOG 2800 GEOGRAPHIC METHODS AND TECHNIQUES (4) LEC. 3. LAB. 2. Pr. COMP 1000 or COMP 1003. Departmental approval. Key geographical concepts and production of basic geographical tools for portraying spatial data through laboratory exercises.

GEOG 2850 MAP READING AND ANALYSIS (3) LEC. 2. LAB. 2. Introduction to basic concepts and techniques used to interpret map symbols and to analyze geographic patterns.

GEOG 3000 SPORTS GEOGRAPHY (3) LEC. 3. Geographical basis of sports at different spatial scales, including locational strategies, sportive nationalism, and the urban political economy of sports.

GEOG 3110 UNITED STATES AND CANADA (3) LEC. 3. Survey of the region incorporating physical and cultural elements, providing a synthesis of the economic and political processes of the U.S. and Canada.

GEOG 3120 ALABAMA AND THE SOUTHEAST (3) LEC. 3. Study of the physical and cultural environments of the state.

GEOG 3130 LATIN AMERICA (3) LEC. 3. Survey of physical and human landscape of the region including historical geography, natural resources, economic development and problems and prospects affecting major countries.

GEOG 3140 AFRICA (3) LEC. 3. Analysis of the relationships among diverse population groups and the physical environments of sub-Saharan Africa.

GEOG 3150 EUROPE (3) LEC. 3. Survey of physical and human landscape of the region including historical geography, natural resources, economic development, and problems and prospects affecting several of the major countries.

GEOG 3160 ASIA (3) LEC. 3. Survey of the physical and cultural landscape of Asia, including its development and spatial distribution of resources, with a focus on major countries.

GEOG 3300 INTERNATIONAL TRAVEL AND TOURISM (3) LEC. 3. Environmental and cultural patterns that characterize places attractive to tourists. Provides realistic situations for developing travel plans and programs.

GEOG 3810 CARTOGRAPHY AND GRAPHICS (4) LEC. 2. LAB. 2. Techniques of map production including relevant computer graphics applications and related laboratory exercises.

GEOG 4740 SENIOR SEMINAR (2) SEM. 2. Individual research by geoscience undergraduates is coupled with improved written and oral communication skills along with resume and ePortfolio development. May count GEOG 4740 or GEOL 4740.

GEOG 4920 INTERNSHIP (3) LEC. 3. Opportunity to apply classroom experience to real job setting. Course may be repeated for a maximum of 6 credit hours.

GEOG 4930 DIRECTED STUDIES (1-4) IND. Departmental approval. Conferences, reading, research and/or reports may fulfill course requirement. Course may be repeated for a maximum of 4 credit hours.

GEOG 5010 URBAN GEOGRAPHY AND SUSTAINABILITY (3) LEC. 3. Senior standing or Departmental approval. An introduction to the field of urban geography and urban sustainability. Basic principles and processes that constitute the growth of urban areas, history, impact of urbanization, adaptation and mitigation towards a sustainable future.
GEOG 5210 CLIMATOLOGY (3) LEC. 3. Pr., Senior standing or departmental approval. An introduction to the field of climatology. Basic principles and process that constitute the earth's climate system (e.g. surface-atmosphere energy budget, the hydrologic cycle, and atmospheric motion) as well as climate change and sea level rise.

GEOG 5220 GEOMORPHOLOGY (3) LEC. 2. LAB. 2. Basic concepts, terms, and techniques used to identify landforms and their evolutionary processes. Study of the origin of landforms with emphasis on the eologic processes and structures that generate the landforms and applications of landform analysis. Two all-day weekend trips are required. Two one-hour classes and one two-hour laboratory per week.

GEOG 5300 ADVANCED REGIONAL STUDIES IN GEOGRAPHY (3) LEC. 3. Departmental approval. Spatial patterns of socio-economic development of Latin America and the Caribbean.

GEOG 5310 GEOGRAPHY OF RURAL CHANGE (3) LEC. 3. Examination of the patterns and processes associated with population levels and distributions, natural resource management systems, economic development, and cultural landscapes of rural communities. Credit will not be given for both GEOG 5310 and GEOG 6310.

GEOG 5350 ECONOMIC GEOGRAPHY (3) LEC. 3. Departmental approval. Economic Geography in a global context. Spatial aspects of resource use, agricultural development, manufacturing production and services.

GEOG 5380 POLITICAL GEOGRAPHY (3) LEC. 3. Examination of political processes over space, from local to the global levels. The course examines the development of political space, geographies of voting, the role of identity in shaping nationalism, and the geopolitical relationship between power and place.

GEOG 5400 GEOGRAPHY OF NATURAL HAZARDS (3) LEC. 3. Geography of natural hazards and their impacts on society. Credit will not be given for both GEOG 5400 and GEOG 6400.

GEOG 5510 HUMAN-ENVIRONMENT INTERACTION (3) LEC. 3. Departmental approval. Investigation of the inter-relationships between humans and their natural or physical environments.

GEOG 5550 GEOGRAPHY OF WATER RESOURCES (3) LEC. 3. Study of water use, management, law, and conflicts at local and international scales. May count either GEOG 5550 or GEOG 6550.

GEOG 5600 GLOBAL RESOURCES AND THE ENVIRONMENT (3) LEC. 3. Departmental approval. Global environmental problems such as climate change, ozone and deforestation and international public agencies and private volunteer movements protecting our global commons.

GEOG 5700 QUANTITATIVE METHODS AND SPATIAL ANALYSIS (3) LEC. 3. Pr. STAT 2510 or STAT 2513. Pr., STAT 2510 or similar statistics course. Applications of quantitative methods and spatial statistics to environmental, urban and economic systems and implementations of these techniques in GIS and statistical software. Credit will not be given for both GEOG 5710 and GEOG 6710.

GEOG 5710 GEOGRAPHIC FIELD METHODS (3) LEC. 1. LAB. 4. Geographic methods and techniques used to conduct field research investigations of human and physical characteristics of the landscape. Credit will not be given for both GEOG 5710 and GEOG 6710.

GEOG 5720 PANAMA STUDY ABROAD-CLIMATE CHANGE AND ENVIRONMENT (3) LEC. 3. Departmental approval. Four-week course intended to give students a general understanding of the potential impacts of climate change on Panama's environment via a mix of lectures, hands-on activities and field trips.

GEOG 5800 GEOGRAPHIC THOUGHT (3) LEC. 3. Departmental approval. Develops effective thinking skills, evaluates written materials in geography, reviews geographical research and produces written reports and papers related to geographic issues.

GEOG 5820/5823 AERIAL PHOTOGRAPHY AND REMOTE SENSING (4) LEC. 3. LAB. 2. Departmental approval. Aerial photo and satellite digital interpretation, photogrammetry, remote sensing technology and photogrammetry and related laboratory exercises.

GEOG 5830/5833 GEOGRAPHIC INFORMATION SYSTEMS (4) LEC. 3. LAB. 2. Introduction to concepts and techniques used in developing a geographic information system (GIS) for evaluating spatial distribution patterns and spatial relationships.

GEOG 5850 GEOGRAPHIC INFORMATION SYSTEMS APPLICATIONS (3) LEC. 3. LAB. 3. Pr. GEOG 5830 or GEOG 6830. Introducing the concepts and implementations of the geographic information analysis and integrate GIS with real-world applications. This is a follow-up course of GEOG 5830/GEOG/6830.
GEOG 5860 ADVANCED CONCEPTS IN CARTOGRAPHY (3) LEC. 2. LAB. 2. Pr. GEOG 3810. Advanced techniques of map design and production including relevant computer graphics applications and related laboratory exercises. Credit will not be given for both GEOG 5860 and GEOG 6860.

GEOG 5870 ADVANCED REMOTE SENSING (3) LEC. 2. LAB. 2. Pr. GEOG 5820. Explores advanced topics of remote sensing for use in research and analysis. Credit will not be given for both GEOG 5870 and GEOG 6870.

GEOG 5880 ADVANCED GEOGRAPHIC INFORMATION SYSTEMS (3) LEC. 2. LAB. 2. Pr. GEOG 5830. Advanced concepts and techniques used in the collection and analysis of data for evaluating spatial patterns and process. Credit will not be given for both GEOG 5880 and GEOG 6880.

GEOG 5970 SEMINAR IN GEOGRAPHY (3) LEC. 3. Development of modern geographic thinking with attention to applied research topics. Course may be repeated for a maximum of 6 credit hours.

GEOG 6010 URBAN GEOGRAPHY AND SUSTAINABILITY (3) LEC. 3. An introduction to the field of urban geography and urban sustainability. Basic principles and processes that constitute the growth of urban areas, history, impact of urbanization, adaptation and mitigation towards a sustainable future.

GEOG 6210 CLIMATOLOGY (3) LEC. 3. Pr., Senior standing or departmental approval. An introduction to the field of climatology. Basic principles and process that constitute the earth's climate system (e.g surface-atmosphere energy budge, the hydrologic cycle, and atmospheric motion, as well as climate change and sea level rise.

GEOG 6220 GEOMORPHOLOGY (3) LEC. 3. Basic concepts, terms, and techniques used to identify landforms and their evolutionary processes. Credit will not be given for both GEOG 5220 and GEOG 6220.

GEOG 6300 ADVANCED REGIONAL STUDIES IN GEOGRAPHY (3) LEC. 3. Departmental approval. Spatial patterns of socio-economic development of Latin America and the Caribbean.

GEOG 6310 GEOGRAPHY OF RURAL CHANGE (3) LEC. 3. Examination of the patterns and processes associated with population levels and distributions, natural resource management systems, economic development, and cultural landscapes of rural communities. Credit will not be given for both GEOG 5310 and GEOG 6310.

GEOG 6350 ECONOMIC GEOGRAPHY (3) LEC. 3. Departmental approval. Economic Geography in a global context. Spatial aspects of resource use, agricultural development, manufacturing production and services.

GEOG 6380 POLITICAL GEOGRAPHY (3) LEC. 3. Examination of political processes over space, from local to the global levels. The course examines the development of political space, geographies of voting, the role of identity in shaping nationalism, and the geopolitical relationship between power and place.

GEOG 6400 GEOGRAPHY OF NATURAL HAZARDS (3) LEC. 3. Geography of natural hazards and their impacts on society. Credit will not be given for both GEOG 5400 and GEOG 6400.

GEOG 6500 GEOGRAPHY OF ENVIRONMENTAL MANAGEMENT (3) LEC. 3. Departmental approval. Understanding and application of the theories and methods for the United States’ version of environmental impact assessment.

GEOG 6510 HUMAN-ENVIRONMENT INTERACTION (3) LEC. 3. Departmental approval. Investigation the inter-relationships between humans and their natural or physical environments.

GEOG 6550 GEOGRAPHY OF WATER RESOURCES (3) LEC. 3. Study of water use, management, law, and conflicts at local and international scales. May count either GEOG 5550 or GEOG 6550.

GEOG 6600 GLOBAL RESOURCES AND THE ENVIRONMENT (3) LEC. 3. Departmental approval. Global environmental problems such as climate change, ozone and deforestation and international public agencies and private volunteer movements protecting our global commons.

GEOG 6700 QUANT METH & SPATIAL ANALYSIS (3) LEC. 3. Pr. STAT 2510 or STAT 2513. or similar statistics course. Applications of quantitative methods and spatial statistics to environmental, urban and economic systems and implementations of these techniques in GIS and statistical software. Credit will not be given for both GEOG 5700 and GEOG 6700.

GEOG 6710 GEOGRAPHIC FIELD METHODS (3) LEC. 1. LAB. 4. Geographic methods and techniques used to conduct field research investigations of human and physical characteristics of the landscape. Credit will not be given for both GEOG 5710 and GEOG 6710.
GEOG 6720 PANAMA STUDY ABROAD-CLIMATE CHANGE AND ENVIRONMENT (3) LEC. 3. Departmental approval. Four-week course intended to give students a general understanding of the potential impacts of climate change on Panama’s environment via a mix of lectures, hands-on activities and field trips.

GEOG 6800 GEOGRAPHIC THOUGHT (3) LEC. 3. Departmental approval. Develops effective thinking skills; evaluates written materials in geography; Reviews geographical research and produces written reports and papers related to geographic issues.

GEOG 6820/6826 AERIAL PHOTOGRAPHY AND REMOTE SENSING (4) LEC. 3. LAB. 2. Departmental approval. Aerial photo and satellite digital interpretation, photogrammetry, remote sensing technology and photogrammetry and related laboratory exercises.

GEOG 6830/6836 GEOGRAPHIC INFORMATION SYSTEMS (4) LEC. 3. LAB. 2. Departmental approval. Introduction to concepts and techniques used in developing a geographic information system (GIS) for evaluating spatial distribution patterns and spatial relationships.

GEOG 6850 GEOGRAPHIC INFORMATION SYSTEMS APPLICATIONS (3) LEC. 3. LAB. 3. Pr. GEOG 5830 or GEOG 6830. Introducing the concepts and implementations of the geographic information analysis and integrate GIS with real-world applications. This is a follow-up course of GEOG 5830/GEOG/6830.

GEOG 6860 ADVANCED CONCEPTS IN CARTOGRAPHY (3) LEC. 2. LAB. 2. Pr. GEOG 3810. Advanced techniques of map design and production including relevant computer graphics applications and related laboratory exercises. Credit will not be given for both GEOG 5860 and GEOG 6860.

GEOG 6870 ADVANCED REMOTE SENSING (3) LEC. 2. LAB. 2. Pr. GEOG 6820. Explores advanced topics of remote sensing for use in research and analysis. Credit will not be given for both GEOG 5870 and GEOG 6870.

GEOG 6880 ADVANCED GEOGRAPHIC INFORMATION SYSTEMS (3) LEC. 2. LAB. 2. Pr. GEOG 6830. Advanced concepts and techniques used in the collection and analysis of data for evaluating spatial patterns and processes. Credit will not be given for both GEOG 5880 and GEOG 6880.

GEOG 6970 SEMINAR IN GEOGRAPHY (3) LEC. 3. Departmental approval. Development of modern geographic thinking with attention to applied research topics. Course may be repeated for a maximum of 6 credit hours.

GEOG 7930 DIRECTED STUDIES (1-3) IND/RES. Departmental approval. Individualized literature, field and/or laboratory research not available through regularly offered coursework. Subject matter and credit hours shall be determined by student and directing faculty. Course may be repeated for a maximum of 3 credit hours.

GEOG 7980 CAPSTONE RESEARCH (1-3) RES. SU. Departmental approval. enrolled as GEOG MS non-thesis student. Literature, field and/or laboratory research directed toward the completion of capstone project for non-thesis option. Course may be repeated for a maximum of 3 credit hours.

GEOG 7990 M.S. RESEARCH AND THESIS (1-10) RES. Research and Thesis. Course may be repeated with change in topics.

Geology Courses

GEOL 1100/1103 DYNAMIC EARTH (4) LEC. 3. LAB. 2. Coreq. GEOL 1101. Science Core. General physical geology. Survey of the important minerals and rocks. Origin and classification of geologic structures, earthquakes, and landforms. Study of geologic maps. Credit will not be given for both GEOL 1100 and GEOL 3150.

GEOL 1101 DYNAMIC EARTH LABORATORY (0) LAB. 2. Coreq. GEOL 1100. General physical geology. Survey of the important minerals and rocks. Origin and classification of geologic structures, earthquakes, and land forms study of geologic maps.

GEOL 1107 HONORS DYNAMIC EARTH (4) LEC. 3. LAB. 2. Pr. Honors College. Coreq. GEOL 1108. General physical geology for Honors students and for Geology majors. Topics similar to GEOL 1110 but covered in greater depth. Science Core.

GEOL 1108 HONORS DYNAMIC EARTH LABORATORY (0) LAB. 2. Pr. Honors College or Departmental approval. Coreq. GEOL 1107. General physical geology for Honors students and for Geology majors. Topics similar to those in GEOL 1101 but covered in more depth. Science Core.

GEOL 1110/1113 EARTH AND LIFE THROUGH TIME (4) LEC. 3. LAB. 2. Pr. GEOL 1100 or GEOL 1103 or GEOL 1107. Coreq. GEOL 1111. Science Core. Physical and biological history of the Earth, with emphasis on the interaction between life, the atmosphere, rocks, and oceans.
GEOL 1111 EARTH AND LIFE THROUGH TIME LABORATORY (0) LAB. 2. Pr. GEOL 1100 or GEOL 1103 or GEOL 1107. Coreq. GEOL 1110. Examination of rock, fossil, and related data sets bearing on the geological development of the earth with emphasis on North America.

GEOL 1117 HONORS EARTH AND LIFE THROUGH TIME (4) LEC. 3. LAB. 2. Pr. GEOL 1100 or GEOL 1103 or GEOL 1107 or Departmental approval. Coreq. GEOL 1118. Physical and biological history of the Earth, with emphasis on the interaction between life, the atmosphere, rocks, and oceans. For Honors students and Geology majors. Science Core.

GEOL 1118 HONORS EARTH AND LIFE THROUGH TIME LABORATORY (0) LAB. 2. Pr. GEOL 1100 or GEOL 1103 or GEOL 1107 or Departmental approval. Coreq. GEOL 1117. General historical geology for Honors students and Geology majors. Topics similar to those in GEOL 1111 but covered in greater depth. Science Core.

GEOL 1200 MARINE TECHNICAL METHODS (2) LAB. 8. Departmental approval. Introduction to procedures utilized aboard marine research vessels; physical, biological and geological measurements and sampling techniques. Taught only at Dauphin Island Sea Lab. Summer.

GEOL 1220 COASTAL CLIMATOLOGY (2) LEC. 7. Departmental approval. Controlling factors and features of world climates, with attention to coastal areas; application and interpretation of climate data. Taught only at Dauphin Island Sea Lab. Summer only.

GEOL 2000 PROFESSIONAL DEVELOPMENT (1) LEC. 1. Introduction to career opportunities in the Geosciences; goal selection and charting a pathway to success as a professional. Includes writing skills, research and funding opportunities, internships, creation of resumes and ePortfolios, and job applications.

GEOL 2010/2013 MINERALOGY AND OPTICAL CRYSTALLOGRAPHY (5) LEC. 4. LAB. 2. Physical and chemical properties of minerals, classification and roles with emphasis on natural systems, materials science, health, and environment. Credit will not be given for both GEOL 2010 and GEOL 2013.

GEOL 2020 MARINE GEOLOGY (4) LEC. 2. LAB. 4. Departmental approval. Geology of ocean basins; special emphasis on continental shelves, their sediments and the sedimentary process at work there. Taught only at Dauphin Island Sea Lab. Summer only.

GEOL 2100 ENVIRONMENTAL GEOLOGY (4) LEC. 3. LAB. 2. Pr. GEOL 1100 or GEOL 1103 or GEOL 1107. Emphasis on geology as an environmental science; applied geology, geological hazards and environmental regulations as applied to geologic environmental remediation.

GEOL 3100 TERRESTRIAL VEGETATION THROUGH EARTH HISTORY (3) LEC. 2. LAB. 2. Pr. GEOL 2200 and (BIOL 1020 or BIOL 1027). Plants are primary producers and are the foundation upon which the global ecosystem is based. This course focuses on the development, evolution, and application of the plant fossil record to problems in earth history.

GEOL 3150 ENGINEERING GEOLOGY (3) LEC. 2. LAB. 2. Fundamental geologic principles, materials, and processes that affect engineering projects and programs. Emphasis on pre-construction geological analysis to recognize potential hazards and problems. Credit will not be given for both GEOL 3150 and GEOL 1100.

GEOL 3200 INTRODUCTION TO PALEOBIOLOGY (3) LEC. 2. LAB. 2. Pr. GEOL 1110 or GEOL 1113 or GEOL 1117. The nature of the fossil record, applications of that data to geological and biological questions with emphasis on the concepts using examples from all biotic groups.

GEOL 3300 EVOLUTION AND EXTINCTION OF THE DINOSAURIA (3) LEC. 2. LAB. 2. Pr. GEOL 1100 or GEOL 1103 or GEOL 1107. Departmental approval. Survey of the dinosaurs, their evolution and extinction. Southeastern U.S. dinosaurs.

GEOL 3650 FIELD CAMP (6) LEC. 1. LAB. 10. Pr. GEOL 3400. Instruments and methods used in geological field mapping, interpretation of sedimentary, igneous and metamorphic rocks and deformational analysis. Summer only.
GEOL 4010 SEDIMENTARY PETROLOGY (3) LEC. 2. LAB. 2. Pr. GEOL 2050. Departmental approval. Detailed description and classification of sediments and sedimentary rocks with emphasis on interpretation of origins, transport histories, depositional environments and diagenetic histories.

GEOL 4210 ECONOMIC GEOLOGY (3) LEC. 2. LAB. 2. Pr. GEOL 3400. The origin, distribution and classification of mineral deposits formed by igneous, metamorphic and sedimentary processes. Introduction of methods of exploration and development.

GEOL 4260 INTRODUCTION TO GEOCHEMISTRY (3) LEC. 3. Pr. CHEM 1040 and GEOL 2050. Principles governing the distribution of major, minor and trace elements within the earth; differentiation of elements due to geologic processes and the hydrosphere.

GEOL 4300 GEODYNAMICS (3) LEC. 3. Pr. GEOL 3400 and (MATH 1620 or MATH 1623 or MATH 1627) and PHYS 1510. Structure and dynamics of the earth deduced from seismology, gravity, heat flow and magnetism.

GEOL 4740 SENIOR SEMINAR (2) SEM. 2. Geology majors with upperclass standing. Individual research by geoscience undergraduates is coupled with improved written and oral communication skills along with resume and ePortfolio development. May count either GEOL 4740 or GEOG 4740.

GEOL 4920 INTERNSHIP (1-3) INT. SU. Geology majors with upper-class standing (juniors or seniors). An opportunity to apply classroom experience to a real job setting. Course may be repeated for a maximum of 6 credit hours.

GEOL 4930 DIRECTED STUDIES IN UNDERGRADUATE RESEARCH (1-3) AAB. Departmental approval. Directed studies in areas of geology not covered by an existing course or to supplement knowledge gained from an existing course. Course may be repeated for a maximum of 3 credit hours.

GEOL 4970 SPECIAL TOPICS IN GEOLOGY (1-4) ST1. Instruction and discussion of selected topics in geosciences. Course may be repeated for a maximum of 8 credit hours.

GEOL 4980 UNDERGRADUATE RESEARCH METHODS (1-3) IND. Departmental approval. Active participation in original research under supervision of a senior investigator. Course may be repeated for a maximum of 3 credit hours.

GEOL 4997 HONORS THESIS (2-4) LEC. 3. Pr. Honors College. May incorporate library, field or laboratory research in any proportion. Written thesis and thesis defense required. Course may be repeated for a maximum of 4 credit hours.

GEOL 5060 INTRODUCTION TO MICROPALEONTOLOGY (3) LEC. 2. LAB. 2. Pr. GEOL 3200 and (BIOL 1030 or BIOL 1037). A survey of major groups of fossils small enough to require a microscope for their study. Foraminifera, radiolaria, and ostracodes are emphasized; minor groups of interest include conodonts, diatoms, dinoflagellates, acritarchs, and chitinozoans. Includes laboratory, discussion sessions, and field work.

GEOL 5100 HYDROGEOLOGY (3) LEC. 2. LAB. 2. Pr. (GEOL 1100 or GEOL 1103 or GEOL 1107) and CHEM 1030 and (MATH 1610 or MATH 1613 or MATH 1617) and PHYS 1500. Departmental approval. Fundamentals of groundwater flow in porous media, hydrodynamic dispersion, determination of aquifer properties and geological aspects of groundwater occurrences.

GEOL 5220 GEOMORPHOLOGY (3) LEC. 2. LAB. 1. Study of the origin of landforms with emphasis on the geologic processes and structures that generate the landforms and applications of landform analysis. Two all-day weekend trips are required. Two one-hour classes and one two-hour laboratory per week.

GEOL 5240 COASTAL GEOMORPHOLOGY (2) LEC. 5. LAB. 4. Departmental approval. Introduction to coastal sediment processes and applied coastal geomorphology; emphasis on waves, tides, sediments and their impact of anthropogenic influences. Taught only at Dauphin Island Sea Lab. Summer only.

GEOL 5300 BASIN ANALYSIS (3) LEC. 2. LAB. 2. Pr. P/C GEOL 4010. Study of analytical techniques of sedimentary basin fills, including thermal history, litho and biofacies analyses, depositional systems, subsurface logs, seismic reflection, provenance history, evolution, sedimentation and subsidence history.

GEOL 5400 PRINCIPLES OF EARTH SCIENCE (3) LEC. 2. LAB. 2. Departmental approval. A special course for in-service and future teachers only. Internal and surficial geologic processes, meteorology and oceanography.
GEOL 5440 ELECTRON MICROPROBE ANALYSIS (3) LEC. 2. LAB. 1. Pr. CHEM 1040 and PHYS 1510. Instruction in the theory and application of EMPA (electron microprobe analysis) and SEM (scanning electron microscopy). The course provides an understanding of the EMPA as a research tool for evaluating the composition and structure of a wide range of materials.

GEOL 5600 APPLIED GEOPHYSICS (4) LEC. 3. LAB. 2. Pr. (GEOL 1100 or GEOL 1103 or GEOL 1107 or GEOL 3150) and (MATH 1620 or MATH 1623 or MATH 1627) and PHYS 1510. Departmental approval. Overview of geophysical methods with applications to resource, tectonic and environmental analyses. Seismic refraction and reflection, gravity, magnetics, electrical and electromagnetic methods will be included.

GEOL 5720 PANAMA STUDY ABROAD-CLIMATE CHANGE AND ENVIRONMENT (3) LEC. 3. Pr., Departmental approval. Four-week course intended to give students a general understanding of the potential impacts of climate change on Panama's environment via a mix of lectures, hands-on activities and field trips.

GEOL 5840 CLIMATE CHANGE AND SOCIETY (3) LEC. 3. The science of Earth's changing climate, the societal influences on climate change, as well as the expected impacts based on the collected scientific evidence. Analyzes key aspects of climate science, the drivers of climate change, Earth's climate trends, the evidence of climate change, the predicted future climate scenarios, the expected impacts, and the array of possible response options.

GEOL 6060 INTRODUCTION TO MICROPALYONTOLOGY (3) LEC. 3. LAB. 1. A survey of major groups of fossils small enough to require a microscope for their study. Foraminifera, radiolaria, and ostracodes are emphasized; minor groups of interest include conodonts, diatoms, dinoflagellates, acritarchs, and chitinozoans. Includes laboratory, discussion sessions, and field work.

GEOL 6100 HYDROGEOLOGY (3) LEC. 2. LAB. 2. Pr. (GEOL 1100 or GEOL 1103 or GEOL 1107) and CHEM 1030 and (MATH 1610 or MATH 1613 or MATH 1617) and PHYS 1500. Departmental approval. Fundamentals of groundwater flow in porous media, hydrodynamic dispersion, determination of aquifer properties and geological aspects of groundwater occurrences.

GEOL 6220 GEOMORPHOLOGY (3) LEC. 2. LAB. 2. Study of origin of landforms with emphasis on geologic processes and structures that generate landforms; includes the applications of landform analysis. May count either GEOL 6220 or GEOG 6220.

GEOL 6240 COASTAL GEOMORPHOLOGY (2) LEC. 5. LAB. 4. Departmental approval. Introduction to coastal sediment processes and applied coastal geomorphology; emphasis on waves, tides, sediments and their impact of anthropogenic influences. Taught only at Dauphin Island Sea Lab. Summer only.

GEOL 6300 BASIN ANALYSIS (3) LEC. 2. LAB. 2. Pr. GEOL 4010. Departmental approval. Study of analytical techniques of sedimentary basin fills, including thermal history, litho and biofacies analyses, depositional systems, subsurface logs, seismic reflection, provenance history, evolution, sedimentation and subsidence history.

GEOL 6400 PRINCIPLES OF EARTH SCIENCE (3) LEC. 2. LAB. 2. Departmental approval. A special course for in-service and future teachers only. Internal and surficial geologic processes, meteorology and oceanography.

GEOL 6440 ELECTRON MICROPROBE ANALYSIS (3) LEC. 2. LAB. 1. Pr. CHEM 1040 and PHYS 1510. Instruction to theory and application of EMPA (electron microprobe analysis) and SEM (scanning electron microscopy). Provides an understanding of EMPA as a research tool for evaluating composition and structure of wide range of materials. GEOL 5440 or GEOL 6440.

GEOL 6600 APPLIED GEOPHYSICS (4) LEC. 3. LAB. 2. Pr. (GEOL 1100 or GEOL 1103 or GEOL 1107 or GEOL 3150) and (MATH 1620 or MATH 1623 or MATH 1627) and PHYS 1510. Departmental approval. Overview of geophysical methods with applications to resource, tectonic and environmental analyses. Seismic refraction and reflection, gravity, magnetics, electrical and electromagnetic methods will be included.
GEOL 6840 CLIMATE CHANGE AND SOCIETY (3) LEC. 3. The course will investigate the science of Earth’s changing climate, the societal influences on climate change, as well as the expected impacts based on the collected scientific evidence. Analysis of peer-reviewed literature on the key aspects of climate science, the drivers of climate change, Earth’s climate trends, the evidence of climate change, predicted future climate scenarios, expected impacts, and the array of possible societal response options to prevent/mitigate the consequences of anthropogenic climate change. The class will have a strong component of discussion of literature and foundational knowledge as well as reflection on what students have learned and the implications of this knowledge for their areas of interest and generally for their lives.

GEOL 7100 GEOCOMMUNICATION (3) LEC. 3. Departmental approval. Instruction and practice in written and oral communication skills necessary for a successful career in the geosciences; emphasis on preparation of scientific articles, technical reports, abstracts, and thesis; preparation and delivery of oral presentations.

GEOL 7200 TECTONICS (3) LEC. 2. LAB. 2. Pr. GEOL 2050 and GEOL 4010. Departmental approval. Emphasis will be placed on plate tectonics and driving forces, evolution of collisional, transform and extensional systems, and dynamic indicators of past and current tectonic processes.

GEOL 7220 GEOGRAPHIC INFORMATION SYSTEMS AND MARINE RESEARCH (3) LEC. 10. LAB. 15. Departmental approval. Introduction to geographical information system (GIS) techniques with a focus on application in the marine environment. Taught only at Dauphin Island Sea Lab. Summer only.

GEOL 7260 AQUEOUS AND ENVIRONMENTAL GEOCHEMISTRY (3) LEC. 2. LAB. 2. Pr. CHEM 1040 and GEOL 2050. Departmental approval. Study of water-rock reactions that control the chemical composition of groundwater; aqueous geochemistry of trace elements; groundwater pollution, remediation and geomicrobiology.

GEOL 7280 CLIMATE CHANGE LITERACY AND COMMUNICATION (3) DSL. 3. Must be a graduate student, or obtain departmental consent after undergraduate student meets Auburn University criteria for taking a 7000-level course. Investigates the discipline-based geoscience education lenses of people’s understanding (cognitive), emotional influences (affect), and actions (behavior) about climate change literacy. Critically analyzes misconceptions, mental models, cultural influences, risk perceptions and the best practices for addressing these barriers. May count either GEOL 7280 or GEOL 7286.

GEOL 7300 CYCLES THROUGH EARTH HISTORY (3) LEC. 2. LAB. 2. Pr. GEOL 4100 and GEOL 4260. Discussion of the fundamental processes controlling sedimentary cycles at different physical, biotic, and temporal scales.

GEOL 7310 ISSUES IN PALEONTOLOGY (3) LEC. 3. Pr. GEOL 3200. Advanced applications of paleontological data sets to topics that may include taphonomy, biogeochmistry, evolution, asystematic functional morphology, paleoecology, paleoclimatology and biostratigraphy.

GEOL 7400 ADVANCED ECONOMIC GEOLOGY (3) LEC. 2. LAB. 2. Pr. GEOL 4210. Departmental approval. The practical and theoretical aspects of economic geology as applied to exploration and development of natural resources.

GEOL 7410 GEOLOGY OF ORGANIC MATTER (3) LEC. 2. LAB. 2. Pr. GEOL 4010 and GEOL 4110. Departmental approval. The origins, classifications, taphonomy of organic matter, modern and ancient processes and environments of deposition of organic-rich strata, including hydrocarbon-source rocks and coals. Laboratory and field trips required.

GEOL 7450 MINERAL RESOURCES AND THE ENVIRONMENT (3) LEC. 2. LAB. 2. Pr. CHEM 1040 and GEOL 2050. Overview of geology and geographic distribution of mineral resources; economic aspects affecting their extraction; environmental impacts and cost of mineral resource extraction.

GEOL 7500 PALEOCLIMATOLOGY (3) LEC. 3. Explores how Earth’s climate has evolved dynamically over time, varying within restricted boundaries that allowed life to exist and evolve. Explores interactions among Earth’s surface abiotic and biotic components, and includes plate tectonics, atmospheric chemistry and physics, and ocean productivity.
GEOL 7550 ADVANCED GEOPHYSICAL METHODS (3) LEC. 2. LAB. 2. Pr. GEOL 6600. Departmental approval. Advanced treatment of geophysical methods, data interpretation and modeling. Applications to resource development and environmental assessments will be explored, with emphasis on seismic methods.

GEOL 7600 PETROLOGY (3) LEC. 2. LAB. 2. Pr. GEOL 2050 and GEOL 4010. Departmental approval. The description, classification, formative processes, and petrologic interpretation of igneous, metamorphic and sedimentary rocks.

GEOL 7610 STRUCTURAL AND METAMORPHIC ANALYSIS (3) LEC. 2. LAB. 2. Pr. GEOL 2050 and GEOL 3400 and GEOL 3650. Quantitative analysis of dynamic, kinematic and chemical responses of rocks and minerals to crustal movements and dynamo thermal metamorphism.

GEOL 7650 FACIES ANALYSIS AND SEQUENCE STRATIGRAPHY (3) LEC. 2. LAB. 2. Pr. GEOL 4010 and GEOL 4110. Departmental approval. Systematic analysis of modern and ancient deposition facies, and their interpretation in a sequence stratigraphic context. Laboratory and field trips required.

GEOL 7700 ANALYTICAL ISOPOE GEOCHEMISTRY (3) LEC. 2. LAB. 1. Pr. CHEM 1040 or PHYS 1510 or MATH 1620. Biweekly lectures will teach the theory and principles of isotope geochemistry and mass spectrometry, leading to applications in geoscience research. Lab sessions and problem sets will support lectures and emphasize work with various mass spectrometers in the Department of Geosciences.

GEOL 7920 DIRECTED STUDIES (1-3) LEC. 3. Departmental approval. Directed studies. May incorporate literature, field and/or laboratory research in any proportion. Subject matter and credit hours shall be determined by student and directing faculty. Course may be repeated for a maximum of 3 credit hours.

GEOL 7980 CAPSTONE PROJECT (1-3) LEC. SU. Literature, field and/or laboratory research directed towards completion of capstone project required for non-thesis option. Course may be repeated for a maximum of 3 credit hours.

GEOL 7990 RESEARCH AND THESIS (1-10) MST. Departmental Approval. Course may be repeated with change in topics.

GEOL 8900 DIRECTED STUDY (3) IND. 3. Provides exposure to discipline-specific research procedures in Earth System Science. Students will work closely with their mentors to explore an Earth-system problem through directed readings, literature searches, field work, laboratory experimentation, and quantitative analysis.

### Laboratory Science Courses

**LBSC 2010 BASICS IN LABORATORY SCIENCE (2)** LEC. 1. LAB. 1. Basic laboratory skills, quality control and assurance, standard precautions for biohazard testing; requirements for careers in medical and laboratory science.

**LBSC 4010 HEMATOLOGY (3)** LEC. 3. Pr. CHEM 2070 or CHEM 2077. Origin, maturation, morphology, and function of normal blood cells and abnormalities in diseased blood with clinical correlation to disease processes.

**LBSC 4011 HEMATOLOGY LAB (2)** LAB. 6. Pr. CHEM 2070 or CHEM 2077 and P/C LBSC 4010. Lab portion of course covering origin, maturation, morphology, and function of normal blood cells and abnormalities in diseased blood with clinical correlation to disease processes.

**LBSC 4050 CLINICAL IMMUNOHEMATOLOGY/PARASITOLOGY (5)** LEC. 3. LAB. 6. Pr. (CHEM 2070 or CHEM 2077) and (BIOl 1020 or BIOL 1027). Immunogenetics, clinical significance of blood group antigens and antibodies, theory and techniques of serological study of human blood groups. Human parasites, life cycles and disease processes.

**LBSC 4250 CLINICAL BIOCHEM INSTRUMENT (4)** LEC. 3. LAB. 3. Pr. BCHE 5180 or BCHE 3200. Biochemistry/physiology of systems in the body of elements in body fluids during the normal and abnormal processes. Theoretical and practical application of Lab techniques, atomic absorption, gaschromatograph-FID, HPLC, spectroscopy, spectrophotometry, ion selective electrodes and RIA used in analysis of body fluids.

**LBSC 4910 CLINICAL PRACTICUM (0)** PRA.

**LBSC 4920 CLINICAL INTERNSHIP (0)** INT/PRA.
Mathematics Courses

**MATH 1000/1003 COLLEGE ALGEBRA (3)** LEC. 3. Fundamental concepts of algebra, equations and inequalities, functions and graphs, polynomial and rational functions. Does not satisfy the core requirement in mathematics. Students who have previous credit in any higher-numbered math course may not also receive credit for this course.

**MATH 1100 FINITE MATH AND APPLICATIONS (3)** LEC. 3. Pr. A02 score of 22 or S02 score of 520 or S12 score of 550 or MATH 1000 or MATH 1003 or MPME score of 052. Mathematics Core. Overview of finite mathematics and its applications. Graph theory, matrices, finite and conditional probability; descriptive and inferential statistics, voting methods, game theory. A02 refers to the ACT MATH score; S02 refers to the SAT MATH score taken between 2005- January 2016; S12 refers to the SAT MATH score taken between March 2016-present.

**MATH 1120/1123 PRE-CALCULUS ALGEBRA (3)** LEC. 3. Pr. A02 score of 22 or S02 score of 520 or S12 score of 550 or MATH 1000 or MATH 1003 or MPME score of 052. Mathematics Core. Preparatory course for calculus. Basic analytic and geometric properties of trigonometric functions. Complex numbers, De Moivre's Theorem, polar coordinates. No credit is given to students with higher-numbered math course. Credit for only one of MATH 1120/MATH 1123. A02 refers to the ACT MATH score; S02 refers to the SAT MATH score taken between 2005- January 2016; S12 refers to the SAT MATH score taken between March 2016-present.

**MATH 1121 PRE-CALCULUS ALGEBRA WORKSHOP (1)** LAB. 1. SU. Coreq. MATH 1120 and MATH 1000 and MATH 1123 and MATH 1003. Workshop for College Algebra and Pre-Calculus Algebra.

**MATH 1130/1133 PRE-CALCULUS TRIGONOMETRY (3)** LEC. 3. Pr. A02 score of 23 or S02 score of 540 or S12 score of 565 or MATH 1120 or MATH 1123 or MPME score of 060. Mathematics Core. Preparatory course for the calculus sequence. Basic analytic and geometric properties of the trigonometric functions. Complex numbers, de Moivre's theorem, polar coordinates. Students who have previous credit in any higher-numbered math course may not receive credit. Students may receive credit for only one of MATH 1130/MATH 1133. A02 refers to the ACT MATH score; S02 refers to the SAT MATH score taken between 2005- January 2016; S12 refers to the SAT MATH score taken between March 2016-present.

**MATH 1150/1153 PRE-CALCULUS ALGEBRA AND TRIGONOMETRY (4)** LEC. 4. Pr. A02 score of 23 or S02 score of 540 or S12 score of 565 or MATH 1000 or MATH 1003 or MPME score of 060. C or better in MATH 1000 or MATH 1003. Mathematics Core. Algebraic functions, Exponential Logarithmic functions. Analytic and geometric properties of trigonometric functions. Students with previous credit in any higher-numbered math course may not receive credit. A02 refers to the ACT MATH score; S02 refers to the SAT MATH score taken between 2005- January 2016; S12 refers to the SAT MATH score taken between March 2016-present.

**MATH 1151 MATHEXCEL PRECALCULUS WORKSHOP (2)** LEC. 2. SU. Coreq. MATH 1150. Appropriate score on the mathematics placement exam or grade of "C" or better in MATH 1000. Workshop for MATH 1150. Two 2-hour sessions per week.

**MATH 1610/1613 CALCULUS I (4)** LEC. 4. Pr. A02 score of 26 or S02 score of 600 or S12 score of 620 or MATH 1130 or MATH 1133 or MATH 1150 or MATH 1153 or MATH 1130 or MPME score of 076. Mathematics Core. Limits, the derivative of algebraic, trigonometric, exponential, logarithmic functions. Applications of the derivative, antiderivatives, the definite integral and applications to area problems, the fundamental theorem of calculus. Students may receive credit for only one of MATH 1610/1613/1617/1710. A02 refers to the ACT MATH score; S02 refers to the SAT MATH score taken between 2005- January 2016; S12 refers to the SAT MATH score taken between March 2016-present.

**MATH 1611 MATHEXCEL CALCULUS WORKSHOP I (2)** LEC. SU. Coreq. MATH 1610. Workshop for MATH 1610. Two 2-hour sessions per week.

**MATH 1617 HONORS CALCULUS I (4)** LEC. 4. Pr. Honors College. Mathematics Core. Honors version of MATH 1610. Membership in the Honors College or Departmental approval required. Recommended for all Mathematics majors: Applied Math-Actuarial Sci(ACTU), Applied Math-Discrete(DISC), Applied Mathematics(AMTH), and Mathematics(MATH). This course covers the same material as MATH 1610 but in a greater depth appropriate for Honors students and Mathematics majors. Students may receive credit for only one of the following: MATH 1610, MATH 1613, MATH 1617 or MATH 1680. A02 refers to the ACT MATH score; S02 refers to the SAT MATH score taken between 2005- January 2016; S12 refers to the SAT MATH score taken between March 2016-present.

**MATH 1620/1623 CALCULUS II (4)** LEC. 4. Pr. MATH 1610 or MATH 1613 or MATH 1617. "C" or better in MATH 1610, MATH 1613, or MATH 1617. Techniques of integration, applications of the integral, parametric equations, polar coordinates. Vectors, lines and planes in space. Infinite sequences and series. Students may receive credit for only one of MATH 1620, or MATH 1627.
MATH 1621 MATHEXCEL CALCULUS WORKSHOP II (2) LEC. 2. SU. Coreq. MATH 1620. Workshop for MATH 1620. Two 2-hour sessions per week.

MATH 1627 HONORS CALCULUS II (4) LEC. 4. Pr. Honors College. MATH 1610 or MATH 1617 or MATH 1613. "C" or better in MATH 1610, MATH 1613, or MATH 1617. Honors version of MATH 1620. Membership in the Honors College or Departmental approval required. Recommended for all Mathematics majors: Applied Math-Actuarial Sci(ACTU), Applied Math-Discrete(DISC), Applied Mathematics(AMTH), and Mathematics(MATH). The same material as MATH 1620, but in greater depth appropriate for honors students and Mathematics majors. Students may receive credit for only one of MATH 1620 or MATH 1627.

MATH 1680/1683 CALCULUS WITH BUSINESS APPLICATIONS I (4) LEC. 3, LEC. 2. Pr. A02 score of 25 or S02 score of 580 or S12 score of 600 or MATH 1120 or MATH 1123 or MATH 1130 or MATH 1133 or MATH 1150 or MATH 1153 or MPME score of 068. Students in College of Business. Mathematics Core. Differentiation and integration of exponential logarithmic algebraic functions, applications to business. Functions of several variables, partial derivatives, multiple integrals.

MATH 1681 MATHEXCEL BUSINESS CALCULUS WORKSHOP I (2) LEC. 2. SU. Coreq. MATH 1680. Workshop for MATH 1680. Two 2-hour sessions per week.

MATH 1690 CALCULUS WITH BUSINESS APPS II (3) LEC. 3. Pr. MATH 1680 or MATH 1683 or MATH 1610 or MATH 1617 or MATH 1613 or Departmental approval. Probability, random variables, probability distributions. Further topics in calculus: integration, functions of several variables, applications to probability. Applications to business and related areas. Credit will not be given to majors in Engineering or Math or Physics.

MATH 1691 MATHEXCEL BUSINESS CALCULUS WORKSHOP II (2) LEC. 2. SU. Coreq. MATH 1690. Workshop for MATH 1690. Two 2-hours sessions per week.

MATH 1950 FIRST YEAR MATHEMATICS SEMINAR (1) SEM. 1. This seminar will provide a shared intellectual experience for incoming freshmen mathematics majors. It will serve as a focused and interactive forum to provide a glimpse into the world of mathematics that lies beyond elementary calculus. Each semester’s symposium will be devoted to a specific mathematical topic. Writing about mathematics and explaining mathematical ideas to both “math people” and “non-math people” will be emphasized. Only offered to incoming first-year students (though transfer students and higher rank students may be allowed to enroll on an approval basis). May not be repeated for credit. High School Math will be required.

MATH 2630/2633 CALCULUS III (4) LEC. 4. Pr. MATH 1620 or MATH 1623 or MATH 1627 or MATH 1720. "C" or better in MATH 1620, MATH 1623 or MATH 1627. Multivariate calculus: vector-valued functions, partial derivatives, multiple integration, vector calculus. Credit will be given for only one of MATH 2630, MATH 2637, or MATH 2730.

MATH 2637 HONORS CALCULUS III (4) LEC. 4. Pr. MATH 1620 or MATH 1623 or MATH 1627. Must have earned a "C" or better in MATH 1620, MATH 1623 or MATH 1627. Honors version of MATH 2630. Membership in the Honors College or Departmental approval required. Recommended for all Mathematics majors: Applied Math-Actuarial Sci(ACTU), Applied Math-Discrete(DISC), Applied Mathematics(AMTH), and Mathematics(MATH). The same material as MATH 2630, but in greater depth appropriate for honors students and Mathematics majors. Credit will be given for only one of MATH 2630 or MATH 2633 or MATH 2637.

MATH 2650 LINEAR DIFFERENTIAL EQUATIONS (3) LEC. 3. Pr. P/C MATH 2630 or P/C MATH 2633 or P/C MATH 2637. Introduction to ordinary differential equations, specifically linear equations of first and second order, and applications.

MATH 2660 TOPICS IN LINEAR ALGEBRA (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627. Matrices, row-reduction, systems of linear equations, (finite-dimensional) vector spaces, subspaces, bases, dimension, change of basis, linear transformations, kernels, orthogonality, Gram-Schmidt.

MATH 2667 HONORS TOPICS IN LINEAR ALGEBRA (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627. Must have earned a "C" or better in MATH 1620 or MATH 1623 or MATH 1627. Honors version of MATH 2660. Membership in the Honors College or Departmental approval required. Recommended for all Mathematics majors: (Applied Math-Actuarial Sci(ACTU), Applied Math-Discrete(DISC), Applied Mathematics(AMTH), and Mathematics(MATH). Topics include: matrices, row-reduction, systems of linear equations, (finite-dimensional) vector spaces, subspaces, bases, dimension, change of basis, linear transformations, kernels, orthogonality, Gram-Schmidt. The same material as MATH 2660, but in greater depth appropriate for honors students and Mathematics majors, with possible additional topics as determined by the instructor. Credit will be given for only one of MATH 2660 or MATH 2667.

MATH 2790 MATHEMATICS OF INTEREST THEORY (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627 or MATH 1720. Mathematical foundations of the theory of interest necessary as preparation for the Society of Actuaries examination on the theory of interest.
MATH 2850 MATHEMATICS FOR ELEMENTARY EDUCATION I (3) LEC. 3. For Elementary Education major or departmental approval. Mathematical insights for elementary school teachers. Sets, the structure of the number system (integers, fraction, decimals).

MATH 2860 MATHEMATICS FOR ELEMENTARY EDUCATION II (3) LEC. 3. Pr. MATH 2850. For Elementary Education majors or departmental approval. Mathematical insights into measurement and geometry for elementary school teachers. Shapes in two and three dimensions. Similarities, congruences and transformations.

MATH 2870 MATHEMATICS FOR ELEMENTARY EDUCATION III (3) LEC. 3. For Elementary Education majors or departmental approval. Mathematical insights into probability, data analysis and functions for elementary school teachers. Uncertainty, probability spaces and an introduction to statistics. Relationships, functions and change.

MATH 3010 HISTORY OF MATHEMATICS (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627 or MATH 1720. Departmental approval. The evolution of modern mathematics from its motivational roots in the physical sciences; the lives and contributions of outstanding mathematicians; the parallel development of mathematics and western culture.

MATH 3100 INTRODUCTION TO ADVANCED MATHEMATICS (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. Teaching of the fundamental abilities necessary for the pursuance of mathematical studies. Logic and set theory, mathematical induction, basic number theory, basic analysis. Credit will not be given for both MATH 3100 and Math 3710.

MATH 3710 DISCRETE MATHEMATICS (3) LEC. 3. Pr. MATH 2660. Methods of proof, induction, counting, inclusion-exclusion, discrete probability, relations, partial orders, graphs, trees, languages, grammars, finite state machines, automata. Credit will not be given for both MATH 3710 and Math 3100.

MATH 4110 ADVANCED LOGIC (3) LEC. 3. Pr. MATH 2630 or MATH 2637 and MATH 2730. Advanced topics in logic. For example: soundness, completeness, incompleteness, set theory, proof theory, model theory, non-standard logics. May count either MATH 4110 or PHIL 4110.

MATH 4790 ACTUARIAL SEMINAR IN THE MATHEMATICS OF FINANCE (3) LEC. 3. Pr. MATH 2790. Intensive seminar in the mathematical aspects of finance, and the theory of interest primarily intended as preparation for the Society of Actuaries Course 2 examination.

MATH 4820 ACTUARIAL SEMINAR IN PROBABILITY (3) LEC. 3. Pr. STAT 3600. or equivalent. Intensive seminar in calculus, probability, and risk theory primarily intended as preparation for the Society of Actuaries Course 1 examination.

MATH 4930 DIRECTED STUDIES (1-3) IND. Study of individual problems or topics of interest to students. Course may be repeated for a maximum of 3 credit hours.

MATH 4970 SPECIAL TOPICS (1-4) IND. Departmental approval. An individual problems course. Each student will work under the direction of a staff member on a problem of mutual interest. Course may be repeated for a maximum of 4 credit hours.

MATH 4980 UNDERGRADUATE RESEARCH (1-3) IND. Departmental approval. Directed research in the area of specialty under faculty supervision. Course may be repeated for a maximum of 3 credit hours.

MATH 4997 HONORS THESIS (1-6) IND. Pr. Honors College. Course may be repeated for a maximum of 6 credit hours. Membership in Honors College.

MATH 5000 MATH MODELING CONTINUOUS (3) LEC. 3. Pr. MATH 2650 and MATH 2660. Introduction to mathematical models and related techniques. Includes general principles involving continuous deterministic problems and a detailed, specific term project. Programming ability.

MATH 5010 VECTOR CALCULUS (3) LEC. 3. Pr. (MATH 2630 or MATH 2637 or MATH 2730) and MATH 2660. Departmental approval. Vector-valued functions, vector fields. Gradient, divergence, curl. Integral theorems: Green's Theorem, Stoke's Theorem, Gauss' Theorem. Tensors and differential forms. Applications.

MATH 5030 COMPLEX VARIABLES WITH APPLICATIONS I (3) LEC. 3. Pr. MATH 2650. Complex functions and their elementary mapping properties; contour integration and residues; Laurent series; applications to real integrals. MATH 5030-5040 are appropriate for students of engineering or science.

MATH 5040 COMPLEX VARIABLES WITH APPLICATIONS II (3) LEC. 3. Pr. MATH 5030. Linear fractional transformations; conformal mappings; harmonic functions; applications to boundary value problems; analytic continuation; entire functions. MATH 5030-5040 are appropriate for students of engineering or science.
MATH 5050 MATRIX THEORY AND APPLICATIONS (3) LEC. 3. Pr. MATH 2660. Canonical forms, determinants, linear equations, eigenvalue problems.

MATH 5060 ELEMENTARY PARTIAL DIFFERENTIAL EQUATIONS (3) LEC. 3. Pr. MATH 2650. First and second order linear partial differential equations with emphasis on the method of eigenfunction expansions.

MATH 5120 INFORMATION THEORY (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. Information and entropy, information rate optimization and channel capacity, variable-length codes, data compression (Kraft-McMillan inequality, Huffman's algorithm), maximum likelihood decoding, Shannon's Noisy Channel Theorem.

MATH 5130 CALCULUS OF VARIATION (3) LEC. 3. Pr. MATH 2650. Fundamental concepts of extrema of functions and functionals; first and second variations; generalizations; sufficient conditions; constrained functionals; the general Lagrange Problem; optimal control.

MATH 5140 DATA COMPRESSION (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627 or MATH 1720. Lossless compression methods, including static, dynamic, and higher order Huffman and arithmetic encoding, interval and recency rank encoding, and dictionary methods; lossy transform methods (JPEG).

MATH 5150 ALGEBRAIC CODING THEORY (3) LEC. 3. Pr. MATH 2660. Linear codes, Hamming and Golay codes, BCH codes, cyclic codes. Random error detection and correction. Burst-error correction. Decoding algorithms. Credit will not be given for both MATH 5150 and MATH 6150/6156.

MATH 5180 CRYPTOGRAPHY (3) LEC. 3. Pr. MATH 2660. Classical cryptosystems, the Data Encryption Standard, one-way functions and relevant number theoretic problems (factoring, primality testing, discrete logarithm problem), RSA and other public key cryptosystems.

MATH 5190 INTRODUCTION TO APPROXIMATION THEORY (3) LEC. 3. Pr. MATH 2650. Approximation of functions by polynomials, spline functions or trigonometric functions, expansions in series.

MATH 5200 ANALYSIS I (3) LEC. 3. Pr. MATH 3100. "C" or better in MATH 3100. Real numbers, infima and suprema; sequences and series of real numbers, convergence and limits, cauchy sequences and completeness; topology of the real line, Bolzano-Weierstrass and Heine-Borel theorems; real-valued functions of a real variable, continuity and uniform continuity. Emphasis on proofs.

MATH 5210 ANALYSIS II (3) LEC. 3. Pr. MATH 5200. Sequences and series of functions, modes of convergence, power series, elementary functions; derivatives and antiderivatives, the mean-value theorem; Riemann integration and the Fundamental Theorem of Calculus; R^n and abstract spaces, functions of several variables. Emphasis on proofs.

MATH 5280 SYSTEMS OF DIFFERENTIAL EQUATIONS AND APPLICATIONS (3) LEC. 3. Pr. MATH 2650 and MATH 2660. Linear systems of differential equations, stability, phase portraits; non-linear systems, linearization, qualitative properties of orbits, Poincaré-Bendixson Theorem; numerical methods; applications.

MATH 5300 THEORY OF DIFFERENCE EQUATIONS (3) LEC. 3. Pr. MATH 2660. Linear difference equations, initial value problems, Green's functions, boundary value problems, systems, periodic solutions, nonlinear difference equations, models.

MATH 5310 INTRODUCTION TO ABSTRACT ALGEBRA I (3) LEC. 3. Pr. MATH 3100. "C" or better in MATH 3100. Groups, Groups of Permutations, isomorphisms and homomorphisms; Cyclic Groups, Quotient Groups, The Fundamental Homomorphism Theorem.

MATH 5320 INTRODUCTION TO ABSTRACT ALGEBRA II (3) LEC. 3. Pr. MATH 5310. Theory of rings and fields, Ideals and Homomorphisms, Quotient Rings, Rings of Polynomials, Extensions of Fields, Galois Theory.
MATH 5330 COMPUTATIONAL ALGEBRA (3) LEC. 3. Pr. MATH 5310. Introduction to computation in multivariate polynomial rings and finite fields. Topics include Groebner bases, Buchberger's Algorithm, kinematic/robotics problems, symbolic manipulation software.

MATH 5370 LINEAR ALGEBRA (3) LEC. 3. Pr. MATH 2660. Introduction to the theoretical foundations of Linear Algebra including vector spaces, basis, dimension, linear transformations, fundamental subspaces, matrix representations, eigenvalues, eigenspaces.

MATH 5380 INTERMEDIATE EUCLIDEAN GEOMETRY I (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. Fundamental concepts and theorems of Euclidean geometry, introduction to higher dimensions. Regular polygons and polyhedra, symmetry groups, convexity, geometric extremum problems. Geometric transformations and their invariants.

MATH 5390 INTERMEDIATE EUCLIDEAN GEOMETRY II (3) LEC. 3. Pr. MATH 5380. Planar graphs and Euler's theorem. The symmetry group of a set, homotheties and similitudes, path, arcs and length of curves, advanced theorems on the circle.

MATH 5460 PERTURBATION METHODS I (3) LEC. 3. Pr. MATH 2660. Analytical solutions of nonlinear problems, ODEs, PDEs, multiple scales, and transcendental equations in engineering, mathematics, and physics using both regular and singular perturbation methods.

MATH 5470 DYNAMICAL SYSTEMS I (3) LEC. 3. Pr. MATH 2650. One dimensional dynamics. The logistic equation, bifurcation theory, chaos, hyperbolicity, symbolic dynamics, Sarkovskii's Theorem, maps of the circle, homoclinic points and the theory of kneading sequences.

MATH 5480 DYNAMICAL SYSTEMS II (3) LEC. 3. Pr. MATH 5470. Higher dimensional and complex dynamics. Lorenz map, Henon map, toral automorphisms, stable and unstable manifolds, strange attractors, quadratic maps of the complex plane, Julia sets, Mandelbrot set.

MATH 5500 INTRODUCTION TO TOPOLOGY (3) LEC. 3. Pr. MATH 3100. C or better in MATH 3100. Metric spaces, topological spaces, continuity, compactness, connectedness, product and quotient spaces and local properties.

MATH 5620 MATHEMATICAL COMPUTATION AND SCIENTIFIC VISUALIZATION (3) LEC. 3. Pr. MATH 2650. A programming language, or departmental approval. An introduction to the computational modeling process, numerical programming tools for large-scale scientific computation, parallel and cluster computing, and to scientific visualization techniques.

MATH 5640 INTRODUCTION TO NUMERICAL ANALYSIS II (3) LEC. 3. Pr. MATH 2660. Programming ability. Numerical solutions of systems of linear equations, numerical computation of eigenvalues and eigenvectors, error analysis. Written programs using the algorithms.

MATH 5650 THEORY OF NONLINEAR OPTIMIZATION (3) LEC. 3. Pr. MATH 2650 and MATH 2660. Kuhn-Tucker conditions, quadratic programming, search methods and gradient methods, Lagrangean and penalty function methods.

MATH 5670 PROBABILITY AND STOCHASTIC PROCESSES I (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. Random variables, discrete and absolutely continuous distributions. Poisson process, expectation and conditional expectation. Moment generating functions, limit distributions. Emphasis on probabilistic reasoning and problem solving. Credit will not be given for both MATH 5670 and STAT 5670.

MATH 5680 PROBABILITY AND STOCHASTIC PROCESSES II (3) LEC. 3. Pr. MATH 5670 or STAT 5670. Multivariate distributions. Central Limit Theorem, Laplace transforms, convolutions, simulation, renewal processes, Continuous-time Markov Chains, Markov renewal and semi-regenerative processes, Brownian motion and diffusion. Credit will not be given for both MATH 5680 and STAT 5680.

MATH 5690 INTRODUCTION TO CHAOTIC AND RANDOM PHENOMENA (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627 or MATH 1720. Stochastic properties of random phenomena in computational complexity, data analysis, chaotic nonlinear systems. Computer simulation and experimenting within Mathematica, supported by internet resources. Credit will not be given for both MATH 5690 and STAT 5690. Basic programming.

MATH 5730 ENUMERATION (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. Using generating functions and Polya theory to do sophisticated counting. Permutations and combinations, inclusion-exclusion, partitions, recurrence relations, group actions, Polya theory with applications.

MATH 5770 COMBINATORIAL DESIGNS (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627 or MATH 1720. Latin squares, mutually orthogonal latin squares, orthogonal and perpendicular arrays, Steiner triple systems, block designs, difference sets and finite geometries.

MATH 5810 ACTUARIAL MATHEMATICS II (3) LEC. 3. Pr. MATH 5800. A development of the mathematical theory of life insurance and annuities. Utility functions, mortality models, life tables, insurance plans, premiums.

MATH 5840 FOUNDATIONS OF NUMBER THEORY FOR SECONDARY SCHOOL TEACHERS (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. Divisibility, Diophantine equations, congruencies.

MATH 5850 NUMERICAL ANALYSIS FOR SECONDARY TEACHERS (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. The numerical solutions of selected problems arising in calculus and algebra along with the programming techniques. Computer familiarity.

MATH 5860 FOUNDATIONS OF NON-EUCLIDEAN GEOMETRY FOR SECONDARY SCHOOL TEACHERS (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. B.L. geometry, hyperbolic geometry, absolute geometry, parallel postulates.

MATH 5870 FINANCIAL MATHEMATICS (3) LEC. 3. Pr. (MATH 1610 or MATH 1613 or MATH 1617) and (MATH 1620 or MATH 1623 or MATH 1627) and MATH 2650 and STAT 3600. Options and spreads, pricing of such options in accordance with the Black-Scholes Equation, and the binomial pricing model.

MATH 5970 SPECIAL TOPICS (1-3) IND. Departmental approval. Topics may vary as needed. Course may be repeated for a maximum of 3 credit hours.

MATH 6000 MATHEMATICAL MODELING: CONTINUOUS (3) LEC. 3. Introduction to mathematical models and related techniques. Includes general principles involving continuous deterministic problems and a detailed, specific term-project. Programming ability.

MATH 6030/6036 COMPLEX VARIABLES WITH APPLICATIONS I (3) LEC. 3. Complex functions and their elementary mapping properties; contour integration and residues; Laurent series; applications to real integrals. MATH 6030-6040 are appropriate for students of engineering or science.

MATH 6040 COMPLEX VARIABLES WITH APPLICATIONS II (3) LEC. 3. Pr. MATH 6030 or MATH 6036. Linear fractional transformations; conformal mappings; harmonic functions; applications to boundary value problems; analytic continuation; entire functions. MATH 6030-6040 are appropriate for students of engineering or science.

MATH 6050 MATRIX THEORY AND APPLICATIONS (3) LEC. 3. Canonical forms, determinants, linear equations, eigenvalue problems.

MATH 6060 ELEMENTARY PARTIAL DIFFERENTIAL EQUATIONS (3) LEC. 3. First and second order linear partial differential equations with emphasis on the method of eigenfunction expansions.

MATH 6120 INFORMATION THEORY (3) LEC. 3. Information and entropy, information rate optimization and channel capacity, variable-length codes, data compression (Kraft-McMillan inequality, Huffman's algorithm), maximum likelihood decoding, Shannon's Noisy Channel Theorem.
MATH 6130 CALCULUS OF VARIATION (3) LEC. 3. Pr. MATH 2650. Fundamental concepts of extrema functions and functionals; first and second generalizations; sufficient conditions; constrained functionals; the general Lagrange problem; optimal control.

MATH 6140 DATA COMPRESSION (3) LEC. 3. Lossless compression methods, including static, dynamic, and higher order Huffman and arithmetic encoding, interval and recency rank encoding, and dictionary methods; lossy transform methods (JPEG).

MATH 6150/6156 ALGEBRAIC CODING THEORY (3) LEC. 3. Pr. MATH 2660. Linear codes, Hamming and Golay codes, BCH codes, cyclic codes. Random error detection and correction. Burst-error correction. Decoding algorithms. Credit will not be given for both MATH 5150 and MATH 6150/6156.

MATH 6180 CRYPTOGRAPHY (3) LEC. 3. Classical cryptosystems, the Data Encryption Standard, one-way functions and relevant number theoretic problems (factoring, primality testing, discrete logarithm problem), RSA and other public key cryptosystems.

MATH 6190 INTRODUCTION TO APPROXIMATION THEORY (3) LEC. 3. Pr. MATH 2650. Approximation of functions by polynomials, spline functions or trigonometric function, expansions in series.

MATH 6200 ANALYSIS I (3) LEC. 3. or equivalent course, subject to departmental approval. Real numbers, infima and suprema; sequences and series of real numbers, convergence and limits, Cauchy sequences and completeness; topology of the real line, Bolzano-Weierstrass and Heine-Borel theorems; real-valued functions of a real variable, continuity and uniform continuity; intermediate value and extreme-value theorems. Emphasis on proofs.

MATH 6210 ANALYSIS II (3) LEC. 3. Pr. MATH 6200. Sequences and series of functions, modes of convergence, power series, elementary functions; derivatives and power series, elementary functions; derivatives and antiderivatives, the mean-value theorem; Riemann integration and the Fundamental Theorem of Calculus; R^n and abstract spaces, functions of several variables. Emphasis on proofs.

MATH 6280 SYSTEMS OF DIFFERENTIAL EQUATIONS AND APPLICATIONS (3) LEC. 3. Linear systems of differential equations, stability, phase portraits; non-linear systems, linearization, qualitative properties of orbits, Poincare-Bendixson Theorem; numerical methods; applications.

MATH 6300 THEORY OF DIFFERENCE EQUATIONS (3) LEC. 3. Linear difference equations, initial value problems, Green's functions, boundary value problems, systems, periodic solutions, nonlinear difference equations, models.

MATH 6310 INTRODUCTION TO ABSTRACT ALGEBRA I (3) LEC. 3. Departmental approval. Groups, Groups of Permutations, isomorphisms and homomorphisms; Cyclic Groups, Quotient Groups, The Fundamental Homomorphism Theorem.

MATH 6320 INTRODUCTION TO ABSTRACT ALGEBRA II (3) LEC. 3. Pr. MATH 6310. Theory of rings and fields, Ideals and Homomorphisms, Quotient Rings, Rings of Polynomials, Extensions of Fields, and Galois Theory.

MATH 6330 COMPUTATIONAL ALGEBRA (3) LEC. 3. Pr. MATH 6310. Introduction to computation in multivariate polynomial rings and finite fields. Topics include Groebner bases, Buchberger's Algorithm, kinematic/robotics problems, and symbolic manipulation software.

MATH 6370 LINEAR ALGEBRA (3) LEC. 3. Introduction to the theoretical foundations of Linear Algebra Algebra including vector spaces, basis, dimension, linear transformations, fundamental subspaces matrix representations, eigenvalues, eigenspaces.

MATH 6380 INTERMEDIATE EUCLIDEAN GEOMETRY I (3) LEC. 3. Fundamental concepts and theorems of Euclidean geometry, introduction to higher dimensions. Regular polygons and polyhedra, symmetry groups, convexity, geometric extremum problems. Geometric transformations and their invariants.

MATH 6390 INTERMEDIATE EUCLIDEAN GEOMETRY II (3) LEC. 3. Pr. MATH 6380. Planar graphs and Euler's theorem. The symmetry group of a set, homotheties and similitudes, path, arcs and length of curves, and advanced theorems on the circle.
MATH 6460/6466 PERTURBATION METHODS (3) LEC. 3. Pr. MATH 2660. Departmental approval. Analytical solutions of nonlinear problems, ODES, PDEs, multiple scales, and transcendental equations in engineering, mathematics, and physics using both regular and singular perturbation methods. May count either AERO/MATH 5460 or AERO/MATH 6460.

MATH 6470 DYNAMICAL SYSTEMS I (3) LEC. 3. Pr. MATH 2650. One dimensional dynamics. The logistic equation, bifurcation theory, chaos, hyperbolicity, symbolic dynamics, Sarkovskii's Theorem, maps of the circle, homoclinic points and the theory of kneading sequences.

MATH 6480 DYNAMICAL SYSTEMS II (3) LEC. 3. Pr. MATH 6470. Higher dimensional and complex dynamics. Lorenz map, Henonmap, toral automorphisms, stable and unstable manifolds, strange attractors, quadratic maps of the complex plane, Julia sets, Mandelbrot set.

MATH 6500 INTRODUCTION TO TOPOLOGY (3) LEC. 3. Departmental approval. Metric spaces, topological spaces, continuity, compactness, connectedness, product and quotient spaces and local properties.

MATH 6620 MATHEMATICAL COMPUTATION AND SCIENTIFIC VISUALIZATION (3) LEC. 3. An introduction to the computational modeling process, numerical programming tools for large-scale scientific computation, parallel and cluster computing, and to scientific visualization techniques.

MATH 6640/6646 INTRODUCTION TO NUMERICAL ANALYSIS II (3) LEC. 3. Numerical solutions of systems of linear equations, numerical computation of eigenvalues and eigenvectors, error analysis. Written programs using the algorithms. Programming ability.

MATH 6650 THEORY OF NONLINEAR OPTIMIZATION (3) LEC. 3. Kuhn-Tucker conditions, quadratic programming, search methods and gradient methods, Lagrangean and penalty function methods.

MATH 6670/6676 PROBABILITY AND STOCHASTIC PROCESSES I (3) LEC. 3. Random variables, discrete and absolutely continuous distributions. Poisson process, expectation and conditional expectation. Moment generating functions, limit distributions. Emphasis on probabilistic reasoning and problem solving. Credit will not be given for both MATH 6670 and STAT 6670.

MATH 6680 PROBABILITY AND STOCHASTIC PROCESSES II (3) LEC. 3. Pr. MATH 6670 or MATH 6676 or STAT 6670 or STAT 6676. Multivariate distributions. Central Limit Theorem, Laplace transforms, convolutions, simulation, renewal processes, Continuous-time Markov Chains, Markov renewal and semi-regenerative processes, Brownian motion and diffusion. Credit will not be given for both MATH 6680 and STAT 6680.

MATH 6690 INTRODUCTION TO CHAOTIC AND RANDOM PHENOMENA (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627. Stochastic properties of random phenomena in computational complexity, data analysis, chaotic nonlinear systems. Computer simulation and experimenting within Mathematica, supported by Internet resources. Credit will not be given for both MATH 6690 and STAT 6690.

MATH 6710 LINEAR OPTIMIZATION (3) LEC. 3. Theory and algorithms for standard linear optimization problems. Simplex algorithm and duality, shortest paths, network flows, min-cost flows and circulations, out-of-kilter method, assignments and matchings.

MATH 6730 ENUMERATION (3) LEC. 3. Using generating functions and Polya theory to do sophisticated counting. Permutations and combinations, inclusion-exclusion, partitions, recurrence relations, group actions, Polya theory with applications.

MATH 6750 GRAPH THEORY (3) LEC. 3. Algorithmic and theoretical aspects of graph theory: matchings, colorings, scheduling problems, Hamilton cycles, Euler tours, spanning trees, network reliability, connectivity, extremal graphs, planar graphs, disjoint paths.

MATH 6770 COMBINATORIAL DESIGNS (3) LEC. 3. Latin squares, mutually orthogonal latin squares, orthogonal and perpendicular arrays, Steiner triple systems, block designs, difference sets and finite geometries.

MATH 6810 ACTUARIAL MATHEMATICS II (3) LEC. 3. Pr. MATH 6800. A development of the mathematical theory of life insurance and annuities. Utility functions, mortality models, life tables, insurance plans, premiums.
MATH 6840 FOUNDATIONS OF NUMBER THEORY FOR SECONDARY SCHOOL TEACHERS (3) LEC. 3. Divisibility, Diophantine equations, congruencies.

MATH 6850 NUMERICAL ANALYSIS FOR SECONDARY TEACHERS (3) LEC. 3. Pr. MATH 2630 or MATH 2637. The numerical solutions of selected problems arising in calculus and algebra along with the programming techniques. Computer familiarity.

MATH 6860 FOUNDATIONS OF NON-EUCLIDEAN GEOMETRY FOR SECONDARY SCHOOL TEACHERS (3) LEC. 3. Pr. MATH 2630 or MATH 2637. B.L. geometry, hyperbolic geometry, absolute geometry, parallel postulates.

MATH 6870 FINANCIAL MATHEMATICS (3) LEC. 3. Pr. (MATH 1610 or MATH 1613 or MATH 1617) and (MATH 1620 or MATH 1623 or MATH 1627) and MATH 2650 and STAT 3600. Options and spreads, pricing of such options in accordance with the Black-Scholes Equation, and the binomial pricing model.

MATH 6970/6976 SPECIAL TOPICS (1-3) IND. Departmental approval. Topics may vary as needed. Course may be repeated for a maximum of 3 credit hours.

MATH 7010/7016 APPLIED MATHEMATICS II (3) LEC. 3. Pr. MATH 7000 or MATH 7006. Calculus of variations, asymptotic expansions, Spectral theory, Fourier transform, Partial differential equations, transform methods and eigenfunction expansions, vibrations, diffusion processes, equilibrium states, Green's functions, boundary layer problems.

MATH 7040/7046 APPROXIMATION THEORY I (3) LEC. 3. Departmental approval. Introduction and theory of some of the important methods of approximation. Includes uniform approximation, best approximation, best trigonometric approximation.

MATH 7050/7056 APPROXIMATION THEORY II (3) LEC. 3. Pr. MATH 7040 or MATH 7046. Least square approximation and rational approximation, and advanced topics of current interest.

MATH 7070 INTERPOLATION I (3) LEC. 3. Departmental approval. Techniques of approximation by interpolation, rates of convergence and methods of estimating error. Simultaneous approximation of functions and their derivatives; spline function interpolation; curve and surface fitting.

MATH 7100 SPECIAL FUNCTIONS (3) LEC. 3. Departmental approval. Special functions from classical complex analysis which play an important role in the mathematics of physics, chemistry, and engineering.

MATH 7130 TENSOR ANALYSIS (3) LEC. 3. Departmental approval. Manifolds, differential structure, vector and tensor fields, vector and tensor bundles, differential forms, chains. elements of differential geometry, advanced topics.

MATH 7150 AXIOMATIC SET THEORY I (3) LEC. 3. Departmental approval. Introduction to modern set theory. The axioms of ZFC, ordinals and cardinals, closed unbounded sets, the constructible universe L, Martin's Axiom.

MATH 7160 AXIOMATIC SET THEORY II (3) LEC. 3. Pr. MATH 7150. Introduction to forcing, independence results, iterated forcing, consistency of Martin's Axiom.
MATH 7170 ALGORITHMS DISCRETE OPTIMIZATION (3) LEC. 3. Pr. MATH 6750. Theory and practice of discrete algorithms: complexity class classes, reductions, approximate algorithms, greedy algorithms, search techniques, heuristics, randomized algorithms, and numeric algorithms.

MATH 7200 REAL ANALYSIS I (3) LEC. 3. Departmental approval. Sigma algebras, measures, measurable functions, integratability, properties of Lebesgue measure, density, Lusin's theorem, Egoroff's theorem, product measures, Fubini's theorem. Limit theorems involving pointwise convergence and integration.

MATH 7230 FUNCTIONS OF A COMPLEX VARIABLE I (3) LEC. 3. Departmental approval. Complex numbers, analytic functions, derivatives, Cauchy integral theorem and formulae, Taylor and Laurent series, analytic continuation, residues, maximum principles, Riemann surfaces.

MATH 7240 FUNCTIONS OF A COMPLEX VARIABLE II (3) LEC. 3. Pr. MATH 7230. Conformal mappings, families of analytic functions and harmonic analysis.

MATH 7280 ADVANCED THEORY OF ORDINARY DIFFERENTIAL EQUATIONS I (3) LEC. 3. Departmental approval. Existence and continuation theorems for ordinary differential equations, continuity and differentiability with respect to initial conditions, linear systems, differential inequalities, Sturm theory.

MATH 7310 ALGEBRA I (3) LEC. 3. Departmental approval. Groups, Lagrange's Theorem, normal subgroups, factor groups, Isomorphism and Correspondence Theorems. Symmetric groups, alternating groups, free groups, torsion groups. Introduction to rings, correspondence theorems.

MATH 7320 ALGEBRA II (3) LEC. 3. Pr. MATH 7310. Rings, modules, vector spaces, and semi-simple modules. Commutative rings; prime and primary ideals, PID's are UFD, factorizations in integral domains, field extensions, the Galois Correspondence Theorem.

MATH 7330 LINEAR REPRESENTATIONS OF FINITE GROUPS (3) LEC. 3. Pr. MATH 7320. Maschke's Theorem, characters, orthogonality relations, induced modules, Frobenius reciprocity, Clifford's Theorem, Mackey's Subgroup Theorem, Burnside's theorem on solvability.

MATH 7340 RING THEORY (3) LEC. 3. Pr. MATH 7320. Topics on: commutative rings (Cohen-Seidenberg theorems, Krull Intersection Theorem, Dedekind domains), or noncommutative rings (projective modules over Artinian algebras, representation type, Noether-Skolem Theorem, division algebras).

MATH 7350 ABELIAN GROUPS (3) LEC. 3. Pr. MATH 7320. Torsion groups: Decompositions, Ulm's theorem, uniqueness theorem for Axiom 3 groups, Torsion-free groups: Completely decomposable groups, Butler groups, p-local groups, Warfield groups, splitting criteria. Homological topics.

MATH 7360 LIE ALGEBRA (3) LEC. 3. General introduction of Lie algebras including their structures and classifications of semisimple Lie algebras.

MATH 7370 MATRICES I (3) LEC. 3. Departmental approval. Jordan form, functions of a matrix, spectral theorem, singular values, norms, quadratic forms, field of values, inertia; topics of current interest.

MATH 7380 MATRICES II (3) LEC. 3. Pr. MATH 7370. Matrix stability and inertia, inequalities for matrix eigenvalues and singular values, The Kronecker and Hadamard matrix products, the exponential and logarithm matrix map; topics of current interest.
MATH 7390 MULTILINEAR ALGEBRA (3) LEC. 3. Pr. MATH 5370 or MATH 6370. Multilinear algebra, symmetry class of tensors, induced operators, generalized matrix functions, and current research topics.

MATH 7410 FUNCTIONAL ANALYSIS II (3) LEC. 3. Pr. MATH 7400. C*-algebras, Hermitian, self adjoint elements, functional calculus for commutative algebras. Normal operators on Hilbert space, spectral theorem, applications, symmetric and self-adjoint operators, normal operators, the spectral theorem.

MATH 7440 PARTIAL DIFFERENTIAL EQUATIONS I (3) LEC. 3. Departmental approval. Second order linear elliptic and hyperbolic equations stressing non-linear and numerical problems, characteristic domains of dependence, energy integrals, finite difference schemes, Sobolev spaces, maximum principle.

MATH 7450 PARTIAL DIFFERENTIAL EQUATIONS II (3) LEC. 3. Pr. MATH 7440. Parabolic and hyperbolic equations, stressing numerical problems, characteristics, domains of dependence, energy integrals, reaction-diffusion problems, Navier-Stokes equations, fixed-point and Galerkin methods.

MATH 7470 NUMBERS AND OPERATIONS FOR ELEMENTARY TEACHERS (3) LEC. 3. Certified Elementary Teacher or Degree in Elementary/Early Education or departmental approval. Develop a deep understanding of the base ten place value system and the operations and algorithms used with this system.

MATH 7480 MEASUREMENT AND GEOMETRY FOR ELEMENTARY TEACHERS (3) LEC. 3. Certified Elementary Teacher or Degree in Elementary/Early Education or departmental approval. Develop a deep understanding of topics in measurement, 2-D and 3-D geometry needed for teaching elementary school students.

MATH 7500 TOPOLOGY I (3) LEC. 3. Departmental approval. Separation and countability axioms, covering properties, completeness, connectedness, metric spaces and metrizability, product and quotient spaces, function spaces.

MATH 7501 TOPOLOGY II (3) LEC. 3. Pr. MATH 7500. Homotopy, elementary properties of retracts, fundamental groups, covering spaces, computations of fundamental groups.

MATH 7520 CONTINUUM THEORY I (3) LEC. 3. Pr. MATH 7510. Departmental approval. Topics such as inverse limits, decompositions, hyperspaces, special mappings, topological structures from the pathological (indecomposable continua), to the straightforward (Peano continua).

MATH 7530 CONTINUUM THEORY II (3) LEC. 3. Pr. MATH 7530. Topics in continuum theory such as confluent mappings, epsilon mappings, chains, to-the-boundary theorems, relationship to inverse limits, advanced topics.

MATH 7550 CONTINUUM THEORY II (3) LEC. 3. Pr. MATH 7550. Topological Groups, Cardinal invariants, use of set-theoretic axioms such as Martin's Axiom, independence results, advanced topics.

MATH 7570 EUCLIDEAN TOPOLOGY I (3) LEC. 3. Pr. MATH 7510. An introduction to concepts basic in algebraic and geometric topology through the study of simple objects such as polyhedra, manifolds, retracts, and the Brouwer fixed point theorem.

MATH 7580 EUCLIDEAN TOPOLOGY II (3) LEC. 3. Pr. MATH 7570. Further study of basic geometric topology. Retracts, absolute neighborhood retracts, maps into spheres, invariance of domain.
MATH 7600/7606 ADVANCED NUMERICAL MATRIX ANALYSIS (3) LEC. 3. Departmental approval. Topics selected from: discretization matrices, sparse matrices, QR-algorithm, symmetric eigenvalue problems, singular value decomposition, pseudo-inverses, simplex method, matrix algorithms for vector computers.

MATH 7610/7616 NUMERICAL SOLUTION OF PARTIAL DIFFERENTIAL EQUATIONS I (3) LEC. 3. Pr. MATH 2650 and MATH 2660 and MATH 5630 or MATH 6630 and MATH 5640 or MATH 6640. Finite difference methods for ordinary and partial differential equations.

MATH 7620 OPTIMIZATION THEORY (3) LEC. 3. Unconstrained problems: basic descent, conjugate gradient and quasi-Newton methods. Constrained problems: gradient projection, penalty, cutting plane and Lagrange methods. Credit will not be given for both MATH 7620 and INSY 8420. An ability to program in high-level language.

MATH 7650 HARMONIC ANALYSIS I (3) LEC. 3. Departmental approval. Fourier series, Fourier transforms, maximal functions, singular integral theory, introduction to function spaces.

MATH 7660 HARMONIC ANALYSIS II (3) LEC. 3. Pr. MATH 7650. Function spaces and interpolation, Calderon's reproducing formulas, wavelets, frames, connections to function spaces applications.

MATH 7680/7686 ADVANCED TOPICS IN NUMERICAL ANALYSIS (3) LEC. 3. Departmental approval. Topics include: sparse systems of equations, parallel and vector algorithms, nonlinear and singular partial differential equations, calculation of eigenvalues and eigenvectors, pseudo-random numbers, filtering techniques.

MATH 7700 INTRODUCTION TO GRAPH THEORY FOR GRADUATE STUDENTS (3) LEC. 3. Algorithmic, enumerative and theoretical aspects of graph theory: matchings and factors, colorings, Hamiltonicity, connectivity, trees, extremal graphs, planarity. May count either MATH 6750 or MATH 7700.

MATH 7710 COMPUTATIONAL GEOMETRY (3) LEC. 3. Departmental approval. Design and time-complexity of computer algorithms for geometry problems studying the geometric ideas needed for computer-aided design, computer graphics and robotics.

MATH 7720 INTRODUCTION TO CODING THEORY (3) LEC. 3. Introduction to methods and algorithms for reliable communications through error control coding. BCH, Reed-Solomon, Reed-muller codes, convolutional codes, Berlekamp-Massey, Viterbi, and iterated decoding algorithms.

MATH 7730 ADVANCED TOPICS IN CODING THEORY (3) LEC. 3. Pr. MATH 7720. Departmental approval. Structure and theoretical properties of codes and related algorithms. Relations to other combinatorial and algebraic objects stressed.

MATH 7740 ADVANCED COMBINATORIAL DESIGNS (3) LEC. 3. Topics of current interest and research in combinatorial design theory. Areas included: latin squares, embeddings, Wilson's constructions, quadruple systems, Hadamard designs, graph designs, orthogonal arrays.

MATH 7750 ADVANCED TOPICS IN GRAPH THEORY (3) LEC. 3. Pr. MATH 6750 or MATH 7700. Topics of current interest and recent research in graph theory. May include edge colorings, algebraic graph theory, network flows, factor theory.

MATH 7760 INTRODUCTION TO ALGEBRAIC TOPOLOGY I (3) LEC. 3. Pr. MATH 7510. Departmental approval. Homology of chain complexes, the axioms of homology and their verification, computations of homology groups.

MATH 7770 INTRODUCTION TO ALGEBRAIC TOPOLOGY II (3) LEC. 3. Pr. MATH 7760. Homology with coefficients and universal coefficient theorem theorems, Cohomology and universal coefficient theorems, homology of products of spaces, cup and cap products, duality in manifolds.

MATH 7780 ADVANCED ALGEBRAIC TOPOLOGY I (3) LEC. 3. Departmental approval. Advanced topics in homology, cohomology, and duality with relations to and further study of homotopy theory. Applications to and further study of manifolds and geometric topology.

MATH 7790 ADVANCED ALGEBRAIC TOPOLOGY II (3) LEC. 3. Pr. MATH 7780. Continuation of MATH 7780; advanced topics in homology, cohomology, and duality with relations to and further study of homotopy theory. Applications to and further study of manifolds and geometric topology.
MATH 7800 PROBABILITY I (3) LEC. 3. Pr., a full year of undergraduate mathematical analysis at a level commensurate with MATH 5200/5210. Measure-theoretic foundations, independence, conditioning, martingales, Markov property, stationarity, random walks, Markov chains, Poisson processes.

MATH 7810/7816 PROBABILITY II (3) LEC. 3. Pr. MATH 7800. Classical and modern topics in stochastic processes (Markov chains, Poisson process, Brownian motion). Applications and stochastic models (queues, stationary processes, population dynamics, finances). Credit will not be given for both MATH 7810 and STAT 7810.

MATH 7820/7826 APPLIED STOCHASTIC PROCESSES I (3) LEC. 3. Classical and modern topics in stochastic processes (Markov processes, Random Walks, Martingales, Brownian motion). Introduction to stochastic integrals and differential equations. Applications (queues, population dynamics, chaos, finances). Credit will not be given for both MATH 7820 and STAT 7820.

MATH 7870 REAL FUNCTIONS AND DESCRIPTIVE SET THEORY I (3) LEC. 3. Pr. MATH 7210 or MATH 7500. Borel classification of sets, the Baire classification of real functions. Derivatives and approximately continuous functions. The Lebesgue density topology.

MATH 7950 SEMINAR (1-3) SEM. SU. Course may be repeated for a maximum of 6 credit hours.

MATH 7960 SPECIAL PROBLEMS (1-10) IND. Departmental approval. Topics may vary as needed. Course may be repeated for a maximum of 10 credit hours.

MATH 7970 SPECIAL TOPICS (1-10) IND. Departmental approval. Topics may vary as needed. Course may be repeated with change in topics.

MATH 7980 RESEARCH AND SPECIAL PROJECT IN APPLIED MATHEMATICS (1-10) RES. SU. Departmental approval. For students working on the Master of Applied Mathematics degree with concentration in numerical analysis. Course may be repeated for a maximum of 10 credit hours.

MATH 7990 RESEARCH AND THESIS (1-10) MST. Course may be repeated with change in topics.

MATH 8310 HOMOLOGICAL ALGEBRA I (3) LEC. 3. Pr. MATH 7320. Departmental approval. Homology and cohomology. Hom and Tensor functors; the adjoint isomorphisms, injective/projective modules, flat modules, the classification of certain rings using homological tools.

MATH 8320 HOMOLOGICAL ALGEBRA II (3) LEC. 3. Pr. MATH 8310. Localizations of modules, nonsingular rings and modules, the Goldie dimension, homological classification of modules; Whitehead modules, reflexive modules, R-modules as modules over their rings of endomorphisms.

MATH 8330 INTRODUCTION TO LIE GROUPS (3) LEC. 3. Pr. MATH 7310 or MATH 7370. Introduce Lie groups via matrix groups. Topics include exponential map, Lie algebras, classical groups, structures and classifications, manifolds, representations.

MATH 8400 ADVANCED FUNCTIONAL ANALYSIS I (3) LEC. 3. Pr. MATH 7210 and MATH 7400. Topics concerning bounded and unbounded linear operators in Banach and Hilbert spaces; theory of distributions and topological vector spaces with applications, current research.

MATH 8410 ADVANCED FUNCTIONAL ANALYSIS II (3) LEC. 3. Pr. MATH 8400. Topics from the theory of bounded and unbounded linear opera operators in Banach and Hilbert spaces; elements of nonlinear functional analysis, topics of current research interest.

MATH 8600 ADVANCED PROBABILITY I (3) LEC. 3. Processes, distributions, independence, Random sequences, series, averages, characteristic functions. Classical limits theorems, conditioning. Some experience with graduate level mathematics, preferably in the areas of analysis and topology.

MATH 8610 ADVANCED PROBABILITY II (3) LEC. 3. Pr. MATH 8600. Martingales, Markov chains, random walks, renewal theory, Poisson processes and ergodic theory.
MATH 8630 ADVANCED STOCHASTIC PROCESSES I (3) LEC. 3. Pr. MATH 8610. Gaussian processes, Brownian motion, invariance principles, convergence of random processes, measures and sets, stochastic integrals and quadratic variation.

MATH 8640 ADVANCED STOCHASTIC PROCESSES II (3) LEC. 3. Pr. MATH 8630. Continuous martingales and Brownian motion, stochastic differential equations and martingale problems, local time, excursions, one-dimensional SDE's and diffusions.

MATH 8700 FINITE GEOMETRY I (3) LEC. 3. Pr. MATH 5370. Projective and affine spaces over finite fields. Inversive planes. Relationship with linear algebra over finite fields and permutation groups. Applications to combinatorial designs.

MATH 8710 FINITE GEOMETRY II (3) LEC. 3. Pr. MATH 8700. Projective and affine spaces over finite fields. Inversive planes. Relationship with linear algebra over finite fields and permutation groups. Applications to combinatorial designs.

MATH 8960 SPECIAL PROBLEMS (1-10) IND. Departmental approval. Topics may vary as needed. Course may be repeated for a maximum of 15 credit hours.

MATH 8970 SPECIAL TOPICS (1-10) IND. Departmental approval. Topics may vary as needed. Course may be repeated for a maximum of 15 credit hours.

MATH 8990 RESEARCH AND DISSERTATION (1-10) DSR. Course may be repeated with change in topics.

Physics Courses

PHYS 1000/1003 FOUNDATIONS OF PHYSICS (4) LEC. 3. LAB. 2. Science Core. Newton's Laws, momentum and energy, solids, liquids, gases, plasma, thermodynamics, electricity, magnetism, light, atomic and nuclear physics. Students who have previous credit in any higher-numbered physics course may not receive credit.

PHYS 1001 FOUNDATIONS OF PHYSICS LABORATORY (1) LAB. 2. Coreq. PHYS 1003. Core-curriculum laboratory course in physics focusing on practical applications and hands-on experience. Topics include: Newton's Laws, momentum and energy, solids, liquids, gases, plasma, thermodynamics, electricity, magnetism, light, atomic and nuclear physics.

PHYS 1150 ASTRONOMY (4) LEC. 3. LAB. 3. Science Core. Open to non-science majors. Earth, the solar system, stars, neutron stars, black holes, supernova, galaxies, the expanding universe, and modern cosmological theories.

PHYS 1500 GENERAL PHYSICS I (4) LEC. 3. LAB. 3. Pr. MATH 1130 or MATH 1133 or MATH 1150 or MATH 1153 or P/C MATH 1610 or P/C MATH 1613 or P/C MATH 1617 or P/C MATH 1620 or P/C MATH 1623 or P/C MATH 1627 or P/C MATH 1710 or P/C MATH 1720 or P/C MATH 2630 or P/C MATH 2637. Science Core. Introduction to Newton's Laws, gravitation and cosmology, concept of conservation laws, solids and fluids, thermodynamics. Math at level of MATH 1130 or higher is expected. Credit will not be given for both PHYS 1500 and PHYS 1600 or PHYS 1607.

PHYS 1510 GENERAL PHYSICS II (4) LEC. 3. LAB. 3. Pr. PHYS 1500 or PHYS 1600 or PHYS 1607. Science Core. Electricity and magnetism, AC circuits, waves, nuclear physics, radioactivity and particle physics. Physics at the level of PHYS 1500 or higher is expected. Credit will not be given for both PHYS 1510 and PHYS 1610 or PHYS 1617.

PHYS 1600 ENGINEERING PHYSICS I (4) LEC. 3. LAB. 3. Pr. P/C MATH 1610 or P/C MATH 1613 or P/C MATH 1617 or P/C MATH 1620 or P/C MATH 1623 or P/C MATH 1710 or P/C MATH 1720 or P/C MATH 2630 or P/C MATH 2637. Science Core. Introduction to Newton's Laws, gravitation, cosmology, conservation of energy, momentum and angular momentum, special relativity, and fluids using introductory calculus. Math at the level of MATH 1610 or higher is expected, at least concurrently. Credit will not be given for both PHYS 1500 and PHYS 1600 or PHYS 1607.

PHYS 1607 HONORS PHYSICS I (4) LEC. 3. LAB. 3. Pr. Honors College. Science Core. Honors version of PHYS 1600. Membership in the Honors College or Departmental approval required. Recommended for Physics majors. Math at the level of MATH 1610 or higher is expected, at least concurrently. Credit will not be given for both PHYS 1600 and PHYS 1600 or PHYS 1607.

PHYS 1610 ENGINEERING PHYSICS II (4) LEC. 3. LAB. 3. Pr. (PHYS 1600 or PHYS 1607) and (P/C MATH 1620 or P/C MATH 1623 or P/C MATH 1627). Science Core. Thermodynamics, electricity and magnetism, simple AC circuits, waves, and geometric optics. Physics at the level of PHYS 1600 or higher is expected. Math at the level of MATH 1620 or higher is expected at least concurrently. Credit will not be given for both PHYS 1510 and PHYS 1610 or PHYS 1617.

<td>INTRODUCTION TO SOLID STATE PHYSICS (3)</td>
<td>LEC. 3</td>
<td>Pr. Lattice vibrations, band description of electronic states in metals, semiconductors and insulators, and magnetic, superconducting and defect properties of solids.</td>
</tr>
</tbody>
</table>
PHYS 5620 SURVEY OF PLASMA PHYSICS (3) LEC. 3. Pr. PHYS 3100. Single particle motions: fluid description of a plasma; plasma waves and oscillations; kinetic description, diffusion, and resistivity; non-linear effects.

PHYS 6100 APPLICATIONS OF QUANTUM MECHANICS (3) LEC. 3. Quantum mechanics applied to atomic physics, solid state physics, nuclear physics, particle physics, electrodynamics, and cosmology.

PHYS 6500 FUNDAMENTALS OF PHYSICS (3) LEC. 3. A subject such as Wave Mechanics, Mathematical Physics, Nonlinear Dynamics, Optics, Nuclear Physics, Elementary Particles, Relativity, or Electrodynamics. Course may be repeated for a maximum of 9 credit hours.

PHYS 6600 FRONTIERS OF PHYSICS (3) LEC. 3. A subject from the research areas in the Department such as Solid State, Atomic, Plasma, Space, or Computational Physics will be selected by the lecturer. Course may be repeated for a maximum of 9 credit hours.

PHYS 6610 INTRODUCTION TO SOLID STATE PHYSICS (3) LEC. 3. Lattice vibrations, band description of electronic states in metals, semiconductors and insulators, and magnetic, superconducting and defect properties of solids.

PHYS 6620 SURVEY OF PLASMA PHYSICS (3) LEC. 3. Single particle motions: fluid description of a plasma; plasma waves and oscillations; kinetic description, diffusion, and resistivity; non-linear effects.

PHYS 7100 CLASSICAL MECHANICS (3) LEC. 3. Lagrangian and Hamiltonian formulations of mechanics, canonical transforms. Hamilton-Jacobi theories, action angle variables, rigid rotators, normal modes, and mechanics of continuous media.

PHYS 7200 ELECTRICITY AND MAGNETISM I (3) LEC. 3. Electrostatics, special function expansions, magnetostatics, linear media and Maxwell's equations.

PHYS 7250 ELECTRICITY AND MAGNETISM II (3) LEC. 3. Time dependent Maxwell theory, wave propagation and dispersion, diffraction, scattering, radiation, relativistic covariance and applications.

PHYS 7300 QUANTUM MECHANICS I (3) LEC. 3. Schrodinger wave equation, discrete and continuous spectra, matrix formulation, perturbation theory.

PHYS 7350 QUANTUM MECHANICS II (3) LEC. 3. Time-dependent approximation methods, relativistic wave equations, and second quantization.

PHYS 7400 STATISTICAL PHYSICS (3) LEC. 3. Thermodynamic quantities, equilibrium ensembles for classical and quantum systems, fluctuations, phase transitions and critical phenomena.

PHYS 7520 NONLINEAR DYNAMICS (3) LEC. 3. Dynamical systems, maps, flows, fixed points and neighborhoods, chaos, fractals and fractal dimensions. Lyapunov exponents, strange attractors, dissipative and Hamiltonian systems, controlling chaos.

PHYS 7540 NON-EQUILIBRIUM STATISTICAL MECHANICS (3) LEC. 3. Introduces the fundamental concepts of non-equilibrium statistical mechanics, develops basic transport theories, and simulates statistic properties with Monte-Carlo and molecular dynamic methods.

PHYS 7900 DIRECTED STUDIES (1-5) IND. SU. Student will work with a faculty member to study a topic of interest. Course may be repeated for a maximum of 6 credit hours.

PHYS 7930 DIRECTED STUDIES (1-5) IND. Student will work with a faculty member to study a topic of interest. Course may be repeated for a maximum of 6 credit hours.

PHYS 7950 PHYSICS COLLOQUIUM (1) SEM. SU. Offers a series of talks presented by invited speakers on broad fields of physics. Check with graduate advisor for credit allowed. Course may be repeated for a maximum of 6 credit hours.

PHYS 7970 SPECIAL TOPICS IN PHYSICS (1-5) SEM. Seminar or lecture series in a rapidly advancing specialty of physics. Course may be repeated for a maximum of 6 credit hours.

PHYS 7990 RESEARCH AND THESIS (1-10) MST. May be repeated as often as is appropriate. Course may be repeated with change in topics.

PHYS 8100 RELATIVISTIC QUANTUM MECHANICS (3) LEC. 3. Dirac equation, 1D barrier scattering, 3D central potentials, S-matrix theory, Feynman diagrams, quantum electrodynamics, renormalization, tree and loop level problems.
PHYS 8200 INTRODUCTION TO ATOMIC PHYSICS (3) LEC. 3. Hydrogen atom, Hartree-Fock theory, radiative transitions, photoionization, autoionization, electron-atom scattering.

PHYS 8600 PLASMA PHYSICS (3) LEC. 3. A detailed study of plasma physics including particle orbit theory, magnetohydrodynamics, plasma waves and transport phenomena.

PHYS 8700 SOLID STATE PHYSICS (3) LEC. 3. Atomic and electronic structures of solids and the associated electrical, optical and transport properties.

PHYS 8900 DIRECTED STUDIES (1-5) IND. SU. Students will work with a faculty member to study a topic of interest. Course may be repeated for a maximum of 10 credit hours.

PHYS 8930 DIRECTED STUDIES IN ADVANCED PHYSICS (1-5) IND. Student will work with a faculty member to study a topic of interest. Course may be repeated for a maximum of 10 credit hours.

PHYS 8970 SPECIAL TOPICS IN ADVANCED PHYSICS (1-5) LEC. Departmental approval. Topic at the forefront of physics research will be chosen by the lecturer. Course may be repeated for a maximum of 10 credit hours.

PHYS 8990 RESEARCH AND DISSERTATION (1-10) DSR. May be repeated as often as is appropriate. Course may be repeated with change in topics.

Sciences Math Courses

SCMH 1010/1013 CONCEPTS OF SCIENCE (4) LEC. 3, AAB/LEC. 3. Coreq. SCMH 1011. Interdisciplinary course which presents major scientific concepts in physical and biological sciences. After taking SCMH 1010, students can complete core science requirement series by taking BIOL 1010, CHEM 1010, GEOL 1100, PHYS 1000, or PHYS 1150. Science Core. May count either SCMH 1010 or SCHM 1013 or SCHM 1017.

SCMH 1011 CONCEPTS OF SCIENCE LABORATORY (0) LAB. 2, AAB/LAB. 2. Coreq. SCMH 1010. Interdisciplinary course which presents major scientific concepts in physical and biological sciences. If a student takes SCMH 1010, students can complete core science requirement series by taking BIOL 1010, CHEM 1010, GEOL 1100, PHYS 1000, or PHYS 1150. Science core. May count SCMH 1011 or SCHM 1018.

SCMH 1017 HONORS CONCEPTS OF SCIENCE (4) LEC. 3. LAB. 1. Pr. Honors College. Coreq. SCMH 1018. Interdisciplinary course for Honors students which presents major scientific concepts in physical and biological sciences. After taking SCMH 1017, students can complete core science requirement series by taking BIOL 1010, CHEM 1010, GEOL 1100, GEOL 1107, PHYS 1000, or PHYS 1150. Science core. Credit will not be given for both SCMH 1017 and SCHM 1010.

SCMH 1018 HONORS CONCEPTS OF SCIENCE LABORATORY (0) LAB. 2, AAB/LAB. 2. Coreq. SCMH 1017. Interdisciplinary course for Honors students which presents major scientific concepts in physical and biological sciences. If a student takes SCMH 1017, students can complete core science requirement series by taking BIOL 1010, CHEM 1010, GEOL 1100, GEOL 1107, PHYS 1000, or PHYS 1150. Science core. Credit will not be given for both SCMH 1017 and SCHM 1010.

SCMH 1100 COSAM ORIENTATION (1) LEC. 1. Introduction to the College of Sciences and Mathematics and its resources, exploration of STEM careers, orientation to campus resources and facilities, and assistance with academics and transition to Auburn.

SCMH 1890 PRE-HEALTH PROFESSIONS ORIENTATION (1) LEC. 1. SU. Orientation and guidance for freshmen and transfer students planning to seek admission to health professions schools and programs such as dentistry, medicine, optometry, pharmacy, physician assistant, and physical therapy.

SCMH 2150 OPS: MANAGEMENT OF BUSINESS PROCESSES (2) LEC. 2. Fundamental concepts, techniques and tools of business processes.

SCMH 3810 PRE-PHYSICAL THERAPY PRACTICUM (1) PRA. 2. SU. Departmental approval. Direct observation of physical therapists at an approved facility in the Auburn-Opelika area.

SCMH 3890 PRE-MEDICAL PRECEPTORSHIP (1) LAB. 2. SU. Departmental approval. Direct observation and interaction with physicians at East Medical Center and in individual medical offices.

SCMH 4920 SCIENCES AND MATHEMATICS INTERNSHIP (3) LEC. 3. SU. Practical on-the-job training in some area related to Sciences and Mathematics. Course may be repeated for a maximum of 6 credit hours.
SCMH 5010 CLINICAL APPLICATIONS I (3) LEC. 2. A study of the clinical/personal issues facing primary care physicians in the rural community. Must be enrolled in the Rural Medicine Program.

SCMH 5020 CLINICAL APPLICATIONS II (3) LEC. 2, CLN/LEC. 1. Pr. SCMH 5010. A continuation of SCMH 5010.

SCMH 5940 GLOBAL STUDY/TRAVEL IN SCIENCES AND MATHEMATICS (1-12) AAB. and departmental approval. Application required. Students international study travel on topics relevant to Sciences and Mathematics. Course may be repeated for a maximum of 12 credit hours.

Statistics Courses

STAT 2010 STATISTICS FOR SOCIAL AND BEHAVIOR SCIENCES (4) LEC. 3. LAB. 2. Pr. MATH 1100 or MATH 1120 or MATH 1123 or MATH 1130 or MATH 1133 or MATH 1150 or MATH 1153 or MATH 1610 or MATH 1613 or MATH 1617. Introduction to basic principles of statistical reasoning and statistical procedures used in data analysis in the social and behavioral sciences.

STAT 2510/2513 STATISTICS FOR BIOLOGICAL AND HEALTH SCIENCES (3) LEC. 3. Pr. MATH 1100 or MATH 1120 or MATH 1123 or MATH 1130 or MATH 1133 or MATH 1150 or MATH 1153 or MATH 1610 or MATH 1613 or MATH 1617 or MATH 1680 or MATH 1683. Introduction to statistical concepts, reasoning and methods used in data analysis, descriptive statistics, sampling distributions, statistical inference, confidence intervals, regression or correlation, contingency tables. Students who have previous credit in any higher-numbered math course may not receive credit.

STAT 2600 BUSINESS ANALYTICS I (3) LEC. 3. Pr. MATH 1680 or MATH 1683 or P/C COMP 1000 or COMP 1003. Introduction to analytics in business including use of data to make business decisions, basic predictive business modeling, and communication of analytical results. Minimum 2.0 overall cumulative undergraduate GPA.

STAT 2610 STATISTICS FOR BUSINESS AND ECONOMICS (3) LEC. 3. Pr. MATH 1690. Introduction to statistical analysis, theory, and interpretation used in business and economics.

STAT 2710 STATISTICAL COMPUTING (1) LEC. 1. Pr. (P/C STAT 2010 or P/C STAT 2017) and (P/C STAT 2510 or STAT 2513) and P/C STAT 2610 and P/C STAT 3010. Introduction to basic statistical computing programs and methods.

STAT 3010 STATISTICS FOR ENGINEERS AND SCIENTISTS (3) LEC. 3. Pr. MATH 1610 or MATH 1613 or MATH 1617 or MATH 1710. Introduction to statistical methods and analysis used in engineering and science.

STAT 3600/3603 PROBABILITY AND STATISTICS I (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627 or MATH 1720. Calculus-based introduction to probability and statistics with an emphasis on practical problem-solving.

STAT 3610 PROBABILITY AND STATISTICS II (3) LEC. 3. Pr. STAT 3600. Departmental approval. Continuation of STAT 3600.

STAT 3611 PROBABILITY AND STATISTICS II LABORATORY (1) LAB. 2. Departmental approval. Coreq. STAT 3610. The application of statistical techniques from STAT 3610.

STAT 4610 APPLIED REGRESSION ANALYSIS (3) LEC. 3. Pr. STAT 3610 or STAT 3010. Least squares estimation, hypothesis testing and confidence interval estimation in regression; simple, polynomial and multiple linear regression; residual and lack-of-fit analysis; use of dummy variables; multiple and partial correlation analysis; model building algorithms and model comparisons; transformations.

STAT 4620 APPLIED NONPARAMETRIC STATISTICS (3) LEC. 3. Review of elementary probability; goodness-of-fit tests; for singles and several location parameters; tests for scale parameters; distribution tests; measures of association; bootstrap and permutation tests.

STAT 4630 APPLIED TIME-SERIES ANALYSIS (3) LEC. 3. ARIMA models: the autoregressive process, the moving average process, and the ARMA process; forecasting, errors and confidence intervals, updating forecast models; estimation; model building and assessment; applications in econometrics.

STAT 4970 SPECIAL TOPICS IN STATISTICS (1-3) LEC. Departmental approval. Special topics designed to meet the needs and interest of students. Course may be repeated for a maximum of 6 credit hours.
STAT 5000 INTERMEDIATE STATISTICAL METHODS FOR DATA SCIENCE (3) LEC. 3. Pr. STAT 3610 or STAT 3010. C Grade or better in STAT3610 or STAT3010 or equivalent. Principles of probability and statistics, multiple testing and bootstrapping, parametric and nonparametric regression, generalized linear models, time dependent data with a focus on Data Science.

STAT 5110 SAS PROGRAMMING AND APPLICATIONS (3) LEC. 3. Pr. STAT 3010 or STAT 3610. Emphasis is placed on using SAS routines to obtain statistical analyses for common statistical methods and interpreting output.

STAT 5210 R PROGRAMMING FOR DATA SCIENCE (3) LEC. 3, LEC. 3. Fundamental concepts on R programming language and popular R packages. Topics include basic syntax, R objects, control flow, file input and output, building R packages, data manipulation, visualization, interface to C, parallel computing, building web apps.

STAT 5330 DATA BASED DECISION MAKING USING SIX SIGMA (3) LEC. 3. Pr. STAT 3610 and INSY 4330. Departmental approval. Covers statistical tools needed for implementation of "Six Sigma", "Learn Six Sigma" and "Design for Six Sigma". Credit will not be given for both STAT 5330 and STAT 6330/ 6336.

STAT 5600 PROBABILITY AND STATISTICS FOR DATA SCIENCE (3) LEC. 3. Pr. STAT 3610 or STAT 3010 or MATH 1620. Grade of C or better in STAT 3610 or STAT 3010 and Grade of C or better in MATH 1620 or equivalent. Basic probability theory, random variables, multivariate random variables, expectation, random processes, times series, convergence of random processes, Markov chains, maximum likelihood estimation, Bayesian statistics, hypothesis testing, prediction, sampling and resampling methods, multivariate statistics.

STAT 5630 SAMPLE SURVEY, DESIGN AND ANALYSIS (3) LEC. 3. Pr. STAT 3600. Departmental approval. Estimation of means, proportions, finite populations, stratified sampling, systematic sampling ratio estimations.

STAT 5650 STATISTICAL LEARNING (3) LEC. 3. Pr. STAT 5000. or equivalent. Introduction to modern methods and algorithms in Statistics. Topics include common supervised and unsupervised learning methods such as linear regression, logistic regression, regularization, non-parametric regression, model assessment and selection, neural network, support vector machines, principal components analysis.

STAT 5670 PROBABILITY AND STOCHASTIC PROCESSES I (3) LEC. 3. Pr. MATH 2630 or MATH 2637. Random variables, discrete and absolutely continuous distributions. Poisson process, expectation and conditional expectation. Moment generating functions, limit distributions. Emphasis on probabilistic reasoning and problem solving. Credit will not be given for both STAT 5670 and MATH 5670.

STAT 5680 PROBABILITY AND STOCHASTIC PROCESSES II (3) LEC. 3. Pr. STAT 5670 or MATH 5670. Multivariate distributions, Central Limit Theorem, Laplace transforms, convolutions, simulations, renewal processes Continuous-time Markov chains, Markov renewal and semi-regenerative processes, Brownian motion and diffusion. Credit will not be given for both STAT 5680 and MATH 5680.

STAT 5690 CHAOTIC AND RANDOM PHENOMENA (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627. Statistics and modeling of random phenomena in connection to computational complexity, data analysis, processes of chance and chaotic nonlinear systems. Credit will not be given for both STAT 5690 and MATH 5690.

STAT 6000/6006 INTERMEDIATE STATISTICAL METHODS FOR DATA SCIENCE (3) LEC. 3. Pr. STAT 3610 or STAT 3010. C Grade or better in STAT 3610 or STAT 3010 or equivalent. Principles of probability and statistics, multiple testing and bootstrapping, parametric and nonparametric regression, generalized linear models, time-dependent data.

STAT 6110 SAS PROGRAMMING AND APPLICATIONS (3) LEC. 3. Pr. STAT 3010 or STAT 3610 or P/C STAT 7000. Emphasis is placed on using SAS routines to obtain statistical analyses for common statistical methods and interpreting output.

STAT 6210/6216 R PROGRAMMING FOR DATA SCIENCE (3) LEC. 3. Pr. STAT 6000. Fundamental concepts on R programming language and popular R packages. Topics include basic syntax, R objects, control flow, file input and output, building R packages, data manipulation, visualization, interface to C, parallel computing, building web apps.

STAT 6330/6336 DATA BASED DECISION MAKING USING SIX SIGMA (3) LEC. 3. Pr. STAT 3610 and INSY 4330. Departmental approval. Covers statistical tools needed for implementation of "Six Sigma", "Learn Six Sigma" and "Design for Six Sigma". Credit will not be given for both STAT 5330 and STAT 6330/ 6336.
STAT 6600/6606 PROBABILITY AND STATISTICS FOR DATA SCIENCE (3) LEC. 3. Pr. STAT 3610 or STAT 3010 and MATH 1620. Grade of C or better in STAT 3610 or STAT 3010 and Grade of C or better in MATH 1620 or equivalent. Basic probability theory, random variables, multivariate random variables, expectation, random processes, times series, convergence of random processes, Markov chains, Maximum Likelihood Estimation, Bayesian statistics, hypothesis testing, prediction, Sampling and Resampling methods, multivariate statistics.

STAT 6630 SAMPLE SURVEY, DESIGN AND ANALYSIS (3) LEC. 3. Pr. STAT 3600. Departmental approval. Estimation of means, proportions, finite populations, stratified sampling systematic sampling ratio estimations.

STAT 6650/6656 STATISTICAL LEARNING (3) LEC. 3. Pr. STAT 6000. or equivalent. Introduction to modern methods and algorithms in Statistics. Topics include common supervised and unsupervised learning methods such as linear regression, logistic regression, regularization, non-parametric regression, model assessment and selection, neural network, support vector machines, principal components analysis.

STAT 6670/6676 PROBABILITY AND STOCHASTIC PROCESSES I (3) LEC. 3. Pr. MATH 2630 or MATH 2637. Random variables, discrete and absolutely continuous distributions. Poisson process, expectation and conditional expectation. Moment generating functions, limit distributions. Emphasis on probabilistic reasoning and problem solving. Credit will not be given for both STAT and MATH 6670.

STAT 6680 PROBABILITY AND STOCHASTIC PROCESSES II (3) LEC. 3. Pr. MATH 6670 or MATH 6676 or STAT 6670 or STAT 6676. Multivariate distributions, Central Limit Theorem, Laplace transforms, convolutions, simulations, renewal processes Continuous-time Markov chains, Markov renewal and semi-regenerative processes, Brownian motion and diffusion. Credit will not be given for both STAT 6680 and MATH 6680.

STAT 6690 CHAOTIC AND RANDOM PHENOMENA (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627. Statistics and modeling of random phenomena in connection to computational complexity, data analysis, processes of chance and chaotic nonlinear systems. Credit will not be given for both STAT 6690 and MATH 6690.

STAT 7000/7006 EXPERIMENTAL STATISTICS I (4) LEC. 4. Departmental approval. Paired and independent sample t-tests, ANOVA, F-tests, contrasts, tests for trends, multiple comparisons, CR and RCB designs of experiments, regression.

STAT 7010 EXPERIMENTAL STATISTICS II (3) LEC. 3. Pr. STAT 7000. Advanced topics in experimental design: writing linear models for experiment-expected mean squares, variance components, nested designs, Latin Square Designs, split plot designs, ANOVA and multiple regression.

STAT 7020/7026 REGRESSION ANALYSIS (3) LEC. 3. Pr. STAT 7000. Departmental approval. Introduction to the method of least squares as it applies to regression and analysis of variance. Simple linear regression, multiple regression, model selection and diagnostics.

STAT 7030 CATEGORICAL DATA ANALYSIS (3) LEC. 3. Pr. STAT 3600 or MATH 3600 or STAT 7000. Departmental approval. Methods for analysis or categorical response data. Topics include Chi-square tests, Likelihood Ratio tests, Logistic Regression, and Loglinear Modeling.

STAT 7040 BIOSTATISTICS (3) LEC. 3. Pr. STAT 7000. Departmental approval. Epidemiology, biometry, methods of survival analysis.

STAT 7100 STATISTICAL ANALYSIS OF SURVEY, AGGREGATE AND LARGE DATA SOURCES (3) LEC. 3. Pr. STAT 2010 or STAT 2017. Departmental approval. Techniques commonly used in multivariate statistical analysis of data sources such as surveys, archival records, and other large data sets. Credit will not be given for STAT 7100 and SOCY 7100.

STAT 7250 PRACTICAL DATA ANALYSIS AND COMPUTATION FOR THE LIFE SCIENCES (3) LEC. 2. LAB. 3. Pr. STAT 7020 or WILD 7150. Data from the life sciences and advanced statistical techniques for data analyses and computaMon are brought together through a cross-fertilization of graduate students in the life sciences, statistics, and mathematics. Focus on production of publication-quality research on student-identified projects.

STAT 7270 EXPERIMENTAL DESIGN IN PSYCHOLOGY (4) LEC. 4. Pr. STAT 7000 and STAT 7020. Introduction to the analysis of data collected under differential experimental designs. Credit will not be given for both STAT 7270 and PSYC 7270.

STAT 7300/7306 ADVANCED ENGINEERING STATISTICS I (3) LEC. 3. Pr. STAT 3610. Departmental approval. Advanced concepts of experimental design including blocking, regression approach to analysis of variance, fractional factorials in base-2, and base-3 designs. Emphasis throughout is on improving industrial products and processes. Credit will not be given for both STAT 7300 and INSY 7300.
STAT 7310/7316 ADVANCED ENGINEERING STATISTICS II (3) LEC. 3. Pr. STAT 7300 or STAT 7306 or INSY 7300 or INSY 7306. Fractional factorial experimentation applied for the purpose of process and quality improvement and optimization, introduction to analysis of covariance, multiple regression analysis, and response surface analysis. Credit will not be given for both STAT 7310 and INSY 7310.

STAT 7600 STATISTICAL THEORY AND METHODS I (3) LEC. 3. Pr. STAT 3600. Departmental approval. Random variables, probability theory, random variables, probability distributions, sampling distributions, convergence.

STAT 7610 STATISTICAL THEORY AND METHODS II (3) LEC. 3. Pr. STAT 7600. Likelihood ratio, regression, ANOVA, categorical data, non-parametric methods, decision theory.

STAT 7650 COMPUTATIONAL STATISTICS (3) LEC. 3. Pr. STAT 7020 and STAT 7610. This course covers the theory and practice of common algorithms used for simulation, computing, and optimization in Statistics.

STAT 7670 APPLIED LONGITUDINAL DATA ANALYSIS (3) LEC. 3. To introduce students to statistical models and methods for the analysis of longitudinal data, i.e. data collected repeatedly on individuals (humans, animals, etc) over time (or other conditions).

STAT 7700 GENERALIZED LINEAR MODELS (3) LEC. 3. Pr. STAT 7600. Departmental approval. Exponential families and links functions, model fitting, likelihood methods, residual diagnostics, count data, estimating equations.

STAT 7800 LINEAR MODELS (3) LEC. 3. Pr. STAT 7610 and MATH 2660. Departmental approval. A rigorous development of some of the important topics of applied statistics: the multivariate normal distribution analysis of variance, regression, aspects of experimental design.

STAT 7810/7816 MODERN STOCHASTIC PROCESSES I (3) LEC. 3. Pr. (MATH 6670 or MATH 6676 or STAT 6670 or STAT 6676) and MATH 6210. Classical and Modern Topics in stochastic processes (Markov chains, Poisson process, Brownian motion). Applications and stochastic models (queues, stationary processes, population dynamics, finances). Credit will not be given for both STAT 7810 and MATH 7810.

STAT 7820/7826 APPLIED STOCHASTIC PROCESSES I (3) LEC. 3. Pr. MATH 7810 or MATH 7816 or STAT 7810 or STAT 7816. Classical and modern topics in stochastic processes (Markov processes, Random Walks, Martingales, Brownian motion.) Introduction to stochastic integrals and differential equations. Applications (queues, population dynamics, chaos finances). Credit will not be given for both STAT 7820 and MATH 7820.

STAT 7830 APPLIED STOCHASTIC PROCESSES II (3) LEC. 3. Pr. STAT 7810 or STAT 7816.

STAT 7840 APPLIED MULTIVARIATE STATISTICAL ANALYSIS (3) LEC. 3. Pr. STAT 7000. Multivariate normal distribution, Hotelling’s T2, MANOVA, discriminate analysis, principal components.

STAT 7850 THEORY OF STATISTICAL INFERENCE (3) LEC. 3. Pr. STAT 7610. Departmental approval. Bayesian methods, Markov Chain Monte Carlo methods, resampling techniques.

STAT 7860/7866 APPLIED TIME SERIES ANALYSIS (3) LEC. 3. Pr. STAT 3610. Departmental approval. Autoregressive and moving average models, differencing, estimation and forecasting, spectral theory.

STAT 7930 STATISTICAL CONSULTING PRACTICUM (3) PRA. 3. Pr. STAT 7000 and STAT 7010 and STAT 7020. This is a course in applied statistics, providing training in statistical consulting. Applications of commonly encountered statistical methods are explored in the consulting environment. Written and oral communication skills are emphasized, and ethical aspects of consulting are introduced. This course provides students with an opportunity to gain practical experience in consulting through various projects with clients, through the AU Statistical Consulting Center.

STAT 7940/7946 CAPSTONE PROJECT (3) LEC. 3. Discuss various topics while working on an industry-level project. Students will complete a semester-long project under the supervision of instructors.
STAT 7960 SPECIAL PROBLEMS IN STATISTICS (1-10) RES. Credit will not be given for both MATH 7960 and STAT 7960. Course may be repeated for a maximum of 10 credit hours.

STAT 7970 SPECIAL TOPICS (1-3) LEC. Departmental approval. Special topics designed to meet the needs and interests of students. Course may be repeated for a maximum of 6 credit hours.

STAT 7990 RESEARCH AND THESIS (1-10) DSR. Research for Master's thesis in Statistics. Course may be repeated with change in topic.

STAT 8400 ADVANCED QUANTITATIVE METHODS FOR MANAGEMENT I (3) LEC. 3. Pr. STAT 7000. or approved equivalent. Study of the application of linear regression analysis to business research. First advanced course in applied linear statistics models.

STAT 8410 ADVANCED QUANTITATIVE METHODS MANAGEMENT II (3) LEC. 3. or approved equivalent. Introduction to multivariate techniques in business research. Study of the theory and applications of ANOVA, ANCOVA, MANOVA, MANCOVE, Discriminate Analysis & Polytomous Logistic Regression.

STAT 8420 ADVANCED QUANTITATIVE METHODS FOR MANAGEMENT III (3) LEC. 3. Pr. STAT 7100 and STAT 8400 and STAT 8410. or approved equivalent. Third course in statistical modeling. Emphasis on applications of Principal Components Analysis, and Structural Equation Modeling to management research.

Biological Sciences

Marine Biology
The Marine Biology major provides students with a strong foundation in basic biological concepts such as genetics, ecology, cell biology and marine systems as well as chemistry and mathematics. The plan of study provides the opportunity to choose elective courses from a wide variety of courses offered at Auburn University. In addition, students are required to take summer courses offered at marine labs around the United States, including Dauphin Island Sea Lab and Gulf Coast Research Lab. Students are also encouraged to consider internships and undergraduate research. Marine Biology graduates are well-prepared for advanced study in any marine science area or employment with marine labs, various governmental and nongovernmental agencies involved with coastal management and conservation, and tourism.

Microbial, Cellular and Molecular Biology
The Microbial, Cellular and Molecular Biology major provides students with an excellent foundation in the areas of microbiology, cellular and molecular biology that emphasizes the understanding of life at the cellular and molecular level. The choice of a formal option within the major allows students to concentrate on a particular area of interest. Each option provides a wide variety of courses and opportunities for undergraduate research. Students selecting the Microbiology option will be well prepared for postgraduate work or career advancement in a number of areas including food, environmental and medical microbiology. Students selecting the Cell and Molecular Biology option would also be well prepared for postgraduate study or career advancement in any area of eukaryotic cell or molecular biology. Both options provide excellent preparation for students interested in biotechnology or professional programs in the health sciences.

Organismal Biology
The Organismal Biology major provides students with a solid foundation in basic biological concepts, such as evolution, ecology, genetics and cell biology and also provides a foundation in physics, chemistry and mathematics. The three formal options within the major allow students to specialize in various ways, while focusing on the study of plants or animals through the choice of elective courses. The major provides a solid foundation for pursuing graduate degrees (M.S. or Ph.D.) in biological fields, but also prepares students for a wide range of laboratory and field-based research positions in environmental resource assessment, management and conservation within federal, state and private agencies or organizations.

Majors
- Marine Biology (p. 1226)
- Microbial, Cellular and Molecular Biology Microbiology Option (MCMB) (p. 1234)
- Microbial, Cellular and Molecular Biology Cell & Molecular Biology Option (MCCM) (p. 1233)
- Microbiology pre-professional concentrations:
• Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1231)
• Pre-Physical Therapy, Pre-Physician Assistant (p. 1232)
• Pre-Veterinary (p. 1304)
• Organismal Biology - Conservation & Biodiversity Option (p. 1237)
• Organismal Biology - Ecology, Evolution & Behavior Option (p. 1235)
• Organismal Biology - Integrative Biology Option (p. 1227)
• Organismal Biology - pre-professional concentrations:
  • Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1228)
  • Pre-Physical Therapy, Pre-Physician Assistant (p. 1230)
  • Pre-Veterinary (p. 1307)

**Biology Courses**

**BIOL 1000/1003 INTRODUCTION TO BIOLOGY (3)**
LEC. 3. Science Core. Introduction to biological principles relevant to human society. Designed for non-science majors. Credit will not be given for both BIOL 1000 and BIOL 1020 or BIOL 1027.

**BIOL 1001 INTRODUCTION TO BIOLOGY LABORATORY (1)**
LAB. 2. Pr. P/C BIOL 1000 or P/C BIOL 1003. Laboratory course for BIOL 1000 or BIOL 1003.

**BIOL 1010/1013 A SURVEY OF LIFE (3)**
LEC. 3. Pr. BIOL 1000 or BIOL 1020 or BIOL 1023 or BIOL 1027 or SCMH 1010 or SCMH 1013 or SCMH 1017 or SCMH 1020 or SCMH 1023 or SCMH 1027. Science Core. Emphasis on contrasting strategies employed by organisms to meet similar biological needs. Credit will not be given for both BIOL 1010 and BIOL 1030 or BIOL 1037.

**BIOL 1011 A SURVEY OF LIFE LABORATORY (1)**
LAB. 2. Pr. P/C BIOL 1010 or P/C BIOL 1013. Laboratory course for BIOL 1010.

**BIOL 1020/1023 PRINCIPLES OF BIOLOGY (3)**
LEC. 3. Science Core. Introduction to the physical, chemical, and biological principles common to all organisms. Credit will not be given for both BIOL 1020 and BIOL 1000 or BIOL 1027.

**BIOL 1021 PRINCIPLES OF BIOLOGY LABORATORY (1)**
LAB. 2. Pr. P/C BIOL 1020 or P/C BIOL 1023. Laboratory Course for BIOL 1020.

**BIOL 1027 HONORS BIOLOGY (4)**
LEC. 3. LAB. 2. Pr. Honors College. Science Core. Introduction to the physical, chemical, and biological principles common to all organisms. Credit will not be given for both BIOL 1027 and BIOL 1000 or BIOL 1020.

**BIOL 1030 ORGANISMAL BIOLOGY (3)**
LEC. 3. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027. Science Core. Principles and fundamentals of biology at the organismal level. Credit will not be given for both BIOL 1030 and BIOL 1010 or BIOL 1037.

**BIOL 1031 ORGANISMAL BIOLOGY LABORATORY (1)**
LAB. 2. Pr. P/C BIOL 1030. Laboratory Course for BIOL 1030.

**BIOL 1037 HONORS ORGANISMAL BIOLOGY (4)**
LEC. 3. LAB. 1. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027. Science Core. Principles and fundamentals of biology at the organismal level. Credit will not be given for both BIOL 1037 and BIOL 1010 or BIOL 1030.

**BIOL 2100 PROFESSIONAL DEVELOPMENT (1)**
LEC. 1. Introduction to career opportunities and student development options for majors in biological sciences. Students will investigate post-graduation academic and professional options, develop writing skills by creating resumes and ePortfolios, and explore course and research options with the department.

**BIOL 2425 MARINE BIOLOGY (4)**
LEC. 4. Pr. BIOL 1030 or BIOL 1037. Departmental approval. The invertebrates, vertebrates and marine plants as communities with emphasis on local examples. Taught only at Dauphin Island Sea Lab. (DISL).

**BIOL 2500/2503 HUMAN ANATOMY AND PHYSIOLOGY I (3)**
LEC. 3. Pr. (BIOL 1000 or BIOL 1020 or BIOL 1023 or BIOL 1027) and P/C BIOL 2501. Study of the structure and function of the human body. First half of two-part sequence with BIOL 2510, concentrating on tissues, muscle, and nervous system.

**BIOL 2501 HUMAN ANATOMY AND PHYSIOLOGY I LABORATORY (1)**
LEC. 1. Pr. (BIOL 1000 or BIOL 1020 or BIOL 1027) and (P/C BIOL 2500 or P/C BIOL 2503). Lab course for study of the structure and function of the human body. First half of two-part sequence with BIOL 2510, concentrating on tissues, muscle, and nervous system.
BIOL 2510 HUMAN ANATOMY AND PHYSIOLOGY II (3) LEC. 3. Pr. (BIOL 2500 or BIOL 2503) and BIOL 2501. Study of the structure and function of the human body. Second half of two-part sequence with BIOL 2500/2501, concentrating on cardiovascular, respiratory, digestive, urinary, reproductive, and endocrine systems.

BIOL 2511 HUMAN ANATOMY AND PHYSIOLOGY II LABORATORY (1) LEC. 1. Pr. (BIOL 2500 or BIOL 2503) and BIOL 2501. Coreq. BIOL 2510. Lab course for study of the structure and function of the human body. Second half of two-part sequence with BIOL 2500, concentrating on the individual organ systems.

BIOL 3000/3003 GENETICS (3) LEC. 3. Pr. (BIOL 1020 or BIOL 1023 or BIOL 1027). An overview of theoretical principles of transmission, cytological, molecular, and population genetics. Problem solving will be emphasized. May count either BIOL 3000 or BIOL 3003 or AGRI 3000.

BIOL 3001 GENERAL GENETICS LABORATORY (1) LAB. 2. Pr. (BIOL 1020 or BIOL 1023 or BIOL 1027) and (P/C BIOL 3000 or P/C BIOL 3003). Laboratory provides practical experience in the areas of transmission, cytological, molecular, and population genetics. Problem solving is emphasized through analysis of simulated and real genetics data sets.

BIOL 3010/3013 COMPARATIVE ANATOMY (4) LEC. 3. LAB. 1. Pr. BIOL 1030 or BIOL 1037. We will examine evolution of anatomical structures from early chordates through vertebrates (both living and extinct). Students will learn the main vertebrate taxa and how each anatomical system appears in them. Students will also examine the linkage of these systems through all vertebrates. The phylogenetic tree (evolutionary relationships of the vertebrates) will be the backbone on which we explore the diversity of anatomy. In lab, students will use and develop their integrative skills by examining the anatomy of a wide variety of organisms.

BIOL 3011 COMPARATIVE ANATOMY LABORATORY (1) LAB. 1. Pr. P/C BIOL 1030 or BIOL 1037. Laboratory to accompany Comparative Anatomy Lecture. This lab course will explore the diverse morphologies of vertebrates.

BIOL 3020 GENOMIC BIOLOGY (4) LEC. 3. LAB. 2. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 or BIOL 3000 or BIOL 3003 or AGRI 3000. An overview of genes, genomes, and genomic and proteomic approaches and methodology. Application of principles of biology at the genomic level. Includes an introduction to bioinformatic approaches to genomic problems in a computer laboratory setting.

BIOL 3030/3033 EVOLUTION AND SYSTEMATICS (3) LEC. 3. Pr. BIOL 1030 or BIOL 1037. An introduction to evolutionary processes, classification, of organisms and scientific nomenclature.

BIOL 3040 BIOLOGY OF MARINE SYSTEMS (3) LEC. 3. Pr. (BIOL 1020 or BIOL 1023 or BIOL 1027) and (BIOL 1030 or BIOL 1037). Introduction to marine systems and biological investigations of coastal, near shore and open ocean organisms and processes.

BIOL 3060 ECOLOGY (4) LEC. 3. LAB. 3. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037. Interactions of organisms with their environments and characteristics of populations, communities, and ecosystems. 8 hours of Biology.

BIOL 3075 INTRODUCTION TO OCEANOGRAPHY (4) LEC. 4. Pr. (MATH 1150 or MATH 1153) and (CHEM 1110 or CHEM 1117 or CHEM 1030 or CHEM 1033) and PHYS 1500. Departmental approval. The physics, chemistry, biology, and geology of the oceans. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 3100 PLANT BIOLOGY (4) LEC. 4. LAB. 1. Pr. (BIOL 1030 or BIOL 1037) and CHEM 1010 or CHEM 1030 or CHEM 1033 or CHEM 1110 or CHEM 1117. Introduction to the morphology, anatomy, physiology and classification of plants with laboratory.

BIOL 3200/3203 GENERAL MICROBIOLOGY (3) LEC. 3. Pr. (BIOL 1020 or BIOL 1023 or BIOL 1027) and CHEM 1030 or CHEM 1033 or CHEM 1110 or CHEM 1117. Introduction to the science of microbiology, emphasizing cell structure, systematics, growth, genetics, and the role in human affairs.

BIOL 3201 GENERAL MICROBIOLOGY LABORATORY (1) LAB. 2. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and CHEM 1030 or CHEM 1033 or CHEM 1110 or CHEM 1117 and P/C BIOL 3200 or P/C BIOL 3203. Fundamental laboratory techniques required to safely handle, enumerate, identify, and provide basic biochemical characterization of microorganisms.

BIOL 4000/4003 HISTOLOGY (3) LEC. 3. Pr. (BIOL 1030 or BIOL 1037) and BIOL 1031. Morphology and classification of tissues; arrangement of tissues in organs and systems of vertebrate animals.

BIOL 4001 HISTOLOGY LABORATORY (1) LAB. 2.8. Pr. (BIOL 1030 or BIOL 1037) and (P/C BIOL 4000 or P/C BIOL 4003). Laboratory investigation of the morphology and classification of tissues using prepared slides to reveal the arrangement of tissues in organs and organ systems of vertebrate animals.
BIOL 4010 INVERTEBRATE BIODIVERSITY (4) LEC. 3. LAB. 3. Pr. BIOL 1030 or BIOL 1037. Survey of the phyla of invertebrates with emphasis on morphology, anatomy, ecology, evolution, and systematics.

BIOL 4015 BIOLOGY AND CONSERVATION OF MARINE TURTLES (2) LEC. 15. LAB. 45. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and BIOL 3040. OR permission of Marine Biology coordinator. An introductory overview of the biology of marine turtles. Topics include: identification, distribution, nesting & migratory behavior, feeding, population biology, development, paleontology and conservation. Extensive laboratory and field studies of multiple species of turtles. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4025 ECOLOGY OF THE FLORIDA EVERGLADES (2) LEC. 15. LAB. 45. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and BIOL 3040. Examines the natural history, ecology and evolution, and human impact on the Everglades. Includes intensive lectures and a more than 1-week long campsites based field trip in the Everglades. Multiple short trips to various locales within the Everglades. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4033 HISTOLOGY LABORATORY (1) DSL. 3. Pr. (BIOL 1030 or BIOL 1037) and (P/C BIOL 4000 or P/C BIOL 4003). Laboratory investigation of the morphology and classification of tissues using prepared digital slides to reveal the arrangement of tissues in organs and organ systems of vertebrate animals.

BIOL 4035 INTRODUCTION TO MARINE ANIMAL NEUROBIOLOGY (3) LEC. 15. LAB. 60. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037. The neuroanatomy and neurophysiology of marine invertebrates and vertebrates. Lectures and labs on neurons, glia, resting and action potentials, synapses and neurotransmitters, muscle contraction, sensorimotor integration; neurophysiological bases of behavior; labs include computer simulation of cellular neurobiology. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4045 MARINE MAMMAL BIOLOGY (4) LEC. 30. LAB. 60. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and BIOL 3040. Introduction to the evolution, taxonomy and classification, anatomy, physiology, behavior, conservation and management issues of marine mammals, including cetaceans, pinnipeds, mustelids, sirenians and the polar bear. Lab and field research methods used to study marine mammals will be covered. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4065 MARINE CONSERVATION BIOLOGY (4) LEC. 45. LAB. 30. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and (BIOL 3040 or BIOL 3060). Study of major threats to marine biodiversity as and potential solutions to the threats. Students discuss current topics in marine conservation biology and critically debate marine conservation literature. Field trips to impacted and pristine sites will demonstrate principles. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4085 HURRICANES OF THE GULF OF MEXICO (2) LEC. 30. An introductory survey with emphasis on Gulf of Mexico hurricanes. Hurricane features. Basic principles of the atmosphere, review of Gulf, Atlantic and Caribbean hurricanes, El Nino, changes in the Atlantic circulation, hurricane formation, development, features, movement, steering and forecasting. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4095 COASTAL BIRDS OF ALABAMA (2) LEC. 15. LAB. 30. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and BIOL 3040. Behavior and ecology-oriented avian field biology. Identification, banding, record/broadcast, other survey methods. Emphasis on behavioral ecology. Extensive field effort along the Gulf Coast and in the Mobile/Alabama/Tombigbee/Tensaw River Delta, other riparian environments, and salt marshes. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4100/4103 CELL BIOLOGY (3) LEC. 3. Pr. CHEM 2030 or (CHEM 2070 or CHEM 2077) and (BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000) and (BIOL 1030 or BIOL 1037). Introduction to cellular structure and processes, including evolution, organization, physiology, molecular biology of cells, membranes, cytoplasm, and organelles as well as energy, transport, motility, cell division, signaling, transcription, and translation.

BIOL 4101 CELL BIOLOGY LABORATORY (2) LAB. 4. Pr. P/C BIOL 4100 or P/C BIOL 4103. Light/electron microscopy, cell structure, origins of life, centrifugation, protein/nucleic acid electrophoresis, and blotting, motility, DNA purification, chromatography, pH, fluorescence microscopy.

BIOL 4135 MARINE BEHAVIORAL ECOLOGY (4) LEC. 30. LAB. 60. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and BIOL 3040. Animal behavior in the context of the marine environment. Students study the ecological and evolutionary significance of behavior in a marine setting. Topics include principles of marine behavioral ecology, techniques for observing behavior, conducting behavior experiments, and data collection. Taught only at Dauphin Island Sea Lab (DISL).
BIOL 4150 HUMAN GENETICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or AGRI 3000 or FISH 3000 and BIOL 4100 and (CHEM 2080 or CHEM 2087). Study of the biological interaction of genes, effects of mutation and changes in gene frequency in human populations. Emphasis on molecular approach to study evolutionary changes in human gene pools.

BIOL 4410 VERTEBRATE DEVELOPMENT (5) LEC. 3. LAB. 4. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Morphogenesis and organogenesis of frog, chick, pig, and human from a descriptive and analytical viewpoint.

BIOL 4415 SHARK AND RAY BIOLOGY (2) LEC. 15. LAB. 45. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and BIOL 3040. An introduction to the biology of sharks and rays with special emphasis on regional shark fauna and field technique. Topics: chondrichthyan origin, systematics, sensory biology, trophic ecology, reproductive biology, life history, ecology, fisheries and conservation. Extensive lab and field work. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4425 MARINE FISHERIES MANAGEMENT (4) LEC. 4. Departmental approval. Fisheries management philosophy, objectives, problems, and principles involved in management decisions. Taught at Gulf Coast Research Laboratory.

BIOL 4435 SPECIAL TOPICS IN MARINE SCIENCE (1-6) LEC. Departmental approval. An opportunity for students to study in an area in which GCRL offers no formal course; not research oriented. Taught at Gulf Coast Research Laboratory. Course may be repeated for a maximum of 6 credit hours.

BIOL 4445 SPECIAL PROBLEMS IN MARINE SCIENCE (1-6) AAB/LEC. Departmental approval. Individualized research-oriented experience. Taught at Gulf Coast Research Laboratory. Course may be repeated for a maximum of 6 credit hours.

BIOL 4465 PARASITES OF MARINE ANIMALS (6) LEC. 3. LAB. 6. Pr. BIOL 5110. Departmental approval. A study of the parasites of marine estuarine animals with emphasis on morphology, taxonomy, life histories, and host-parasite relationships. Taught at Gulf Coast Research Laboratory.

BIOL 4475 MARINE ICHTHYOLOGY (6) LEC. 6. Departmental approval. Biology of the major piscine taxa in Mississippi Sound. Principles involved in classification and evolutionary relationships of these organisms. Taught at Gulf Coast Research Laboratory.

BIOL 4485 MARINE ECOLOGY (5) LEC. 5. Pr. BIOL 4010. The relationship of marine organisms to their environment and the effects of environment on abundance and distribution on marine organisms. Taught at Gulf Coast Research Laboratory, Departmental approval and 16 hours of Biological Science including BIOL 4010.

BIOL 4515 MARINE INVERTEBRATE ZOOLOGY (4) LEC. 4. Pr. At least 10 credits in BIOL 2000-8990. Departmental approval. The natural history, systematics, and morphology of marine invertebrates from the Gulf of Mexico; oriented toward a field and laboratory approach. Participation in extended field trips is part of the course. Taught at DISL.

BIOL 4525 DOLPHINS AND WHALES (2) LEC. 2. Pr. BIOL 1030 or BIOL 1037. Departmental approval. Classification, anatomy, and ecology of the cetaceans. Taught at DISL.

BIOL 4535 COASTAL ZONE MANAGEMENT (2) LEC. 2. Pr. BIOL 1030 or BIOL 1037. Departmental approval. Management of shorelines and flood plains, and current legislation. Water quality and ecosystem quality management. Taught at DISL.

BIOL 4555 COASTAL ORNITHOLOGY (3) LEC. 3. Pr. BIOL 4020. Departmental approval. Coastal and pelagic birds with emphasis on ecology, taxonomy, and distribution. Taught at GCRL.

BIOL 4565 MARINE VERTEBRATE ZOOLOGY (4) LEC. 4. Pr. BIOL 1030 or BIOL 1037. Departmental approval. Systematics, zoogeography and ecology of marine fishes, reptiles, and mammals. Taught at DISL. May not be substituted for BIOL 4020.

BIOL 4575 MARINE ECOLOGY (4) LEC. 4. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027. Prerequisites: BIOL1020 or marine biology. Departmental approval. Experimental ecological theory and its application to interactions of marine organisms with each other and the environment. Includes laboratory, extensive field trip experience. Taught at DISL.

BIOL 4585 PLANKTON BIOLOGY (2) LEC. 15. LAB. 45. Pr. (BIOL 1020 and BIOL 1021 or BIOL 1023 or BIOL 1027) and (BIOL 1030 and BIOL 1031 or BIOL 1037). Students will learn about the biology of all forms of plankton and the methods for their study including optical, chemical and molecular techniques. Students will understand the basic methods of study and be able to sight-identify major groups. Taught only at Dauphin Island Sea Lab (DISL).
BIOL 4920 INTERNSHIP IN BIOLOGY (1-4) INT. SU. Application of biology concepts and skills in a professional experience. 12 credit hours in 3000-level or higher BIOL courses. Departmental approval. Student must be enrolled in a major offered by the Department of Biological Sciences. Course may be repeated for a maximum of 4 credit hours.

BIOL 4950 SENIOR SEMINAR (1) LEC. 1. Departmental approval. Oral presentation and discussion of recent scientific publications from a selected area of biological sciences. One hour is required for all majors. Course may be repeated for a maximum of 3 credit hours.

BIOL 4967 HONORS SPECIAL PROBLEMS (1-3) LEC. Pr. Honors College. Departmental approval and membership in the Honor College. Course may be repeated for a maximum of 3 credit hours.

BIOL 4970 SPECIAL TOPICS (1-4) AAB. Departmental approval. Instruction and discussion in a selected current topic in Biological Sciences. Course may be repeated for a maximum of 8 credit hours.

BIOL 4980 UNDERGRADUATE RESEARCH (2-4) AAB/IND. Directed research in an area of specialty within the department. Course may be repeated for a maximum of 6 credit hours.

BIOL 4997 HONORS THESIS (1-3) IND. Pr. Honors College. Undergraduate research and thesis. Course may be repeated for a maximum of 3 credit hours.

BIOL 4AA0 PROFESSIONAL DEVELOPMENT II (0) PRA. SU. Students enrolled in this course will complete the ePortfolio that they began developing as Freshmen, in BIOL 2100 - Professional Development I. Successfully designing and completing a professional ePortfolio will provide students with: 1. An opportunity to create a unified, polished and coherent educational and professional history of themselves. 2. A platform to organize their thinking about skills and experiences and the opportunity to connect them to the next step in career development. 3. A place to collect, present and reflect on evidence of professional development and growth during the undergraduate experience.

BIOL 5020 DEVELOPMENTAL BIOLOGY (3) LEC. 3. Pr. BIOL 4100 and BIOL 4410. Consideration of induction, constancy of the genome, pathfinding by migrating cells, morphogenetic movements, and other developmental processes.

BIOL 5050 FUNDAMENTALS OF BIOPHYSICS (2) LEC. 2. Pr. PHYS 1510 or BIOL 4100. Introduction to use of theories and methods of physics in biology, illustrated by discussion of organism size, metabolism, physiology, vision, hearing, cell cellular and molecular processes, medicine, physiology and molecular biology.

BIOL 5090 CONSERVATION BIOLOGY (3) LEC. 3. Pr. BIOL 3060. This course is an overview of ethical, economic and biological aspects of conservation biology at scales ranging from local to global. Credit will not be given for both BIOL 5090 and BIOL 6090.

BIOL 5110 PARASITOLOGY (4) LEC. 3. LAB. 3. Pr. BIOL 1030 or BIOL 1037 or BIOL 2500 or BIOL 2503. Students must have Junior or Senior standing. Development, identification, host-parasite relationships, and medical significance of parasitic protozoa, helminthes, and arthropods that infect humans, domestic animals and wildlife. May count either BIOL 5110 or LABT 4050.

BIOL 5120 SYSTEMATIC BOTANY (4) LEC. 3. LAB. 3. Pr. (BIOL 1030 or BIOL 1037). Classification, nomenclature, distribution, systematics, and evolution of vascular plants.

BIOL 5130 ADVANCED PLANT PHYSIOLOGY (3) LEC. 3. Pr. BIOL 3100 and (CHEM 2030 or CHEM 2080 or CHEM 2087). Physiological and biochemical processes affecting plant growth and development including water relations, photosynthesis, respiration, and hormones.

BIOL 5131 ADVANCED PLANT PHYSIOLOGY LABORATORY (1) LAB. 3. Pr. BIOL 3100 and (CHEM 2081 or BIOL 5130). Laboratory exercises in plant physiology. Including water relations, metabolism and growth, and development.

BIOL 5140 PLANT ECOLOGY (4) LEC. 3. LAB. 4. Pr. (BIOL 1030 or BIOL 1037) and BIOL 3060. Exploration of ecological interactions between plants and their environment. Field trips emphasize Southeastern habitats/plant examples. Includes 3-day weekend field trip.

BIOL 5150 COMMUNITY ECOLOGY (3) LEC. 3. Pr. BIOL 3060. Dynamics of ecological communities, including niches, species interactions, succession, island biogeography, biodiversity and food webs. May count BIOL 5150 or BIOL 6150.

BIOL 5160 FIELD BIOLOGY AND ECOLOGY (3-15) LEC. 3. Prereq. 15 hours of biology. Intensive classroom and field studies of an area outside Alabama. Course may be repeated for a maximum of 15 credit hours.

BIOL 5190 CELL AND MOLECULAR SIGNAL TRANSDUCTION (3) LEC. 3. Pr. BIOL 4100 and BIOL 5220. Study of cellular communication and regulation with emphasis on integration between cellular, molecular, genetic, and biochemical approaches.
BIOL 5200 CLINICAL MICROBIOLOGY (5) LEC. 3. LAB. 4. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201. Isolation, cultivation, identification, classification and pathogenesis of infectious agents with emphasis on bacteria; includes clinical materials, Eubacteria, Mycoplasmata, Rickettsiae and Spirochetes. May count either BIOL 5200 or BIOL 6200.

BIOL 5210 MICROBIAL PHYSIOLOGY (3) LEC. 3. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201 and (CHEM 2030 or CHEM 2080 or CHEM 2087). General physiology of microbial cells emphasizing fermentation, respiration, photosynthesis, nitrogen fixation, cell wall synthesis, membranes, and macromolecular synthesis.

BIOL 5220 INTRODUCTORY MOLECULAR GENETICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000) and (BIOL 3200 or BIOL 3203) and BIOL 3201. Principles of gene expression including replication, transcription, and translation; structure and regulation of genes; concepts and techniques in recombinant DNA.

BIOL 5230 VIROLOGY (3) LEC. 3. Pr. (P/C BIOL 5220 or P/C BIOL 6220) or (P/C BIOL 5260 or P/C BIOL 6260). Biology of viruses, including structure, entry, replication, assembly and release, pathogenesis, and epidemiology of viral infections. May count BIOL 5230 or BIOL 6230.

BIOL 5240 ANIMAL PHYSIOLOGY (4) LEC. 3. LAB. 3. Pr. BIOL 4100 or (CHEM 2030 or CHEM 2070 or CHEM 2077). General overview of the function of the major systems in animals, including evolution and adaptation to specific environments.

BIOL 5250 MICROBIAL EVOLUTION AND DIVERSITY (4) LEC. 3. LAB. 2. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000 and (BIOL 3200 or BIOL 3203) and BIOL 3201. Introduction to microbial evolutionary history and theory, and survey of microbial diversity. Credit will not be given for both BIOL 5250 and BIOL 6250.

BIOL 5260 PROKARYOTIC MOLECULAR GENETICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000 and (BIOL 3200 or BIOL 3203) and BIOL 3201. Molecular principles of bacterial genetics including gene structure, genetic organization, regulation of gene expression, acquisition and loss of genes leading to microbial evolution. Credit will not be given for both BIOL 5260 and BIOL 6260.

BIOL 5270 HOST-MICROBE INTERACTIONS (3) LEC. 3. Pr. (BIOL 3200 or BIOL 3203) and (BIOL 3201) and (BIOL 5220 or BIOL 5260). This course will explore interactions between microbes and their hosts including plants, insects and animals. Credit will not be given for both BIOL 5270 and 6270.

BIOL 5280 GENETHICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Twenty-first century biotechnology and related ethical issues, including human cloning, stem cells, neuroenhancement, age retardation, genetic enhancement, and nanobiology. May count BIOL 5280 or 6280.

BIOL 5300 PLANT ANATOMY AND DEVELOPMENT (4) LEC. 3. LAB. 4. Pr. BIOL 3100. Investigation of the various levels of plant organization from subcellular to organ through use of light and scanning electron microscopes.

BIOL 5320 PLANT GENE EXPRESSION (4) LEC. 4. Pr. BIOL 3100. Departmental approval. Genetic expression of genetic elements in plants from the recent literature.

BIOL 5330 DEVELOPMENTAL GENETICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or AGRI 3000 or FISH 3000. Study of the genetics and genetic mechanisms behind developmental processes occurring in a range of species. May count either BIOL 5330 or BIOL 6330.

BIOL 5340 PROTOZOOLOGY (4) LEC. 3. LAB. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Life history, identification, cell biology, and evolution of free-living and parasitic protozoa of the major groups. Laboratory includes techniques for microscopy.

BIOL 5350 BEHAVIORAL ECOLOGY (3) LEC. 3. Pr. (BIOL 3030 or BIOL 3033) and BIOL 3060. Evolution of behaviors via natural, sexual, and kin selections; evolutionary influences on social groups, mating systems, cooperative breeding, and other interactions.

BIOL 5360 POPULATION ECOLOGY (3) LEC. 3. Pr. BIOL 3060 and (MATH 1610 or MATH 1613 or MATH 1617). Quantitative study of populations, including life tables, Leslie matrices, exponential and logistic models, metapopulations, and life-history theory.

BIOL 5370 MOLECULAR ECOLOGY (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000) and BIOL 3060. General overview of the concepts and techniques regarding the application of molecular variation in answering questions pertaining to populations and communities of organisms. Credit will not be given for both BIOL 5370 and BIOL 6370.

BIOL 5380 GENERAL ICHTHYOLOGY (4) LEC. 3. LAB. 4. Pr. BIOL 1030 or BIOL 1037. Survey of the biodiversity of world and local fishes with an overview of ecology, behavior, biology, and conservation of fishes.
BIOL 5425 MARINE BOTANY (4) LEC. 4. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027. Departmental approval. Pr. BIOL 1020 or equiv. Survey of microscopic and macroscopic algae, salt marsh vegetation, sea grasses, mangroves and maritime forests with regard to identification, distribution, structure, ecology and physiology. Field trips and laboratory work. Taught at DISL.

BIOL 5465 MARINE MICROBIOLOGY (5) LEC. 3. LAB. 2. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201. Departmental approval. The role of microorganisms in marine environments.

BIOL 5500 IMMUNOLOGY (3) LEC. 3. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201 and (BIOL 3000 or BIOL 3003 or BIOL 3020). The cellular and molecular basis of the immune response, including antigen presentation, immunogenetics, effector mechanisms, and medical immunology. May count either BIOL 3500 or BIOL 5500.

BIOL 5501 IMMUNOLOGY LAB (2) LAB. 4. Pr. P/C BIOL 5500 or P/C BIOL 3500. Techniques illustrating principles of antigen-antibody interactions and their application in immunoassays, identification of leukocytes, cellular interactions, and antibody production.

BIOL 5510 BIOGEOGRAPHY (3) LEC. 3. Patterns and processes associated with the distribution of living and fossil organisms.

BIOL 5521 GENE EXPRESSION AND RECOMBINANT DNA LABORATORY (2) LEC. 2. LAB. 4. Pr. P/C BIOL 5220 or P/C BIOL 5260. Laboratory experiences demonstrating concepts and techniques in recombinant DNA.

BIOL 5525 MARINE BEHAVIORAL ECOLOGY (4) LEC. 3. LAB. 3. Departmental approval. Study of animal behavior and the influence by and interaction with the environment and the ecological and evolutionary significance of these behaviors. Prereq. Vertebrate and Invertebrate Zoology. Taught at DISL.

BIOL 5535 MARINE CONSERVATION BIOLOGY (4) LEC. 3. LAB. 3. Departmental approval. Major threats to marine biodiversity, current topics in marine conservation biology and critical examination of the literature. Pr. General or Marine Ecology course. Taught DISL.

BIOL 5550 NANOMEDICINE (2) LEC. 2. Pr. PHYS 1510 and CHEM 2080 and BCHE 5180. Nanomedicine is a branch of medicine that applies the knowledge and tools of nanotechnology to the prevention and treatment of disease. It involves the use of nanoscale materials, such as biocompatible nanoparticles, nanorobots and nanosensors, for diagnosis, drug delivery, and sensing in living organisms.

BIOL 5560 MAMMALIAN PHYSIOLOGY (BIOMEDICAL PHYSIOLOGY) (5) LEC. 4.25. LAB. 2.75. Pr. (BIOL 1030 or BIOL 1037) or (BIOL 2500 or BIOL 2503) and BIOL 2501 and (CHEM 2030 or CHEM 2070 or CHEM 2077). An in-depth investigation of the physiology of the major mammalian organ systems.

BIOL 5565 ETHOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 1030 or BIOL 1037) and BIOL 3060. Animal behaviors, analysis of their adaptive value, development, and evolution.

BIOL 5660 FOOD MICROBIOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201. Introduction to basic and applied microbiology in food, including how bacteria, viruses, parasites, yeasts and mold affect and in turn are affected by foods both positively and negatively. May count either FDSC 5660, BIOL 5660, FDSC 6600, or BIOL 6600.

BIOL 5700 APPLIED AND ENVIRONMENTAL MICROBIOLOGY (4) LEC. 3. LAB. 2. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201. Introduction to the ecology, systematics, interrelationships, and role of micro-organisms in geochemical cycles, bioremediation and pharmaceutical production.

BIOL 5750 ORNITHOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 3030 or BIOL 3033) and BIOL 3060. Taxonomy, evolution, ecology, and behavior of birds.

BIOL 5760 MAMMALOGY (4) LEC. 3. LAB. 3. Characteristics, origins, ecology, behavior, reproduction, physiology, and diversity of mammals. Labs include survey or current literature, field trips, data analysis, and report preparation.

BIOL 5800 INTRODUCTION TO COMPUTATIONAL BIOLOGY (3) LEC. 2. LAB. 1. Pr. STAT 2510. Overview of computational approaches to biological data analysis. Additionally, students will learn basic statistical and graphical analysis. May count either BIOL 5800 or BIOL 6800.

BIOL 5850 FUNCTIONAL GENOMICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or BIOL 3020 or FISH 3000 or AGRI 3000) and BIOL 4100 and BIOL 5800. An active-learning course to study the functional aspects of the genome emphasizing gene regulation and functional genetic variation. May count either BIOL 5850 or BIOL 6850.
BIOL 5860 BIOINFORMATICS AND GENOME ANALYSIS (3) LEC. 2. LAB. 1. Pr. (BIOL 3000 or BIOL 3003 or BIOL 3020 or FISH 3000 or AGRI 3000) and BIOL 5800. Overview of informatic approaches to biological data analysis. Students will use the scientific method to investigate key questions in model organisms through emerging 'omics fields. May count either BIOL 5860 or BIOL 6860.

BIOL 6020 DEVELOPMENTAL BIOLOGY (3) LEC. 3. Pr. BIOL 4100 and BIOL 4410. Consideration of induction, constancy of the genome, pathfinding by migrating cells, morphogenetic movements, and other developmental processes.

BIOL 6050 FUNDAMENTALS OF BIOPHYSICS (2) LEC. 2. Pr. PHYS 1510 or BIOL 4100. Introduction to use of theories and methods of physics in biology, illustrated by discussion of organism size, metabolism, physiology, vision, hearing, cell cellular and molecular processes in medicine, physiology and molecular biology.

BIOL 6090 CONSERVATION BIOLOGY (3) LEC. 3. Pr. BIOL 3060. This course is an overview of ethical, economic and biological aspects of conservation biology at scales ranging from local to global. Credit will not be given for both BIOL 5090 and BIOL 6090.

BIOL 6110 PARASITOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 1030 or BIOL 1037) or (BIOL 2500 or BIOL 2503) and BIOL 2501. Development, identification, host-parasite relationships, and medical significance of parasitic protozoa, helminthes, and arthropods that infect humans, domestic animals, and wildlife.

BIOL 6120 SYSTEMATIC BOTANY (4) LEC. 3. LAB. 3. Pr. (BIOL 1030 or BIOL 1037). Classification, nomenclature, distribution, systematics, and evolution of vascular plants.

BIOL 6130 ADVANCED PLANT PHYSIOLOGY (3) LEC. 3. Pr. BIOL 3100 and (CHEM 2030 or CHEM 2080 or CHEM 2087). Physiological and biochemical processes affecting plant growth and development including water relations, photosynthesis, respiration, and hormones.

BIOL 6131 ADV PLANT PHYSIOLOGY LAB (1) LAB. 3. Pr. BIOL 3100 and (CHEM 2081 or CHEM 2088). Laboratory exercises in plant physiology. Including water relations, metabolism, and growth and development.

BIOL 6140 PLANT ECOLOGY (4) LEC. 3. LAB. 4. Pr. (BIOL 1030 or BIOL 1037) and BIOL 3060. Departmental approval. Exploration of ecological interactions between plants and their environment. Field trips emphasize Southeastern habitats/plant examples. Includes 3-day weekend field trip.

BIOL 6150 COMMUNITY ECOLOGY (3) LEC. 3. Pr. BIOL 3060. Dynamics of ecological communities, including niches, species interactions, succession, island biogeography, biodiversity and food webs. May count BIOL 5150 or BIOL 6150.

BIOL 6160 FIELD BIOLOGY AND ECOLOGY (3-15) LEC. 3. Pr. At least 15 credits each with a minimum grade of C in BIOL 1000-8990. Intensive classroom and field studies of an area outside Alabama. Course may be repeated for a maximum of 15 credit hours. Departmental approval and 15 hours of biology.

BIOL 6190 CELL AND MOLECULAR SIGNAL TRANSDUCTION (3) LEC. 3. Pr. BIOL 4100 and BIOL 5220 and (CHEM 2080 or CHEM 2087). Study of cellular communication and regulation with emphasis on integration between cellular, molecular, genetic, and biochemical approaches.

BIOL 6200 CLINICAL MICROBIOLOGY (5) LEC. 3. LAB. 4. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201. Isolation, cultivation, identification, classification and pathogenesis of infectious agents with emphasis on bacteria; includes clinical materials, Eubacteria, Mycoplasma, Rickettsiae and Spirochetes. May count either BIOL 5200 or BIOL 6200.

BIOL 6210 MICROBIAL PHYSIOLOGY (3) LEC. 3. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201 and (CHEM 2030 or CHEM 2080 or CHEM 2087). General physiology of microbial cells emphasizing fermentation, respiration, photosynthesis, nitrogen fixation, cell wall synthesis, membranes, and macromolecular synthesis.

BIOL 6220 INTRODUCTORY MOLECULAR GENETICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or AGRI 3000) and (BIOL 3200 or BIOL 3203) and BIOL 3201. Advanced principles of gene expression including replication, transcription and translation; structure and regulation of genes; detailed concepts and techniques in recombinant DNA. Credit will not be given for both BIOL 6220 and CMBL 6220.

BIOL 6230 VIROLOGY (3) LEC. 3. Pr. (P/C BIOL 5220 or P/C BIOL 6220) or (P/C BIOL 5260 or P/C BIOL 6260). Biology of viruses, including structure, entry, replication, assembly and release, pathogenesis, and epidemiology of viral infections. May count BIOL 5230 or BIOL 6230.
BIOL 6240 ANIMAL PHYSIOLOGY (4) LEC. 3. LAB. 3. Pr. BIOL 4100 or CHEM 2030 or CHEM 2070 or CHEM 2077. General overview of the function of the major systems in animals, including evolution and adaptation to specific environments.

BIOL 6250 MICROBIAL EVOLUTION AND DIVERSITY (4) LEC. 3. LAB. 2. Pr. (BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000) and (BIOL 3200 or BIOL 3203) and BIOL 3201. Introduction to microbial evolutionary history and theory, and survey of microbial diversity. Credit will not be given for both BIOL 5250 and BIOL 6250.

BIOL 6260 PROKARYOTIC MOLECULAR GENETICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000) and (BIOL 3200 or BIOL 3203) and BIOL 3201. Molecular principles of bacterial genetics including gene structure, genetic organization, regulation of gene expression, acquisition and loss of genes leading to microbial evolution. Course will not be given for both BIOL 5260 and BIOL 6260.

BIOL 6270 HOST-MICROBE INTERACTIONS (3) LEC. 3. Pr. (BIOL 3200 or BIOL 3203) and (BIOL 3201) and (BIOL 5200 or BIOL 5260). This course will explore interactions between microbes and their hosts including plants, insects and animals. Credit will not be given for both BIOL 5270 and BIOL 6270.

BIOL 6280 GENETICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Twenty-first century biotechnology and related ethical issues, including human cloning, stem cells, neuroenhancement, age retardation, genetic enhancement, and nanobiology. May count BIOL 5280 or 6280.

BIOL 6300 PLANT ANATOMY AND DEVELOPMENT (4) LEC. 2. LAB. 4. Pr. BIOL 6130. The study of the structure and ontogeny of plant cells, tissues, and organs. Fall.

BIOL 6320 PLANT GENE EXPRESSION (4) LEC. 4. Pr. BIOL 5320. Departmental approval. Genetic expression of genetic elements in plants from the recent literature. Credit will not be given for both BIOL 6320 and CMBL 6320.

BIOL 6330 DEVELOPMENTAL GENETICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Study of the genetics and genetic mechanisms behind developmental processes occurring in a range of species. May count either BIOL 6330 or BIOL 5330.

BIOL 6340 PROTOZOOLOGY (4) LEC. 3. LAB. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Life history, identification, cell biology, and evolution of free-living and parasitic protozoa of the major groups. Laboratory includes techniques for microscopy.

BIOL 6350 BEHAVIORAL ECOLOGY (3) LEC. 3. Pr. (BIOL 3030 or BIOL 3033) and BIOL 3060. Evolution of behaviors via natural, sexual, and kin selections; evolutionary influences on social groups, mating systems, cooperative breeding, and other interactions.

BIOL 6360 POPULATION ECOLOGY (3) LEC. 3. Pr. BIOL 3060. Departmental approval. Quantitative study of populations, including life tables, Leslie matrices, exponential and logistic models, metapopulations, and life-history theory.

BIOL 6370 MOLECULAR ECOLOGY (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000 and BIOL 6800. General overview of the concepts and techniques regarding the application of molecular variation in answering questions pertaining to populations and communities of organisms. Credit will not be given for both BIOL 5370 and BIOL 6370.

BIOL 6380 GENERAL ICHTHYOLOGY (4) LEC. 3. LAB. 4. Pr. BIOL 1030 or BIOL 1037. Survey of the biodiversity of world and local fishes with an overview of ecology, behavior, biology, and conservation of fishes.

BIOL 6425 MARINE BOTANY (4) LEC. 4. Departmental approval. Identification, distribution, structure, ecology and physiology of microscopic and macroscopic algae, sea grasses, salt marsh vegetation, mangroves and maritime forests. Experimental manipulation of these organisms. Taught at DISL.

BIOL 6465 MARINE MICROBIOLOGY (5) LEC. 3. LAB. 2. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201. Departmental approval. The role of microorganisms in marine environments.

BIOL 6500 IMMUNOLOGY (3) LEC. 3. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201 and (BIOL 3000 or BIOL 3003 or FISH 3000 or BIOL 3020) and P/C BIOL 6501. The cellular and molecular basis of the immune response, including antigen presentation, immunogenetics, effector mechanisms, and medical immunology.

BIOL 6501 IMMUNOLOGY LABORATORY (2) LAB. 4. Pr. P/C BIOL 5500 or P/C BIOL 6500. Techniques illustrating principles of antigen-antibody interactions and their application in immunoassays, identification of leukocytes, cellular interactions, and antibody production.

BIOL 6510 BIOGEOGRAPHY (3) LEC. 3. Departmental approval. Patterns and processes associated with the distribution of living and fossil organisms.
BIOL 6521 GENE EXPRESSION AND RECOMBINANT DNA LABORATORY (2) LEC. 2. LAB. 4. Pr. P/C BIOL 5220 or BIOL 6220 or BIOL 5260 or BIOL 6260. Laboratory experiences demonstrating concepts and techniques in recombinant DNA.

BIOL 6525 MARINE BEHAVIORAL ECOLOGY (4) LEC. 3. LAB. 3. Study of animal behavior and the influence by and interaction with the environment and the ecological and evolutionary significance of these behaviors. Vertebrate and Invertebrate Zoology required. Taught at DISL.

BIOL 6535 MARINE BEHAVIORAL ECOLOGY (4) LEC. 3. LAB. 3. Departmental approval. Examination of conservation biology based on previous study of marine ecology. General or Marine Ecology course required. Taught at DISL.

BIOL 6550 NANOMEDICINE (2) LEC. 2. LAB. 0. Pr. PHYS 1510 and CHEM 2080 and BCHE 5180. Nanomedicine is a branch of medicine that applies the knowledge and tools of nanotechnology to the prevention and treatment of disease. It involves the use of nanoscale materials, such as biocompatible nanoparticles, nanorobots and nanosensors, for diagnosis, drug delivery, and sensing in living organisms.

BIOL 6600 MAMMALIAN PHYSIOLOGY (BIOMEDICAL PHYSIOLOGY) (5) LEC. 4.25. LAB. 2.75. Pr. (BIOL 1030 or BIOL 1037) or (BIOL 2500 or BIOL 2503) and BIOL 2501 and (CHEM 2030 or CHEM 2070 or CHEM 2077). An in-depth investigation of the physiology of the major mammalian organ systems.

BIOL 6650 ETHOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 1030 or BIOL 1037) and BIOL 3060. Animal behaviors, analysis of their adaptive value, development, and evolution.

BIOL 6660 FOOD MICROBIOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201. Introduction to basic and applied microbiology in food, including how bacteria, viruses, parasites, yeasts and mold affect and in turn are affected by foods both positively and negatively. May count either FDSC 5660, BIOL 5660, FDSC 6600, or BIOL 6600.

BIOL 6700 APPLIED AND ENVIRONMENTAL MICROBIOLOGY (4) LEC. 3. LAB. 2. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201. An advanced treatment of bacteria comprising the Kingdom Prokaryotae, emphasizing ecology, systematics, interrelationships, geochemical cycles, and bioremediation.

BIOL 6750 ORNITHOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 3030 or BIOL 3033) and BIOL 3060. Departmental approval. An intensive investigation of the current literature and relevant research dealing with birds.

BIOL 6760 MAMMALOGY (4) LEC. 3. LAB. 3. Characteristics, origins, ecology, behavior, reproduction, physiology, and diversity of mammals. Labs include survey or current literature, fieldtrips, data analysis and report preparation. Instructor approval.

BIOL 6800 INTRODUCTION TO COMPUTATIONAL BIOLOGY (3) LEC. 2. LAB. 1. Pr. STAT 2510. Overview of computational approaches to the analysis of biological data. Students will learn basic statistical and graphical analysis. May count either BIOL 5800 or BIOL 6800.

BIOL 6850 FUNCTIONAL GENOMICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or BIOL 3020 or FISH 3000 or AGRI 3000) and BIOL 4100 and BIOL 5800. Active-learning course to study the functional aspects of the genome emphasizing gene regulation and functional genetic variation. May count either BIOL 5850 or BIOL 6850.

BIOL 6860 BIOINFORMATICS AND GENOME ANALYSIS (3) LEC. 2. LAB. 1. Pr. (BIOL 3000 or BIOL 3003 or BIOL 3020 or FISH 3000 or AGRI 3000) and BIOL 5800. Overview of informatic approaches to biological data analysis. Students will use the scientific method to investigate key questions in model organisms through emerging ‘omics fields. May count either BIOL 5860 or BIOL 6860.

BIOL 7000 ADVANCED PARASITOLOGY (3) LEC. 3. Pr. BIOL 6110 or BIOL 5110. Departmental approval. Interactions of organisms with their environments and characteristics of populations, communities, and ecosystems. Eight hours of Biology.

BIOL 7010 FUNDAMENTALS OF TEACHING BIOLOGY (1) LEC. 1. SU. Course may be repeated for a maximum of 6 credit hours.

BIOL 7035 MARINE ANIMAL NEUROBIOLOGY (4) LEC. 30. LAB. 60. Pr. BIOL 1020 or BIOL 1023 and BIOL 1021 and BIOL 1030 and BIOL 1031 and BIOL 4100. Biophysical neurobiology of marine invertebrates and vertebrates. Lectures and labs on neurons, glia, resting and action potentials, synapses, neurotransmitters, muscle contraction, sensorimotor integration, computer simulation and extensive technical methods: extra-, intracellular, patch recording, molecular neuroimmunology, confocal fluorescence microscopy. Evening/Saturday classes.
BIOL 7060 ADVANCED MAMMALOGY (4) LEC. 3. LAB. 3. Pr. BIOL 6760. Current literature in mammalogy, collections management, and professional aspects of mammalogy. Labs include preparing specimens, curating research collections, fieldtrips, library work, data analysis, and report preparation.

BIOL 7075 INTRODUCTION TO OCEANOGRAPHY (4) LEC. 30. LAB. 60. Pr. MATH 1150 or MATH 1153 and CHEM 1030 or CHEM 1033 or CHEM 1110 or CHEM 1117 and PHYS 1500 and BIOL 3040. An in-depth examination of the physics, chemistry, geology and biology of the oceans. Lectures cover the interrelationships of these components to each other. Field and lab work will introduce students to research on oceanographic processes of the Gulf of Mexico. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 7170 POPULATION GENETICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Examination of the theories relating to maintenance in variation in natural populations of plants and animals.

BIOL 7180 SCRIPTING FOR BIOLOGISTS (3) LEC. 2. LAB. 1. Pr. BIOL 6800 and STAT 7000. or Instructor approval. A hands-on course to teach students concepts, applications, and best practices of utilizing computer scripting languages in the life sciences.

BIOL 7200 EVOLUTIONARY BIOLOGY (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000 and (BIOL 3200 or BIOL 3203) and BIOL 3201. Topics of current interest in evolution. Readings and presentation required.

BIOL 7210 EVOLUTIONARY ECOLOGY (3) LEC. 2.5, LEC/PR1. 1. The Evolutionary Ecology research paradigm is a key approach to the study of behavioral, evolutionary, and ecological processes in the context of realistic or natural environmental settings. We will investigate a number of current "hot" research topics in Evolutionary Ecology, discuss the leading hypotheses being developed and how they are cast as statistical models, and practice the published statistical techniques. An emphasis will be placed on practical application of computational and statistical approaches to parameter estimation and hypothesis testing. Students will come away with both a broader and deeper knowledge of current avenues of research in behavioral, ecological, and evolutionary programs as well as a practical skill set for analyzing data in the field of evolutionary ecology.

BIOL 7250 PRACTICAL DATA ANALYSIS AND COMPUTATION FOR THE LIFE SCIENCES (3) LEC. 2. LAB. 3. Pr. STAT 7020 or WILD 7150. or equivalent; or permission of the instructor. Data from the life sciences and advanced statistical techniques for data analyses and computation are brought together through a cross-fertilization of graduate student students in the life sciences, statistics, and mathematics. Focus on production of publication-quality research on student-identified projects. May count either BIOL 7250 or STAT 7250.

BIOL 7280 PLANT HORMONES (2) LEC. 2. Pr. BIOL 6130. Synthesis, physiology, and mode of action of the major plant hormones including abscisic acid, auxins, cytokinins, ethylene, and gibberellins.

BIOL 7290 EVOLUTIONARY GENETICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000 and BIOL 6170. Departmental approval. The role of population processes as mechanisms for evolution; and evolution at the molecular level. Credit will not be given for both BIOL 7290 and CMBL 7290.

BIOL 7370 STREAM ECOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 1030 or BIOL 1037) and BIOL 3060. Physical, chemical, and biological aspects of stream ecosystems emphasizing effects of natural environmental factors and human influences on stream biota, and quantitative methods used to study stream ecology.

BIOL 7440 ADVANCED CELL BIOLOGY (3) LEC. 3. Pr. BIOL 4100. Examination of current areas of research in cell and developmental biology by directed reading and discussion. Credit will not be given for both BIOL 7440 and CMBL 7440.

BIOL 7470 GENOME EVOLUTION (3) LEC. 3. Provides a broad evolutionary perspective on the origin, composition, and architecture of eukaryotic genomes. Students will participate in a literature-driven discussion format and will complete weekly writing assignments.

BIOL 7485 ADVANCED MARINE ECOLOGY (4) LEC. 2. LAB. 2. Pr. (BIOL 1020 or BIOL 1023) and BIOL 1021 and BIOL 1030 and BIOL 1031 and (BIOL 3060 or BIOL 3040). An advanced course open only to MS or PhD students. Interactions between marine organisms and the environment. In-depth discussion of ecological theory with emphasis on the latest research, using extensive reference to the literature. Lecture, lab and overnight field trips.

BIOL 7490 PHYSIOLOGICAL ECOLOGY (3) LEC. 3. Pr. BIOL 3060. A study of the physiological adaptations that allow animals to survive in unusual environments. A course in ecology required.

BIOL 7500 STRESS PHYSIOLOGY (2) LEC. 2. Pr. (BIOL 4100 or BIOL 5240 or BIOL 5600). This course is a discussion-based course focusing on physiological stress responses at various levels of organization and communication among them, from molecules, cells, organ, to whole organism.
BIOL 7510 NATURAL HISTORY MUSEUM PRACTICUM (1) LAB. 3. Practical methods in natural history museum curation. Students will assist in curating collections at the Auburn University Museum of Natural History. Course may be repeated for a maximum of 4 credit hours.

BIOL 7525 MARINE INVERTEBRATES (4) LEC. 2. LAB. 2. Morphology, natural history, physiology, evolution and ecology. Students examine modern literature and develop an advanced presentation on invertebrate biology involving problem solving in an area such as sensory biology, molecular evolution or management. Term paper, classroom presentation and lecture.

BIOL 7530 ADVANCED SYSTEMATIC BOTANY (3) LEC. 3. Morphological and molecular approaches to modern systematics of plants.

BIOL 7540 PROFESSIONAL ASPECTS OF BIOLOGY (3) LEC. 3. Departmental approval. Instruction on practical aspects of a career in biological sciences.

BIOL 7550 PHYSIOLOGICAL ECOLOGY OF REPRODUCTION (3) LEC. 3. This course focuses on physiological ecology of reproduction by identifying key physiological mechanisms linking the environmental change, reproductive constraints, and reproductive performance and describing how variation in reproductive performance are impacted by ecological and evolutionary processes.

BIOL 7560 PLANT/ANIMAL INTERACTIONS (3) LEC. 3. Pr. BIOL 3100 and BIOL 3060. Departmental approval. Overview of ecological and evolutionary interrelationships between animals and plants, including pollination biology, dispersal ecology, carnivory, and plant-herbivore interactions.

BIOL 7620 MICROBIOLOGY OF EPIDEMICS (3) LEC. 3. Departmental approval. Epidemics of communicable disease outbreaks are analyzed according to the hosts, modes of transmission, environment, and pathogenesis of the agents.

BIOL 7705 TROPICAL BIOLOGY: ECOLOGICAL APPROACH (8) LEC. 4. LAB. 12. Pr. At least 15 credits each with a minimum grade of C in BIOL 6000-8990. An in-depth introduction to the principles of ecology in the tropics. Orientation and introductory lecture in San Jose, Costa Rica, followed by field work during an 8 week period. 15 hours of graduate level biological science.

BIOL 7720 PROKARYOTIC GENE REGULATION (3) LEC. 3. Pr. BIOL 6210 or CHEM 6180. Discussion of gene expression in bacteria using the current literature.

BIOL 7880 MITONUCLEAR ECOLOGY (2) LEC. 2. Pr. BIOL 3030. This course will explore the implications of the necessity of mitonuclear coadaptation for the evolution of quintessential eukaryotic characteristics, including sex and two sexes, a sequestered germ line, senescence, discrete species, mate choice, and adaptation. Permission of instructor may be needed.

BIOL 7950 MASTERS THESIS SEMINAR (1) LEC. 1. SU. Departmental approval. Oral presentation and discussion of research in the field of specialization. Course may be repeated for a maximum of 2 credit hours.

BIOL 7960 SPECIAL PROBLEMS (1-4) LEC. Pr. P/C BIOL 6220. Oral presentation and discussion of recent scientific publications from a selected area molecular biology. Credit will not be given for both BIOL 7960 and CMBL 7960. Course may be repeated for a maximum of 4 credit hours.

BIOL 7970 SPECIAL TOPICS (1-4) AAB. Departmental approval. Instruction and discussion in a selected current topic in botany, microbiology, molecular biology, or zoology. A different topic for advanced study will be selected each semester this course is offered. Course may be repeated for a maximum of 8 credit hours.

BIOL 7990 RESEARCH AND THESIS (1-10) MST. Course may be repeated with change in topic.

BIOL 8950 DOCTORAL SEMINAR (1) SEM. 1. SU. Oral presentation and discussion of research in the field of specialization. Course may be repeated for a maximum of 3 credit hours.

BIOL 8990 RESEARCH AND DISSERTATION (1-10) DSR. Course may be repeated with change in topic.

**Cell and Molecular Biology Courses**

CMBL 4150 HUMAN GENETICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003) and BIOL 4100 and (CHEM 2080 or CHEM 2087). Study of the biological interaction of genes, effects of mutation and changes in gene frequency in human populations. Emphasis on molecular approach to study evolutionary changes in human gene pools.
CMBL 5190 CELL AND MOLECULAR SIGNAL TRANSDUCTION (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003) and BIOL 4100 and BIOL 4220 and CHEM 2090. The study of cellular communication and regulation with emphasis on integration between cellular, molecular, genetic and biochemical approaches.

CMBL 5500 IMMUNOLOGY (3) LEC. 3. Pr. BIOL 3200 and (BIOL 3000 or BIOL 3003). The cellular and molecular basis of the immune response, including antigen presentation, immunogenetics, effector mechanisms and medical immunology.

CMBL 5501 IMMUNOLOGY LAB (2) LAB. 4. Coreq. BIOL 5500. Techniques illustrating principles of antigen-antibody interactions and their application in immunoassays, identification of leukocytes, cellular interactions and antibody production.

CMBL 6190 CELL AND MOLECULAR SIGNAL TRANSDUCTION (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003) and BIOL 4100 and BIOL 4050 and CHEM 2090. Study of cellular communication and regulation with emphasis on integration between cellular, molecular, genetic and biochemical approaches. Credit will not be given for both CMBL 6190 and BIOL 6190.

CMBL 6220 INTRODUCTION TO MOLECULAR GENETICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003) and BIOL 4510. Advanced principles of gene expression including replication, transcription and translation; structure and regulation of genes; detailed concepts and techniques in recombinant DNA. Credit will not be given for both CMBL 6220 and BIOL 6230.

CMBL 6230 VIROLOGY (4) LEC. 4. Pr. (BIOL 3000 or BIOL 3003) and BIOL 3200 and BIOL 4520. Molecular mechanisms of virus biology including virus-cell replication, assembly and release pathogens. Credit will not be given for both CMBL 6230 and BIOL 6230.

CMBL 6320 PLANT GENE EXPRESSION (4) LEC. 4. Pr. BIOL 5320. Departmental approval. Genetic expression of genetic elements in plants from the recent literature. Credit will not be given for both BIOL and CMBL 6320.

CMBL 6500 IMMUNOLOGY (3) LEC. 3. Pr. BIOL 3200 and (BIOL 3000 or BIOL 3003). The cellular and molecular basis of the immune response, including antigen presentation, immunogenetics, effector mechanisms, and medical immunology.

CMBL 6501 TECHNIQUES IN IMMUNOLOGY (2) LAB. 4. Coreq. BIOL 6500. Techniques illustrating principles of antigen-antibody interactions and their application in immunoassays, identification of leukocytes, cellular interactions and antibody production.

CMBL 7070 PLANT BIOTECHNOLOGY (4) LEC. 2. LAB. 4. Pr. BIOL 3000 or BIOL 3003. Plant biotechnology, including plant tissue culture technologies and genetic transformation and applications to horticultural crop improvement.

CMBL 7080 MOLECULAR ENDOCRINOLOGY (2) LEC. 2. Pr. VBMS 7070. Departmental approval. Examination of the literature of hormonal synthesis, secretion and mechanism of action with emphasis on receptors, second messenger systems and gene regulation.

CMBL 7270 ULTRASTRUCTURE OF PLANT CELLS AND MICROBES (5) LEC. 3. LAB. 4. Departmental approval. Theory and practice of transmission and scanning electron microscopy and their application to the biological sciences. Credit will not be given for both CMBL 7270 and BIOL 7290.

CMBL 7290 EVOLUTIONARY GENETICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003) and BIOL 6170. Departmental approval. Examine two major topics: the role of population processes as mechanisms for evolution; and evolution at the molecular level. Credit will not be given for both CMBL 7290 and BIOL 7290.

CMBL 7330 MOLECULAR BIOLOGY OF PLANT DEVELOPMENT (2) LEC. 2. Pr. BIOL 6130 and BIOL 7280. Departmental approval. Physiological, biochemical and molecular aspects of plant growth and development. Credit will not be given for both CMBL 7330 and BIOL 7330.

CMBL 7400 PLANT VIROLOGY (4) LEC. 3. LAB. 2. Pr. (PLPA 3000 or PLPA 3003 or PLPA 6000) and CHEM 6180. Departmental approval. Introduction to plant viruses and the diseases they cause; virus particle structure and replication strategies; disease identification by symptoms and detection of pathogen; transmission, ecology, epidemiology and control.

CMBL 7440 ADVANCED CELL BIOLOGY (3) LEC. 3. Pr. BIOL 4100. Examination of current areas of research in cell and developmental biology by directed reading and discussion. Credit will not be given for both CMBL 7440 and BIOL 7440.

CMBL 7460 BACTERIAL PATHOGENESIS (3) LEC. 3. Pr. VBMS 7510 or BIOL 4520. Departmental approval. Molecular and cellular basis of virulence of bacterial pathogens of animals.

CMBL 7480 METHODS IN IMMUNOLOGY (5) LEC. 1. LAB. 8. Departmental approval. Theoretical concept underlying immunological methods combined with practical hands-on immunological experimentation focused on application to research in the biological sciences.

CMBL 7510 MOLECULAR GENETICS I (5) LEC. 5. Pr. CHEM 7200. Bacterial, bacteriophage, and eukaryotic genetics, with a focus on gene structure, and molecular mechanisms regulation expression. Critical review of current literature will be emphasized.

CMBL 7520 MOLECULAR GENETICS II (5) LEC. 5. Pr. VBMS 7510. Genetic mechanisms by which eukaryotic cells replicate, communicate and differentiate. Current literature will be used extensively.

CMBL 7530 ADVANCED SYSTEMATIC BOTANY (3) LEC. 3. Pr. BIOL 6120. Morphological and molecular approaches to modern systematics of plants.

CMBL 7540 CURRENT TOPICS IN MOLECULAR VIROLOGY (3) LEC. 3. Pr. VBMS 7510 and VBMS 7520. Viral gene expression and evasion of host defense mechanisms.

CMBL 7660 MOLECULAR GENETICS AND BIOTECHNOLOGY (4) LEC. 3. LAB. 3. Pr. BIOL 3000 or BIOL 3003. Departmental approval. Principles and applications of DNA fingerprinting technologies, gene mapping, genetic information and analysis using internet tools, transgenic technologies. Credit will not be given for both CMBL 7660 and FISH 7660.

CMBL 7960 READINGS IN MOLECULAR BIOLOGY (1) RCT. 1. Pr/C BIOL 7220. Oral presentation and discussion of recent scientific publications from a selected area of molecular biology. Credit will not be given for both CMBL 7960 and BIOL 7960. Course may be repeated for a maximum of 4 credit hours.

CMBL 8160 LABORATORY TECHNIQUES IN MOLECULAR VIROLOGY (4) LEC. 1. LAB. 9. Pr. BIOL 4520 and BIOL 4530. Isolation, purification, and identification of viral nucleic acids and proteins. Credit will not be given for both CMBL 8160 and POUL 8160.

CMBL 8880 PHYSIOLOGICAL AND MOLECULAR PLANT PATHOLOGY (3) LEC. 2. LAB. 2. Pr. PLPA 6000 and CHEM 6180 and BIOL 4230. Comprehensive coverage of physiology and molecular biology of plant-pathogen interactions.

Total Hours: 122

---

1. Students must complete a two-course sequence in either HIST or LIT (for example, World History 1 and 2 or American Lit 1 and 2). For complete HIST and LIT sequence options, see the Bulletin.

2. Students who complete a HIST sequence other than HIST 1010 and HIST 1020 should talk to an advisor about CORE SOC SCI choices.

3. If a LIT sequence is chosen, this course must be a CORE SOCIAL SCIENCE. If a HIST sequence is chosen, this course must be a CORE HUMANITIES.

4. All courses taken at a Summer Marine Lab must receive departmental approval.

---

1. Students must complete a two-course sequence in either HIST or LIT (for example, World History 1 and 2 or American Lit 1 and 2). For complete HIST and LIT sequence options, see the Bulletin.
Students who choose a HIST sequence other than HIST 1010 and HIST 1020 should talk to an advisor about CORE SOC SCI choices.

If a LIT sequence is chosen, this course must be a CORE SOC SCI. If a HIST sequence is chosen, this course must be a CORE HUMANITIES.

This elective in the junior year should be chosen with consideration of the electives courses to be taken in the senior year. Consult your advisor.

This course must be taken the semester of graduation.

Chemistry & Biochemistry

BS curriculum in Chemistry and BS curriculum in Biochemistry

These curricula, approved by the American Chemical Society, prepare students for careers in pure and applied chemistry with a dual emphasis on classroom and laboratory experience. A flexible senior year allows student to tailor the program to individual professional goals. Graduates are prepared to enter the profession immediately or continue for advanced degree programs. The senior research program introduces students to modern advanced techniques and approaches to chemical research in an area of their interest by having them complete an individual research project in conjunction with a faculty adviser.

BA curriculum in Chemistry

The BA curriculum in Chemistry provides a strong background in chemistry while allowing students to specialize in areas of interest. It is especially well suited for students leaning towards medical sciences while allowing more flexibility than that allowed in the American Chemical Society approved biochemistry curriculum. The program allows for great versatility in the junior and senior years, allowing the curriculum to be tailored to individual goals. The curriculum prepares students for professional careers in chemistry or biochemistry and advanced degree programs in chemistry, biochemistry and medically related fields.

Clinical Laboratory Sciences

The Division of Clinical Laboratory Sciences has two curricula leading to the degree of bachelor of science in laboratory technology or bachelor of science in medical technology. These curricula prepare students for medical laboratory careers in fields such as public health, bacteriology, environmental testing, industrial quality control, research and forensic science. Graduates may choose to qualify as certified medical technologists, which is accomplished by successfully completing a 12-month training period (rotating hospital internship) in an accredited school of medical technology and passing a national certifying examination.

Majors

- BA Chemistry (p. 1247)
- BA Chemistry pre-professional concentration:
  - Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1245)
- BS Chemistry (p. 1249)
- Biochemistry (p. 1246)
- Laboratory Sciences (p. 1250)
- Medical Laboratory Sciences (p. 1251)

Biochemistry Courses

BCHE 3180 NUTRITIONAL BIOCHEMISTRY (3) LEC. 3. Pr. CHEM 2030 or CHEM 2080 or CHEM 2087. Departmental approval. Fundamental pathways of carbohydrate, lipid, and amino acid metabolism in human beings. Credit will not be given for both BCHE 3180 and BCHE 3200.
BCHE 3200 PRINCIPLES OF BIOCHEMISTRY (3) LEC. 3. Pr. (BIOL 1010 or BIOL 1020 or BIOL 1030 or BIOL 1027 or BIOL 1037) and (CHEM 2030 or CHEM 2070 or CHEM 2077 or CHEM 2080 or CHEM 2087). Structure and function of biomolecules, enzyme catalysis, processing of genetic information, bioenergetics and metabolism, and regulatory mechanisms in cellular processes.

BCHE 3201 PRINCIPLES OF BIOCHEMISTRY LABORATORY (1) LAB. 2. Coreq. BCHE 3200. Fundamental theory and techniques used in the isolation, characterization, and study of biomolecules.

BCHE 5180 BIOCHEMISTRY I (3) LEC. 3. Pr. CHEM 2080 or CHEM 2087. Fundamentals of metabolism, focusing on the design and regulation of the major catabolic and biosynthetic metabolic pathways. Bioenergetics.

BCHE 5181 BIOCHEMISTRY I LABORATORY (1) LAB. 3. Pr. P/C BCHE 5180 or P/C CHEM 5180. Laboratory techniques required for identification and quantification of compounds of important biochemical classes.

BCHE 5190 BIOCHEMISTRY II (3) LEC. 3. Pr. BCHE 5180 or BCHE 6180. Fundamentals of metabolism, focusing on the design and regulation of the major catabolic and biosynthetic metabolic pathways.

BCHE 5191 BIOCHEMISTRY II LABORATORY (1) LAB. 3. Pr. P/C BCHE 5190 or P/C CHEM 5190. Laboratory techniques required for partial purification, kinetic studies, and characterization of enzymes and nucleotides from various plants, animals and bacteria.

BCHE 5250 PLANT METABOLIC PATHWAYS (3) LEC. 3. Pr. CHEM 2080 or CHEM 2087. Fundamental processes of metabolism specific to plants.

BCHE 6180 BIOCHEMISTRY I (3) LEC. 3. Pr. CHEM 2080 or CHEM 2087. Departmental approval. Fundamentals of the classification, structure, and reactions of the major constituents of living matter and evaluation of binding phenomena and bioenergetics.

BCHE 6181 BIOCHEMISTRY I LABORATORY (1) LAB. 3. Pr. P/C BCHE 6180 or P/C CHEM 6180. Laboratory techniques required for identification and quantification of compounds of important biochemical classes.

BCHE 6190 BIOCHEMISTRY II (3) LEC. 3. Pr. BCHE 6180. Departmental approval. Fundamentals of metabolism, focusing on the design and regulation of the major catabolic and biosynthetic metabolic pathways.

BCHE 6191 BIOCHEMISTRY II LABORATORY (1) LAB. 3. Pr. P/C CHEM 6190. Laboratory techniques required for partial purification, kinetic studies, and characterization of enzymes and nucleotides from various plants, animals, and bacteria.

BCHE 6250 PLANT METABOLISM (3) LEC. 3. Pr. CHEM 2080 or CHEM 2087. Fundamental processes of metabolism specific to plants.

BCHE 7200 ADVANCED BIOCHEMISTRY I (3) LEC. 3. Graduate credit will not be given for both BCHE 6190 and BCHE 7200.

BCHE 7210 ADVANCED BIOCHEMISTRY II (3) LEC. 3. Structure and function of macromolecules participating in the flow of molecular information. Graduate credit will not be given for both BCHE 6180 and BCHE 7210. Or equivalent.

BCHE 7220 PRINCIPLES OF CELLULAR AND MOLECULAR ENZYMEOLOGY (3) LEC. 3. Pr. BCHE 6190 or CHEM 6190 or BCHE 7200. Departmental approval. The principles of enzyme chemistry including the physical, chemical, and catalytic properties of enzymes.

BCHE 7250 BIOCHEMISTRY OF LIPIDS AND LIPOPROTEINS (3) LEC. 3. Pr. BCHE 7200. Departmental approval. The regulation of lipid and lipoprotein metabolism, role of lipid mediators in signaling pathways and protein modification, assembly and dynamics of lipoproteins and biomembranes.

BCHE 7260 BIOINFORMATICS (3) LEC. 3. Pr. BCHE 7210. Departmental approval. Advanced study of main concepts and tools of genomics and proteomics.

BCHE 7270 BIOCHEMICAL RESEARCH TECHNIQUES (3-6) LEC. Pr. BCHE 6190 or CHEM 6190. Departmental approval. Modern biochemical laboratory techniques. Course may be repeated for a maximum of 6 credit hours.

BCHE 7280 TOPICS IN BIOCHEMISTRY (1-3) LEC. Pr. BCHE 7210. Directed studies in biochemistry. Departmental approval and BCHE 7210 or equivalent. Course may be repeated for a maximum of 3 credit hours.

</table>
CHEM 1128 HONORS GENERAL CHEMISTRY II LABORATORY (1) LAB. 3. Pr. Honors College. Science Core. Laboratory experiments emphasizing course material in CHEM 1127. Credit will not be given for both CHEM 1128 and CHEM 1041 or CHEM 1121.

CHEM 2030 SURVEY OF ORGANIC CHEMISTRY (3) LEC. 3. Pr. CHEM 1040 or CHEM 1120 or CHEM 1127. Structure, nomenclature and reactions of the functional group classes of organic compounds polymers, and molecules of biological interest. Credit will not be given for both CHEM 2030 and CHEM 2070.

CHEM 2070 ORGANIC CHEMISTRY I (3) LEC. 3. Pr. CHEM 1040 or CHEM 1043 or CHEM 1120 or CHEM 1127. In-depth study of organic chemistry including structure, nomenclature, reactions, reaction mechanisms, stereochemistry, synthesis and spectroscopic structure determination organized by the functional group approach. Considers alkanes, alkenes, alkynes, alkylic halides, alcohols, ethers, and aromatic compounds. Credit will not be given for both CHEM 2070 and CHEM 2030.

CHEM 2071 ORGANIC CHEMISTRY I LABORATORY (1) LAB. 3. Pr. (P/C CHEM 2070 or P/C CHEM 2077) and (CHEM 1041 or CHEM 1128 or CHEM 1121). Laboratory for CHEM 2070.

CHEM 2077 HONORS ORGANIC CHEMISTRY I (3) LEC. 3. Pr. Honors College. Organic chemistry for students in the honors program and Chemistry & Biochemistry majors. Topics similar to CHEM 2070, but covered in more depth. Additional credit will not be given for CHEM 2070. Member of the Honors College or CHEM 1110 with grade of A or B or CHEM 1040 with grade of A.

CHEM 2078 HONORS ORGANIC CHEMISTRY I LABORATORY (1) LAB. 3. Pr. P/C CHEM 2070 or P/C CHEM 2077. Laboratory experiments emphasizing course material in CHEM 2077. Additional credit will not be given for CHEM 2071. Course may be repeated for a maximum of 3 credit hours.

CHEM 2080 ORGANIC CHEMISTRY II (3) LEC. 3. Pr. CHEM 2070 or CHEM 2077. Continuation of CHEM 2070. Aldehydes, ketones, amines, carboxylic acids, esters, amides, anhydrides, polymers, carbohydrates and amino acids.

CHEM 2081 ORGANIC CHEMISTRY II LABORATORY (1) LAB. 1. Pr. (CHEM 2070 or CHEM 2077) and (CHEM 2071 or CHEM 2078) and (P/C CHEM 2080 or P/C CHEM 2087). Laboratory for CHEM 2080.

CHEM 2087 HONORS ORGANIC CHEMISTRY II (3) LEC. 3. Pr. Honors College or departmental approval. Organic chemistry for students in the honors program and Chemistry & Biochemistry majors. Topics similar to CHEM 2080, but covered in more depth. Additional credit will not be given for CHEM 2080. Member of the Honors College or CHEM 2077

CHEM 2088 HONORS ORGANIC CHEMISTRY II LABORATORY (1) LAB. 3. Pr. P/C CHEM 2080 or P/C CHEM 2087. Laboratory experiments emphasizing course material in CHEM 2087. Additional credit will not be given for CHEM 2081. May count either CHEM 2081 or CHEM 2088. Course may be repeated for a maximum of 3 credit hours.

CHEM 2100 PROFESSIONAL DEVELOPMENT (1) LEC. 1. This course is designed to introduce students to the many opportunities available in chemistry, both as a career choice and while as a student. Students will have the opportunity to investigate available options, will reflect on what career success means to the student, and will chart a pathway to student professional success.

CHEM 2980 INTRODUCTION TO UNDERGRADUATE RESEARCH IN CHEMISTRY (1-3) LAB. SU. Individual problems course. Students will work under the direction of a staff member on some problem of mutual interest. Departmental approval required. Only Freshman or Sophomore. Course may be repeated for a maximum of 6 credit hours.

CHEM 3000 CHEMICAL LITERATURE (1) LEC. 1. Pr. CHEM 2080 or CHEM 2087. Chemical literature with emphasis on primary and secondary sources and the various computer data bases available.

CHEM 3050 ANALYTICAL CHEMISTRY (3) LEC. 3. Pr. CHEM 1040 or CHEM 1120 or CHEM 1127. Theory and application of volumetric, potentiometric and photometric chemical analysis.

CHEM 3051 ANALYTICAL CHEMISTRY LABORATORY (1) LAB. 3. Pr. P/C CHEM 3050. Analytical techniques applied to chemical analysis.

CHEM 3160 SURVEY OF PHYSICAL CHEMISTRY (3) LEC. 3. Pr. CHEM 1040 or (CHEM 1120 or CHEM 1127). The principles of physical chemistry.

CHEM 4070 PHYSICAL CHEMISTRY I (3) LEC. 3. Pr. CHEM 1040 or (CHEM 1120 or CHEM 1127) and (MATH 2630 or MATH 2637) and MATH 2650 and (PHYS 1610 or PHYS 1617). Principles of chemical thermodynamics, principles of application to problems of chemical interest.
CHEM 4071 PHYSICAL CHEMISTRY I LABORATORY (1) LAB. 3. Pr. P/C CHEM 4070.

CHEM 4080 PHYSICAL CHEMISTRY II (3) LEC. 3. Pr. CHEM 1040 or (CHEM 1120 or CHEM 1127) and (MATH 2630 or MATH 2637) and MATH 2650 and (PHYS 1610 or PHYS 1617). Principles of quantum mechanics and spectroscopy; application in molecular structure and in statistical thermodynamics.

CHEM 4081 PHYSICAL CHEMISTRY II LABORATORY (1) LAB. 3. Pr. P/C CHEM 4080. Laboratory for CHEM 4080.

CHEM 4100 INORGANIC CHEMISTRY (3) LEC. 3. Pr. CHEM 4080 or CHEM 3160. Principles of inorganic chemistry emphasizing periodic properties, bonding, structure and symmetry, the solid state, acid-base theory and coordination chemistry.

CHEM 4101 INORGANIC CHEMISTRY LABORATORY (1) LAB. 3. Pr. P/C CHEM 4100. Synthesis and characterization of a variety of inorganic compounds.

CHEM 4110 INORGANIC CHEMISTRY II (3) LEC. 3. Pr. CHEM 4100. Departmental approval. Survey of main group, transition metal and organometallic chemistry.

CHEM 4111 INORGANIC CHEMISTRY LABORATORY II (1) LAB. 3. Pr. CHEM 4101 and P/C CHEM 4110. Laboratory for CHEM 4110.

CHEM 4130 INSTRUMENTAL ANALYSIS (3) LEC. 3. Pr. P/C CHEM 3050. Fundamental concepts used in instrumental analytical chemistry emphasizing spectrophotometric, electroanalytical and chromatographic analysis.

CHEM 4131 INSTRUMENTAL ANALYSIS LABORATORY (1) LAB. 3. Pr. P/C CHEM 4130. Laboratory for CHEM 4130.

CHEM 4950 UNDERGRADUATE SEMINAR (1) LEC. 1. Oral presentation and discussion of research in the area of specialization.

CHEM 4980 UNDERGRADUATE RESEARCH IN CHEMISTRY (3) LAB. 9. Departmental approval. This is an individual problem course. Each student will work under the direction of a staff member on some problem of mutual interest. Course may be repeated for a maximum of 9 credit hours.

CHEM 4997 HONORS THESIS (1-3) LEC. 3. Pr. Honors College. Departmental approval. Honors College Members Only; Course may be repeated for a maximum of 6 credit hours.

CHEM 5180 BIOCHEMISTRY I (3) LEC. 3. Pr. CHEM 2080 or CHEM 2087. Molecular Structure: classification, structure and reactions of the major constituents of living matter. Also includes binding phenomena and bioenergetics. Credit will not be given for both CHEM 5180 and BCHE 5180.

CHEM 5181 BIOCHEMISTRY I LABORATORY (1) LEC. 3. Pr. P/C CHEM 5180 or P/C BCHE 5180. Identification and quantification of compounds from the important biochemical classes. Examples include amino acid chromatography, dipeptide sequencing, glucose concentration etc. Credit will not be given for both CHEM 5181 and BCHE 5180.

CHEM 5190 BIOCHEMISTRY II (3) LEC. 3. Pr. CHEM 5180. Metabolism: survey of design and regulation of the major catabolic and biosynthetic (including photosynthesis) metabolic pathways. An overview of the flow of genetic information. Credit will not be given for both CHEM 5190 and BCHE 5190.

CHEM 5191 BIOCHEMISTRY II LABORATORY (1) LEC. 3. Pr. P/C CHEM 5190 or P/C BCHE 5190. Partial purification, Kinetic studies and characterization of enzymes and nucleotides from various plants, animals and bacteria. Credit will not be given for both CHEM 5191 and BCHE 5191.

CHEM 5280 COMPUTATIONAL CHEMISTRY (4) LEC. 3. LAB. 3. Pr. (CHEM 2080 or CHEM 2087) and CHEM 4080. Modern computational chemistry including molecular mechanics and quantum mechanical calculations.

CHEM 5310 LEARNING ASSISTANT PEDAGOGY (1) ST1. 1. Departmental approval. The Learning Assistant Pedagogy course is a special topics course reserved for students (undergraduate or graduate) serving as learning assistants in active learning classrooms. This seminar style class incorporates literature on student-centered learning with reflective writing and discussion.
CHEM 5450 FOUNDATIONS OF R FOR DBER (3) LEC. 3. R is an open-source statistical software that allows nearly limitless data manipulation, statistical analysis, and advance data visualizations for both the social and physical sciences required for quality research in discipline-based education research (DBER). This course will dedicate approximately one half to learning the basics of coding in R for many common tasks found in DBER (focusing on how to independently find and apply new functions as only a portion of functions can possibly be discussed) and the second half on applying these principles into real data from students' thesis or dissertation (or data can be provided by instructor).

CHEM 6180 BIOCHEMISTRY I (3) LEC. 3. Pr. CHEM 2080 or CHEM 2087. Molecular Structure: classification, structure and reactions of the major constituents of living matter. Also includes binding phenomena and bioenergetics. Credit will not be given for both CHEM 6180 and BCHE 6180.

CHEM 6190 BIOCHEMISTRY II (3) LEC. 3. Pr. CHEM 6180. Departmental approval. Metabolism: survey of design and regulation of the major catabolic and biosynthetic (including photosynthesis) metabolic pathways. An overview of the flow of genetic information. Credit will not be given for both CHEM 6190 and BCHE 6190.

CHEM 6280 COMPUTATIONAL CHEMISTRY (4) LEC. 3. LAB. 3. Pr. (CHEM 2080 or CHEM 2087) and CHEM 4080. Modern computational chemistry including molecular mechanics and quantum mechanical calculations.

CHEM 6450 FOUNDATIONS OF R FOR DBER (3) LEC. 3. R is an open-source statistical software that allows nearly limitless data manipulation, statistical analysis, and advance data visualizations for both the social and physical sciences required for quality research in discipline-based education research (DBER). This course will dedicate approximately one half to learning the basics of coding in R for many common tasks found in DBER (focusing on how to independently find and apply new functions as only a portion of functions can possibly be discussed) and the second half on applying these principles into real data from students' thesis or dissertation (or data can be provided by instructor).

CHEM 7100 ADVANCED INORGANIC CHEMISTRY (3) LEC. 3. Departmental approval. Current concepts of inorganic chemistry with an emphasis on theory, structure, bonding and reactivity.

CHEM 7110 PHYSICAL METHODS IN INORGANIC CHEMISTRY (3) LEC. 3. Pr. CHEM 7100. Or equivalent. Theory and application of techniques for obtaining information inorganic compounds including magnetism, multinuclear nmr, mass spectrometry, x-ray diffraction, vibrational and electronic spectroscopies.

CHEM 7120 ORGANOMETALLIC CHEMISTRY (3) LEC. 3. Pr. CHEM 7100. Departmental approval. Main group and transition metal organometallic chemistry.

CHEM 7160 ADVANCED TOPICS IN INORGANIC CHEMISTRY (3) LEC. 3. Pr. CHEM 7100. Departmental approval. Currently active research areas in inorganic chemistry. Course may be repeated for a maximum of 12 credit hours.

CHEM 7200 PHYSICAL ORGANIC CHEMISTRY (3) LEC. 3. This course will combine the foundations of undergraduate organic chemistry reactions and add to this the physical properties of chemical reactions as affected by real laboratory applications.

CHEM 7210 STRUCTURE ELUCIDATION OF ORGANIC COMPOUNDS (3) LEC. 3. Pr. CHEM 7200 or CHEM 7220. The early stages of this course will focus on the identification of functional groups, saturated, unsaturated and cyclic compounds using IR and NMR spectroscopy, as well as mass spectrometry. Detailed analyses of 1H NMR spectra, i.e., chemical shift, multiplet shape, and coupling constants will demonstrate the power of these methods in ascertaining atom connectivity in simple organic molecules. More advanced two-dimensional NMR techniques such as COSY, HSQC and HMBC will be discussed and used for determining the structures of more complex organic molecules. The determination of absolute and relative stereochimistry using Mosher ester analyses and NOESY, respectively, in chiral molecules will also be covered. Most of the structures that will be discussed and analyzed will be stereochemically complex systems and polycyclic molecules that require a combination of multiple one-dimensional and two-dimensional NMR techniques.

CHEM 7220 ORGANIC REACTIONS (3) LEC. 3. Pr. (CHEM 2070 or CHEM 2073 or CHEM 2077) and (CHEM 2080 or CHEM 2083 or CHEM 2087). Organic reactions are described in the context of oxidation; reduction; C-C, C-N, C-O bond forming; olefination; aldol (and related) condensations; pericyclic, fragmentation, ring-expansion and ring-contraction reactions; and, named organic reactions and their reaction mechanisms and their application to chemical synthesis. Concurrent enrollment with CHEM 7200 is highly recommended.
CHEM 7230 COMPLEX MOLECULE SYNTHESIS (3) LEC. 3. Pr. CHEM 7220. This class is focused on target-oriented chemical synthesis of complex organic molecules. The main objective is to teach students how to use retrosynthetic analysis, a method for disconnecting a complex molecule into simpler starting materials, as well as classical and modern organic reactions to plan syntheses of organic compounds that are biologically relevant and important in the development of better pharmaceuticals. During the course of the semester, students will be introduced to important classes of natural products including terpenes, terpenoids, alkaloids, macrolides, polycyclic ethers, as well as designed molecules that are biologically relevant, but not natural products themselves. Identifying key structural components (i.e., retrons), stereogenic centers, and substructures that can be derived from the chiral pool will be emphasized in synthesis planning. All lecture content will come from the current literature, with only manuscripts published in the past 12 months being discussed in class. Students will be responsible for reading Classics in Total Synthesis on their own and tested on the content of this book as well as assigned current literature in class. Emphasis will be placed on identifying economical and streamlined synthetic protocols that can employ cascade or domino reaction sequences.

CHEM 7260 SPECIAL TOPICS IN ORGANIC CHEMISTRY (1-3) LEC. Pr. CHEM 7200. Advanced course in a research area in organic chemistry which is of mutual interest to graduate students and the instructor. Course may be repeated for a maximum of 6 credit hours.

CHEM 7270 SUPRAMOLECULAR CHEMISTRY: SYNTHESIS, STRUCTURES, AND APPLICATIONS (3) ST1. 3. Pr. CHEM 2080. Supramolecular Chemistry bridges organic, inorganic, surface science, and analytical chemistries. It is a topical area that explores synthesis, spatial organization, weak bonding interactions, hydrogen bonding or covalent bonding, and is interest for numerous industrial or pharmacy applications.

CHEM 7300 ADVANCED PHYSICAL CHEMISTRY (3) LEC. 3. Topics of general and current interest; may vary from year to year.

CHEM 7330 CHEMICAL KINETICS (3) LEC. 3. Theoretical and experimental aspects of reaction rates. The mathematics and characterization of chemically reacting systems.

CHEM 7350 QUANTUM AND STATISTICAL MECHANICS (3) LEC. 3. Pr. CHEM 7300. A quantum mechanical and statistical approach to molecular structure and chemistry.

CHEM 7370 SPECIAL TOPICS IN PHYSICAL CHEMISTRY (1-3) LEC. 3. Pr. CHEM 7300. Modern topics in advanced physical chemistry. Course may be repeated for a maximum of 3 credit hours.

CHEM 7380 MOLECULAR SPECTROSCOPY (3) LEC. 3. Pr. CHEM 7300. Theory and application of optical and magnetic resonance spectroscopy.

CHEM 7410 A DBER APPROACH TO TEACHING AND LEARNING IN CHEMISTRY (3) LEC. 3. Pr. CHEM 1030 and CHEM 1040. Discipline-based education research (DBER) theory and trends, consuming and evaluating DBER research, active learning in advanced chemistry topics, action research, review of pedagogical tools, assessment. This course will be of use to chemistry graduate students aiming for careers in academia, masters education students looking to take a chemistry course for the fulfillment of their degree requirements, and other fields that want to know more about evaluating and critiquing current DBER literature and methods.

CHEM 7500 ADVANCED ANALYTICAL CHEMISTRY (3) LEC. 3. Analytical principles, applications and methods, mathematical interpretations and current developments.

CHEM 7510 ELECTROANALYTICAL CHEMISTRY (3) LEC. 3. Pr. CHEM 7500. Analytical applications of electrochemistry.

CHEM 7520 SURFACE CHEMISTRY (3) LEC. 3. Pr. CHEM 7500. Basic concepts in surface chemistry and surface analytical methods.

CHEM 7530 ADVANCES IN BIOANALYTICAL CHEMISTRY (3) LEC. 3. Pr. CHEM 7500. Analytical Chemistry of microfluidic devices and "Lab on a chip." New methods of miniaturization of separations and analysis with emphasis on bioanalytical applications.

CHEM 7540 FLUORESCENCE IN BIOANALYTICAL CHEMISTRY: SPECTROSCOPY AND IMAGING (3) LEC. 3. Pr. CHEM 7500. Modern fluorescence-based bioanalytical methods as well as an advanced study of related literature. Standard approaches such as biosensors, nucleic acid analysis will be covered, as well as modern techniques such as Fluorescence microscopy, FRET, immunoassays, ELISAs and single-molecule detection.

CHEM 7610 BIOCHEMISTRY AND BIOPHYSICS TECHNIQUES (3) LEC. 3. Fundamental concepts in biochemistry, molecular microbiology, and principles of physics will be introduced. This will be followed by presentations on the theory and practical application of common biophysical techniques. The techniques discussed will include, but will not be limited to: Raman, NMR, and Mass Spectrometry of biological molecules, X-ray Diffraction, Ion Mobility, Fluorescence Microscopy, Single-Molecule Approaches, EM/Cryo-EM, and Nano-particle techniques.
CHEM 7750 FORMAL PRESENTATIONS IN MODERN CHEMISTRY (1) LEC. 1. Oral presentations skills will be developed with a focus on the dissemination of new discoveries in the field of Chemistry. Course may be repeated for a maximum of 6 credit hours.

CHEM 7930 DIRECTED INDIVIDUAL STUDY (1-15) IND. Credit to be arranged. Course may be repeated for a maximum of 15 credit hours.

CHEM 7950 SEMINAR (1) SEM. 1. SU. Course may be repeated for a maximum of 6 credit hours.

CHEM 7990 RESEARCH AND THESIS (1-10) MST. Course may be repeated with change in topics.

CHEM 8990 RESEARCH AND DISSERTATION (1-10) DSR. Course may be repeated with change in topics.

Laboratory Science Courses

LBSC 2010 BASICS IN LABORATORY SCIENCE (2) LEC. 1. LAB. 1. Basic laboratory skills, quality control and assurance, standard precautions for biohazard testing; requirements for careers in medical and laboratory science.

LBSC 4010 HEMATOLOGY (3) LEC. 3. Pr. CHEM 2070 or CHEM 2077. Origin, maturation, morphology, and function of normal blood cells and abnormalities in diseased blood with clinical correlation to disease processes.

LBSC 4011 HEMATOLOGY LAB (2) LAB. 6. Pr. CHEM 2070 or CHEM 2077 and P/C LBSC 4010. Lab portion of course covering origin, maturation, morphology, and function of normal blood cells and abnormalities in disease blood with clinical correlation to disease processes.

LBSC 4050 CLINICAL IMMUNOHEMATOLOGY/PARASITOLOGY (5) LEC. 3. LAB. 6. Pr. (CHEM 2070 or CHEM 2077) and (BIOL 1020 or BIOL 1027). Immunogenetics, clinical significance of blood group antigens and antibodies, theory and techniques of serological study of human blood groups. Human parasites, life cycles and disease processes.

LBSC 4250 CLINICAL BIOCHEM INSTRUMENT (4) LEC. 3. LAB. 3. Pr. BCHE 5180 or BCHE 3200. Biochemistry/physiology of systems in the body of elements in body fluids during the normal and abnormal processes. Theoretical and practical application of Lab techniques, atomic absorption, gaschromatograph-FID, HPLC, spectroscopy, spectrophotometry, ion selective electrodes and RIA used in analysis of body fluids.

LBSC 4910 CLINICAL PRACTICUM (0) PRA.

LBSC 4920 CLINICAL INTERNSHIP (0) INT/PRA.

Long range schedules for COSAM courses are online at www.auburn.edu/cosam/students/

Courses in BOLD will be used to calculate GPA in major.

Options for courses labeled CORE are in the Auburn University Bulletin (www.auburn.edu/bulletin) under Core Curriculum.

¹ Students who have AP or transfer credit for US History should talk to an advisor about CORE SOC SCI choices.
² CHEM 1030/1031 and 1040/1041 sequence can substitute for CHEM 1110/1111 and 1120/1121. See advisor for details.
³ CHEM Electives are defined as any CHEM course 3000-level and above.

Total Hours: 120

¹ Students who choose a HIST sequence other than HIST 1010 and HIST 1020 should talk to an advisor about CORE SOC SCI choices.
² May take more CHEM 4980 as additional elective hours.
³ CHEM 1030/CHEM 1031 and CHEM 1040/CHEM 1041 sequence can substitute for CHEM 1110/CHEM 1111 and CHEM 1120/CHEM 1121. See advisor for details.
⁴ This course must be taken the semester of graduation.

### Curriculum in Chemistry, BA

This curriculum provides a strong background in chemistry while allowing students to specialize in areas of interest. It is especially well suited for students leaning towards medical sciences while allowing more flexibility than that allowed in the American Chemical Society approved biochemistry curriculum. The program allows for great versatility in the junior and senior years, allowing the curriculum to
be tailored to individual goals. The curriculum prepares students for professional careers in chemistry or biochemistry and advanced degree programs in chemistry, biochemistry and medically related fields.

Total Hours: 120
1 Students who choose a HIST sequence other than HIST 1010 and HIST 1020 should talk to an advisor about CORE SOC SCI choices.

2 CHEM 1030/CHEM 1031 and CHEM 1040/CHEM 1041 sequence can substitute for CHEM 1110/CHEM 1111 and CHEM 1120/CHEM 1121. See advisor for details.

3 CHEM Electives are defined as any CHEM course 3000-level and above. A maximum of 3 hours of CHEM 4980 may be counted as a CHEM elective. Additional hours may be used as general elective.

4 This course must be taken the semester of graduation.

Geosciences

The curriculum in geology provides a background in the geosciences and opportunity to specialize in an area of interest (i.e., environmental geology, paleontology) through elective major or related courses. It is designed for those interested in preparation for graduate studies or employment in the field of geology.

The curriculum in geography promotes geographic literacy as an indispensable element in any educational program. It focuses on spatial relationships and the view of the Earth as the home of humankind. Geography readies students for careers in public services, consulting companies, state or federal agencies, utilities and other professions, as well as for graduate studies in geography.

Majors

- Geography (p. 1261)
- Geology (p. 1262)
- Geology - Earth System Science Option (p. 1264)

Geography Courses

GEOG 1010/1013 GLOBAL GEOGRAPHY (3) LEC. 3. Social Science I Core. Spatial and locational context for analyzing change in the contemporary world, including elements of both physical and cultural environments.

GEOG 1017 HONORS GLOBAL GEOGRAPHY (3) LEC. 3. Pr. Honors College. Spatial and locational context for analyzing change in the contemporary world, including elements of both physical and cultural environments.
GEOG 2000 PROFESSIONAL DEVELOPMENT (1) LEC. 1. Introduction to career opportunities in the Geosciences; goal selection and charting a pathway to success as a professional. Includes writing skills, research and funding opportunities, internships, creation of resumes and ePortfolios, and job applications.

GEOG 2010 HUMAN GEOGRAPHY (3) LEC. 3. Spatial perspectives on modern society such as population change, economics, politics, urban development, and local culture, and geography’s approach to solving problems using case studies and issues.

GEOG 2020 PHYSICAL GEOGRAPHY (3) LEC. 3. Selected elements of the earth’s physical system to include such items as landforms, basic weather elements, soils and vegetation.

GEOG 2800 GEOGRAPHIC METHODS AND TECHNIQUES (4) LEC. 3. LAB. 2. Pr. COMP 1000 or COMP 1003. Departmental approval. Key geographical concepts and production of basic geographical tools for portraying spatial data through laboratory exercises.

GEOG 2850 MAP READING AND ANALYSIS (3) LEC. 2. LAB. 2. Introduction to basic concepts and techniques used to interpret map symbols and to analyze geographic patterns.

GEOG 3000 SPORTS GEOGRAPHY (3) LEC. 3. Geographical basis of sports at different spatial scales, including locational strategies, sportive nationalism, and the urban political economy of sports.

GEOG 3110 UNITED STATES AND CANADA (3) LEC. 3. Survey of the region incorporating physical and cultural elements, providing a synthesis of the economic and political processes of the U.S. and Canada.

GEOG 3120 ALABAMA AND THE SOUTHEAST (3) LEC. 3. Study of the physical and cultural environments of the state.

GEOG 3130 LATIN AMERICA (3) LEC. 3. Survey of physical and human landscape of the region including historical geography, natural resources, economic development and problems and prospects affecting major countries.

GEOG 3140 AFRICA (3) LEC. 3. Analysis of the relationships among diverse population groups and the physical environments of sub-Saharan Africa.

GEOG 3150 EUROPE (3) LEC. 3. Survey of physical and human landscape of the region including historical geography, natural resources, economic development, and problems and prospects affecting several of the major countries.

GEOG 3160 ASIA (3) LEC. 3. Survey of the physical and cultural landscape of Asia, including its development and spatial distribution of resources, with a focus on major countries.

GEOG 3300 INTERNATIONAL TRAVEL AND TOURISM (3) LEC. 3. Environmental and cultural patterns that characterize places attractive to tourists. Provides realistic situations for developing travel plans and programs.

GEOG 3810 CARTOGRAPHY AND GRAPHICS (4) LEC. 2. LAB. 2. Techniques of map production including relevant computer graphics applications and related laboratory exercises.

GEOG 4740 SENIOR SEMINAR (2) SEM. 2. Individual research by geoscience undergraduates is coupled with improved written and oral communication skills along with resume and ePortfolio development. May count GEOG 4740 or GEOL 4740.

GEOG 4920 INTERNSHIP (3) LEC. 3. Opportunity to apply classroom experience to real job setting. Course may be repeated for a maximum of 6 credit hours.

GEOG 4930 DIRECTED STUDIES (1-4) IND. Departmental approval. Conferences, reading, research and/or reports may fulfill course requirement. Course may be repeated for a maximum of 4 credit hours.

GEOG 5010 URBAN GEOGRAPHY AND SUSTAINABILITY (3) LEC. 3. Senior standing or Departmental approval. An introduction to the field of urban geography and urban sustainability. Basic principles and processes that constitute the growth of urban areas, history, impact of urbanization, adaptation and mitigation towards a sustainable future.

GEOG 5210 CLIMATOLOGY (3) LEC. 3. Pr., Senior standing or departmental approval. An introduction to the field of climatology. Basic principles and process that constitute the earth’s climate system (e.g. surface-atmosphere energy budge, the hydrologic cycle, and atmospheric motion) as well as climate change and sea level rise.
GEOG 5220 GEOMORPHOLOGY (3) LEC. 2. LAB. 2. Basic concepts, terms, and techniques used to identify landforms and their evolutionary processes. Study of the origin of landforms with emphasis on the eologic processes and structures that generate the landforms and applications of landform analysis. Two all-day weekend trips are required. Two one-hour classes and one two-hour laboratory per week.

GEOG 5300 ADVANCED REGIONAL STUDIES IN GEOGRAPHY (3) LEC. 3. Departmental approval. Spatial patterns of socio-economic development of Latin America and the Caribbean.

GEOG 5310 GEOGRAPHY OF RURAL CHANGE (3) LEC. 3. Examination of the patterns and processes associated with population levels and distributions, natural resource management systems, economic development, and cultural landscapes of rural communities. Credit will not be given for both GEOG 5310 and GEOG 6310.

GEOG 5350 ECONOMIC GEOGRAPHY (3) LEC. 3. Departmental approval. Economic Geography in a global context. Spatial aspects of resource use, agricultural development, manufacturing production and services.

GEOG 5380 POLITICAL GEOGRAPHY (3) LEC. 3. Examination of political processes over space, from local to the global levels. The course examines the development of political space, geographies of voting, the role of identity in shaping nationalism, and the geopolitical relationship between power and place.

GEOG 5400 GEOGRAPHY OF NATURAL HAZARDS (3) LEC. 3. Geography of natural hazards and their impacts on society. Credit will not be given for both GEOG 5400 and GEOG 6400.

GEOG 5510 HUMAN-ENVIRONMENT INTERACTION (3) LEC. 3. Departmental approval. Investigation of the inter-relationships between humans and their natural or physical environments.

GEOG 5550 GEOGRAPHY OF WATER RESOURCES (3) LEC. 3. Study of water use, management, law, and conflicts at local and international scales. May count either GEOG 5550 or GEOG 6550.

GEOG 5600 GLOBAL RESOURCES AND THE ENVIRONMENT (3) LEC. 3. Departmental approval. Global environmental problems such as climate change, ozone and deforestation and international public agencies and private volunteer movements protecting our global commons.

GEOG 5700 QUANTITATIVE METHODS AND SPATIAL ANALYSIS (3) LEC. 3. Pr. STAT 2510 or STAT 2513. Pr., STAT 2510 or similar statistics course. Applications of quantitative methods and spatial statistics to environmental, urban and economic systems and implementations of these techniques in GIS and statistical software. Credit will not be given for both GEOG 5710 and GEOG 6710.

GEOG 5710 GEOGRAPHIC FIELD METHODS (3) LEC. 1. LAB. 4. Geographic methods and techniques used to conduct field research investigations of human and physical characteristics of the landscape. Credit will not be given for both GEOG 5710 and GEOG 6710.

GEOG 5720 PANAMA STUDY ABROAD-CLIMATE CHANGE AND ENVIRONMENT (3) LEC. 3. Departmental approval. Four-week course intended to give students a general understanding of the potential impacts of climate change on Panama’s environment via a mix of lectures, hands-on activities and field trips.

GEOG 5800 GEOGRAPHIC THOUGHT (3) LEC. 3. Departmental approval. Develops effective thinking skills, evaluates written materials in geography, reviews geographical research and produces written reports and papers related to geographic issues.

GEOG 5820/5823 AERIAL PHOTOGRAPHY AND REMOTE SENSING (4) LEC. 3. LAB. 2. Departmental approval. Aerial photo and satellite digital interpretation, photogrammetry, remote sensing technology and photogrammetry and related laboratory exercises.

GEOG 5830/5833 GEOGRAPHIC INFORMATION SYSTEMS (4) LEC. 3. LAB. 2. Introduction to concepts and techniques used in developing a geographic information system (GIS) for evaluating spatial distribution patterns and spatial relationships.

GEOG 5850 GEOGRAPHIC INFORMATION SYSTEMS APPLICATIONS (3) LEC. 3. LAB. 3. Pr. GEOG 5830 or GEOG 6830. Introducing the concepts and implementations of the geographic information analysis and integrate GIS with real-world applications. This is a follow-up course of GEOG 5830/GEOG/6830.

GEOG 5860 ADVANCED CONCEPTS IN CARTOGRAPHY (3) LEC. 2. LAB. 2. Pr. GEOG 3810. Advanced techniques of map design and production including relevant computer graphics applications and related laboratory exercises. Credit will not be given for both GEOG 5860 and GEOG 6860.
GEOG 5870 ADVANCED REMOTE SENSING (3) LEC. 2. LAB. 2. Pr. GEOG 5820. Explores advanced topics of remote sensing for use in research and analysis. Credit will not be given for both GEOG 5870 and GEOG 6870.

GEOG 5880 ADVANCED GEOGRAPHIC INFORMATION SYSTEMS (3) LEC. 2. LAB. 2. Pr. GEOG 5830. Advanced concepts and techniques used in the collection and analysis of data for evaluating spatial patterns and process. Credit will not be given for both GEOG 5880 and GEOG 6880.

GEOG 5970 SEMINAR IN GEOGRAPHY (3) LEC. 3. Development of modern geographic thinking with attention to applied research topics. Course may be repeated for a maximum of 6 credit hours.

GEOG 6010 URBAN GEOGRAPHY AND SUSTAINABILITY (3) LEC. 3. An introduction to the field of urban geography and urban sustainability. Basic principles and processes that constitute the growth of urban areas, history, impact of urbanization, adaptation and mitigation towards a sustainable future.

GEOG 6210 CLIMATOLOGY (3) LEC. 3. Pr., Senior standing or departmental approval. An introduction to the field of climatology. Basic principles and process that constitute the earth's climate system (e.g surface-atmosphere energy budge, the hydrologic cycle, and atmospheric motion, as well as climate change and sea level rise.

GEOG 6220 GEOMORPHOLOGY (3) LEC. 3. Basic concepts, terms, and techniques used to identify landforms and their evolutionary processes. Credit will not be given for both GEOG 5220 and GEOG 6220.

GEOG 6300 ADVANCED REGIONAL STUDIES IN GEOGRAPHY (3) LEC. 3. Departmental approval. Spatial patterns of socio-economic development of Latin America and the Caribbean.

GEOG 6310 GEOGRAPHY OF RURAL CHANGE (3) LEC. 3. Examination of the patterns and processes associated with population levels and distributions, natural resource management systems, economic development, and cultural landscapes of rural communities. Credit will not be given for both GEOG 5310 and GEOG 6310.

GEOG 6350 ECONOMIC GEOGRAPHY (3) LEC. 3. Departmental approval. Economic Geography in a global context. Spatial aspects of resource use, agricultural development, manufacturing production and services.

GEOG 6380 POLITICAL GEOGRAPHY (3) LEC. 3. Examination of political processes over space, from local to the global levels. The course examines the development of political space, geographies of voting, the role of identity in shaping nationalism, and the geopolitical relationship between power and place.

GEOG 6400 GEOGRAPHY OF NATURAL HAZARDS (3) LEC. 3. Geography of natural hazards and their impacts on society. Credit will not be given for both GEOG 5400 and GEOG 6400.

GEOG 6500 GEOGRAPHY OF ENVIRONMENTAL MANAGEMENT (3) LEC. 3. Departmental approval. Understanding and application of the theories and methods for the United States' version of environmental impact assessment.

GEOG 6510 HUMAN-ENVIRONMENT INTERACTION (3) LEC. 3. Departmental approval. Investigation the inter-relationships between humans and their natural or physical environments.

GEOG 6550 GEOGRAPHY OF WATER RESOURCES (3) LEC. 3. Study of water use, management, law, and conflicts at local and international scales. May count either GEOG 5550 or GEOG 6550.

GEOG 6600 GLOBAL RESOURCES AND THE ENVIRONMENT (3) LEC. 3. Departmental approval. Global environmental problems such as climate change, ozone and deforestation and international public agencies and private volunteer movements protecting our global commons.

GEOG 6700 QUANT METH & SPATIAL ANALYSIS (3) LEC. 3. Pr. STAT 2510 or STAT 2513. or similar statistics course. Applications of quantitative methods and spatial statistics to environmental, urban and economic systems and implementations of these techniques in GIS and statistical software. Credit will not be given for both GEOG 5700 and GEOG 6700.

GEOG 6710 GEOGRAPHIC FIELD METHODS (3) LEC. 1. LAB. 4. Geographic methods and techniques used to conduct field research investigations of human and physical characteristics of the landscape. Credit will not be given for both GEOG 5710 and GEOG 6710.

GEOG 6720 PANAMA STUDY ABROAD-CLIMATE CHANGE AND ENVIRONMENT (3) LEC. 3. Departmental approval. Four-week course intended to give students a general understanding of the potential impacts of climate change on Panama's environment via a mix of lectures, hands-on activities and field trips.
GEOG 6800 GEOGRAPHIC THOUGHT (3) LEC. 3. Departmental approval. Develops effective thinking skills; evaluates written materials in geography; Reviews geographical research and produces written reports and papers related to geographic issues.

GEOG 6820/6826 AERIAL PHOTOGRAPHY AND REMOTE SENSING (4) LEC. 3. LAB. 2. Departmental approval. Aerial photo and satellite digital interpretation, photogrammetry, remote sensing technology and photogrammetry and related laboratory exercises.

GEOG 6830/6836 GEOGRAPHIC INFORMATION SYSTEMS (4) LEC. 3. LAB. 2. Departmental approval. Introduction to concepts and techniques used in developing a geographic information system (GIS) for evaluating spatial distribution patterns and spatial relationships.

GEOG 6850 GEOGRAPHIC INFORMATION SYSTEMS APPLICATIONS (3) LEC. 3. LAB. 3. Pr. GEOG 5830 or GEOG 6830. Introducing the concepts and implementations of the geographic information analysis and integrate GIS with real-world applications. This is a follow-up course of GEOG 5830/GEOG/6830.

GEOG 6860 ADVANCED CONCEPTS IN CARTOGRAPHY (3) LEC. 2. LAB. 2. Pr. GEOG 3810. Advanced techniques of map design and production including relevant computer graphics applications and related laboratory exercises. Credit will not be given for both GEOG 5860 and GEOG 6860.

GEOG 6870 ADVANCED REMOTE SENSING (3) LEC. 2. LAB. 2. Pr. GEOG 6820. Explores advanced topics of remote sensing for use in research and analysis. Credit will not be given for both GEOG 5870 and GEOG 6870.

GEOG 6880 ADVANCED GEOGRAPHIC INFORMATION SYSTEMS (3) LEC. 2. LAB. 2. Pr. GEOG 6830. Advanced concepts and techniques used in the collection and analysis of data for evaluating spatial patterns and processes. Credit will not be given for both GEOG 5880 and GEOG 6880.

GEOG 6970 SEMINAR IN GEOGRAPHY (3) LEC. 3. Departmental approval. Development of modern geographic thinking with attention to applied research topics. Course may be repeated for a maximum of 6 credit hours.

GEOG 7930 DIRECTED STUDIES (1-3) IND/RES. Departmental approval. Individualized literature, field and/or laboratory research not available through regularly offered coursework. Subject matter and credit hours shall be determined by student and directing faculty. Course may be repeated for a maximum of 3 credit hours.

GEOG 7980 CAPSTONE RESEARCH (1-3) RES. SU. Departmental approval. enrolled as GEOG MS non-thesis student. Literature, field and/or laboratory research directed toward the completion of capstone project for non-thesis option. Course may be repeated for a maximum of 3 credit hours.

GEOG 7990 M.S. RESEARCH AND THESIS (1-10) RES. Research and Thesis. Course may be repeated with change in topics.

Geology Courses

GEOL 1100/1103 DYNAMIC EARTH (4) LEC. 3. LAB. 2. Coreq. GEOL 1101. Science Core. General physical geology. Survey of the important minerals and rocks. Origin and classification of geologic structures, earthquakes, and landforms. Study of geologic maps. Credit will not be given for both GEOL 1100 and GEOL 3150.

GEOL 1101 DYNAMIC EARTH LABORATORY (0) LAB. 2. Coreq. GEOL 1100. General physical geology. Survey of the important minerals and rocks. Origin and classification of geologic structures, earthquakes, and land forms study of geologic maps.

GEOL 1107 HONORS DYNAMIC EARTH (4) LEC. 3. LAB. 2. Pr. Honors College. Coreq. GEOL 1108. General physical geology for Honors students and for Geology majors. Topics similar to GEOL 1110 but covered in greater depth. Science Core.

GEOL 1108 HONORS DYNAMIC EARTH LABORATORY (0) LAB. 2. Pr. Honors College or Departmental approval. Coreq. GEOL 1107. General physical geology for Honors students and for Geology majors. Topics similar to those in GEOL 1101 but covered in more depth. Science Core.

GEOL 1110/1113 EARTH AND LIFE THROUGH TIME (4) LEC. 3. LAB. 2. Pr. GEOL 1100 or GEOL 1103 or GEOL 1107. Coreq. GEOL 1111. Science Core. Physical and biological history of the Earth, with emphasis on the interaction between life, the atmosphere, rocks, and oceans.

GEOL 1111 EARTH AND LIFE THROUGH TIME LABORATORY (0) LAB. 2. Pr. GEOL 1100 or GEOL 1103 or GEOL 1107. Coreq. GEOL 1110. Examination of rock, fossil, and related data sets bearing on the geological development of the earth with emphasis on North America.
GEOL 1117 HONORS EARTH AND LIFE THROUGH TIME (4) LEC. 3. LAB. 2. Pr. GEOL 1100 or GEOL 1103 or GEOL 1107 or Departmental approval. Coreq. GEOL 1118. Physical and biological history of the Earth, with emphasis on the interaction between life, the atmosphere, rocks, and oceans. For Honors students and Geology majors. Science Core.

GEOL 1118 HONORS EARTH AND LIFE THROUGH TIME LABORATORY (0) LAB. 2. Pr. GEOL 1100 or GEOL 1103 or GEOL 1107 or Departmental approval. Coreq. GEOL 1117. General historical geology for Honors students and Geology majors. Topics similar to those in GEOL 1111 but covered in greater depth. Science Core.

GEOL 1200 MARINE TECHNICAL METHODS (2) LAB. 8. Departmental approval. Introduction to procedures utilized aboard marine research vessels; physical, biological and geological measurements and sampling techniques. Taught only at Dauphin Island Sea Lab. Summer.

GEOL 1220 COASTAL CLIMATOLOGY (2) LEC. 7. Departmental approval. Controlling factors and features of world climates, with attention to coastal areas; application and interpretation of climate data. Taught only at Dauphin Island Sea Lab. Summer only.

GEOL 2000 PROFESSIONAL DEVELOPMENT (1) LEC. 1. Introduction to career opportunities in the Geosciences; goal selection and charting a pathway to success as a professional. Includes writing skills, research and funding opportunities, internships, creation of resumes and ePortfolios, and job applications.

GEOL 2010/2013 MINERALOGY AND OPTICAL CRYSTALLOGRAPHY (5) LEC. 4. LAB. 2. Physical and chemical properties of minerals, classification and roles with emphasis on natural systems, materials science, health, and environment. Credit will not be given for both GEOL 2010 and GEOL 2013.

GEOL 2020 MARINE GEOLOGY (4) LEC. 2. LAB. 4. Departmental approval. Geology of ocean basins; special emphasis on continental shelves, their sediments and the sedimentary process at work there. Taught only at Dauphin Island Sea Lab. Summer only.

GEOL 2100 ENVIRONMENTAL GEOLOGY (4) LEC. 3. LAB. 2. Pr. GEOL 1100 or GEOL 1103 or GEOL 1107. Emphasis on geology as an environmental science; applied geology, geological hazards and environmental regulations as applied to geologic environmental remediation.

GEOL 3100 TERRESTRIAL VEGETATION THROUGH EARTH HISTORY (3) LEC. 2. LAB. 2. Pr. GEOL 2200 and (BIOL 1020 or BIOL 1027). Plants are primary producers and are the foundation upon which the global ecosystem is based. This course focuses on the development, evolution, and application of the plant fossil record to problems in earth history.

GEOL 3150 ENGINEERING GEOLOGY (3) LEC. 2. LAB. 2. Fundamental geologic principles, materials, and processes that affect engineering projects and programs. Emphasis on pre-construction geological analysis to recognize potential hazards and problems. Credit will not be given for both GEOL 3150 and GEOL 1100.

GEOL 3200 INTRODUCTION TO PALEOBIOLOGY (3) LEC. 2. LAB. 2. Pr. GEOL 1110 or GEOL 1113 or GEOL 1117. The nature of the fossil record, applications of that data to geological and biological questions with emphasis on the concepts using examples from all biotic groups.

GEOL 3300 EVOLUTION AND EXTINCTION OF THE DINOSAURIA (3) LEC. 2. LAB. 2. Pr. GEOL 1100 or GEOL 1103 or GEOL 1107. Departmental approval. Survey of the dinosaurs, their evolution and extinction. Southeastern U.S. dinosaurs.

GEOL 3650 FIELD CAMP (6) LEC. 1. LAB. 10. Pr. GEOL 3400. Instruments and methods used in geological field mapping, interpretation of sedimentary, igneous and metamorphic rocks and deformational analysis. Summer only.

GEOL 4010 SEDIMENTARY PETROLOGY (3) LEC. 2. LAB. 2. Pr. GEOL 2050. Departmental approval. Detailed description and classification of sediments and sedimentary rocks with emphasis on interpretation of origins, transport histories, depositional environments and diagnostic histories.

GEOL 4210 ECONOMIC GEOLOGY (3) LEC. 2. LAB. 2. Pr. GEOL 3400. The origin, distribution and classification of mineral deposits formed by igneous, metamorphic and sedimentary processes. Introduction of methods of exploration and development.

GEOL 4260 INTRODUCTION TO GEOCHEMISTRY (3) LEC. 3. Pr. CHEM 1040 and GEOL 2050. Principles governing the distribution of major, minor and trace elements within the earth; differentiation of elements due to geologic processes and the hydrosphere.

GEOL 4300 GEODYNAMICS (3) LEC. 3. Pr. GEOL 3400 and (MATH 1620 or MATH 1623 or MATH 1627) and PHYS 1510. Structure and dynamics of the earth deduced from seismology, gravity, heat flow and magnetism.

GEOL 4740 SENIOR SEMINAR (2) SEM. 2. Geology majors with upperclass standing. Individual research by geoscience undergraduates is coupled with improved written and oral communication skills along with resume and ePortfolio development. May count either GEOL 4740 or GEOG 4740.

GEOL 4920 INTERNSHIP (1-3) INT. SU. Geology majors with upper-class standing (juniors or seniors). An opportunity to apply classroom experience to a real job setting. Course may be repeated for a maximum of 6 credit hours.

GEOL 4930 DIRECTED STUDIES IN UNDERGRADUATE RESEARCH (1-3) AAB. Departmental approval. Directed studies in areas of geology not covered by an existing course or to supplement knowledge gained from an existing course. Course may be repeated for a maximum of 3 credit hours.

GEOL 4970 SPECIAL TOPICS IN GEOLOGY (1-4) ST1. Instruction and discussion of selected topics in geosciences. Course may be repeated for a maximum of 8 credit hours.

GEOL 4980 UNDERGRADUATE RESEARCH METHODS (1-3) IND. Departmental approval. Active participation in original research under supervision of a senior investigator. Course may be repeated for a maximum of 3 credit hours.

GEOL 4997 HONORS THESIS (2-4) LEC. 3. Pr. Honors College. May incorporate library, field or laboratory research in any proportion. Written thesis and thesis defense required. Course may be repeated for a maximum of 4 credit hours.

GEOL 5060 INTRODUCTION TO MICROPALEONTOLOGY (3) LEC. 2. LAB. 2. Pr. GEOL 3200 and (BIOL 1030 or BIOL 1037). A survey of major groups of fossils small enough to require a microscope for their study. Foraminifera, radiolarians, and ostracodes are emphasized; minor groups of interest include conodonts, diatoms, dinoflagellates, acritarchs, and chitinozoans. Includes laboratory, discussion sessions, and field work.

GEOL 5100 HYDROGEOLOGY (3) LEC. 2. LAB. 2. Pr. (GEOL 1100 or GEOL 1103 or GEOL 1107) and CHEM 1030 and (MATH 1610 or MATH 1613 or MATH 1617) and PHYS 1500. Departmental approval. Fundamentals of groundwater flow in porous media, hydrodynamic dispersion, determination of aquifer properties and geological aspects of groundwater occurrences.

GEOL 5220 GEOMORPHOLOGY (3) LEC. 2. LAB. 1. Study of the origin of landforms with emphasis on the geologic processes and structures that generate the landforms and applications of landform analysis. Two all-day weekend trips are required. Two one-hour classes and one two-hour laboratory per week.

GEOL 5240 COASTAL GEOMORPHOLOGY (2) LEC. 5. LAB. 4. Departmental approval. Introduction to coastal sediment processes and applied coastal geomorphology; emphasis on waves, tides, sediments and their impact of anthropogenic influences. Taught only at Dauphin Island Sea Lab. Summer only.

GEOL 5300 BASIN ANALYSIS (3) LEC. 2. LAB. 2. Pr. P/C GEOL 4010. Study of analytical techniques of sedimentary basin fills, including thermal history, litho and biofacies analyses, depositional systems, subsurface logs, seismic reflection, provenance history, evolution, sedimentation and subsidence history.

GEOL 5400 PRINCIPLES OF EARTH SCIENCE (3) LEC. 2. LAB. 2. Departmental approval. A special course for in-service and future teachers only. Internal and surficial geologic processes, meteorology and oceanography.

GEOL 5440 ELECTRON MICROPROBE ANALYSIS (3) LEC. 2. LAB. 1. Pr. CHEM 1040 and PHYS 1510. Instruction in the theory and application of EMPA (electron microprobe analysis) and SEM (scanning electron microscopy). The course provides an understanding the EMPA as a research tool for evaluating the composition and structure of a wide range of materials.

GEOL 5600 APPLIED GEOPHYSICS (4) LEC. 3. LAB. 2. Pr. (GEOL 1100 or GEOL 1103 or GEOL 1107 or GEOL 3150) and (MATH 1620 or MATH 1623 or MATH 1627) and PHYS 1510. Departmental approval. Overview of geophysical methods with applications to resource, tectonic and environmental analyses. Seismic refraction and reflection, gravity, magnetics, electrical and electromagnetic methods will be included.

GEOL 5720 PANAMA STUDY ABROAD-CLIMATE CHANGE AND ENVIRONMENT (3) LEC. 3. Pr., Departmental approval. Four-week course intended to give students a general understanding of the potential impacts of climate change on Panama's environment via a mix of lectures, hands-on activities and field trips.

GEOL 5840 CLIMATE CHANGE AND SOCIETY (3) LEC. 3. The science of Earth’s changing climate, the societal influences on climate change, as well as the expected impacts based on the collected scientific evidence. Analyzes key aspects of climate science, the drivers of climate change, Earth’s climate trends, the evidence of climate change, the predicted future climate scenarios, the expected impacts, and the array of possible response options.

GEOL 6060 INTRODUCTION TO MICROPALeOONTOLOGY (3) LEC. 3. LAB. 1. A survey of major groups of fossils small enough to require a microscope for their study. Foraminifera, radiolarians, and ostracodes are emphasized; minor groups of interest include conodonts, diatoms, dinoflagellates, acritarchs, and chitinozoans. Includes laboratory, discussion sessions, and field work.

GEOL 6100 HYDROGEOLOGY (3) LEC. 2. LAB. 2. Pr. (GEOL 1100 or GEOL 1103 or GEOL 1107) and CHEM 1030 and (MATH 1610 or MATH 1613 or MATH 1617) and PHYS 1500. Departmental approval. Fundamentals of groundwater flow in porous media, hydrodynamic dispersion, determination of aquifer properties and geological aspects of groundwater occurrences.

GEOL 6220 GEOMORPHOLOGY (3) LEC. 2. LAB. 2. Study of origin of landforms with emphasis on geologic processes and structures that generate landforms; includes the applications of landform analysis. May count either GEOL 6220 or GEOG 6220.

GEOL 6240 COASTAL GEOMORPHOLOGY (2) LEC. 5. LAB. 4. Departmental approval. Introduction to coastal sediment processes and applied coastal geomorphology; emphasis on waves, tides, sediments and their impact of anthropogenic influences. Taught only at Dauphin Island Sea Lab. Summer only.

GEOL 6300 BASIN ANALYSIS (3) LEC. 2. LAB. 2. Pr. GEOL 4010. Departmental approval. Study of analytical techniques of sedimentary basin fills, including thermal history, litho and biofacies analyses, depositional systems, subsurface logs, seismic reflection, provenance history, evolution, sedimentation and subsidence history.

GEOL 6400 PRINCIPLES OF EARTH SCIENCE (3) LEC. 2. LAB. 2. Departmental approval. A special course for in-service and future teachers only. Internal and surficial geologic processes, meteorology and oceanography.

GEOL 6440 ELECTRON MICROPROBE ANALYSIS (3) LEC. 2. LAB. 1. Pr. CHEM 1040 and PHYS 1510. Instruction to theory and application of EMPA (electron microprobe analysis) and SEM (scanning electron microscopy). Provides an understanding of EMPA as a research tool for evaluating composition and structure of wide range of materials. GEOL 5440 or GEOL 6440.

GEOL 6600 APPLIED GEOPHYSICS (4) LEC. 3. LAB. 2. Pr. (GEOL 1100 or GEOL 1103 or GEOL 1107 or GEOL 3150) and (MATH 1620 or MATH 1623 or MATH 1627) and PHYS 1510. Departmental approval. Overview of geophysical methods with applications to resource, tectonic and environmental analyses. Seismic refraction and reflection, gravity, magnetics, electrical and electromagnetic methods will be included.

GEOL 6840 CLIMATE CHANGE AND SOCIETY (3) LEC. 3. The course will investigate the science of Earth’s changing climate, the societal influences on climate change, as well as the expected impacts based on the collected scientific evidence. Analysis of peer-reviewed literature on the key aspects of climate science, the drivers of climate change, Earth’s climate trends, the evidence of climate change, predicted future climate scenarios, expected impacts, and the array of possible societal response options to prevent/mitigate the consequences of anthropogenic climate change. The class will have a strong component of discussion of literature and foundational knowledge as well as reflection on what students have learned and the implications of this knowledge for their areas of interest and generally for their lives.
GEOL 7100 GEOCOMMUNICATION (3) LEC. 3. Departmental approval. Instruction and practice in written and oral communication skills necessary for a successful career in the geosciences; emphasis on preparation of scientific articles, technical reports, abstracts, and thesis; preparation and delivery of oral presentations.

GEOL 7200 TECTONICS (3) LEC. 2. LAB. 2. Pr. GEOL 2050 and GEOL 4010. Departmental approval. Emphasis will be placed on plate tectonics and driving forces, evolution of collisional, transform and extensional systems, and dynamic indicators of past and current tectonic processes.

GEOL 7220 GEOGRAPHIC INFORMATION SYSTEMS AND MARINE RESEARCH (3) LEC. 10. LAB. 15. Departmental approval. Introduction to geographical information system (GIS) techniques with a focus on application in the marine environment. Taught only at Dauphin Island Sea Lab. Summer only.

GEOL 7260 AQUEOUS AND ENVIRONMENTAL GEOCHEMISTRY (3) LEC. 2. LAB. 2. Pr. CHEM 1040 and GEOL 2050. Departmental approval. Study of water-rock reactions that control the chemical composition of groundwater; aqueous geochemistry of trace elements; groundwater pollution, remediation and geomic robiology.

GEOL 7286 CLIMATE CHANGE LITERACY AND COMMUNICATION (3) DSL. 3. Must be a graduate student, or obtain departmental consent after undergraduate student meets Auburn University criteria for taking a 7000-level course. Investigates the discipline-based geoscience education lenses of people's understanding (cognitive), emotional influences (affect), and actions (behavior) about climate change literacy. Critically analyzes misconceptions, mental models, cultural influences, risk perceptions and the best practices for addressing these barriers. May count either GEOL 7280 or GEOL 7286.

GEOL 7300 CYCLES THROUGH EARTH HISTORY (3) LEC. 2. LAB. 2. Pr. GEOL 4100 and GEOL 4260. Discussion of the fundamental processes controlling sedimentary cycles at different physical, biotic, and temporal scales.

GEOL 7310 ISSUES IN PALEONTOLOGY (3) LEC. 3. Pr. GEOL 3200. Advanced applications of paleontological data sets to topics that may include taphonomy, biogeochemistry, evolution, asystematic functional morphology, paleoecology, paleoclimatology and biostratigraphy.

GEOL 7400 ADVANCED ECONOMIC GEOLOGY (3) LEC. 2. LAB. 2. Pr. GEOL 4210. Departmental approval. The practical and theoretical aspects of economic geology as applied to exploration and development of natural resources.

GEOL 7410 GEOLOGY OF ORGANIC MATTER (3) LEC. 2. LAB. 2. Pr. GEOL 4010 and GEOL 4110. Departmental approval. The origins, classifications, taphonomy of organic matter, modern and ancient processes and environments of deposition of organic-rich strata, including hydrocarbon- source rocks and coals. Laboratory and field trips required.

GEOL 7450 MINERAL RESOURCES AND THE ENVIRONMENT (3) LEC. 2. LAB. 2. Pr. CHEM 1040 and GEOL 2050. Overview of geology and geographic distribution of mineral resources; economic aspects affecting their extraction; environmental impacts and cost of mineral resource extraction.

GEOL 7500 PALEOClimatology (3) LEC. 3. Explores how Earth's climate has evolved dynamically over time, varying within restricted boundaries that allowed life to exist and evolve. Explores interactions among Earth's surface abiotic and biotic components, and includes plate tectonics, atmospheric chemistry and physics, and ocean productivity.

GEOL 7550 ADVANCED GEOPHYSICAL METHODS (3) LEC. 2. LAB. 2. Pr. GEOL 6600. Departmental approval. Advanced treatment of geophysical methods, data interpretation and modeling. Applications to resource development and environmental assessments will be explored, with emphasis on seismic methods.

GEOL 7600 PETROLOGY (3) LEC. 2. LAB. 2. Pr. GEOL 2050 and GEOL 4010. Departmental approval. The description, classification, formative processes, and petrologic interpretation of igneous, metamorphic and sedimentary rocks.
GEOL 7610 STRUCTURAL AND METAMORPHIC ANALYSIS (3) LEC. 2. LAB. 2. Pr. GEOL 2050 and GEOL 3400 and GEOL 3650. Quantitative analysis of dynamic, kinematic and chemical responses of rocks and minerals to crustal movements and dynamo thermal metamorphism.

GEOL 7650 FACIES ANALYSIS AND SEQUENCE STRATIGRAPHY (3) LEC. 2. LAB. 2. Pr. GEOL 4010 and GEOL 4110. Departmental approval. Systematic analysis of modern and ancient deposition facies, and their interpretation in a sequence stratigraphic context. Laboratory and field trips required.

GEOL 7700 ANALYTICAL ISOTOPE GEOCHEMISTRY (3) LEC. 2. LAB. 1. Pr. CHEM 1040 or PHYS 1510 or MATH 1620. Biweekly lectures will teach the theory and principles of isotope geochemistry and mass spectrometry, leading to applications in geoscience research. Lab sessions and problem sets will support lectures and emphasize work with various mass spectrometers in the Department of Geosciences.

GEOL 7930 DIRECTED STUDIES (1-3) LEC. 3. Departmental approval. Directed studies. May incorporate literature, field and/or laboratory research in any proportion. Subject matter and credit hours shall be determined by student and directing faculty. Course may be repeated for a maximum of 3 credit hours.

GEOL 7980 CAPSTONE PROJECT (1-3) LEC. SU. Literature, field and/or laboratory research directed towards completion of capstone project required for non-thesis option. Course may be repeated for a maximum of 3 credit hours.

GEOL 7990 RESEARCH AND THESIS (1-10) MST. Departmental Approval. Course may be repeated with change in topics.

GEOL 8900 DIRECTED STUDY (3) IND. 3. Provides exposure to discipline-specific research procedures in Earth System Science. Students will work closely with their mentors to explore an Earth-system problem through directed readings, literature searches, field work, laboratory experimentation, and quantitative analysis.

| Total Hours: 120 |

---

1. Students must complete a two-course sequence in either HIST or LIT (for example, World History 1 and 2 or American Lit 1 and 2). For complete HIST and Lit sequence options, see the Bulletin.

2. If a LIT sequence is chosen, this course must be a CORE SOC SCI. If a HIST sequence is chosen, this course must be a CORE HUMANITIES.

3. CORE Science Sequences:
   - BIOL 1020/BIOL 1021, BIOL 1030/BIOL 1031, CHEM 1030/CHEM 1031, CHEM 1040/CHEM 1041, CHEM 1110/CHEM 1111, CHEM 1120/CHEM 1121, GEOL 1100, PHYS 1500, PHYS 1510, PHYS 1600, PHYS 1610.

4. Elective hours may be substituted upon passing the COMP 1AA0 placement test. See the Computer Science and Engineering Dept. for details.

5. This course must be taken the semester of graduation.

Courses in BOLD will be used to calculate GPA in major. Options for courses labeled CORE are in the Auburn University Bulletin (www.auburn.edu/bulletin) under Core Curriculum.
Curriculum in Geology - Earth System Science Option

1 Geology Electives: 12 hours required. Geology electives may be selected from the following groups of courses with NO MORE THAN 4 hours coming from group B.

GEOL Group A Electives:
- GEOL 4210 (3) Economic Geology
- GEOL 4260 (3) Geochemistry
- GEOL 5060 (4) Invertebrate Paleontology
- GEOL 5100 (3) Hydrogeology
- GEOL 5300 (3) Basin Analysis
- GEOL 5600 (4) Applied Geophysics
- GEOG 5220 (3) Geomorphology

GEOL Group B Electives:
- GEOL 3060 (3) Lunar and Planetary Geology
- GEOL 4930 Actualistic Paleontology
- GEOL 4930 Ichnology
- GEOL 4930 (1) Carbonate Depositional Systems
- GEOL 4930 Unspecified Directed Study (no more than 2 hours)
- GEOL 4980 Unspecified Research Methods (no more than 2 hours)

Technical Electives: The following courses are approved. Other courses may be permitted with prior approval of the GEOL advisor. Students must meet with their Geology advisor and have technical electives approved in advance. An approval form must be on file in the Dean's office in order to be cleared for graduation.
- AERO 3040, 5320
- AGRN 3040, 3100,5000,5080,5150,5300
- ANTH any 2000+ course
- BIOL 2425,3030, 3060,3075,3200,4010,4020
- CI\TL 2010, 3210, 3310, 3120,4210, 4310, 5330, 5340
- CHEM 2070, 3050, 3200, any 3000-5000 course
- COMP 2200, 2210, any 2000-3000 course
- GEOG any 3000-5000 course
- MATH any 2000-5000 course
- MECH any 3000-5000 course
- PHYS any 2000-5000 course
- STAT any 2000-5000 course

2 GEOG 1010 Global Geography is suggested for majors.

**ESS Elective** (BIOL 3075 Introduction to Oceanography, offered at Dauphin Island Sea Lab in summer, is recommended)

1GEOG 1010 Global Geography is suggested for majors.

### Earth System Science Electives

- GEOL 2050 Igneous and Metamorphic Petrology
- GEOG 2850 Map Reading and Analysis
- GEOL 3400 Structural Geology
- GEOG 5400 Geography of Natural Hazards
- GEOL 4010 Sedimentary Petrology
- GEOG 5500 Geography of Environmental Management
- GEOL 4260 Introduction to Geochemistry
Minor in Geography

GEOG 5510 Human-Environment Interaction
GEOL 4300 Geodynamics
GEOG 5550 Geography of Water Resources
GEOL 4930 Directed Studies in Undergraduate Research
GEOG 5600 Global Resources and the Environment
GEOL 5100 Hydrogeology
GEOG 5820 Aerial Photography and Remote Sensing
GEOL 5600 Applied Geophysics
BIOL 2500 Human Anatomy and Physiology I
BIOL 3040 Biology of Marine Systems
BIOL 3075 Introduction to Oceanography (Dauphin Island Sea Lab)
BIOL 3100 Plant Biology
BIOL 3200 General Microbiology & BIOL 3201 General Microbiology Laboratory
BIOL 4010 Invertebrate Biodiversity
BIOL 4020 Vertebrate Biodiversity
BIOL 5090 Conservation Biology
BIOL 5150 Community Ecology
CHEM 2030 Survey of Organic Chemistry
CHEM 2071 Organic Chemistry I Laboratory
CHEM 2080 Organic Chemistry II
CHEM 2081 Organic Chemistry II Laboratory
CHEM 3050 Analytical Chemistry
CHEM 3160 Survey of Physical Chemistry
PHYS 3500 Physics of the World Around Us
NATR 5050 Urban Ecology
NATR 5310 Environmental Ethics
CIVL 3220 Water and Waste Treatment

Minor in Geology

A minimum of fifteen semester hours including any two of the following: GEOG 1010/1013/1017 Global Geography, GEOG 2010 Human Geography, and GEOG 2020 Physical Geography. In addition, 9 hours of electives consisting of any GEOG courses at the 3000 level or above, except GEOG 4920 Internship or GEOG 4930 Directed Studies. Students must earn a grade of “C” or better in all minor courses.

Minor in Geology

A minimum of fifteen semester hours including GEOL 1100/1107 Dynamic Earth. Additional GEOL courses may include any other GEOL courses at the 3000 level or above, excluding GEOL 4920 Internship. Students must earn a grade of “C” or better in all minor courses.

Mathematics & Statistics

The Department of Mathematics and Statistics offers degree curricula in mathematics and in applied mathematics (with its various options), as well as minors and a minor in statistics. Majors acquire a firm foundation in mathematics preparing them for further study,
or for careers in mathematics or statistics and related fields. For a minor in MATH or STAT see the “Minors” heading earlier in this section.

This curriculum of Mathematics provides students with a general background in Mathematics preparing them for graduate studies in Mathematics, or careers that require mathematical knowledge and problem solving skills, and is well suited for students who wish to pursue career in teaching Mathematics in a university/college, or who desire more flexibility or emphasis in liberal arts.

The Department of Mathematics and Statistics offers three options in the field of Applied Mathematics. The option in Applied Mathematics is suitable for students who are preparing for graduate work in mathematics, or applied mathematics, as well as for those anticipating careers which are supported by significant applied mathematics such as engineering, physical sciences, or computer science, and the more recently mathematicized fields of biological, behavioral, or managerial sciences.

The option in Discrete Mathematics prepares students for graduate work in mathematics or theoretical computer science, and for careers in industry supported by discrete mathematics dealing with problems in graph theory, operations research, discrete optimization, computer science, communications and information sciences.

The option in Actuarial Science prepares students for a career in the insurance industry and in other businesses relying on the expertise of actuaries, but is at the same time flexible enough to allow its graduates to enter graduate programs in mathematics and related areas.

Starting with the Fall 2015 semester incoming students will be required to earn a “C” or better in certain prerequisites to take the follow on course. The follow-on courses are: Pre-Calculus Algebra and Trigonometry, Calculus I, Calculus II, and Calculus III.

Students should consult the departmental advisor to determine appropriate technical electives for the emphasis of their choice.

**Majors**

- Applied Mathematics - Actuarial Science Option (p. 1286)
- Applied Mathematics - Applied Discrete Mathematics Options (p. 1287)
- Applied Mathematics (p. 1288)
- Mathematics (p. 1285)

**Minors**

- Mathematics (p. 1286)
- Statistics (p. 1289)

**Mathematics Courses**

**MATH 1000/1003 COLLEGE ALGEBRA (3)** LEC. 3. Fundamental concepts of algebra, equations and inequalities, functions and graphs, polynomial and rational functions. Does not satisfy the core requirement in mathematics. Students who have previous credit in any higher-numbered math course may not also receive credit for this course.

**MATH 1100 FINITE MATH AND APPLICATIONS (3)** LEC. 3. Pr. A02 score of 22 or S02 score of 520 or S12 score of 550 or MATH 1000 or MATH 1003 or MPME score of 052. Mathematics Core. Overview of finite mathematics and its applications. Graph theory, matrices, finite and conditional probability; descriptive and inferential statistics; voting methods, game theory. A02 refers to the ACT MATH score; S02 refers to the SAT MATH score taken between 2005- January 2016; S12 refers to the SAT MATH score taken between March 2016-present.

**MATH 1120/1123 PRE-CALCULUS ALGEBRA (3)** LEC. 3. Pr. A02 score of 22 or S02 score of 520 or S12 score of 550 or MATH 1000 or MATH 1003 or MPME score of 052. Mathematics Core. Preparatory course for calculus. Basic analytic and geometric rities of trigonometric functions. Complex numbers, De Moivre’s Theorem, polar coordinates. No credit is given to students with higher-numbered math course. Credit for only one of MATH 1120/MATH 1123. A02 refers to the ACT MATH score; S02 refers to the SAT MATH score taken between 2005- January 2016; S12 refers to the SAT MATH score taken between March 2016-present.

**MATH 1121 PRE-CALCULUS ALGEBRA WORKSHOP (1)** LAB. 1. SU. Coreq. MATH 1120 and MATH 1000 and MATH 1123 and MATH 1003. Workshop for College Algebra and Pre-Calculus Algebra.
MATH 1130/1133 PRE-CALCULUS TRIGONOMETRY (3) LEC. 3. Pr. A02 score of 23 or S02 score of 540 or S12 score of 565 or MATH 1120 or MATH 1123 or MPME score of 060. Mathematics Core. Preparatory course for the calculus sequence. Basic analytic and geometric properties of the trigonometric functions. Complex numbers, de Moivre's theorem, polar coordinates. Students who have previous credit in any higher-numbered math course may not receive credit. Students may receive credit for only one of MATH 1130/ MATH 1133. A02 refers to the ACT MATH score; S02 refers to the SAT MATH score taken between 2005- January 2016; S12 refers to the SAT MATH score taken between March 2016-present.

MATH 1150/1153 PRE-CALCULUS ALGEBRA AND TRIGONOMETRY (4) LEC. 4. Pr. A02 score of 23 or S02 score of 540 or S12 score of 565 or MATH 1000 or MATH 1003 or MPME score of 060. C or better in MATH 1000 or MATH 1003. Mathematics Core. Algebraic functions, Exponential Logarithmic functions. Analytic and geometric properties of trigonometric functions. Students with previous credit in any higher-numbered math course may not receive credit. A02 refers to the ACT MATH score; S02 refers to the SAT MATH score taken between 2005- January 2016; S12 refers to the SAT MATH score taken between March 2016-present.

MATH 1151 MATHEXCEL PRECALCULUS WORKSHOP (2) LEC. 2. SU. Coreq. MATH 1150. Appropriate score on the mathematics placement exam or grade of "C" or better in MATH 1000. Workshop for MATH 1150. Two 2-hour sessions per week.

MATH 1610/1613 CALCULUS I (4) LEC. 4. Pr. A02 score of 26 or S02 score of 600 or S12 score of 620 or MATH 1130 or MATH 1133 or MATH 1150 or MATH 1153 or MPME score of 076. "C" or better in MATH 1130, MATH 1133, MATH 1150 or MATH 1153. Mathematics Core. Limits, the derivative of algebraic, trigonometric, exponential, logarithmic functions. Applications of the derivative, antiderivatives, the definite integral and applications to area problems, the fundamental theorem of calculus. Students may receive credit for only one of MATH 1610/1613/1617/1710. A02 refers to the ACT MATH score; S02 refers to the SAT MATH score taken between 2005- January 2016; S12 refers to the SAT MATH score taken between March 2016-present.

MATH 1620/1623 CALCULUS II (4) LEC. 4. Pr. MATH 1610 or MATH 1613 or MATH 1617. "C" or better in MATH 1610, MATH 1613, or MATH 1617. Techniques of integration, applications of the integral, parametric equations, polar coordinates. Vectors, lines and planes in space. Infinite sequences and series. Students may receive credit for only one of MATH 1620 or MATH 1627.

MATH 1680/1683 CALCULUS WITH BUSINESS APPLICATIONS I (4) LEC. 3, LEC. 2. Pr. A02 score of 25 or S02 score of 580 or S12 score of 600 or MATH 1120 or MATH 1123 or MATH 1130 or MATH 1133 or MATH 1150 or MATH 1153 or MPME score of 068. Students in College of Business. Mathematics Core. Differentiation and integration of exponential logarithmic algebraic functions, applications to business. Functions of several variables, partial derivatives, multiple integrals.

MATH 1681 MATHEXCEL BUSINESS CALCULUS WORKSHOP I (2) LEC. 2. SU. Coreq. MATH 1680. Workshop for MATH 1680. Two 2-hour sessions per week.

MATH 1690 CALCULUS WITH BUSINESS APPS II (3) LEC. 3. Pr. MATH 1680 or MATH 1683 or MATH 1610 or MATH 1617 or MATH 1613 or Departmental approval. Probability, random variables, probability distributions. Further topics in calculus: integration, functions of several variables, applications to probability. Applications to business and related areas. Credit will not be given to majors in Engineering or Math or Physics.
MATH 1691 MATHEXCEL BUSINESS CALCULUS WORKSHOP II (2) LEC. 2. SU. Coreq. MATH 1690. Workshop for MATH 1690. Two 2-hours sessions per week.

MATH 1950 FIRST YEAR MATHEMATICS SEMINAR (1) SEM. 1. This seminar will provide a shared intellectual experience for incoming freshmen mathematics majors. It will serve as a focused and interactive forum to provide a glimpse into the world of mathematics that lies beyond elementary calculus. Each semester's symposium will be devoted to a specific mathematical topic. Writing about mathematics and explaining mathematical ideas to both "math people" and "non-math people" will be emphasized. Only offered to incoming first-year students (though transfer students and higher rank students may be allowed to enroll on an approval basis). May not be repeated for credit. High School Math will be required.

MATH 2630/2633 CALCULUS III (4) LEC. 4. Pr. MATH 1620 or MATH 1623 or MATH 1627 or MATH 1720. "C" or better in MATH 1620, MATH 1623 or MATH 1627. Multivariate calculus: vector-valued functions, partial derivatives, multiple integration, vector calculus. Credit will be given for only one of MATH 2630, MATH 2637, or MATH 2730.

MATH 2637 HONORS CALCULUS III (4) LEC. 4. Pr. MATH 1620 or MATH 1623 or MATH 1627. Must have earned a "C" or better in MATH 1620, MATH 1623 or MATH 1627. Honors version of MATH 2630. Membership in the Honors College or Departmental approval required. Recommended for all Mathematics majors: Applied Math-Actuarial Sci(ACCTU), Applied Math-Discrete(DISC), Applied Mathematics(AMTH), and Mathematics(MATH). The same material as MATH 2630, but in greater depth appropriate for honors students and Mathematics majors. Credit will be given for only one of MATH 2630 or MATH 2633 or MATH 2637.

MATH 2650 LINEAR DIFFERENTIAL EQUATIONS (3) LEC. 3. Pr. P/C MATH 2630 or P/C MATH 2633 or P/C MATH 2637. Introduction to ordinary differential equations, specifically linear equations of first and second order, and applications.

MATH 2660 TOPICS IN LINEAR ALGEBRA (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627. Matrices, row-reduction, systems of linear equations, (finite-dimensional) vector spaces, subspaces, bases, dimension, change of basis, linear transformations, kernels, orthogonality, Gram-Schmidt.

MATH 2667 HONORS TOPICS IN LINEAR ALGEBRA (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627. Must have earned a "C" or better in MATH 1620 or MATH 1623 or MATH 1627. Honors version of MATH 2660. Membership in the Honors College or Departmental approval required. Recommended for all Mathematics majors: (Applied Math-Actuarial Sci(ACCTU), Applied Math-Discrete(DISC), Applied Mathematics(AMTH), and Mathematics(MATH). Topics include: matrices, row-reduction, systems of linear equations, (finite-dimensional) vector spaces, subspaces, bases, dimension, change of basis, linear transformations, kernels, orthogonality, Gram-Schmidt. The same material as MATH 2660, but in greater depth appropriate for honors students and Mathematics majors, with possible additional topics as determined by the instructor. Credit will be given for only one of MATH 2660 or MATH 2667.

MATH 2790 MATHEMATICS OF INTEREST THEORY (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627 or MATH 1720. Mathematical foundations of the theory of interest necessary as preparation for the Society of Actuaries examination on the theory of interest.

MATH 2850 MATHEMATICS FOR ELEMENTARY EDUCATION I (3) LEC. 3. For Elementary Education major or departmental approval. Mathematical insights for elementary school teachers. Sets, the structure of the number system (integers, fraction, decimals).

MATH 2860 MATHEMATICS FOR ELEMENTARY EDUCATION II (3) LEC. 3. Pr. MATH 2850. For Elementary Education majors or departmental approval. Mathematical insights into measurement and geometry for elementary school teachers. Shapes in two and three dimensions. Similarities, congruences and transformations.

MATH 2870 MATHEMATICS FOR ELEMENTARY EDUCATION III (3) LEC. 3. For Elementary Education majors or departmental approval. Mathematical insights into probability, data analysis and functions for elementary school teachers. Uncertainty, probability spaces and an introduction to statistics. Relationships, functions and change.

MATH 3010 HISTORY OF MATHEMATICS (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627 or MATH 1720. Departmental approval. The evolution of modern mathematics from its motivational roots in the physical sciences; the lives and contributions of outstanding mathematicians; the parallel development of mathematics and western culture.

MATH 3100 INTRODUCTION TO ADVANCED MATHEMATICS (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. Teaching of the fundamental abilities necessary for the pursuance of mathematical studies. Logic and set theory, mathematical induction, basic number theory, basic analysis. Credit will not be given for both MATH 3100 and Math 3710.
MATH 3710 DISCRETE MATHEMATICS (3) LEC. 3. Pr. MATH 2660. Methods of proof, induction, counting, inclusion-exclusion, discrete probability, relations, partial orders, graphs, trees, languages, grammars, finite state machines, automata. Credit will not be given for both MATH 3710 and Math 3100.

MATH 4110 ADVANCED LOGIC (3) LEC. 3. Pr. MATH 2630 or MATH 2637 and MATH 2730. Advanced topics in logic. For example: soundness, completeness, incompleteness, set theory, proof theory, model theory, non-standard logics. May count either MATH 4110 or PHIL 4110.

MATH 4790 ACTUARIAL SEMINAR IN THE MATHEMATICS OF FINANCE (3) LEC. 3. Pr. MATH 2790. Intensive seminar in the mathematical aspects of finance, and the theory of interest primarily intended as preparation for the Society of Actuaries Course 2 examination.

MATH 4820 ACTUARIAL SEMINAR IN PROBABILITY (3) LEC. 3. Pr. STAT 3600. or equivalent. Intensive seminar in calculus, probability, and risk theory primarily intended as preparation for the Society of Actuaries Course 1 examination.

MATH 4930 DIRECTED STUDIES (1-3) IND. Study of individual problems or topics of interest to students. Course may be repeated for a maximum of 3 credit hours.

MATH 4970 SPECIAL TOPICS (1-4) IND. Departmental approval. An individual problems course. Each student will work under the direction of a staff member on a problem of mutual interest. Course may be repeated for a maximum of 4 credit hours.

MATH 4980 UNDERGRADUATE RESEARCH (1-3) IND. Departmental approval. Directed research in the area of specialty under faculty supervision. Course may be repeated for a maximum of 3 credit hours.

MATH 4997 HONORS THESIS (1-6) IND. Pr. Honors College. Course may be repeated for a maximum of 6 credit hours. Membership in Honors College.

MATH 5000 MATH MODELING CONTINUOUS (3) LEC. 3. Pr. MATH 2650 and MATH 2660. Introduction to mathematical models and related techniques. Includes general principles involving continuous deterministic problems and a detailed, specific term project. Programming ability.

MATH 5010 VECTOR CALCULUS (3) LEC. 3. Pr. (MATH 2630 or MATH 2637 or MATH 2730) and MATH 2660. Departmental approval. Vector-valued functions, vector fields. Gradient, divergence, curl. Integral theorems: Green's Theorem, Stoke's Theorem, Gauss' Theorem. Tensors and differential forms. Applications.

MATH 5030 COMPLEX VARIABLES WITH APPLICATIONS I (3) LEC. 3. Pr. MATH 2650. Complex functions and their elementary mapping properties; contour integration and residues; Laurent series; applications to real integrals. MATH 5030-5040 are appropriate for students of engineering or science.

MATH 5040 COMPLEX VARIABLES WITH APPLICATIONS II (3) LEC. 3. Pr. MATH 5030. Linear fractional transformations; conformal mappings; harmonic functions; applications to boundary value problems; analytic continuation; entire functions. MATH 5030-5040 are appropriate for students of engineering or science.

MATH 5050 MATRIX THEORY AND APPLICATIONS (3) LEC. 3. Pr. MATH 2660. Canonical forms, determinants, linear equations, eigenvalue problems.

MATH 5060 ELEMENTARY PARTIAL DIFFERENTIAL EQUATIONS (3) LEC. 3. Pr. MATH 2650. First and second order linear partial differential equations with emphasis on the method of eigenfunction expansions.

MATH 5120 INFORMATION THEORY (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. Information and entropy, information rate optimization and channel capacity, variable-length codes, data compression (Kraft-McMillan inequality, Huffman's algorithm), maximum likelihood decoding, Shannon's Noisy Channel Theorem.

MATH 5130 CALCULUS OF VARIATION (3) LEC. 3. Pr. MATH 2650. Fundamental concepts of extrema of functions and functionals; first and second variations; generalizations; sufficient conditions; constrained functionals; the general Lagrange Problem; optimal control.
MATH 5140 DATA COMPRESSION (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627 or MATH 1720. Lossless compression methods, including static, dynamic, and higher order Huffman and arithmetic encoding, interval and recency rank encoding, and dictionary methods; lossy transform methods (JPEG).

MATH 5150 ALGEBRAIC CODING THEORY (3) LEC. 3. Pr. MATH 2660. Linear codes, Hamming and Golay codes, BCH codes, cyclic codes. Random error detection and correction. Burst-error correction. Decoding algorithms. Credit will not be given for both MATH 5150 and MATH 6150/6156.

MATH 5180 CRYPTOGRAPHY (3) LEC. 3. Pr. MATH 2660. Classical cryptosystems, the Data Encryption Standard, one-way functions and relevant number theoretic problems (factoring, primality testing, discrete logarithm problem), RSA and other public key cryptosystems.

MATH 5190 INTRODUCTION TO APPROXIMATION THEORY (3) LEC. 3. Pr. MATH 2650. Approximation of functions by polynomials, spline functions or trigonometric functions, expansions in series.

MATH 5200 ANALYSIS I (3) LEC. 3. Pr. MATH 3100. "C" or better in MATH 3100. Real numbers, infima and suprema; sequences and series of real numbers, convergence and limits, cauchy sequences and completeness; topology of the real line, Bolzano-Weierstrass and Heine-Borel theorems; real-valued functions of a real variable, continuity and uniform continuity. Emphasis on proofs.

MATH 5210 ANALYSIS II (3) LEC. 3. Pr. MATH 5200. Sequences and series of functions, modes of convergence, power series, elementary functions; derivatives and antiderivatives, the mean-value theorem; Riemann integration and the Fundamental Theorem of Calculus; R^n and abstract spaces, functions of several variables. Emphasis on proofs.

MATH 5280 SYSTEMS OF DIFFERENTIAL EQUATIONS AND APPLICATIONS (3) LEC. 3. Pr. MATH 2650 and MATH 2660. Linear systems of differential equations, stability, phase portraits; non-linear systems, linearization, qualitative properties of orbits, Poincare-Bendixson Theorem; numerical methods; applications.

MATH 5300 THEORY OF DIFFERENCE EQUATIONS (3) LEC. 3. Pr. MATH 2650. Linear difference equations, initial value problems, Green's functions, boundary value problems, systems, periodic solutions, nonlinear difference equations, models.

MATH 5310 INTRODUCTION TO ABSTRACT ALGEBRA I (3) LEC. 3. Pr. MATH 3100. "C" or better in MATH 3100. Groups, Groups of Permutations, isomorphisms and homomorphisms; Cyclic Groups, Quotient Groups, The Fundamental Homomorphism Theorem.

MATH 5320 INTRODUCTION TO ABSTRACT ALGEBRA II (3) LEC. 3. Pr. MATH 5310. Theory of rings and fields, Ideals and Homomorphisms, Quotient Rings, Rings of Polynomials, Extensions of Fields, Galois Theory.

MATH 5330 COMPUTATIONAL ALGEBRA (3) LEC. 3. Pr. MATH 5310. Introduction to computation in multivariate polynomial rings and finite fields. Topics include Groebner bases, Buchberger's Algorithm, kinematic/robotics problems, symbolic manipulation software.

MATH 5370 LINEAR ALGEBRA (3) LEC. 3. Pr. MATH 2660. Introduction to the theoretical foundations of Linear Algebra including vector spaces, basis, dimension, linear transformations, fundamental subspaces, matrix representations, eigenvalues, eigenspaces.

MATH 5380 INTERMEDIATE EUCLIDEAN GEOMETRY I (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. Fundamental concepts and theorems of Euclidean geometry, introduction to higher dimensions. Regular polygons and polyhedra, symmetry groups, convexity, geometric extremum problems. Geometric transformations and their invariants.

MATH 5390 INTERMEDIATE EUCLIDEAN GEOMETRY II (3) LEC. 3. Pr. MATH 5380. Planar graphs and Euler's theorem. The symmetry group of a set, homotheties and similitudes, path, arcs and length of curves, advanced theorems on the circle.

MATH 5460 PERTURBATION METHODS I (3) LEC. 3. Pr. MATH 2660. Analytical solutions of nonlinear problems, ODEs, PDEs, multiple scales, and transcendental equations in engineering, mathematics, and physics using both regular and singular perturbation methods.
MATH 5470 DYNAMICAL SYSTEMS I (3) LEC. 3. Pr. MATH 2650. One dimensional dynamics. The logistic equation, bifurcation theory, chaos, hyperbolicity, symbolic dynamics, Sarkovskii's Theorem, maps of the circle, homoclinic points and the theory of kneading sequences.

MATH 5480 DYNAMICAL SYSTEMS II (3) LEC. 3. Pr. MATH 5470. Higher dimensional and complex dynamics. Lorenz map, Henon map, toral automorphisms, stable and unstable manifolds, strange attractors, quadratic maps of the complex plane, Julia sets, Mandelbrot set.

MATH 5500 INTRODUCTION TO TOPOLOGY (3) LEC. 3. Pr. MATH 3100. C or better in MATH 3100. Metric spaces, topological spaces, continuity, compactness, connectedness, product and quotient spaces and local properties.

MATH 5620 MATHEMATICAL COMPUTATION AND SCIENTIFIC VISUALIZATION (3) LEC. 3. Pr. MATH 2650. A programming language, or departmental approval. An introduction to the computational modeling process, numerical programming tools for large-scale scientific computation, parallel and cluster computing, and to scientific visualization techniques.

MATH 5640 INTRODUCTION TO NUMERICAL ANALYSIS II (3) LEC. 3. Pr. MATH 2660. Programming ability. Numerical solutions of systems of linear equations, numerical computation of eigenvalues and eigenvectors, error analysis. Written programs using the algorithms.

MATH 5650 THEORY OF NONLINEAR OPTIMIZATION (3) LEC. 3. Pr. MATH 2650 and MATH 2660. Kuhn-Tucker conditions, quadratic programming, search methods and gradient methods, Lagrangean and penalty function methods.

MATH 5690 PROBABILITY AND STOCHASTIC PROCESSES I (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. Random variables, discrete and absolutely continuous distributions. Poisson process, expectation and conditional expectation. Moment generating functions, limit distributions. Emphasis on probabilistic reasoning and problem solving. Credit will not be given for both MATH 5670 and STAT 5670.

MATH 5700 PROBABILITY AND STOCHASTIC PROCESSES II (3) LEC. 3. Pr. MATH 5670 or STAT 5670. Multivariate distributions. Central Limit Theorem, Laplace transforms, convolutions, simulation, renewal processes, Continuous-time Markov Chains, Markov renewal and semi-regenerative processes, Brownian motion and diffusion. Credit will not be given for both MATH 5680 and STAT 5680.

MATH 5710 INTRODUCTION TO CHAOTIC AND RANDOM PHENOMENA (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627 or MATH 1720. Stochastic properties of random phenomena in computational complexity, data analysis, chaotic nonlinear systems. Computer simulation and experimenting within Mathematica, supported by internet resources. Credit will not be given for both MATH 5690 and STAT 5690. Basic programming.

MATH 5730 ENUMERATION (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. Using generating functions and Polya theory to do sophisticated counting. Permutations and combinations, inclusion-exclusion, partitions, recurrence relations, group actions, Polya theory with applications.

MATH 5750 COMBINATORIAL DESIGNS (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627 or MATH 1720. Latin squares, mutually orthogonal latin squares, orthogonal and perpendicular arrays, Steiner triple systems, block designs, difference sets and finite geometries.

MATH 5810 ACTUARIAL MATHEMATICS II (3) LEC. 3. Pr. MATH 5800. A development of the mathematical theory of life insurance and annuities. Utility functions, mortality models, life tables, insurance plans, premiums.
MATH 5840 FOUNDATIONS OF NUMBER THEORY FOR SECONDARY SCHOOL TEACHERS (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. Divisibility, Diophantine equations, congruencies.

MATH 5850 NUMERICAL ANALYSIS FOR SECONDARY TEACHERS (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. The numerical solutions of selected problems arising in calculus and algebra along with the programming techniques. Computer familiarity.

MATH 5860 FOUNDATIONS OF NON-EUCLIDEAN GEOMETRY FOR SECONDARY SCHOOL TEACHERS (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. B.L. geometry, hyperbolic geometry, absolute geometry, parallel postulates.

MATH 5870 FINANCIAL MATHEMATICS (3) LEC. 3. Pr. (MATH 1610 or MATH 1613 or MATH 1617) and (MATH 1620 or MATH 1623 or MATH 1627) and MATH 2650 and STAT 3600. Options and spreads, pricing of such options in accordance with the Black-Scholes Equation, and the binomial pricing model.

MATH 5970 SPECIAL TOPICS (1-3) IND. Departmental approval. Topics may vary as needed. Course may be repeated for a maximum of 3 credit hours.

MATH 6000 MATHEMATICAL MODELING: CONTINUOUS (3) LEC. 3. Introduction to mathematical models and related techniques. Includes general principles involving continuous deterministic problems and a detailed, specific term-project. Programming ability.

MATH 6030/6036 COMPLEX VARIABLES WITH APPLICATIONS I (3) LEC. 3. Complex functions and their elementary mapping properties; contour integration and residues; Laurent series; applications to real integrals. MATH 6030-6040 are appropriate for students of engineering or science.

MATH 6040 COMPLEX VARIABLES WITH APPLICATIONS II (3) LEC. 3. Pr. MATH 6030 or MATH 6036. Linear fractional transformations; conformal mappings; harmonic functions; applications to boundary value problems; analytic continuation; entire functions. MATH 6030-6040 are appropriate for students of engineering or science.

MATH 6050 MATRIX THEORY AND APPLICATIONS (3) LEC. 3. Canonical forms, determinants, linear equations, eigenvalue problems.

MATH 6060 ELEMENTARY PARTIAL DIFFERENTIAL EQUATIONS (3) LEC. 3. First and second order linear partial differential equations with emphasis on the method of eigenfunction expansions.

MATH 6120 INFORMATION THEORY (3) LEC. 3. Information and entropy, information rate optimization and channel capacity, variable-length codes, data compression (Kraft-McMillan inequality, Huffman's algorithm), maximum likelihood decoding, Shannon's Noisy Channel Theorem.

MATH 6130 CALCULUS OF VARIATION (3) LEC. 3. Pr. MATH 2650. Fundamental concepts of extrema functions and functionals; first and second generalizations; sufficient conditions; constrained functionals; the general Lagrange problem; optimal control.

MATH 6140 DATA COMPRESSION (3) LEC. 3. Lossless compression methods, including static, dynamic, and higher order Huffman and arithmetic encoding, interval and recency rank encoding, and dictionary methods; lossy transform methods (JPEG).

MATH 6150/6156 ALGEBRAIC CODING THEORY (3) LEC. 3. Pr. MATH 2660. Linear codes, Hamming and Golay codes, BCH codes, cyclic codes. Random error detection and correction. Burst-error correction. Decoding algorithms. Credit will not be given for both MATH 5150 and MATH 6150/6156.

MATH 6180 CRYPTOGRAPHY (3) LEC. 3. Classical cryptosystems, the Data Encryption Standard, one-way functions and relevant number theoretic problems (factoring, primality testing, discrete logarithm problem), RSA and other public key cryptosystems.
MATH 6190 INTRODUCTION TO APPROXIMATION THEORY (3) LEC. 3. Pr. MATH 2650. Approximation of functions by polynomials, spline functions or trigonometric function, expansions in series.

MATH 6200 ANALYSIS I (3) LEC. 3. or equivalent course, subject to departmental approval. Real numbers, infima and suprema; sequences and series of real numbers, convergence and limits, Cauchy sequences and completeness; topology of the real line, Bolzano-Weierstrass and Heine-Borel theorems; real-valued functions of a real variable, continuity and uniform continuity; intermediate value and extreme-value theorems. Emphasis on proofs.

MATH 6210 ANALYSIS II (3) LEC. 3. Pr. MATH 6200. Sequences and series of functions, modes of convergence, power series, elementary functions; derivatives and power series, elementary functions; derivatives and antiderivatives, the mean-value theorem; Riemann integration and the Fundamental Theorem of Calculus; \( \mathbb{R}^n \) and abstract spaces, functions of several variables. Emphasis on proofs.

MATH 6280 SYSTEMS OF DIFFERENTIAL EQUATIONS AND APPLICATIONS (3) LEC. 3. Linear systems of differential equations, stability, phase portraits; non-linear systems, linearization, qualitative properties of orbits, Poincare-Bendixson Theorem; numerical methods; applications.

MATH 6300 THEORY OF DIFFERENCE EQUATIONS (3) LEC. 3. Linear difference equations, initial value problems, Green's functions, boundary value problems, systems, periodic solutions, nonlinear difference equations, models.

MATH 6310 INTRODUCTION TO ABSTRACT ALGEBRA I (3) LEC. 3. Departmental approval. Groups, Groups of Permutations, isomorphisms and homomorphisms; Cyclic Groups, Quotient Groups, The Fundamental Homomorphism Theorem.

MATH 6320 INTRODUCTION TO ABSTRACT ALGEBRA II (3) LEC. 3. Pr. MATH 6310. Theory of rings and fields, Ideals and Homomorphisms, Quotient Rings, Rings of Polynomials, Extensions of Fields, and Galois Theory.

MATH 6330 COMPUTATIONAL ALGEBRA (3) LEC. 3. Pr. MATH 6310. Introduction to computation in multivariate polynomial rings and finite fields. Topics include Groebner bases, Buchberger's Algorithm, kinematic/robotics problems, and symbolic manipulation software.

MATH 6370 LINEAR ALGEBRA (3) LEC. 3. Introduction to the theoretical foundations of Linear Algebra Algebra including vector spaces, basis, dimension, linear transformations, fundamental subspaces matrix representations, eigenvalues, eigenspaces.

MATH 6380 INTERMEDIATE EUCLIDEAN GEOMETRY I (3) LEC. 3. Fundamental concepts and theorems of Euclidean geometry, introduction to higher dimensions. Regular polygons and polyhedra, symmetry groups, convexity, geometric extremum problems. Geometric transformations and their invariants.

MATH 6390 INTERMEDIATE EUCLIDEAN GEOMETRY II (3) LEC. 3. Pr. MATH 6380. Planar graphs and Euler's theorem. The symmetry group of a set, homotheties and similitudes, path, arcs and length of curves, and advanced theorems on the circle.

MATH 6460/6466 PERTURBATION METHODS (3) LEC. 3. Pr. MATH 2660. Departmental approval. Analytical solutions of nonlinear problems, ODES, PDEs, multiple scales, and transcendental equations in engineering, mathematics, and physics using both regular and singular perturbation methods. May count either AERO/MATH 5460 or AERO/MATH 6460.

MATH 6470 DYNAMICAL SYSTEMS I (3) LEC. 3. Pr. MATH 2650. One dimensional dynamics. The logistic equation, bifurcation theory, chaos, hyperbolicity, symbolic dynamics, Sarkovskii's Theorem, maps of the circle, homoclinic points and the theory of kneading sequences.

MATH 6480 DYNAMICAL SYSTEMS II (3) LEC. 3. Pr. MATH 6470. Higher dimensional and complex dynamics. Lorenz map, Henonmap, toral automorphisms, stable and unstable manifolds, strange attractors, quadratic maps of the complex plane, Julia sets, Mandelbrot set.

MATH 6500 INTRODUCTION TO TOPOLOGY (3) LEC. 3. Departmental approval. Metric spaces, topological spaces, continuity, compactness, connectedness, product and quotient spaces and local properties.

MATH 6620 MATHEMATICAL COMPUTATION AND SCIENTIFIC VISUALIZATION (3) LEC. 3. An introduction to the computational modeling process, numerical programming tools for large-scale scientific computation, parallel and cluster computing, and to scientific visualization techniques.

MATH 6640/6646 INTRODUCTION TO NUMERICAL ANALYSIS II (3) LEC. 3. Numerical solutions of systems of linear equations, numerical computation of eigenvalues and eigenvectors, error analysis. Written programs using the algorithms. Programming ability.

MATH 6650 THEORY OF NONLINEAR OPTIMIZATION (3) LEC. 3. Kuhn-Tucker conditions, quadratic programming, search methods and gradient methods, Lagrangean and penalty function methods.

MATH 6670/6676 PROBABILITY AND STOCHASTIC PROCESSES I (3) LEC. 3. Random variables, discrete and absolutely continuous distributions. Poisson process, expectation and conditional expectation. Moment generating functions, limit distributions. Emphasis on probabilistic reasoning and problem solving. Credit will not be given for both MATH 6670 and STAT 6670.

MATH 6680 PROBABILITY AND STOCHASTIC PROCESSES II (3) LEC. 3. Pr. MATH 6670 or MATH 6676 or STAT 6670 or STAT 6676. Multivariate distributions. Central Limit Theorem, Laplace transforms, convolutions, simulation, renewal processes, Continuous-time Markov Chains, Markov renewal and semi-regenerative processes, Brownian motion and diffusion. Credit will not be given for both MATH 6680 and STAT 6680.

MATH 6690 INTRODUCTION TO CHAOTIC AND RANDOM PHENOMENA (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627. Stochastic properties of random phenomena in computational complexity, data analysis, chaotic nonlinear systems. Computer simulation and experimenting within Mathematica, supported by Internet resources. Credit will not be given for both MATH 6690 and STAT 6690.

MATH 6710 LINEAR OPTIMIZATION (3) LEC. 3. Theory and algorithms for standard linear optimization problems. Simplex algorithm and duality, shortest paths, network flows, min-cost flows and circulations, out-of-kilter method, assignments and matchings.

MATH 6730 ENUMERATION (3) LEC. 3. Using generating functions and Polya theory to do sophisticated counting. Permutations and combinations, inclusion-exclusion, partitions, recurrence relations, group actions, Polya theory with applications.

MATH 6770 COMBINATORIAL DESIGNS (3) LEC. 3. Latin squares, mutually orthogonal latin squares, orthogonal and perpendicular arrays, Steiner triple systems, block designs, difference sets and finite geometries.

MATH 6810 ACTUARIAL MATHEMATICS II (3) LEC. 3. Pr. MATH 6800. A development of the mathematical theory of life insurance and annuities. Utility functions, mortality models, life tables, insurance plans, premiums.

MATH 6840 FOUNDATIONS OF NUMBER THEORY FOR SECONDARY SCHOOL TEACHERS (3) LEC. 3. Divisibility, Diophantine equations, congruencies.

MATH 6850 NUMERICAL ANALYSIS FOR SECONDARY TEACHERS (3) LEC. 3. Pr. MATH 2630 or MATH 2637. The numerical solutions of selected problems arising in calculus and algebra along with the programming techniques. Computer familiarity.

MATH 6860 FOUNDATIONS OF NON-EUCLIDEAN GEOMETRY FOR SECONDARY SCHOOL TEACHERS (3) LEC. 3. Pr. MATH 2630 or MATH 2637. B.L. geometry, hyperbolic geometry, absolute geometry, parallel postulates.

MATH 6870 FINANCIAL MATHEMATICS (3) LEC. 3. Pr. (MATH 1610 or MATH 1613 or MATH 1617) and (MATH 1620 or MATH 1623 or MATH 1627) and MATH 2650 and STAT 3600. Options and spreads, pricing of such options in accordance with the Black-Scholes Equation, and the binomial pricing model.

MATH 6970/6976 SPECIAL TOPICS (1-3) IND. Departmental approval. Topics may vary as needed. Course may be repeated for a maximum of 3 credit hours.

MATH 7010/7016 APPLIED MATHEMATICS II (3) LEC. 3. Pr. MATH 7000 or MATH 7006. Calculus of variations, asymptotic expansions, Spectral theory, Fourier transform, Partial differential equations, transform methods and eigenfunction expansions, vibrations, diffusion processes, equilibrium states, Green's functions, boundary layer problems.

MATH 7040/7046 APPROXIMATION THEORY I (3) LEC. 3. Departmental approval. Introduction and theory of some of the important methods of approximation. Includes uniform approximation, best approximation, best trigonometric approximation.

MATH 7050/7056 APPROXIMATION THEORY II (3) LEC. 3. Pr. MATH 7040 or MATH 7046. Least square approximation and rational approximation, and advanced topics of current interest.

MATH 7070 INTERPOLATION I (3) LEC. 3. Departmental approval. Techniques of approximation by interpolation, rates of convergence and methods of estimating error. Simultaneous approximation of functions and their derivatives; spline function interpolation; curve and surface fitting.

MATH 7100 SPECIAL FUNCTIONS (3) LEC. 3. Departmental approval. Special functions from classical complex analysis which play an important role in the mathematics of physics, chemistry, and engineering.

MATH 7130 TENSOR ANALYSIS (3) LEC. 3. Departmental approval. Manifolds, differential structure, vector and tensor fields, vector and tensor bundles, differential forms, chains. elements of differential geometry, advanced topics.

MATH 7140 INTRODUCTION TO MODEL THEORY (3) LEC. 3. Departmental approval. First-order languages, Satisfaction. Consequences. The completeness and compactness theorems, models constructed from constants. Elementary substructures and embeddings, Lowenheim-Skolem-Tarskj theorems. Ultraproducts and ultrapowers.

MATH 7150 AXIOMATIC SET THEORY I (3) LEC. 3. Departmental approval. Introduction to modern set theory. The axioms of ZFC, ordinals and cardinals, closed unbounded sets, the constructible universe L, Martin's Axiom.

MATH 7160 AXIOMATIC SET THEORY II (3) LEC. 3. Pr. MATH 7150. Introduction to forcing, independence results, iterated forcing, consistency of Martin's Axiom.

MATH 7170 ALGORITHMS DISCRETE OPTIMIZATION (3) LEC. 3. Pr. MATH 6750. Theory and practice of discrete algorithms: complexity class classes, reductions, approximate algorithms, greedy algorithms, search techniques, heuristics, randomized algorithms, and numeric algorithms.

MATH 7200 REAL ANALYSIS I (3) LEC. 3. Departmental approval. Sigma algebras, measures, measurable functions, integrability, properties of Lebesgue measure, density, Lusin's theorem, Egeroff's theorem, product measures, Fubini's theorem. Limit theorems involving pointwise convergence and integration.

MATH 7230 FUNCTIONS OF A COMPLEX VARIABLE I (3) LEC. 3. Departmental approval. Complex numbers, analytic functions, derivatives, Cauchy integral theorem and formulae, Taylor and Laurent series, analytic continuation, residues, maximum principles, Riemann surfaces.
### MATH 7240 FUNCTIONS OF A COMPLEX VARIABLE II (3)
- LEC. 3. Pr. MATH 7230.
- Conformal mappings, families of analytic functions and harmonic analysis.

### MATH 7280 ADVANCED THEORY OF ORDINARY DIFFERENTIAL EQUATIONS I (3)
- LEC. 3. Departmental approval.
- Existence and continuation theorems for ordinary differential equations, continuity and differentiability with respect to initial conditions, linear systems, differential inequalities, Sturm theory.

### MATH 7290 ADVANCED THEORY OF ORDINARY DIFFERENTIAL EQUATIONS II (3)
- LEC. 3. Pr. MATH 7280.
- Stability theory, periodic solutions, boundary value problems, disconjugacy of linear equations, Green's functions, upper and lower solutions, a priori bounds methods, current research.

### MATH 7310 ALGEBRA I (3)
- LEC. 3. Departmental approval.
- Groups, Lagrange's Theorem, normal subgroups, factor groups, Isomorphism and Correspondence Theorems. Symmetric groups, alternating groups, free groups, torsion groups. Introduction to rings, correspondence theorems.

### MATH 7320 ALGEBRA II (3)
- LEC. 3. Pr. MATH 7310.
- Rings, modules, vector spaces, and semi-simple modules. Commutative rings; prime and primary ideals, PID's are UFD, factorizations in integral domains, field extensions, the Galois Correspondence Theorem.

### MATH 7330 LINEAR REPRESENTATIONS OF FINITE GROUPS (3)
- LEC. 3. Pr. MATH 7320.
- Maschke's Theorem, characters, orthogonality relations, induced modules, Frobenius reciprocity, Clifford's Theorem, Mackey's Subgroup Theorem, Burnside's theorem on solvability.

### MATH 7340 RING THEORY (3)
- LEC. 3. Pr. MATH 7320.
- Topics on: commutative rings (Cohen-Seidenberg theorems, Krull Intersection Theorem, Dedekind domains), or noncommutative rings (projective modules over Artinian algebras, representation type, Noether-Skolem Theorem, division algebras).

### MATH 7350 ABELIAN GROUPS (3)
- LEC. 3. Pr. MATH 7320.
- Torsion groups: Decompositions, Ulm's theorem, uniqueness theorem for Axion 3 groups, Torsion-free groups: Completely decomposable groups, Butler groups, p-local groups, Warfield groups, splitting criteria. Homological topics.

### MATH 7360 LINEAR REPRESENTATIONS OF FINITE GROUPS (3)
- LEC. 3. Pr. MATH 5370 or MATH 6370.
- Multilinear algebra, symmetry class of tensors, induced operators, generalized matrix functions, and current research topics.

### MATH 7370 MATRICES I (3)
- LEC. 3. Departmental approval.
- Jordan form, functions of a matrix, spectral theorem, singular values, norms, quadratic forms, field of values, inertia; topics of current interest.

### MATH 7380 MATRICES II (3)
- LEC. 3. Pr. MATH 7370.
- Matrix stability and inertia, inequalities for matrix eigenvalues and singular values, The Kronecker and Hadamard matrix products, the exponential and logarithm matrix map; topics of current interest.

### MATH 7390 MULTILINEAR ALGEBRA (3)
- LEC. 3. Pr. MATH 5370 or MATH 6370.
- Multilinear algebra, symmetry class of tensors, induced operators, generalized matrix functions, and current research topics.

### MATH 7400 FUNCTIONAL ANALYSIS I (3)
- LEC. 3. Pr. MATH 7210.

### MATH 7410 FUNCTIONAL ANALYSIS II (3)
- LEC. 3. Pr. MATH 7400.
- C*-algebras, Hermitian, self-adjoint elements, functional calculus for commutative algebras. Normal operators on Hilbert space, spectral theorem, applications, symmetric and self-adjoint operators, normal operators, the spectral theorem.

### MATH 7440 PARTIAL DIFFERENTIAL EQUATIONS I (3)
- LEC. 3. Departmental approval.
- Second order linear elliptic and hyperbolic equations stressing non-linear and numerical problems, characteristic domains of dependence, energy integrals, finite difference schemes, Sobolev spaces, maximum principle.

### MATH 7450 PARTIAL DIFFERENTIAL EQUATIONS II (3)
- LEC. 3. Pr. MATH 7440.
- Parabolic and hyperbolic equations, stressing numerical problems, characteristics, domains of dependence, energy integrals, reaction-diffusion problems, Navier-Stokes equations, fixed-point and Galerkin methods.

### MATH 7460/7466 ADVANCED PERTURBATION METHODS (3)
- LEC. 3. Departmental approval.
MATH 7470 NUMBERS AND OPERATIONS FOR ELEMENTARY TEACHERS (3) LEC. 3. Certified Elementary Teacher or Degree in Elementary/Early Education or departmental approval. Develop a deep understanding of the base ten place value system and the operations and algorithms used with this system.

MATH 7480 MEASUREMENT AND GEOMETRY FOR ELEMENTARY TEACHERS (3) LEC. 3. Certified Elementary Teacher or Degree in Elementary/Early Education or departmental approval. Develop a deep understanding of topics in measurement, 2-D and 3-D geometry needed for teaching elementary school students.

MATH 7490 DATA, STATISTICS AND FUNCTIONS FOR ELEMENTARY TEACHERS (3) LEC. 3. Certified Elementary Teacher or Degree in Elementary/Early Education or departmental approval. Develop a deep understanding of topics in data analysis, probability, statistics and algebra needed for teaching elementary school students.

MATH 7500 TOPOLOGY I (3) LEC. 3. Departmental approval. Separation and countability axioms, covering properties, completeness, connectedness, metric spaces and metrizability, product and quotient spaces, function spaces.

MATH 7510 TOPOLOGY II (3) LEC. 3. Pr. MATH 7500. Homotopy, elementary properties of retracts, fundamental groups, covering spaces, computations of fundamental groups.

MATH 7530 CONTINUUM THEORY I (3) LEC. 3. Pr. MATH 7510. Departmental approval. Topics such as inverse limits, decompositions, hyperspaces, special mappings, topological structures from the pathological (indecomposable continua), to the straightforward (Peano continua).

MATH 7540 CONTINUUM THEORY II (3) LEC. 3. Pr. MATH 7530. Topics in continuum theory such as confluent mappings, epsilon mappings, chains, to-the-boundary theorems, relationship to inverse limits, advanced topics.

MATH 7550 SET THEORETIC TOPOLOGY I (3) LEC. 3. Pr. MATH 7510. Departmental approval. Compactifications, covering properties, metrization theorems and generalized metrizable spaces, topological groups.

MATH 7560 SET THEORETIC TOPOLOGY II (3) LEC. 3. Pr. MATH 7550. Topological Groups, Cardinal invariants, use of set-theoretic axioms such as Martin’s Axiom, independence results, advanced topics.

MATH 7570 EUCLIDEAN TOPOLOGY I (3) LEC. 3. Pr. MATH 7510. An introduction to concepts basic in algebraic and geometric topology through the study of simple objects such as polyhedra, manifolds, retracts, and the Brouwer fixed point theorem.

MATH 7580 EUCLIDEAN TOPOLOGY II (3) LEC. 3. Pr. MATH 7570. Further study of basic geometric topology. Retracts, absolute neighborhood retracts, maps into spheres, invariance of domain.

MATH 7600/7606 ADVANCED NUMERICAL MATRIX ANALYSIS (3) LEC. 3. Departmental approval. Topics selected from: discretization matrices, sparse matrices, QR-algorithm, symmetric eigenvalue problems, singular value decomposition, pseudo-inverses, simplex method, matrix algorithms for vector computers.

MATH 7610/7616 NUMERICAL SOLUTION OF PARTIAL DIFFERENTIAL EQUATIONS I (3) LEC. 3. Pr. MATH 2650 and MATH 2660 and MATH 5630 or MATH 6630 or MATH 5640 or MATH 6640. Finite difference methods for ordinary and partial differential equations.

MATH 7620 OPTIMIZATION THEORY (3) LEC. 3. Unconstrained problems: basic descent, conjugate gradient and quasi-Newton methods. Constrained problems: gradient projection, penalty, cutting plane and Lagrange methods. Credit will not be given for both MATH 7620 and INSY 8420. An ability to program in high- level language.

MATH 7650 HARMONIC ANALYSIS I (3) LEC. 3. Departmental approval. Fourier series, Fourier transforms, maximal functions, singular integral theory, introduction to function spaces.

MATH 7660 HARMONIC ANALYSIS II (3) LEC. 3. Pr. MATH 7650. Function spaces and interpolation, Calderon’s reproducing formulas, wavelets, frames, connections to function spaces applications.
MATH 7680/7686 ADVANCED TOPICS IN NUMERICAL ANALYSIS (3) LEC. 3. Departmental approval. Topics include: sparse systems of equations, parallel and vector algorithms, nonlinear and singular partial differential equations, calculation of eigenvalues and eigenvectors, pseudo-random numbers, filtering techniques.

MATH 7700 INTRODUCTION TO GRAPH THEORY FOR GRADUATE STUDENTS (3) LEC. 3. Algorithmic, enumerative and theoretical aspects of graph theory: matchings and factors, colorings, Hamiltonicity, connectivity, trees, extremal graphs, planarity. May count either MATH 6750 or MATH 7700.

MATH 7710 COMPUTATIONAL GEOMETRY (3) LEC. 3. Departmental approval. Design and time-complexity of computer algorithms for geometry problems studying the geometric ideas needed for computer-aided design, computer graphics and robotics.

MATH 7720 INTRODUCTION TO CODING THEORY (3) LEC. 3. Introduction to methods and algorithms for reliable communications through error control coding. BCH, Reed-Solomon, Reed-muller codes, convolutional codes, Berlekamp-Massey, Viterbi, and iterated decoding algorithms.

MATH 7730 ADVANCED TOPICS IN CODING THEORY (3) LEC. 3. Pr. MATH 7720. Departmental approval. Structure and theoretical properties of codes and related algorithms. Relations to other combinatorial and algebraic objects stressed.

MATH 7740 ADVANCED COMBINATORIAL DESIGNS (3) LEC. 3. Topics of current interest and research in combinatorial design theory. Areas included: latin squares, embeddings, Wilson's constructions, quadruple systems, Hadamard designs, graph designs, orthogonal arrays.

MATH 7750 ADVANCED TOPICS IN GRAPH THEORY (3) LEC. 3. Pr. MATH 6750 or MATH 7700. Topics of current interest and recent research in graph theory. May include edge colorings, algebraic graph theory, network flows, factor theory.

MATH 7760 INTRODUCTION TO ALGEBRAIC TOPOLOGY I (3) LEC. 3. Pr. MATH 7510. Departmental approval. Homology of chain complexes, the axioms of homology and their verification, computations of homology groups.

MATH 7770 INTRODUCTION TO ALGEBRAIC TOPOLOGY II (3) LEC. 3. Pr. MATH 7760. Homology with coefficients and universal coefficient theorem theorems, Cohomology and universal coefficient theorems, homology of products of spaces, cup and cap products, duality in manifolds.

MATH 7780 ADVANCED ALGEBRAIC TOPOLOGY I (3) LEC. 3. Departmental approval. Advanced topics in homology, cohomology, and duality with relations to and further study of homotopy theory. Applications to and further study of manifolds and geometric topology.

MATH 7790 ADVANCED ALGEBRAIC TOPOLOGY II (3) LEC. 3. Pr. MATH 7780. Continuation of MATH 7780; advanced topics in homology, cohomology, and duality with relations to and further study of homotopy theory. Applications to and further study of manifolds and geometric topology.

MATH 7800 PROBABILITY I (3) LEC. 3. Pr., a full year of undergraduate mathematical analysis at a level commensurate with MATH 5200/5210. Measure-theoretic foundations, independence, conditioning, martingales, Markov property, stationarity, random walks, Markov chains, Poisson processes.

MATH 7810/7816 PROBABILITY II (3) LEC. 3. Pr. MATH 7800. Classical and modern topics in stochastic processes (Markov chains, Poisson process, Brownian motion). Applications and stochastic models (queues, stationary processes, population dynamics, finances). Credit will not be given for both MATH 7810 and STAT 7810.

MATH 7820/7826 APPLIED STOCHASTIC PROCESSES I (3) LEC. 3. Classical and modern topics in stochastic processes (Markov processes, Random Walks, Martingales, Brownian motion). Introduction to stochastic integrals and differential equations. Applications (queues, population dynamics, chaos, finances). Credit will not be given for both MATH 7820 and STAT 7820.

MATH 7870 REAL FUNCTIONS AND DESCRIPTIVE SET THEORY I (3) LEC. 3. Pr. MATH 7210 or MATH 7500. Borel classification of sets, the Baire classification of real functions. Derivatives and approximately continuous functions. The Lebesgue density topology.

MATH 7950 SEMINAR (1-3) SEM. SU. Course may be repeated for a maximum of 6 credit hours.

MATH 7960 SPECIAL PROBLEMS (1-10) IND. Departmental approval. Topics may vary as needed. Course may be repeated for a maximum of 10 credit hours.

MATH 7970 SPECIAL TOPICS (1-10) IND. Departmental approval. Topics may vary as needed. Course may be repeated with change in topics.

MATH 7980 RESEARCH AND SPECIAL PROJECT IN APPLIED MATHEMATICS (1-10) RES. SU. Departmental approval. For students working on the Master of Applied Mathematics degree with concentration in numerical analysis. Course may be repeated for a maximum of 10 credit hours.

MATH 7990 RESEARCH AND THESIS (1-10) MST. Course may be repeated with change in topics.

MATH 8310 HOMOLOGICAL ALGEBRA I (3) LEC. 3. Pr. MATH 7320. Departmental approval. Homology and cohomology. Hom and Tensor functors; the adjoint isomorphisms, injective/projective modules, flat modules, the classification of certain rings using homological tools.

MATH 8320 HOMOLOGICAL ALGEBRA II (3) LEC. 3. Pr. MATH 8310. Localizations of modules, nonsingular rings and modules, the Goldie dimension, homological classification of modules; Whitehead modules, reflexive modules, R-modules as modules over their rings of endomorphisms.

MATH 8330 INTRODUCTION TO LIE GROUPS (3) LEC. 3. Pr. MATH 7310 or MATH 7370. Introduce Lie groups via matrix groups. Topics include exponential map, Lie algebras, classical groups, structures and classifications, manifolds, representations.

MATH 8400 ADVANCED FUNCTIONAL ANALYSIS I (3) LEC. 3. Pr. MATH 7210 and MATH 7400. Topics concerning bounded and unbounded linear operators in Banach and Hilbert spaces; theory of distributions and topological vector spaces with applications, current research.

MATH 8410 ADVANCED FUNCTIONAL ANALYSIS II (3) LEC. 3. Pr. MATH 8400. Topics from the theory of bounded and unbounded linear operators in Banach and Hilbert spaces; elements of nonlinear functional analysis, topics of current research interest.

MATH 8600 ADVANCED PROBABILITY I (3) LEC. 3. Processes, distributions, independence, Random sequences, series, averages, characteristic functions. Classical limits theorems, conditioning. Some experience with graduate level mathematics, preferably in the areas of analysis and topology.

MATH 8610 ADVANCED PROBABILITY II (3) LEC. 3. Pr. MATH 8600. Martingales, Markov chains, random walks, renewal theory, Poisson processes and ergodic theory.

MATH 8630 ADVANCED STOCHASTIC PROCESSES I (3) LEC. 3. Pr. MATH 8610. Gaussian processes, Brownian motion, invariance principles, convergence of random processes, measures and sets, stochastic integrals and quadratic variation.

MATH 8640 ADVANCED STOCHASTIC PROCESSES II (3) LEC. 3. Pr. MATH 8630. Continuous martingales and Brownian motion, stochastic differential equations and martingale problems, local time, excursions, one-dimensional SDE’s and diffusions.

MATH 8700 FINITE GEOMETRY I (3) LEC. 3. Pr. MATH 5370. Projective and affine spaces over finite fields. Inversive planes. Relationship with linear algebra over finite fields and permutation groups. Applications to combinatorial designs.

MATH 8710 FINITE GEOMETRY II (3) LEC. 3. Pr. MATH 8700. Projective and affine spaces over finite fields. Inversive planes. Relationship with linear algebra over finite fields and permutation groups. Applications to combinatorial designs.

MATH 8960 SPECIAL PROBLEMS (1-10) IND. Departmental approval. Topics may vary as needed. Course may be repeated for a maximum of 15 credit hours.

MATH 8970 SPECIAL TOPICS (1-10) IND. Departmental approval. Topics may vary as needed. Course may be repeated for a maximum of 15 credit hours.

MATH 8990 RESEARCH AND DISSERTATION (1-10) DSR. Course may be repeated with change in topics.
Statistics Courses

STAT 2010 STATISTICS FOR SOCIAL AND BEHAVIOR SCIENCES (4) LEC. 3. LAB. 2. Pr. MATH 1100 or MATH 1120 or MATH 1123 or MATH 1130 or MATH 1133 or MATH 1150 or MATH 1153 or MATH 1610 or MATH 1613 or MATH 1617. Introduction to basic principles of statistical reasoning and statistical procedures used in data analysis in the social and behavioral sciences.

STAT 2510/2513 STATISTICS FOR BIOLOGICAL AND HEALTH SCIENCES (3) LEC. 3. Pr. MATH 1100 or MATH 1120 or MATH 1123 or MATH 1130 or MATH 1133 or MATH 1150 or MATH 1153 or MATH 1610 or MATH 1613 or MATH 1617 or MATH 1680 or MATH 1683. Introduction to statistical concepts, reasoning and methods used in data analysis, descriptive statistics, sampling distributions, statistical inference, confidence intervals, regression or correlation, contingency tables. Students who have previous credit in any higher-numbered math course may not receive credit.

STAT 2600 BUSINESS ANALYTICS I (3) LEC. 3. Pr. MATH 1680 or MATH 1683 or P/C COMP 1000 or COMP 1003. Introduction to analytics in business including use of data to make business decisions, basic predictive business modeling, and communication of analytical results. Minimum 2.0 overall cumulative undergraduate GPA.

STAT 2610 STATISTICS FOR BUSINESS AND ECONOMICS (3) LEC. 3. Pr. MATH 1690. Introduction to statistical analysis, theory, and interpretation used in business and economics.

STAT 2710 STATISTICAL COMPUTING (1) LEC. 1. Pr. (P/C STAT 2010 or P/C STAT 2017) and (P/C STAT 2510 or STAT 2513) and P/C STAT 2610 and P/C STAT 3010. Introduction to basic statistical computing programs and methods.

STAT 3010 STATISTICS FOR ENGINEERS AND SCIENTISTS (3) LEC. 3. Pr. MATH 1610 or MATH 1613 or MATH 1617 or MATH 1710. Introduction to statistical methods and analysis used in engineering and science.

STAT 3600/3603 PROBABILITY AND STATISTICS I (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627 or MATH 1720. Calculus-based introduction to probability and statistics with an emphasis on practical problem-solving.

STAT 3610 PROBABILITY AND STATISTICS II (3) LEC. 3. Pr. STAT 3600. Departmental approval. Continuation of STAT 3600.

STAT 3611 PROBABILITY AND STATISTICS II LABORATORY (1) LAB. 2. Departmental approval. Coreq. STAT 3610. The application of statistical techniques from STAT 3610.

STAT 4610 APPLIED REGRESSION ANALYSIS (3) LEC. 3. Pr. STAT 3610 or STAT 3010. Least squares estimation, hypothesis testing and confidence interval estimation in regression; simple, polynomial and multiple linear regression; residual and lack-of-fit analysis; use of dummy variables; multiple and partial correlation analysis; model building algorithms and model comparisons; transformations.

STAT 4620 APPLIED NONPARAMETRIC STATISTICS (3) LEC. 3. Review of elementary probability; goodness-of-fit tests; for singles and several location parameters; tests for scale parameters; distribution tests; measures of association; bootstrap and permutation tests.

STAT 4630 APPLIED TIME-SERIES ANALYSIS (3) LEC. 3. ARIMA models: the autoregressive process, the moving average process, and the ARMA process; forecasting, errors and confidence intervals, updating forecast models; estimation; model building and assessment; applications in econometrics.

STAT 4970 SPECIAL TOPICS IN STATISTICS (1-3) LEC. Departmental approval. Special topics designed to meet the needs and interest of students. Course may be repeated for a maximum of 6 credit hours.

STAT 5000 INTERMEDIATE STATISTICAL METHODS FOR DATA SCIENCE (3) LEC. 3. Pr. STAT 3610 or STAT 3010. C Grade or better in STAT3610 or STAT3010 or equivalent. Principles of probability and statistics, multiple testing and bootstrapping, parametric and nonparametric regression, generalized linear models, time dependent data with a focus on Data Science.

STAT 5110 SAS PROGRAMMING AND APPLICATIONS (3) LEC. 3. Pr. STAT 3010 or STAT 3610. Emphasis is placed on using SAS routines to obtain statistical analyses for common statistical methods and interpreting output.
STAT 5210 R PROGRAMMING FOR DATA SCIENCE (3) LEC. 3, LEC. 3. Fundamental concepts on R programming language and popular R packages. Topics include basic syntax, R objects, control flow, file input and output, building R packages, data manipulation, visualization, interface to C, parallel computing, building web apps.

STAT 5330 DATA BASED DECISION MAKING USING SIX SIGMA (3) LEC. 3. Pr. STAT 3610 and INSY 4330. Departmental approval. Covers statistical tools needed for implementation of "Six Sigma", "Learn Six Sigma" and "Design for Six Sigma". Credit will not be given for both STAT 5330 and STAT 6330/6336.

STAT 5600 PROBABILITY AND STATISTICS FOR DATA SCIENCE (3) LEC. 3. Pr. STAT 3610 or STAT 3010 or MATH 1620. Grade of C or better in STAT 3610 or STAT 3010 and Grade of C or better in MATH 1620 or equivalent. Basic probability theory, random variables, multivariate random variables, expectation, random processes, times series, convergence of random processes, Markov chains, maximum likelihood estimation, Bayesian statistics, hypothesis testing, prediction, sampling and resampling methods, multivariate statistics.

STAT 5630 SAMPLE SURVEY, DESIGN AND ANALYSIS (3) LEC. 3. Pr. STAT 3600. Departmental approval. Estimation of means, proportions, finite populations, stratified sampling, systematic sampling ratio estimations.

STAT 5650 STATISTICAL LEARNING (3) LEC. 3. Pr. STAT 5000. or equivalent. Introduction to modern methods and algorithms in Statistics. Topics include common supervised and unsupervised learning methods such as linear regression, logistic regression, regularization, non-parametric regression, model assessment and selection, neural network, support vector machines, principal components analysis.

STAT 5670 PROBABILITY AND STOCHASTIC PROCESSES I (3) LEC. 3. Pr. MATH 2630 or MATH 2637. Random variables, discrete and absolutely continuous distributions. Poisson process, expectation and conditional expectation. Moment generating functions, limit distributions. Emphasis on probabilistic reasoning and problem solving. Credit will not be given for both STAT 5670 and MATH 5670.

STAT 5680 PROBABILITY AND STOCHASTIC PROCESSES II (3) LEC. 3. Pr. STAT 5670 or MATH 5670. Multivariate distributions, Central Limit Theorem, Laplace transforms, convolutions, simulations, renewal processes Continuous-time Markov chains, Markov renewal and semi-regenerative processes, Brownian motion and diffusion. Credit will not be given for both STAT 5680 and MATH 5680.

STAT 5690 CHAOTIC AND RANDOM PHENOMENA (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627. Statistics and modeling of random phenomena in connection to computational complexity, data analysis, processes of chance and chaotic nonlinear systems. Credit will not be given for both STAT 5690 and MATH 5690.

STAT 6000/6006 INTERMEDIATE STATISTICAL METHODS FOR DATA SCIENCE (3) LEC. 3. Pr. STAT 3610 or STAT 3010. Grade of C or better in STAT 3610 or STAT 3010 or equivalent. Principles of probability and statistics, multiple testing and bootstrapping, parametric and nonparametric regression, generalized linear models, time-dependent data.

STAT 6110 SAS PROGRAMMING AND APPLICATIONS (3) LEC. 3. Pr. STAT 3010 or STAT 3610 or P/C STAT 7000. Emphasis is placed on using SAS routines to obtain statistical analyses for common statistical methods and interpreting output.

STAT 6210/6216 R PROGRAMMING FOR DATA SCIENCE (3) LEC. 3. Pr. STAT 6000. Fundamental concepts on R programming language and popular R packages. Topics include basic syntax, R objects, control flow, file input and output, building R packages, data manipulation, visualization, interface to C, parallel computing, building web apps.

STAT 6330/6336 DATA BASED DECISION MAKING USING SIX SIGMA (3) LEC. 3. Pr. STAT 3610 and INSY 4330. Departmental approval. Covers statistical tools needed for implementation of "Six Sigma", "Learn Six Sigma" and "Design for Six Sigma". Credit will not be given for both STAT 5330 and STAT 6330/6336.

STAT 6600/6606 PROBABILITY AND STATISTICS FOR DATA SCIENCE (3) LEC. 3. Pr. STAT 3610 or STAT 3010 and MATH 1620. Grade of C or better in STAT 3610 or STAT 3010 and Grade of C or better in MATH 1620 or equivalent. Basic probability theory, random variables, multivariate random variables, expectation, random processes, times series, convergence of random processes, Markov chains, Maximum Likelihood Estimation, Bayesian statistics, hypothesis testing, prediction, Sampling and Resampling methods, multivariate statistics.

STAT 6630 SAMPLE SURVEY, DESIGN AND ANALYSIS (3) LEC. 3. Pr. STAT 3600. Departmental approval. Estimation of means, proportions, finite populations, stratified sampling systematic sampling ratio estimations.
STAT 6650/6656 STATISTICAL LEARNING (3) LEC. 3. Pr. STAT 6000. or equivalent. Introduction to modern methods and algorithms in Statistics. Topics include common supervised and unsupervised learning methods such as linear regression, logistic regression, regularization, non-parametric regression, model assessment and selection, neural network, support vector machines, principal components analysis.

STAT 6670/6676 PROBABILITY AND STOCHASTIC PROCESSES I (3) LEC. 3. Pr. MATH 2630 or MATH 2637. Random variables, discrete and absolutely continuous distributions. Poisson process, expectation and conditional expectation. Moment generating functions, limit distributions. Emphasis on probabilistic reasoning and problem solving. Credit will not be given for both STAT and MATH 6670.

STAT 6680 PROBABILITY AND STOCHASTIC PROCESSES II (3) LEC. 3. Pr. MATH 6670 or MATH 6676 or STAT 6670 or STAT 6676. Multivariate distributions, Central Limit Theorem, Laplace transforms, convolutions, simulations, renewal processes Continuous-time Markov chains, Markov renewal and semi-regenerative processes, Brownian motion and diffusion. Credit will not be given for both STAT 6680 and MATH 6680.

STAT 6690 CHAOTIC AND RANDOM PHENOMENA (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627. Statistics and modeling of random phenomena in connection to computational complexity, data analysis, processes of chance and chaotic nonlinear systems. Credit will not be given for both STAT 6690 and MATH 6690.

STAT 7000/7006 EXPERIMENTAL STATISTICS I (4) LEC. 4. Departmental approval. Paired and independent sample t-tests, ANOVA, F-tests, contrasts, tests for trends, multiple comparisons, CR and RCB designs of experiments, regression.

STAT 7010 EXPERIMENTAL STATISTICS II (3) LEC. 3. Pr. STAT 7000. Advanced topics in experimental design: writing linear models for experiment-expected mean squares, variance components, nested designs, Latin Square Designs, split plot designs, ANOVA and multiple regression.

STAT 7020/7026 REGRESSION ANALYSIS (3) LEC. 3. Pr. STAT 7000. Departmental approval. Introduction to the method of least squares as it applies to regression and analysis of variance. Simple linear regression, multiple regression, model selection and diagnostics.

STAT 7030 CATEGORICAL DATA ANALYSIS (3) LEC. 3. Pr. STAT 3600 or MATH 3600 or STAT 7000. Departmental approval. Methods for analysis of categorical response data. Topics include Chi-square tests, Likelihood Ratio tests, Logistic Regression, and Loglinear Modeling.

STAT 7040 BIOSTATISTICS (3) LEC. 3. Pr. STAT 7000. Departmental approval. Epidemiology, biometry, methods of survival analysis.

STAT 7100 STATISTICAL ANALYSIS OF SURVEY, AGGREGATE AND LARGE DATA SOURCES (3) LEC. 3. Pr. STAT 2010 or STAT 2017. Departmental approval. Techniques commonly used in multivariate statistical analysis of data sources such as surveys, archival records, and other large data sets. Credit will not be given for STAT 7100 and SOCY 7100.

STAT 7250 PRACTICAL DATA ANALYSIS AND COMPUTATION FOR THE LIFE SCIENCES (3) LEC. 2. LAB. 3. Pr. STAT 7020 or WILD 7150. Data from the life sciences and advanced statistical techniques for data analyses and computaMon are brought together through a cross-fertilization of graduate students in the life sciences, statistics, and mathematics. Focus on production of publication-quality research on student-identified projects.

STAT 7270 EXPERIMENTAL DESIGN IN PSYCHOLOGY (4) LEC. 4. Pr. STAT 7000 and STAT 7020. Introduction to the analysis of data collected under differential experimental designs. Credit will not be given for both STAT 7270 and PSYC 7270.

STAT 7300/7306 ADVANCED ENGINEERING STATISTICS I (3) LEC. 3. Pr. STAT 3610. Departmental approval. Advanced concepts of experimental design including blocking, regression approach to analysis of variance, fractional factorials in base-2, and base-3 designs. Emphasis throughout is on improving industrial products and processes. Credit will not be given for both STAT 7300 and INSY 7300.

STAT 7310/7316 ADVANCED ENGINEERING STATISTICS II (3) LEC. 3. Pr. STAT 7300 or STAT 7306 or INSY 7300 or INSY 7306. Fractional factorial experimentation applied for the purpose of process and quality improvement and optimization, introduction to analysis of covariance, multiple regression analysis, and response surface analysis. Credit will not be given for both STAT 7310 and INSY 7310.

STAT 7600 STATISTICAL THEORY AND METHODS I (3) LEC. 3. Pr. STAT 3600. Departmental approval. Random variables, probability theory, random variables, probability distributions, sampling distributions, convergence.
STAT 7610 STATISTICAL THEORY AND METHODS II (3) LEC. 3. Pr. STAT 7600. Likelihood ratio, regression, ANOVA, categorical data, non-parametric methods, decision theory.

STAT 7650 COMPUTATIONAL STATISTICS (3) LEC. 3. Pr. STAT 7020 and STAT 7610. This course covers the theory and practice of common algorithms used for simulation, computing, and optimization in Statistics.

STAT 7670 APPLIED LONGITUDINAL DATA ANALYSIS (3) LEC. 3. To introduce students to statistical models and methods for the analysis of longitudinal data, i.e. data collected repeatedly on individuals (humans, animals, etc) over time (or other conditions).

STAT 7700 GENERALIZED LINEAR MODELS (3) LEC. 3. Pr. STAT 7600. Departmental approval. Exponential families and links functions, model fitting, likelihood methods, residual diagnostics, count data, estimating equations.

STAT 7800 LINEAR MODELS (3) LEC. 3. Pr. STAT 7610 and MATH 2660. Departmental approval. A rigorous development of some of the important topics of applied statistics: the multivariate normal distribution analysis of variance, regression, aspects of experimental design.

STAT 7810/7816 MODERN STOCHASTIC PROCESSES I (3) LEC. 3. Pr. (MATH 6670 or MATH 6676 or STAT 6670 or STAT 6676) and MATH 6210. Classical and Modern Topics in stochastic processes (Markov chains, Poisson process, Brownian motion). Applications and stochastic models (queues, stationary processes, population dynamics, finances). Credit will not be given for both STAT 7810 and MATH 7810.

STAT 7820/7826 APPLIED STOCHASTIC PROCESSES I (3) LEC. 3. Pr. MATH 7810 or MATH 7816 or STAT 7810 or STAT 7816. Classical and modern topics in stochastic processes (Markov processes, Random Walks, Martingales, Brownian motion.) Introduction to stochastic integrals and differential equations. Applications (queues, population dynamics, chaos finances). Credit will not be given for both STAT 7820 and MATH 7820.

STAT 7830 APPLIED STOCHASTIC PROCESSES II (3) LEC. 3. Pr. STAT 7810 or STAT 7816.

STAT 7840 APPLIED MULTIVARIATE STATISTICAL ANALYSIS (3) LEC. 3. Pr. STAT 7000. Multivariate normal distribution, Hotelling's T2, MANOVA, discriminate analysis, principal components.

STAT 7850 THEORY OF STATISTICAL INFERENCE (3) LEC. 3. Pr. STAT 7610. Departmental approval. Bayesian methods, Markov Chain Monte Carlo methods, resampling techniques.

STAT 7860/7866 APPLIED TIME SERIES ANALYSIS (3) LEC. 3. Pr. STAT 3610. Departmental approval. Autoregressive and moving average models, differencing, estimation and forecasting, spectral theory.

STAT 7930 STATISTICAL CONSULTING PRACTICUM (3) PRA. 3. Pr. STAT 7000 and STAT 7010 and STAT 7020. This is a course in applied statistics, providing training in statistical consulting. Applications of commonly encountered statistical methods are explored in the consulting environment. Written and oral communication skills are emphasized, and ethical aspects of consulting are introduced. This course provides students with an opportunity to gain practical experience in consulting through various projects with clients, through the AU Statistical Consulting Center.

STAT 7940/7946 CAPSTONE PROJECT (3) LEC. 3. Discuss various topics while working on an industry-level project. Students will complete a semester-long project under the supervision of instructors.

STAT 7960 SPECIAL PROBLEMS IN STATISTICS (1-10) RES. Credit will not be given for both MATH 7960 and STAT 7960. Course may be repeated for a maximum of 10 credit hours.

STAT 7970 SPECIAL TOPICS (1-3) LEC. Departmental approval. Special topics designed to meet the needs and interests of students. Course may be repeated for a maximum of 6 credit hours.

STAT 7990 RESEARCH AND THESIS (1-10) DSR. Research for Master’s thesis in Statistics. Course may be repeated with change in topic.

STAT 8400 ADVANCED QUANTITATIVE METHODS FOR MANAGEMENT I (3) LEC. 3. Pr. STAT 7000. or approved equivalent. Study of the application of linear regression analysis to business research. First advanced course in applied linear statistics models.

STAT 8410 ADVANCED QUANTITATIVE METHODS MANAGEMENT II (3) LEC. 3. or approved equivalent. Introduction to multivariate techniques in business research. Study of the theory and applications of ANOVA, ANCOVA, MANOVA, MANCOVE, Discriminate Analysis & Polytomous Logistic Regression.

STAT 8420 ADVANCED QUANTITATIVE METHODS FOR MANAGEMENT III (3) LEC. 3. Pr. STAT 7100 and STAT 8400 and STAT 8410. or approved equivalent. Third course in statistical modeling. Emphasis on applications of Principal Components Analysis, and Structural Equation Modeling to management research.

Mathematics Minor

Fifteen semester hours of courses labeled MATH or STAT at the level of 3000 or higher; at least three courses must be designated MATH. A minimum grade of C in each of these courses is required.

**Option in Actuarial Science**

Total Hours: 120

---

1. Students must complete a two-course sequence in either HIST or LIT (for example, World History 1 and 2 or American Lit 1 and 2). For complete HIST and LIT sequence options, see the Bulletin.

2. If a LIT sequence is chosen, this course must be a CORE SOC SCI. If a HIST sequence is chosen, this course must be CORE HUMANITIES.

3. Core Science: One of the sequences PHYS 1600/PHYS 1610, BIOL 1020/BIOL 1030, CHEM 1030/CHEM 1040 with labs, or GEOL 1100/GEOL 1110.

4. MATH or STAT courses at the 3000 level or higher; no more than one 3000-level course. Subject to advisor's approval.

5. Any course that will serve as the statistics prerequisite for FINC 3630. See advisor for approved courses, currently BUAL 2600 or STAT 2010 or STAT 2510 or STAT 2513 or STAT 2610 or STAT 3010 or STAT 3610.

A minimum grade of C in each of these courses is required.
Physics

Physics majors acquire a firm foundation for careers in physics and related fields and excellent preparation for further study. Through the judicious use of electives, this curriculum provides not only a thorough understanding of physics, but also the ability to solve problems in other fields of interest to the student.

Major

• Physics (p. 1293)
• Physics - pre-professional concentrations:
  • Physics - Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1294)
  • Physics - Pre-Physical Therapy, Pre-Physician Assistant (p. 1295)

Minor

• Physics (p. 1296)

Courses

**PHYS 1000/1003 FOUNDATIONS OF PHYSICS** (4) LEC. 3. LAB. 2. Science Core. Newton's Laws, momentum and energy, solids, liquids, gases, plasma, thermodynamics, electricity, magnetism, light, atomic and nuclear physics. Students who have previous credit in any higher-numbered physics course may not receive credit.

**PHYS 1001 FOUNDATIONS OF PHYSICS LABORATORY** (1) LAB. 2. Coreq. PHYS 1003. Core-curriculum laboratory course in physics focusing on practical applications and hands-on experience. Topics include: Newton’s Laws, momentum and energy, solids, liquids, gases, plasma, thermodynamics, electricity, magnetism, light, atomic and nuclear physics.

**PHYS 1150 ASTRONOMY** (4) LEC. 3. LAB. 3. Science Core. Open to non-science majors. Earth, the solar system, stars, neutron stars, black holes, supernova, galaxies, the expanding universe, and modern cosmological theories.

**PHYS 1500 GENERAL PHYSICS I** (4) LEC. 3. LAB. 3. Pr. MATH 1130 or MATH 1133 or MATH 1150 or MATH 1153 or P/C MATH 1610 or P/C MATH 1613 or P/C MATH 1617 or P/C MATH 1620 or P/C MATH 1623 or P/C MATH 1627 or P/C MATH 1710 or P/C MATH 1720 or P/C MATH 2630 or P/C MATH 2637. Science Core. Introduction to Newton’s Laws, gravitation and cosmology, concept of conservation laws, solids and fluids, thermodynamics. Math at level of MATH 1130 or higher is expected. Credit will not be given for both PHYS 1500 and PHYS 1600 or PHYS 1607.

**PHYS 1510 GENERAL PHYSICS II** (4) LEC. 3. LAB. 3. Pr. PHYS 1500 or PHYS 1600 or PHYS 1607. Science Core. Electricity and magnetism, AC circuits, waves, nuclear physics, radioactivity and particle physics. Physics at the level of PHYS 1500 or higher is expected. Credit will not be given for both PHYS 1510 and PHYS 1610 or PHYS 1617.

**PHYS 1600 ENGINEERING PHYSICS I** (4) LEC. 3. LAB. 3. Pr. P/C MATH 1610 or P/C MATH 1613 or P/C MATH 1617 or P/C MATH 1620 or P/C MATH 1623 or P/C MATH 1627 or P/C MATH 1710 or P/C MATH 1720 or P/C MATH 2630 or P/C MATH 2637. Science Core. Introduction to Newton’s Laws, gravitation, cosmology, conservation of energy, momentum and angular momentum, special relativity, and fluids using introductory calculus. Math at the level of MATH 1610 or higher is expected, at least concurrently. Credit will not be given for both PHYS 1500 and PHYS 1600 or PHYS 1607.

**PHYS 1607 HONORS PHYSICS I** (4) LEC. 3. LAB. 3. Pr. Honors College. Science Core. Honors version of PHYS 1600. Membership in the Honors College or Departmental approval required. Recommended for Physics majors. Math at the level of MATH 1610 or higher is expected, at least concurrently. Credit will not be given for both PHYS 1500 and PHYS 1600 or PHYS 1607.

**PHYS 1610 ENGINEERING PHYSICS II** (4) LEC. 3. LAB. 3. Pr. (PHYS 1600 or PHYS 1607) and (P/C MATH 1620 or P/C MATH 1623 or P/C MATH 1627). Science Core. Thermodynamics, electricity and magnetism, simple AC circuits, waves, and geometric optics. Physics at the level of PHYS 1600 or higher is expected. Math at the level of MATH 1620 or higher is expected at least concurrently. Credit will not be given for both PHYS 1510 and PHYS 1610 or PHYS 1617.

**PHYS 1617 HONORS PHYSICS II** (4) LEC. 3. LAB. 3. Pr. Honors College. MATH 1620 and PHYS 1600 or PHYS 1607. Science Core. Honors version of PHYS 1610. Membership in the Honors College or Departmental approval required. Recommended for Physics majors. Math at the level of MATH 1620 or higher is expected, at least concurrently. Physics at the level of PHYS 1600 or higher is expected. Credit will not be given for both PHYS 1510 and PHYS 1610 or PHYS 1617.
PHYS 2100 INTERMEDIATE MECHANICS (3) LEC. 3. Pr. (PHYS 1610 or PHYS 1617) and (P/C MATH 2630 or P/C MATH 2637). Principles and applications of Newtonian mechanics, noninertial reference frames, harmonic motion, central forces, rigid bodies, introduction to Lagrangian and Hamiltonian mechanics.

PHYS 2200 INTRODUCTORY QUANTUM PHYSICS AND RELATIVITY (3) LEC. 3. Pr. PHYS 1617 or PHYS 1610. Observational foundations of quantum physics, relativity and developments of several branches of physics up to their present frontiers.

PHYS 2300 PHYSICS LABORATORY SKILLS (2) LAB. 6. Pr. PHYS 1617 or PHYS 1610. The measurement process and its unavoidable uncertainties; standard laboratory instruments; data analysis techniques and tools.

PHYS 3100 INTERMEDIATE ELECTRICITY AND MAGNETISM (3) LEC. 3. Pr. (PHYS 1617 or PHYS 1610) and (MATH 2630 or MATH 2637 or MATH 2730). Electrostatics, Magnetostatics, Laplace's equation, boundary-value problems, multipole expansions, dielectric and magnetic materials. Faraday's law, AC circuits, and Maxwell's equations.

PHYS 3200 STATISTICAL THERMODYNAMICS (3) LEC. 3. Pr. PHYS 2200. The basic laws of thermodynamics, kinetic theory, and statistical mechanics including entropy, the partition function, free energy, and the quantum statistics of Fermions and Bosons.

PHYS 3500 PHYSICS OF THE WORLD AROUND US (3) LEC. 3. Interdisciplinary topic e.g. Biophysics, Astrophysics, Physics of Weather, Physics of Music, or Environmental Physics. Course may be repeated for a maximum of 12 credit hours.

PHYS 3501 PHYSICS OF THE WORLD AROUND US LABORATORY (1) LAB. 3. Laboratory course required for certain topics for PHYS 3500. One 3 hour session per week.

PHYS 4100 FUNDAMENTALS OF QUANTUM MECHANICS (3) LEC. 3. Pr. PHYS 2200 and MATH 2650. Schrodinger equation, stationary and time-dependent solutions, spin and the exclusion principle, perturbation theory, scattering and resonances, the interpretation of quantum mechanics.

PHYS 4200 FUNDAMENTAL EXPERIMENTS IN PHYSICS (2) LAB. 6. Pr. PHYS 2300. Experiments that demonstrate the fundamental ideas and facts of physics. Data will be collected, analyzed, interpreted and reported in comprehensive lab reports.

PHYS 4900 DIRECTED STUDIES (1-5) IND. SU. Departmental approval. Student will investigate a topic of interest under the direction of a faculty member. Course may be repeated for a maximum of 10 credit hours.

PHYS 4930 DIRECTED STUDIES IN PHYSICS (1-5) IND. Departmental approval. Student will study a topic of interest under the direction of a faculty member. Course may be repeated for a maximum of 10 credit hours.

PHYS 4967 HONORS SPECIAL PROBLEMS (1-3) IND. Pr. Honors College. Departmental approval.. Course may be repeated for a maximum of 6 credit hours.

PHYS 4980 UNDERGRADUATE RESEARCH IN PHYSICS (1-5) IND. Departmental approval. Student will work under the direction of a faculty member on a problem of mutual interest. Course may be repeated for a maximum of 10 credit hours.

PHYS 4997 HONORS THESIS (1-6) IND. Pr. Honors College. Departmental approval.. Course may be repeated for a maximum of 6 credit hours.

PHYS 5100 APPLICATIONS OF QUANTUM MECHANICS (3) LEC. 3. Pr. PHYS 4100. Quantum mechanics applied to atomic physics, solid state physics, nuclear physics, particle physics, electrodynamics, and cosmology.

PHYS 5500 FUNDAMENTALS OF PHYSICS (3) LEC. 3. A subject such as Wave Mechanics, Mathematical Physics, Nonlinear Dynamics, Optics, Nuclear Physics, Elementary Particles, Relativity, or Electrodynamics. Course may be repeated for a maximum of 9 credit hours.

PHYS 5600 FRONTIERS OF PHYSICS (3) LEC. 3. A subject from the research areas in the Department such as Solid State, Atomic, Plasma, Space, or Computational Physics will be selected by the lecturer. Course may be repeated for a maximum of 9 credit hours.

PHYS 5610 INTRODUCTION TO SOLID STATE PHYSICS (3) LEC. 3. Lattice vibrations, band description of electronic states in metals, semiconductors and insulators, and magnetic, superconducting and defect properties of solids.

PHYS 5620 SURVEY OF PLASMA PHYSICS (3) LEC. 3. Pr. PHYS 3100. Single particle motions: fluid description of a plasma; plasma waves and oscillations; kinetic description, diffusion, and resistivity; non-linear effects.
PHYS 6100 APPLICATIONS OF QUANTUM MECHANICS (3) LEC. 3. Quantum mechanics applied to atomic physics, solid state physics, nuclear physics, particle physics, electrodynamics, and cosmology.

PHYS 6500 FUNDAMENTALS OF PHYSICS (3) LEC. 3. A subject such as Wave Mechanics, Mathematical Physics, Nonlinear Dynamics, Optics, Nuclear Physics, Elementary Particles, Relativity, or Electrodynamics. Course may be repeated for a maximum of 9 credit hours.

PHYS 6600 FRONTIERS OF PHYSICS (3) LEC. 3. A subject from the research areas in the Department such as Solid State, Atomic, Plasma, Space, or Computational Physics will be selected by the lecturer. Course may be repeated for a maximum of 9 credit hours.

PHYS 6610 INTRODUCTION TO SOLID STATE PHYSICS (3) LEC. 3. Lattice vibrations, band description of electronic states in metals, semiconductors and insulators, and magnetic, superconducting and defect properties of solids.

PHYS 6620 SURVEY OF PLASMA PHYSICS (3) LEC. 3. Single particle motions: fluid description of a plasma; plasma waves and oscillations; kinetic description, diffusion, and resistivity; non-linear effects.

PHYS 7100 CLASSICAL MECHANICS (3) LEC. 3. Lagrangian and Hamiltonian formulations of mechanics, canonical transforms. Hamilton-Jacobi theories, action angle variables, rigid rotators, normal modes, and mechanics of continuous media.

PHYS 7200 ELECTRICITY AND MAGNETISM I (3) LEC. 3. Electrostatics, special function expansions, magnetostatics, linear media and Maxwell’s equations.

PHYS 7250 ELECTRICITY AND MAGNETISM II (3) LEC. 3. Time dependent Maxwell theory, wave propagation and dispersion, diffraction, scattering, radiation, relativistic covariance and applications.

PHYS 7300 QUANTUM MECHANICS I (3) LEC. 3. Schrödinger wave equation, discrete and continuous spectra, matrix formulation, perturbation theory.

PHYS 7350 QUANTUM MECHANICS II (3) LEC. 3. Time-dependent approximation methods, relativistic wave equations, and second quantization.

PHYS 7400 STATISTICAL PHYSICS (3) LEC. 3. Thermodynamic quantities, equilibrium ensembles for classical and quantum systems, fluctuations, phase transitions and critical phenomena.

PHYS 7520 NONLINEAR DYNAMICS (3) LEC. 3. Dynamical systems, maps, flows, fixed points and neighborhoods, chaos, fractals and fractal dimensions. Lyapunov exponents, strange attractors, dissipative and Hamiltonian systems, controlling chaos.

PHYS 7540 NON-EQUILIBRIUM STATISTICAL MECHANICS (3) LEC. 3. Introduces the fundamental concepts of non-equilibrium statistical mechanics, develops basic transport theories, and simulates statistic properties with Monte-Carlo and molecular dynamic methods.

PHYS 7900 DIRECTED STUDIES (1-5) IND. SU. Student will work with a faculty member to study a topic of interest. Course may be repeated for a maximum of 6 credit hours.

PHYS 7930 DIRECTED STUDIES (1-5) IND. Student will work with a faculty member to study a topic of interest. Course may be repeated for a maximum of 6 credit hours.

PHYS 7950 PHYSICS COLLOQUIUM (1) SEM. SU. Offers a series of talks presented by invited speakers on broad fields of physics. Check with graduate advisor for credit allowed. Course may be repeated for a maximum of 6 credit hours.

PHYS 7970 SPECIAL TOPICS IN PHYSICS (1-5) SEM. Seminar or lecture series in a rapidly advancing specialty of physics. Course may be repeated for a maximum of 6 credit hours.

PHYS 7990 RESEARCH AND THESIS (1-10) MST. May be repeated as often as is appropriate. Course may be repeated with change in topics.

PHYS 8100 RELATIVISTIC QUANTUM MECHANICS (3) LEC. 3. Dirac equation, 1D barrier scattering, 3D central potentials, S-matrix theory, Feynman diagrams, quantum electrodynamics, renormalization, tree and loop level problems.

PHYS 8200 INTRODUCTION TO ATOMIC PHYSICS (3) LEC. 3. Hydrogen atom, Hartree-Fock theory, radiative transitions, photoionization, autoionization, electron-atom scattering.
PHYS 8600 PLASMA PHYSICS (3) LEC. 3. A detailed study of plasma physics including particle orbit theory, magnetohydrodynamics, plasma waves and transport phenomena.

PHYS 8700 SOLID STATE PHYSICS (3) LEC. 3. Atomic and electronic structures of solids and the associated electrical, optical and transport properties.

PHYS 8900 DIRECTED STUDIES (1-5) IND. SU. Students will work with a faculty member to study a topic of interest. Course may be repeated for a maximum of 10 credit hours.

PHYS 8930 DIRECTED STUDIES IN ADVANCED PHYSICS (1-5) IND. Student will work with a faculty member to study a topic of interest. Course may be repeated for a maximum of 10 credit hours.

PHYS 8970 SPECIAL TOPICS IN ADVANCED PHYSICS (1-5) LEC. Departmental approval. Topic at the forefront of physics research will be chosen by the lecturer. Course may be repeated for a maximum of 10 credit hours.

PHYS 8990 RESEARCH AND DISSERTATION (1-10) DSR. May be repeated as often as is appropriate. Course may be repeated with change in topics.

---

1. Students who choose a HIST sequence other than HIST 1010 and HIST 1020 should talk to an advisor about CORE SOC SCI choices.
2. Science Electives consist of a sequence of GEOL 1100-GEOL 1110 or CHEM 1030/CHEM 1031 – CHEM 1040/CHEM 1041 or BIOL 1020/Biol 1021- BIOL 1030/Biol 1031
3. PHYS and Professional Electives must be at the 3000 level or higher. A Plan of Study indicating choices and physics advisor approval for Physics and Professional electives must be on file in the Dean’s Office before scheduling those courses.
4. This course must be taken the semester of graduation.

Total Hours: 120

Long range schedules for COSAM courses are online at http://aub.ie/cosamlrs

Courses in BOLD will be used to calculate GPS in major.

Options for courses labeled CORE are in the Auburn University Bulletin (http://www.auburn.edu/bulletin) under Core Curriculum.

Students should declare a major in the semester they earn 60 hours.

Students must complete all requirements for that major prior to graduation.

Students planning a Physics major should consult with a pre-health advisor.

1. The Chemistry 1110/1111-1120/1121 sequence can substitute for CHEM 1030/1031-1040/1041. See advisor for details.
2. Students who have AP or transfer credit for US History should see an advisor for CORE SOC SCI choices.
3. Total electives required may change with choice of major.

Total Hours: 120

Long range schedules for COSAM courses are online at [http://aub.ie/cosamlrs](http://aub.ie/cosamlrs).

Courses in BOLD will be used to calculate GPA in major.

Options for courses labeled CORE are in the Auburn University Bulletin ([www.auburn.edu/bulletin](http://www.auburn.edu/bulletin)) under Core Curriculum.

Students must complete all requirements for the major prior to graduation.

Students planning a Physics major should consult with the pre-health advisor.

1. The Chemistry 1110/1111-1120/1121 sequence can substitute for CHEM 1030/1031-1040/1041. See advisor for details.
2. Students who have AP or transfer credit for US History should see an advisor for CORE SOC SCI choices.
3. Students planning a major in Biomedical Sciences should take CHEM 2080/81 as their professional elective in their sophomore or junior year.
Pre-Health Professional Curricula

Pre-health professional curricula are offered in pre-dentistry, pre-medicine, pre-optometry, pre-physical therapy, pre-physician assistant, pre-pharmacy and pre-veterinary medicine. Advisors are available to guide the students concerning admissions requirements to the professional schools. The department in which students major will advise them where applicable. Completion of these curricula does not assure admission to a professional school. Competition for admission to professional schools is keen; the number of qualified applicants exceeds the number of places available.

Pre-Dentistry and Pre-Medicine

These programs are designed to prepare students for dental and medical schools and lead to a bachelor of science in one of several majors offered through the college. The requirements are very exacting and demand high scholastic competence and performance.

Most American dental and medical schools recommend that applicants have at least two semesters of freshman biology, general chemistry, organic chemistry, and physics with labs; (2) breadth in the educational experience; and (3) in-depth experience in a single discipline. Auburn University students complete these recommendations by enrolling in a core of courses shown in the curriculum model. Each student also declares a major. Students should confer with the COSAM pre-health advisors for specific course requirements since these can vary from school to school. Students may choose to major in a curriculum in another college or school, but they should meet with the COSAM Director of Pre-Health Programs as freshmen for assistance in becoming competitive applicants.

In the junior year, students should attend the mandatory meetings concerning the application process that are conducted by the COSAM Chairman of the Pre-Health Professions Advisory Committee (PPAC) in January. Also, students in pre-dentistry or pre-medicine should take the Dental Admission Test or the Medical College Admission Test at least a year before the date of entry to professional school and submit applications to the professional schools of their choice at that time.

Pre-Optometry

This program leads to a bachelor of science and prepares students for the rigorous demands of American optometry schools.

Students must select a major and should confer with the COSAM pre-health advisors for specific course requirements since these can vary from school to school. Students may also choose to major in a curriculum in another college or school, but they should work with the COSAM Director of Pre-Health Programs as freshmen for assistance in becoming competitive applicants.

Pre-optometry students should review the websites of the optometry schools of their choice during the freshman year to determine any special admission requirements of those schools. The prerequisite courses for most U.S. optometry schools are listed in the curriculum model, either as required courses or as electives. In the junior year, students should attend the mandatory meetings concerning the application process that are conducted by the COSAM Chairman of the Pre-Health Professions Advisory Committee (PPAC) in January. Students should take the Optometry Admission Test and complete an official application for admission to the schools of their choice about a year in advance of the expected date of enrollment.

Pre-Physical Therapy

This program prepares students applying to schools of physical therapy and leads to a bachelor’s degree in one of the majors offered in the College of Sciences and Mathematics. Students should confer with their academic advisors for specific course requirements since these can vary from school to school. Students may also choose to major in a curriculum in another college or school, but they should meet with the COSAM Director of Pre-Health Programs as freshmen for information about becoming competitive applicants. Students should review the websites of the schools of their choice during the freshman year to determine any special admission requirements of those schools. Students should take the Graduate Record Examination and complete an official application for admission to the schools of their choice about a year in advance of the expected date of enrollment.

Pre-Pharmacy

This program meets the requirements for admission to the Auburn University Harrison School of Pharmacy, which is fully accredited by the American Council on Pharmaceutical Education. Complete information about the professional curriculum in pharmacy may be found in the Harrison School of Pharmacy section of this Bulletin.
To be considered for admission, the applicant must complete the course requirements listed in the curriculum model and meet other admissions criteria set by the Harrison School of Pharmacy.

Although not required, students may want to complete an undergraduate degree before entering pharmacy school since the majority of students admitted have a degree. Any major may be acceptable as long as the pre-pharmacy requirements are completed. The College of Sciences and Mathematics offers a major in biomedical sciences that is an excellent choice for students interested in this option. Students should confer with the COSAM pre-health advisors for specific course requirements.

**Pre-Physician Assistant**

This program is designed to prepare students for enrollment in physician assistant programs and leads to a bachelor of science in one of several majors offered through the college. The academic requirements are very demanding and high scholastic competence and performance are expected. Auburn University students complete these recommendations by enrolling in a core of courses shown in the curriculum model. Each student also declares a major. Students should confer with the COSAM pre-health advisors for specific course requirements since these can vary from school to school. Students may choose to major in a curriculum in another college or school, but they should meet with the COSAM Director of Pre-Health Programs as freshmen for assistance in becoming competitive applicants and applying.

Students in the pre-physician assistant program should take the Graduate Record Examination at least a year before the date of entry to professional school and submit an application to the schools of their choice at that time.

**Pre-Veterinary Medicine**

Students in the Pre-Veterinary Medicine (PVET) curriculum must select a major by the end of their sophomore year. Students in Sciences and Mathematics typically select microbiology (MCMB, PVET) or organismal biology (IBIO, PVET) as majors. Pre-Veterinary options in the College of Agriculture include animal sciences (ANDS, PVET) and poultry science (POUL, PVET). A pre-vet option in wildlife (WILD, PVET) sciences also exists in the School of Forestry and Wildlife Sciences. The minimum requirements for admission to the College of Veterinary Medicine at Auburn University are incorporated into the curriculum models for all of these majors.

It is possible to gain admission to the College of Veterinary Medicine by completing only the minimum requirements listed. However, it is preferable to select a major and earn a baccalaureate degree. If a student is admitted to the College of Veterinary Medicine prior to completion of the full four years, he or she may obtain a BS degree by successfully completing the first three years of some of the Pre-Veterinary curricula and the first year of veterinary school. Students should consult their advisors regarding which curricula offer this option. Application for admission to the College of Veterinary Medicine must be submitted to the dean of that college. A minimum grade-point average of 2.5 is required for application; D grades in required courses are unacceptable. All minimum requirements, including courses repeated due to time limitations, must be completed by the end of the spring term preceding the date of admission, and all advanced required courses in physical and biological sciences (organic chemistry and physics) must have been completed within six calendar years prior to the anticipated entrance date. Competition for admission to the professional schools is keen with the number of qualified applicants exceeding the number of places available. For additional information, see College of Veterinary Medicine section and the Pre-Veterinary Medicine curricula in the College of Agriculture, COSAM, and the School of Forestry and Wildlife Sciences.

**Programs**

- Pre-Medicine, Pre-Dental, Pre-Optometry. Majors in:
  - Biomedical Sciences (p. 1299)
  - Microbiology (p. 1231)
  - BA Chemistry (p. 1245)
  - Physics (p. 1294)
  - Organismal Biology (p. 1228)

- Pre-Pharmacy. Major in:
  - Biomedical Sciences (p. 1301)

- P (p. 1310) re-Physical Therapy and Pre-Physician Assistant. Majors in:
  - Biomedical Sciences (p. 1302)
  - Microbiology (p. 1232)
Courses

SCMH 1010/1013 CONCEPTS OF SCIENCE (4) LEC. 3, AAB/LEC. 3. Coreq. SCMH 1011. Interdisciplinary course which presents major scientific concepts in physical and biological sciences. After taking SCMH 1010, students can complete core science requirement series by taking BIOL 1010, CHEM 1010, GEOL 1100, PHYS 1000, or PHYS 1150. Science Core. May count either SCMH 1010 or SCMH 1013 or SCMH 1017.

SCMH 1011 CONCEPTS OF SCIENCE LABORATORY (0) LAB. 2, AAB/LAB. 2. Coreq. SCMH 1010. Interdisciplinary course which presents major scientific concepts in physical and biological sciences. If a student takes SCMH 1010, students can complete core science requirement series by taking BIOL 1010, CHEM 1010, GEOL 1100, PHYS 1000, or PHYS 1150. Science core. May count SCMH 1011 or SCMH 1018.

SCMH 1017 HONORS CONCEPTS OF SCIENCE (4) LEC. 3, LAB. 1. Pr. Honors College. Coreq. SCMH 1018. Interdisciplinary course for Honors students which presents major scientific concepts in physical and biological sciences. After taking SCMH 1017, students can complete core science requirement series by taking BIOL 1010, CHEM 1010, GEOL 1100, GEOL 1107, PHYS 1000, or PHYS 1150. Science core. Credit will not be given for both SCMH 1017 and SCMH 1010.

SCMH 1018 HONORS CONCEPTS OF SCIENCE LABORATORY (0) LAB. 2, AAB/LAB. 2. Coreq. SCMH 1017. Interdisciplinary course for Honors students which presents major scientific concepts in physical and biological sciences. If a student takes SCMH 1017, students can complete core science requirement series by taking BIOL 1010, CHEM 1010, GEOL 1100, GEOL 1107, PHYS 1000, or PHYS 1150. Science core. Credit will not be given for both SCMH 1017 and SCMH 1010.

SCMH 1100 COSAM ORIENTATION (1) LEC. 1. Introduction to the College of Sciences and Mathematics and its resources, exploration of STEM careers, orientation to campus resources and facilities, and assistance with academics and transition to Auburn.

SCMH 1890 PRE-HEALTH PROFESSIONS ORIENTATION (1) LEC. 1. SU. Orientation and guidance for freshmen and transfer students planning to seek admission to health professions schools and programs such as dentistry, medicine, optometry, pharmacy, physician assistant, and physical therapy.

SCMH 2150 OPS: MANAGEMENT OF BUSINESS PROCESSES (2) LEC. 2. Fundamental concepts, techniques and tools of business processes.

SCMH 3810 PRE-PHYSICAL THERAPY PRACTICUM (1) PRA. 2. SU. Departmental approval. Direct observation of physical therapists at an approved facility in the Auburn-Opelika area.

SCMH 3890 PRE-MEDICAL PRECEPTORSHIP (1) LAB. 2. SU. Departmental approval. Direct observation and interaction with physicians at East Medical Center and in individual medical offices.

SCMH 4920 SCIENCES AND MATHEMATICS INTERNSHIP (3) LEC. 3. SU. Practical on-the-job training in some area related to Sciences and Mathematics. Course may be repeated for a maximum of 6 credit hours.

SCMH 5010 CLINICAL APPLICATIONS I (3) LEC. 2. A study of the clinical/personal issues facing primary care physicians in the rural community. Must be enrolled in the Rural Medicine Program.

SCMH 5020 CLINICAL APPLICATIONS II (3) LEC. 2, CLN/LEC. 1. Pr. SCMH 5010. A continuation of SCMH 5010.

SCMH 5940 GLOBAL STUDY/TRAVEL IN SCIENCES AND MATHEMATICS (1-12) AAB. and departmental approval. Application required. Students international study travel on topics relevant to Sciences and Mathematics. Course may be repeated for a maximum of 12 credit hours.

---

1. Students who plan to finish the Biomedical Sciences degree must choose COMM 1000.
2. Students who choose a HIST sequence other than HIST 1010 and HIST 1020 should talk to an advisor about CORE SOC SCI choices.
3. Students may choose to take BCHE 5180 and BCHE 5190 to complete the Biochemistry requirement for HSOP.
4. Students must complete a two-course sequence in either HIST or LIT. For complete HIST and LIT sequence options, see the Bulletin.
5. If a LIT sequence is chosen, this course must be a CORE SOCIAL SCIENCE. If a HIST sequence is chosen, this course must be a CORE HUMANITIES.

### Long range schedules for COSAM courses are online at http://aub.ie.cosamlrs

Courses in BOLD will be used to calculate GPA in major.

Options for courses labeled CORE are in the Auburn University Bulletin (www.auburn.edu/bulletin) under Core Curriculum.

Students must complete all requirements for the major prior to graduation.

Students planning a Physics major should consult with the pre-health advisor.

1. The Chemistry 1110/1111-1120/1121 sequence can substitute for CHEM 1030/1031-1040/1041. See advisor for details.
2. Students who have AP or transfer credit for US History should see an advisor for CORE SOC SCI choices.
3. Students planning a major in Biomedical Sciences should take CHEM 2080/2081 as their professional elective in their sophomore or junior year.

Total Hours: 120

Options for courses labeled CORE are in the Auburn University *Bulletin*, under Core Curriculum.

1. The General Chemistry CHEM 1110/CHEM 1111- CHEM 1120/CHEM 1121 sequence or the General Chemistry Honors Sequence can substitute for CHEM 1030/CHEM 1031- CHEM 1040/CHEM 1041. See advisor.
2. *Professional Electives:* Foreign Language, BIOL 2500, or any BIOL, CHEM, PHYS course 3000+
3. BMSC Electives:
   - BIOL 3010/BIOL 3013 and BIOL 3011 (Comparative Anatomy); BIOL 4000/BIOL 4003 and BIOL 4001/BIOL 4033 (Histology).
   - BIOL 5110 (Parasitology); BIOL 5200 (Clinical Micro); BIOL 5280 (Genetics); BIOL 5230 (Virology); BIOL 5330 (Developmental Genetics); BIOL 5521 (Gene Express. Lab); CHEM 3160 (Physical Chem); CHEM 3050 (Analytical Chem); Undergraduate Research (no more than 4 additional hours);
   - SCMH 3810 or SCMH 3890 (Preceptorships)
4. Students may only register for UNIV 4AA0 during the semester they plan to graduate.

**Total Hours: 121**

ANS 3400 Animal Nutrition is now required to enter vet school at Auburn. See advisor for details.

¹ Students must complete a two-course sequence in either HIST or LIT (for example, World History 1 and 2 or American Lit 1 and 2). For complete HIST and LIT sequence options, see the Bulletin.

² Students who choose a HIST sequence other than HIST 1010 and HIST 1020 should talk to an advisor about CORE SOC SCI choices.
If a LIT sequence is chosen, this course must be a CORE SOC SCI. If a HIST sequence is chosen, this course must be a CORE HUMANITIES.

Students who complete the above 6 semesters and successfully complete the first year of veterinary school may be awarded a BS in Organismal Biology. In the event the first year Veterinary College alternative is not followed, the indicated senior year courses must be successfully completed to receive the BS in Organismal Biology.

### Total Hours: 18

Total Hours: 122
Students must complete a two-course sequence in either HIST or LIT (for example, World History 1 and 2 or American Lit 1 and 2). For complete HIST and LIT sequence options, see the Bulletin.

Students who choose a HIST sequence other than HIST 1010 and HIST 1020 should talk to an advisor about CORE SOC SCI choices.

If a LIT sequence is chosen, this course must be a CORE SOC SCI. If a HIST sequence is chosen, this course must be a CORE HUMANITIES.

This course must be taken the semester of graduation.

Students should declare a major when they have completed 60 hours.

The Chemistry CHEM 1110/CHEM 1111- CHEM 1120/CHEM 1121 sequence can substitute for CHEM 1030/CHEM 1031-CHEM 1040/CHEM 1041. See advisor for details.

Students who complete a HIST sequence other than HIST 1010 and HIST 1020 should see an advisor for CORE SOC SCI choices.
Majors
Minors
College of Veterinary Medicine

THE COLLEGE OF VETERINARY MEDICINE offers a fully accredited program of training leading to the degree of doctor of veterinary medicine. The degree requires four years in the professional curriculum after completion of a pre-professional curriculum which may take four years or more for the average applicant.

Admission

Each year 130 students are admitted to the four-year program for the doctorate in veterinary medicine. Admitted students are residents of Alabama or residents of Kentucky admitted by contract through the Southern Regional Education Board (SREB); or at-large residents (non-Alabama and non-contract students). Alabama and SREB students must have a minimum GPA of 2.5 on a 4.0 system on all course work attempted. A grade of D on any required course will not be accepted. At-large (non-Alabama and non-SREB) students must have a minimum GPA of 3.0 on a 4.0 scale. At-large applicants must be citizens of the United States and will be required to pay non-resident university fees. As part of the admissions process, the Committee on Admissions and Standards of the College of Veterinary Medicine requires a personal interview. The College of Agriculture, the College of Sciences and Mathematics and the School of Forestry and Wildlife Sciences offer Pre-Veterinary curricula and are responsible for pre-veterinary counseling. In addition to academic requirements, candidates are expected to have animal experience and to have worked with a veterinarian for a minimum of 500 hours.

All applicants must apply through the Veterinary Medical College Application Service (VMCAS). Additional information, including an electronic application, is available from the Association of American Veterinary Medical Colleges at http://www.aavmc.org/. Kentucky students must provide proof of residency from their public Kentucky college/university or from the Kentucky Council on Postsecondary Education.

Minimum Requirements for Pre-Veterinary Medicine

A bachelor's degree or completion of the Core Curriculum as stated in the General Information section in this Bulletin.

Specific Course Requirements

Minimum pre-veterinary requirements for Alabama residents are those listed for the pre-veterinary curriculum in either the College of Agriculture, College of Sciences and Mathematics or the School of Forestry and Wildlife Sciences. Non-Alabama and SREB applicants must have acceptable equivalents which have been approved by the College of Veterinary Medicine.

All transfer courses must be equivalent in hours and content. Courses will not be waived on the basis of degrees or "practical experience." Pass-Fail or Satisfactory-Unsatisfactory grades are not acceptable in required courses.

Standardized Examination

Applicants must complete the Graduate Record Examination (verbal and quantitative) within five calendar years prior to the anticipated date of enrollment. Results of the GRE must be officially reported to the Office of Academic Affairs, College of Veterinary Medicine by September 15th.

Application Procedure

Admission to the College of Veterinary Medicine must be gained through formal application made by the VMCAS deadline preceding the fall semester in which admission is desired. All applicants must be citizens of the United States.

The electronic application is available from the Association of American Veterinary Medical Colleges (www.aavmc.org). An Auburn University College of Veterinary Medicine processing fee of $120 is required of all applicants. An additional $50 is required upon acceptance of all who have not previously attended Auburn University.

The final selection of students is made by the Committee on Admissions and Standards of the College of Veterinary Medicine, Auburn University. The right is reserved to accept or reject any applicant.

Under the Regional Plan for Veterinary Training, the College of Veterinary Medicine currently serves Alabama and Kentucky. The land-grant institution in each state participating under the SREB plan maintains counseling and guidance service for students desiring admission to the College of Veterinary Medicine. Students attending other institutions should contact the pre-health professions advisor in their state for information concerning admission requirements.
**Scholastic Requirements**

All applicants and students in the professional program are subject to the academic and disciplinary regulations of the College of Veterinary Medicine in addition to those of Auburn University.

Any student who earns less than a 2.25 GPA for any term will be placed on academic probation. A student who fails to earn a 2.25 GPA in each of the succeeding two terms of enrollment will be dropped from the rolls of the College of Veterinary Medicine for scholastic deficiency. In addition, a student who does not have a veterinary college cumulative average of 2.25 at the end of any academic year may be required to withdraw from the College of Veterinary Medicine.

Any student who earns a D in any course will be placed on academic probation. If the student receives a second D in the same calendar year or academic year, they will be required to withdraw from the College of Veterinary Medicine.

A student will be removed from academic probation after two terms, assuming they have met the terms of probation.

A student who makes a grade of F on any course will be required to withdraw from the College of Veterinary Medicine. If a student who is dismissed for academic reasons is readmitted, they may be required to repeat additional courses as deemed necessary by the Admissions and Standards Committee.

Clinical courses are unique in that the art and skills to be developed in them can be acquired only through full participation in the laboratories. Attendance in these courses is required except in case of illness or other extenuating circumstances as may be judged by the involved instructor. Grading in these clinical laboratory courses is primarily by subjective evaluation. When a course involves student rotation through several disciplines, the student must receive a passing grade in each area before a passing grade can be assigned for the course.

Any student who earns a D or F in any clinical rotation will be placed on academic probation. If the student receives a second or third D or F during clinical rotations, (i.e. D-D-F or D-D-D) that student will be required to withdraw from the College of Veterinary Medicine. If the college admissions and standards committee allows readmission, the student may be required to repeat all experiences to meet the requirements for the clinical year.

The responsibility for academic and psychological counseling is shared by the faculty of this College and an embedded psychological counselor associated with Student Counseling Services.

**Non-Scholastic Requirements**

Health Insurance: Students enrolled in the professional curriculum are required to provide evidence of health insurance coverage.

**Required Withdrawal**

The faculty of the College of Veterinary Medicine reserves the right to require the withdrawal at any time of any student who in the judgment of the admissions and standards committee is not profiting from the instruction offered, who is neglectful, irregular, dishonest or indifferent in the performance of required duties and studies or whose character or conduct is inconsistent with good order of the veterinary college or with the standard of the veterinary profession.

**Requirements for Graduation**

To be eligible for the DVM degree, candidates must complete all of the required courses in the order listed in the curriculum in veterinary medicine along with at least four hours of elective credit, with a minimum overall GPA of 2.25. In addition, each senior must participate in a clinicopathologic conference (CPC) to fulfill their oral communication requirement. Following completion of all academic work, each student is required to serve a preceptorship of eight weeks with an approved veterinarian. Satisfactory completion of the preceptorship is required for graduation.

A graduation fee must be paid at the beginning of the term of graduation and all indebtedness due the institution must be paid prior to graduation.

VM-Biomedical Sciences Courses

VBMS 2100 INTRODUCTION TO PUBLIC HEALTH (3) LEC. 3. Lecture and discussion of historic advances in public health leading to discussion of diseases affecting the health of people in Alabama today.

VBMS 3010 INTRODUCTION TO EPIDEMIOLOGY (3) LEC. 3. Principles of epidemiology, with emphasis on approaches for prevention/control of diseases of humans and animals. Broad applications of studies of populations will be stressed.

VBMS 3050 VETERINARY MEDICINE STUDY ABROAD (2) AAB/FLD. 30. This 2 week course is intended to introduce students to the challenges of maintaining health in domestic, wild and commercial land and marine animals through exposure to diverse ecological environments of Australia’s land and marine parks.

VBMS 3250 INTRODUCTION TO CLINICAL RESEARCH (1) LEC. 1. This introductory course is designed to be a primer for students (veterinary, medical, pharmacy, nursing) interested in biological research with an emphasis on clinical veterinary and human medical research.

VBMS 3903 REPRODUCTIVE SCIENCE AND HEALTH (3) LEC. 3. P/C, One basic organismal biology, physiology or similar life science course. Sophomore level or higher. Foundational physiologic concepts in reproductive science linked to important animal and human reproductive health issues. May count either ANSC 3600 or VBMS 3600.

VBMS 4830 GLOBAL AND COMPARATIVE HEALTH SYSTEMS (3) LEC. 3. Departmental approval. Different national approaches to providing health care for the population will be compared to the US system.

VBMS 4910 OBSERVING NEEDS IN PUBLIC HEALTH (3) LEC. 3. Through volunteer service to public health agency students will develop an understanding of the importance for volunteers to support community public health needs.

VBMS 4980 UNDERGRADUATE RESEARCH (1-3) RES. Directed, supervised undergraduate research in veterinary biomedical sciences (VBMS). Course may be repeated for a maximum of 9 credit hours.

VBMS 4987 HONORS RESEARCH (1-3) RES. Pr. Honors College. Supervised undergraduate research in veterinary biomedical science. May count either VBMS 4987 or VBMS 4997. Course may be repeated for a maximum of 9 credit hours.

VBMS 4997 HONORS THESIS (1-3) RES. Pr. Honors College. Undergraduate honors thesis development in veterinary biomedical science. May Count either VBMS 4987 or VBMS 4997. Course may be repeated for a maximum of 9 credit hours.

VBMS 6111 VETERINARY ANATOMY I (4) LAB. 12. Departmental approval. Gross anatomy of the dog and cat including skeletal and muscular systems, neck, thorax, limbs, abdomen, pelvis, head, and nervous system. Credit will not be given for VMED 5111 and VBMS 6111.

VBMS 6121 VETERINARY ANATOMY II (3) LAB. 9. Pr. VBMS 6111. In-depth study of the gross anatomy of the ox, horse, and minor species (chicken) with inclusion of clinical relevance. In-dept presentation of a specific anatomy topics related to course material. May count either VMED 5121 or VBMS 6120.

VBMS 7000 NEUROANATOMY (5) LEC. 3. LAB. 4. Departmental approval. Functional morphology of nervous system from input/output through the long systems; limbic relations to endocrine and autonomic nervous system. Comparative among mammals.

VBMS 7010 PATHWAYS TO SUCCESSFUL RESEARCH (1) LEC. 1. An introduction to topics pertinent to performance of a successful graduate program and in the conduction of responsible research.

VBMS 7020 MICROSCOPIC ANATOMY I (3) LEC. 1. LAB. 4. Departmental approval. A detailed study of and preparation of the basic tissues. Light microscopy and electron micrograph preparations are used to describe and interpret morphology.

VBMS 7030 MICROSCOPIC ANATOMY II (3) LEC. 1. LAB. 4. Departmental approval. Light microscopy and electron microscopy detailed study of the cardiovascular, hemopoietic, digestive, urinary and respiratory systems of domestic animals.
VBMS 7040 ADVANCED PHYSIOLOGY OF REPRODUCTION (3) LEC. 3. Pr. ANSC 3600 and BIOL 6240 or VBMS 7150. Departmental approval. Developmental, physiological, endocrinological, cellular and molecular mechanisms regulating reproduction, with emphasis on mammalian systems.

VBMS 7070 ENDOCRINOLOGY (4) LEC. 4. Pr. BCHE 7200 and BCHE 7260 and BIOL 6600 or departmental approval. Molecular and cellular endocrinology and physiological regulation of hormone synthesis, secretion, and action in mammalian species. Emphasis will be placed on metabolic regulatory hormones.

VBMS 7080 MOLECULAR ENDOCRINOLOGY (2) LEC. 2. Pr. VBMS 7070. Departmental approval. Examination of the literature of hormonal synthesis, secretion and mechanism of action with emphasis on receptors, second messenger systems, and gene regulation.

VBMS 7090 CLINICAL PHARMACOLOGY (3) LEC. 3. Departmental approval. The actions and effects of drugs on human beings. Acceptable courses in biochemistry and physiology;

VBMS 7100 ADVANCED CARDIOLOGY I (2) LEC. 2. Graduate students in Biomedical Sciences, College of Veterinary Medicine and must have a DVM or equivalent. Topics about advanced diagnostics and therapeutics in cardiovascular disease will be discussed.

VBMS 7120 MEMBRANE PHYSIOLOGY (3) LEC. 2. LAB. 3. Departmental approval. The classic and modern aspects of biological membranes. Labs include patch clamp, reconstruction of ion channels in bilayers, Langmuir-Blodgett techniques, and other methods.

VBMS 7130 VETERINARY MEDICINE DIAGNOSTIC ULTRASONOGRAPHY (3) LEC. 3. Pr. (VMED 9120 or VMED 9121 or VMED 5120) and VMED 5121. The principles and practice of veterinary medical diagnostic ultrasonography as they are utilized in evaluating normal and abnormal anatomy. All animals are used in this course. Veterinary anatomy and/or DVM degree.

VBMS 7140 PHYSIOLOGY I (5) LEC. 5. Departmental approval. Cellular, Cardiovascular, Renal and Respiratory Physiology.

VBMS 7150 PHYSIOLOGY II (4) LEC. 4. Pr. VBMS 7140. Departmental approval. Gastrointestinal Physiology, Metabolism, Endocrinology, and Reproductive Physiology.

VBMS 7160 NEUROSCIENCE (3) LEC. 3. Departmental approval. An overview of neuroscience on the subcellular, cellular and system levels.

VBMS 7180 RECEPTOROLOGY (4) LEC. 4. Pr. VBMS 7070.

VBMS 7190 VETERINARY MEDICAL COMMUNICATIONS TRAINING (1) LEC. 10. LAB. 6. SU. No P or C required. Restricted to only Biomedical Science Masters students, both degree and non-degree seeking, in the College of Veterinary Medicine. Introduce communication skills necessary to build veterinary-client relationships and trust.

VBMS 7210 RADIATION BIOLOGY (4) LEC. 4. Exploration of biological, physical, and chemical basis of radiotherapy with emphasis on the biological effects of ionizing radiation at the cellular and molecular level. Effects of irradiation on the tumor, normal tissues, and the patient will be addressed. DVM degree; Residency in Radiation Oncology or Radiology or Small Animal Oncology and registered in the Graduate School.

VBMS 7220 STRUCTURE AND FUNCTION OF COMPANION ANIMAL SKIN (3) LEC. 3. The course will cover the comparative aspects of the structure and function of the skin of companion animals in healthy and diseased states.

VBMS 7230 CUTANEOUS DISORDERS OF LARGE AND EXOTIC ANIMALS (3) LEC. 3, IND/LEC. 9-12. In depth review of the common and uncommon dermatologic conditions affecting large animal and exotic animal species, including emphasis on those conditions considered zoonotic.

VBMS 7240 ADVANCED SCIENCE OF CANINE AND EQUINE LOCOMOTION (3) LEC. 3. Attendees will learn about the science of biomechanics, muscle physiology and how they apply to locomotion or athletics and working dog and horse.

VBMS 7250 NORMAL RADIOLOGICAL ANATOMY (3) LEC. 3. A detailed study of the normal structure, size and position of the various organs of the cat, dog, horse, cow, and other veterinary species as they appear on plain and contrast radiographs. DVM Degree, acceptance in an established residency program.
VBMS 7260 ADVANCED RADIOLOGY (3-5) LEC. Detailed study of concepts and techniques of all imaging procedures. For graduate students and residents in DCS program or DVM or equivalent. Course may be repeated for a maximum of 5 credit hours.

VBMS 7270 RADIOLOGICAL INTERPRETATIONS (1-3) LEC. The interpretation of various diagnostic imaging modalities used in veterinary medicine and their applications in the diagnostic work-up of clinical cases presenting to the College of Veterinary Medicine. DVM Degree. Course may be repeated for a maximum of 3 credit hours.

VBMS 7280 PHYSICS OF DIAGNOSTIC IMAGING (3) LEC. 3. Principles of physics related to the imaging modalities of diagnostic radiology, ultrasonography, magnetic resonance imaging, scintigraphy, computed tomography, and radiation therapy. Students will study physics at the atomic level but must also develop an understanding of construction, function, and hazards of modern imaging equipment. DVM Degree.

VBMS 7290 GRADUATE SEMINAR (1) SEM. 1. Departmental approval. A mandatory graded seminar presentation, held in conjunction with the VBMS seminar series, presenting the resident student's individual Master of Science degree research topic including pertinent review, hypothesis, materials, results, and discussion of findings.

VBMS 7300 AVIAN DIAGNOSTIC PATHOLOGY (1-3) LAB. SU. Residents enrolled in the Veterinary Biomedical Sciences Avian Pathology specialty program will interpret lesions for the diagnosis of avian diseases using necropsy procedures. Focus will be placed on an integrated comparative understanding of the pathophysiology of disease in commercial poultry. Course may be repeated for a maximum of 3 credit hours.

VBMS 7310 ADVANCED VETERINARY ANESTHESIOLOGY (1) LEC. 1. This course will be delivered in weekly one hour lecture format. The presenter for each lecture will rotate between course students and veterinary faculty. For each hour, the presenter will be required to deliver a lecture on a topic related to the overarching subject for that semester course. The lecture will be delivered at an in-depth level utilizing currently scientific literature, text books, and other reference materials resulting in delivery of state of the art information. Graduate standing in Biomedical Sciences, College of Veterinary Medicine. Must have a DVM degree or equivalent. Course may be repeated for a maximum of 9 credit hours.

VBMS 7320 EVALUATION OF CURRENT AND EMERGING LITERATURE IN VETERINARY ANESTHESIA (1) LEC. 1. This course will be delivered in weekly one hour lecture format. The presenter for each lecture will rotate between course students and veterinary faculty. For each hour, the presenter will be required to deliver an in-depth evaluation and summary of two medical journal manuscripts related to veterinary anesthesiology. The presenter will be required to discuss the manuscript format, study design, data analysis, results, and conclusions including discussion on the pros and cons of the study. Manuscript selection for each class will be at the discretion of the presenter and copies of the manuscripts will be made available electronically to all faculty and students of the course one week prior to the class. Graduate standing in Biomedical Sciences, College of Veterinary Medicine. Must have a DVM degree or equivalent. Course may be repeated for a maximum of 9 credit hours.

VBMS 7330 EVIDENCE BASED EQUINE SURGERY (3) LEC. 3. DVM and enrollment in the College of Veterinary Medicine’s Equine Medicine or Surgery Residency. Provides an introduction to evidence based medicine and meta-analysis with application to topics in equine surgery.

VBMS 7340 LARGE ANIMAL SURGERY AND MEDICINE SEMINAR (1) SEM. 1. Departmental approval. Seminar required of all graduate students in large animal surgery and medicine. Meets at scheduled intervals each year.

VBMS 7370 ADVANCED LARGE ANIMAL ORTHOPEDIC SURGERY (5) LEC. 3. LAB. 2. Research and advanced techniques for orthopedic surgical procedures in large domestic animals.

VBMS 7380 ADVANCED FOOD ANIMAL MEDICINE (3) LEC. 3. In-depth study of food animal medical diseases of all body systems with emphasis on pathophysiologic mechanisms. Departmental approval; DVM degree.

VBMS 7400 GYNECOLOGY OF LARGE DOMESTIC ANIMALS (3) LEC. 3. Diseases and problems of the reproductive system in the female domestic animals. Normal and abnormal conditions of various species are covered. Departmental approval; DVM degree.

VBMS 7410 ANDROLOGY OF LARGE DOMESTIC ANIMALS (3) LEC. 3. Diseases and problems of the reproductive system in male domestic animals. Departmental approval; DVM degree.
VBMS 7430 HEALTH MAINTENANCE OF FOOD ANIMALS (3) LEC. 5. Departmental approval. Research in production medicine. Principles of production medicine to enhance animal health and productivity.

VBMS 7450 SELECTED TOPICS IN GRADUATE EDUCATION RESEARCH (1) LEC. 1. SU. Departmental approval. Overview of research funding strategies, grant preparation, transfer of research technology and patents, research ethics, etc.

VBMS 7460 BACTERIAL PATHOGENESIS (3) LEC. 3. Pr. VBMS 7510 or BIOL 4520. Departmental approval. Molecular and cellular basis of virulence of bacterial pathogens of animals.

VBMS 7470 ADVANCED EPIDEMIOLOGY (3) LEC. 3. Departmental approval. Advanced epidemiological techniques and their application to disease research, clinical retrospective and prospective studies, and disease outbreak investigation. Introductory statistics course.

VBMS 7480 METHODS IN IMMUNOLOGY (5) LEC. 1. LAB. 8. Departmental approval. Theoretical concepts underlying immunological methods combined with practical hands-on immunological experimentation focused on application to research in the biological sciences.

VBMS 7500 CELLULAR AND MOLECULAR IMMUNOLOGY (3) LEC. Pr. BIOL 6500. Departmental approval. Current literature in immunobiology, emphasis on cellular/biochemical/genetic basis of immune response.

VBMS 7510 QUALITY SYSTEMS IN HEALTH SCIENCES (3) LEC. 3. Overview of regulations, standards, and foundational principles for quality systems and processes illuminating the application to health sciences.

VBMS 7520 EUKARYOTIC MOLECULAR BIOLOGY (3) LEC. 3. Genetic mechanisms by which eukaryotic cells replicate, communicate and differentiate. Current literature will be used extensively.

VBMS 7530 EXPERIMENTAL TECHNIQUES IN MOLECULAR AND CELL BIOLOGY (3) LEC. 2. LAB. 6. Nucleic acid detection/amplification/sequencing, protein/antibody chemistry, flow cytometry, photo/electron microscopy fluorochromes, radioisotopes, centrifugation, cell/embryo culture.

VBMS 7540 CURRENT TOPICS IN MOLECULAR VIROLOGY (3) LEC. 3. Pr. VBMS 7520 and BIOL 6260. Departmental approval. Viral gene expression and evasion of host defense mechanisms.

VBMS 7550 PATHOLOGY (1-3) LEC. SU. Departmental approval. Diagnostic interpretation of lesions and test results. Special topics or current issues in pathology to meet the particular needs of students. DVM degree or equivalent; Course may be repeated for a maximum of 3 credit hours.

VBMS 7560 GENERAL PATHOLOGY (4) LEC. 3. LAB. 3. Fundamental alterations of disease. Departmental approval; Satisfactory courses in histology and physiology.

VBMS 7570 DIAGNOSTIC PATHOLOGY (1-3) LEC. SU. Diagnosis of animal diseases using necropsy procedures and histopathology. Required every semester for all graduate students and residents in pathology. DVM degree. Course may be repeated for a maximum of 3 credit hours.

VBMS 7580 SURGICAL PATHOLOGY (1-3) LEC. SU. Histopathologic diagnosis of surgical biopsy specimens. Required every semester for all graduate students and residents in pathology. DVM degree. Course may be repeated for a maximum of 3 credit hours.

VBMS 7590 AVIAN PATHOLOGY (4) LEC. 4. Departmental approval. Comparative avian pathology emphasizing cause, pathogenesis and lesions associated with diseases; differential diagnosis and diagnostic procedures to confirm a diagnosis.

VBMS 7600 ADVANCED CLINICAL PATHOLOGY I (3) LEC. 3. Pr. VMED 5230 or VMED 9230. Departmental approval. The lymphohematopoietic system. Normal components and evaluation of disease states.

VBMS 7610 ADVANCED CLINICAL PATHOLOGY II (3) LEC. 3. Pr. VBMS 5230. Departmental approval. Laboratory evaluation of organ function; disease pattern recognition.

VBMS 7620 DIAGNOSTIC ONCOLOGY (3) LEC. 3. Pr. VMED 5220 or VMED 9220. Departmental approval. Principles of gross and microscopic interpretation of animal neoplasms using basic and specialized techniques.
VBMS 7630 BASIC AND CLINICAL ONCOLOGY (3) LEC. 3. Comparative aspects of the etiology, pathophysiology, diagnosis and treatment of cancer.

VBMS 7640 MECHANISMS OF DISEASE (3) LEC. 3. Pr. VMED 5220 or VMED 9220. Departmental approval. VMED 5220 or equivalent.

VBMS 7650 VETERINARY PROTOZOOLOGY AND ENTOMOLOGY (3) LEC. 3. Departmental approval. Current topics in immunology, physiology, molecular biology, pathogenicity, etc. of selected protozoal and arthropod parasites.

VBMS 7660 VETERINARY HELMINTHOLOGY (3) LEC. 3. Departmental approval. Current topics in immunology, physiology, biochemistry, molecular biology, epidemiology, and pathogenicity of selected helminth parasites.

VBMS 7670 PATHOLOGY PARASITIC DISEASES (3) LEC. 2. LAB. 2. Pr. VBMS 7560. Departmental approval. Gross and microscopic pathology of parasitic diseases of veterinary importance.

VBMS 7680 PATHOLOGY SEMINAR (1) LEC. 1. Pr. VMED 5220 or VMED 9220. Departmental approval. Weekly conference to discuss gross and histologic pathology in animal tissues.

VBMS 7690 READINGS IN IMMUNOLOGY AND INFECTIOUS DISEASE (1) LEC. 1. SU. Pr. BIOL 6500 or VBMS 7500. To familiarize students with current scientific literature in immunology and the methods employed. Or equivalent.

VBMS 7700 COMBINATORIAL BIOCHEMISTRY AND PHAGE DISPLAY (4) LEC. 1. LAB. 6. In-depth study of combinatorial biochemistry and phage display as a tool for development of new drugs, vaccines and diagnostics for veterinary medicine.

VBMS 7720 DEVELOPMENTAL MOLECULAR BIOLOGY (3) LEC. 3. Pr. VBMS 7520. Genetic mechanisms by which eukaryotes differentiate from single cells to complex multicellular organisms will be covered. Important examples of biomedical dysfunction will be used to illustrate developmental pathways. Current literature will be used extensively.

VBMS 7730 APPLIED CYTOLOGY (2) LEC. 2. Systematic review of normal and abnormal cytologic findings in veterinary species. Participation in a residency training program at the Auburn University College of Veterinary Medicine.

VBMS 7750 GRADUATE COLLOQUIUM IN VETERINARY CLINICAL SCIENCE (1) CLN. 1. Departmental approval. Forum to present topics relevant to the students clinical and research interests. This a mandatory seminar for graduate students in the Department of Clinical Science. DVM degree Course may be repeated for a maximum of 5 credit hours.

VBMS 7760 ADVANCED VETERINARY NEUROSURGERY (5) LEC. 3. LAB. 2. Enrolled in the CVM’s MS or PHD program. Veterinary neurosurgery. All aspects of veterinary neurosurgery will be covered. Content delivery is via didactic lecture, small group discussion, and skills laboratories.

VBMS 7770 ADVANCED SMALL ANIMAL GENERAL SURGERY (3) LEC. 2. LAB. 3. Application of critical thinking skills to perioperative plans and tasks. DVM or VMD degree, or equivalent.

VBMS 7780 VETERINARY WOUND MANAGEMENT AND RECONSTRUCTIVE SURGERY (4) LEC. 2. LAB. 2. Techniques in veterinary wound management and reconstructive surgery in large and small animals. DVM degree or equivalent.

VBMS 7790 SMALL ANIMAL ORTHOPEDICS (5) LEC. 5. Review of orthopedic diseases in small animals, interactive review of recent literature and advanced laboratory sessions intended for residents in small animal surgery. DVM degree or equivalent.

VBMS 7800 ADVANCED SMALL ANIMAL NEUROLOGY (3) LEC. 3. Advanced study of neurodiagnostics and non-surgical therapy of neurological disorders in small domestic animals.

VBMS 7810 ADVANCED SMALL ANIMAL MEDICINE I (3-5) LEC. Departmental approval. Special study of the causes, methods of diagnosis, treatment and control of non-surgical urogenital diseases of small animals. DVM degree; Course may be repeated for a maximum of 5 credit hours.

VBMS 7820 ADVANCED SMALL ANIMAL MEDICINE II (3-5) LEC. 3. Departmental approval. Special study of the causes, methods of diagnosis, treatment and control of non-surgical gastrointestinal diseases of small animals. DVM degree; Course may be repeated for a maximum of 5 credit hours.
VBMS 7830 ADVANCED SMALL ANIMAL MEDICINE III (3-5) LEC. 3. Departmental approval. Special study of the causes, methods of diagnosis, treatment and control of non-surgical cardiovascular and respiratory diseases of small animals. DVM degree; Course may be repeated for a maximum of 5 credit hours.

VBMS 7850 ADVANCED VETERINARY MEDICAL SPECIALTY TRAINING (1-4) LEC. 1. LAB. 2. SU. Advanced veterinary medical specialty training is provided to residents and board-eligible veterinary trainees with hands-on instruction in clinical activities commensurate with the board-certification expectation of various veterinary medical specialties. Up to 3 hours may be used toward BMS degree program, course may be repeated for a maximum of 6 credit hours.

VBMS 7860 INTRODUCTION TO PUBLIC HEALTH (3) DSL/LEC. 3. The course will provide an overview of the fascinating history of public health issues and accomplishments, with an emphasis on 1800-2010. Students will receive a comprehensive introduction to Public Health core principles, regulatory agencies, and programs. Emphasis is given to the interdisciplinary and integrative nature of Public Health policies and practices which address and dovetail with the One Health triad of humans, animals, and the environment/ ecosystem.

VBMS 7870 ADVANCED VETERINARY OPHTHALMOLOGY: OPHTHALMIC MEDICINE (3) LEC. 3. Advanced ophthalmology with emphasis on diagnosis, pathophysiology and treatment of ocular diseases of domestic animals. DVM degree or equivalent.

VBMS 7880 ADVANCED VETERINARY OPHTHALMOLOGY: OPHTHALMIC MEDICINE (3) LEC. 1. LAB. 6. Pr. VBMS 7870. Advanced ophthalmology with emphasis on ophthalmic surgery.

VBMS 7890 ADVANCED VETERINARY OPHTHALMOLOGY: OPHTHALMIC BASIC SCIENCES (3) LEC. 3. Advanced ophthalmology with emphasis on diagnosis, pathophysiology and treatment of ocular diseases of domestic animals. DVM degree or equivalent.

VBMS 7946 EPIDEMIOLOGY AND ONE HEALTH (3) LEC. 3. This course will review the principles of epidemiology as they apply to the One Health Initiative. Emphasis will be placed on the rich history of the discipline and how it applies to the one health concept.

VBMS 7970 RESEARCH PROBLEMS IN BIOMEDICAL SCIENCES (1-5) RES. Research problems for graduate students, under supervision of faculty, in variety of specialized disciplines related to the biomedical sciences. Faculty approval. Course may be repeated for a maximum of 15 credit hours.

VBMS 7980 NON-THESIS PROJECT (1-3) LEC. SU. Departmental approval. Non-thesis project, to be determined by faculty advisor and student's graduate advisory committee. DVM degree

VBMS 7990 RESEARCH AND THESIS IN BIOMEDICAL SCIENCES (1-10) MST. Credit to be arranged. Course may be repeated with change in topics.

VBMS 8360 ADVANCED EQUINE MEDICINE I: GI DISEASE (2) LEC. 2. Advanced topics in equine gastrointestinal disease are discussed. Topics include pathophysiology, pharmacology, and specific therapy of GI disease in horses. Graduate standing in Biomedical Sciences, College of Veterinary Medicine. Must have DVM or equivalent.

VBMS 8370 ADVANCED EQUINE MEDICINE II: RENAL/ENDOCRINE (2) LEC. 2. Advanced topics in equine renal and endocrine disease are discussed. Topics include pathophysiology, pharmacology, and specific therapies. Graduate standing in Biomedical Sciences, College Veterinary Medicine. Must have DVM or equivalent.

VBMS 8380 ADVANCED EQUINE MEDICINE III: NEUROMUSCULAR (2) LEC. 2. Advanced topics in equine neuromuscular disease are discussed. Topics include pathophysiology, pharmacology, and specific therapies. Graduate standing in Biomedical Sciences, College Veterinary Medicine. Must have DVM or equivalent.

VBMS 8390 ADVANCED EQUINE MEDICINE IV: CARDIORESPIRATORY (2) LEC. 2. Advanced topics in equine cardiorespiratory disease are discussed. Topics include pathophysiology, pharmacology and specific therapies. Graduate standing in Biomedical Sciences, College Veterinary Medicine. Must have DVM or equivalent.

VBMS 8480 EXPERIMENTAL METHODS IN VETERINARY MEDICINE (3) LEC. 3. Departmental approval. This course is intended to provide the biomedical sciences graduate student with the necessary tools to design and analyze a straightforward Masters-level veterinary biomedical research study, and interpret common statistical methods in the veterinary biomedical literature. Students will review and discuss examples from the veterinary research literature and acquire experience performing analysis using commonly available software packages.
VBMS 8950 BIOMEDICAL SCIENCES SEMINAR (1) SEM. 1. SU. Recent advances in biochemistry, cell biology and molecular biology will be critically presented and discussed by graduate faculty and students.

VBMS 8990 RESEARCH AND DISSERTATION (1-10) DSR. Course may be repeated with change in topics.

Veterinary Medicine Courses

VMED 9000 ORIENTATION TO VETERINARY MEDICINE (0) SEM. 1. SU. Overview of organized veterinary medicine, history of the profession, professional responsibilities and privileges, and career opportunities within the profession.

VMED 9010 VETERINARY MEDICAL ETHICS & LAW (1) LEC. 15. Provide a foundation in veterinary medical ethics and legal issues associated with veterinary medicine. Course may be repeated for a maximum of 6 credit hours.

VMED 9020 VETERINARY MEDICINE AND THE LAW (1) LEC. 13. Laws relating to the veterinary profession, public policies, and government regulations.

VMED 9030 VETERINARY EPIDEMIOLOGY & ZOONOSES (2) LEC. 30. Basic principles of epidemiology including mechanisms of transmission, disease prevention, diagnosis, and assessment of human health risks. Course may be repeated for a maximum of 6 credit hours.

VMED 9040 VETERINARY FOOD SAFETY (2) LEC. 30. Provide a basic awareness of the most common foodborne diseases and methods to protect consumers from foodborne disease. Course may be repeated for a maximum of 6 credit hours.

VMED 9050 PROFESSIONAL DEVELOPMENT AND BUSINESS FUNDAMENTALS (1) LEC. 15. Auburn University CVM Professional Development and Business Fundamentals course is a 1 credit-hour course encompassing the study, understanding and application of pertinent business disciplines guiding the decision-making responsibilities of practice owners, veterinarians, veterinary students, veterinary technicians and practice managers that seek to improve profitability and efficiency allowing for a competitive advantage and long term success in their personal and professional careers.

VMED 9062 CLINICOPATHOLOGY CONFERENCE CRITICAL THINKING (1) LEC. 14. SU. Review and assessment of material presented in a case-based format by faculty and house officers to develop and refine clinical thinking and critical thinking skills. Course may be repeated with change in topics.

VMED 9110 PHYSIOLOGY I (5) LEC. 72. LAB. 3. Cellular, Cardiovascular, Renal, and Respiratory Physiology.

VMED 9111 VETERINARY ANATOMY I (SMALL ANIMAL) (4) LEC. 44. LAB. 94. Basic concepts of body structure and small animal gross anatomy with veterinary medical applications. Credit will not be given for both VMED 5111 and VBMS 6111.

VMED 9120 PHYSIOLOGY II (4) LEC. 57. Gastrointestinal Physiology, Metabolism, Endocrinology, and Reproductive Physiology.

VMED 9121 VETERINARY ANATOMY II (3) LEC. 38. LAB. 57. In-depth study of the gross anatomy of the ox, horse, and minor species with inclusion of clinical relevance.

VMED 9130 GENETIC AND CELLULAR BASIS OF ANIMAL DISEASE (1) LEC. 15. One credit course focused on the relationship between genetics and animal diseases.

VMED 9131 BASIC MICROANATOMY/DOMESTICS ANIMALS (3) LEC. 15. LAB. 54. Functional comparative microstructure of cells, basic tissues, cardiovascular system, urinary system, skeleton and osteogenesis, respiratory system, and blood of domestic animals.

VMED 9141 ORGANOLOGY OF DOMESTIC ANIMALS (2) LEC. 5. LAB. 56. Comparative microstructure of the digestive system, lymphoid system, endocrine system, integumentary system, reproductive system, and placentation of domestic animals.

VMED 9150 DIAGNOSTIC IMAGING (2) LEC. 27. LAB. 12. Basic radiographic and ultrasonographic physics; introduction to computed tomography, magnetic resonance imaging, and nuclear imaging.

VMED 9151 VETERINARY NEUROSCIENCES (4) LEC. 44. LAB. 24. Gross and microscopic morphology and physiology of the peripheral and central nervous systems. Course may be repeated for a maximum of 12 credit hours.
VMED 9160 VETERINARY PUBLIC HEALTH (3) LEC. 3. This first half of this class will include instruction on the zoonoses, and the principles of epidemiology or population medicine. For the zoonoses primary mechanisms of transmission and inclusion in differential diagnosis lists will be emphasized. The role of the veterinarian in prevention of human disease from the zoonoses will be stressed. Epidemiologic methods for investigation of disease distribution and dynamics in populations also will be covered. The second half of the course will provide a broad One Health/ Public Health overview of food safety and food security issues, including pet food and animal feeds. Basic concepts and principles will be illustrated and reinforced through the study of food- and water-borne diseases. This part of the course will address food and water-borne pathogens, their public health impacts (historic and present-day), prevention and mitigation measures (sanitary production and processing, pasteurization, and preservation techniques). The history and importance of regulatory controls and oversight in order to assure food and feed safety, consumer confidence, sustainability, and stable markets for American agriculture will be discussed.

VMED 9180 VETERINARY ETHOLOGY (2) LEC. 28. Basic concepts of ethology and other approaches to animal behavior, introduce diagnostic and treatment methods, discuss relevant cases. Course may be repeated for a maximum of 6 credit hours.

VMED 9190 INTRODUCTION TO VETERINARY PHARMACOLOGY (1) LEC. 16. An organized foundation of information to develop clinical thinking skills in veterinary pharmacology. Course may be repeated for a maximum of 16 credit hours.

VMED 9200 VETERINARY PARASITOLOGY I (3) LEC. 37. LAB. 13.5. Platyhelminthes, trematodes, and nematodes of domestic animals.

VMED 9210 VETERINARY PARASITOLOGY II (2) LEC. 17. LAB. 10. Arthropods, protozoa, helminths, and acanthocephalans of domestic animals. Parasitcides.

VMED 9220 PRINCIPLES OF VETERINARY PATHOLOGY (3) LEC. 35. LAB. 20. General principles of pathology and mechanisms of disease processes affecting animals.

VMED 9230 VETERINARY CLINICAL PATHOLOGY (3) LEC. 47. LAB. 8. Laboratory test principles and results interpretations in evaluation of hematopoietic, coagulation, hepatic, renal, gastrointestinal, acid/base and fluid status of animals.

VMED 9240 PRINCIPLES OF VETERINARY IMMUNOLOGY (3) LEC. 41. LAB. 6. Principles underlying the immune system's ability to protect animals from disease and mechanisms by which immune responses contribute to disease.

VMED 9250 VIROLOGY & PRIONS (2) LEC. 23. LAB. 6. Principles of infectious agents and their pathogenic attributes, infectious diseases of animals, and mechanisms of antimicrobial agents. Course may be repeated for a maximum of 6 credit hours.

VMED 9260 VETERINARY PHARMACOLOGY (3) LEC. 45. LAB. 8. Overview of drugs relevant to veterinary practice; pharmacodynamics, pharmacokinetics, clinical application.

VMED 9262 CLINICAL PHARMACOLOGY AND THERAPEUTICS (1) LAB. 20. Use of group based discussion to create therapeutic plan for specific patients with a target disease. Satisfactory advancement into the second of the professional (DVM) program.

VMED 9270 INTRODUCTION TO CYTOLOGY (1) LEC. 3. LAB. 10. The principles and practice of evaluation of blood films, cytologic preparations, and urine sediments from various veterinary species.

VMED 9280 BACTERIOLOGY & MYCOLOGY (3) LEC. 34. LAB. 20. Veterinary bacterial and fungal pathogens, diseases caused by each, prevention, treatment and presumptive laboratory diagnoses. Course may be repeated for a maximum of 9 credit hours.

VMED 9301 PHYSICAL DIAGNOSES OF LARGE AND SMALL ANIMALS (2) LEC. 18. LAB. 30. Basic approach to physical examination of large and small animals.

VMED 9310 INTRODUCTION TO SURGERY (2) LEC. 18. LAB. 19.5. Current standing in the DVM professional curriculum and completion of the first 3 semesters of the professional program. Introduction to the fundamental principles and techniques of veterinary surgery.

VMED 9311 SURGICAL PRACTICUM (1) LEC. 1. LAB. 16. Aseptic technique, instrument handling, suture patterns, surgical ties, anesthetic administration/monitoring, surgical incision/tissue handling, wound closure, postoperative patient management.

VMED 9320 LARGE ANIMAL NUTRITION (2) LEC. 28. LAB. 4. Proper nutrition for health and disease prevention and treatment in large animals in different stages of life. May count either VMED 5320 or VMED 5420. Course may be repeated for a maximum of 6 credit hours.
VMED 9330 EXOTIC COMPANION ANIMAL MEDICINE (2) LEC. 30. Care, diagnosis, and treatment of exotic companion animals. May count either VMED 5330 or VMED 5430. Course may be repeated for a maximum of 6 credit hours.

VMED 9340 EMERGENCY MEDICINE AND CRITICAL CARE (2) LEC. 28. Emergency presentations, critical care management.

VMED 9350 VETERINARY TOXICOLOGY (2) LEC. 30. LAB. 15. Poisons and poisonous plants affecting large and small animals, chemical properties, signs, lesions, diagnosis, treatment.

VMED 9360 PRODUCTION PREVENTATIVE MEDICINE (3) LEC. 57. Principles of disease prevention and maximization of production application of food safety principles.

VMED 9370 ONCOLOGY (1) LEC. 17. Diagnostic and therapeutic measures used to manage animals with oncologic diseases.

VMED 9380 PHYSICAL DIAGNOSIS II (1) LEC. 4. LAB. 14. Continued experience in the performance of routine physical examination in small and large animal species. Satisfactory advancement into the second year of the professional (DVM) program.

VMED 9410 APPLIED CLINICAL IMAGING (2) LEC. 2. Define and describe abnormalities of various systems detected through imaging. Course may be repeated for a maximum of 6 credit hours.

VMED 9420 SMALL ANIMAL NUTRITION (2) LEC. 28. LAB. 4. Proper nutrition for health and disease prevention and treatment in large animals in different stages of life. May count either VMED 9320 or VMED 9420. Course may be repeated for a maximum of 6 credit hours.

VMED 9430 POULTRY MEDICINE (2) LEC. 30. The care, diagnosis, and treatment of poultry. May count either VMED 9330 or VMED 9430. Course may be repeated for a maximum of 6 credit hours.

VMED 9480 VETERINARY SERVICE LEARNING AND OUTREACH (2) LEC. 2. SU. This course is designed to introduce the future veterinarian to the challenges and rewards associated with provision of veterinary health care to underserved communities. It will consist of didactic lectures intended to stimulate dialogue with key partners and with service experiences that will help the student progressively build the confidence, skills and knowledge necessary to provide veterinary services to underserved communities.

VMED 9490 VETERINARY MEDICINE STUDY ABROAD (2) AAB/FLD. 2. SU. To introduce students to the challenges of maintaining health in domestic, wild and commercial Australian land and marine animals through exposure to diverse ecological land and marine park environments.

VMED 9500 SPECIALIZED TOPICS IN VETERINARY MEDICINE (2) LEC. 30. Focused instruction on topics of interest in veterinary medicine. Must be enrolled in the Doctor of Veterinary Medicine program. Course may be repeated for a maximum of 8 credit hours.

VMED 9502 CURRENT TOPICS IN VETERINARY MEDICINE (1) LEC. 1. SU. Emerging topics in veterinary medicine, current literature. Course may be repeated for a maximum of 15 credit hours.

VMED 9510 HEMOLYMPHATIC SYSTEM (1) LEC. 15. LAB. 6. Diagnosis, treatment and prevention of diseases affecting the integumentary and hemolymphatic systems. Course may be repeated for a maximum of 3 credit hours.

VMED 9520 CARDIOVASCULAR SYSTEM (2) LEC. 25. LAB. 13. Pathophysiology, pathologic lesions, radiographic and ultrasonographic lesions, diagnosis, treatment and prevention of diseases affecting the cardiovascular system.

VMED 9530 RESPIRATORY SYSTEM (3) LEC. 41. Pathophysiology, pathologic lesions, radiographic and ultrasonographic lesions, diagnosis, treatment and prevention of diseases affecting the respiratory system.

VMED 9540 SMALL ANIMAL ALIMENTARY SYSTEM (2) LEC. 34. Pathophysiology, pathologic lesions, radiographic and ultrasonographic lesions, diagnosis, treatment and prevention of diseases affecting the alimentary system. Course may be repeated for a maximum of 6 credit hours.

VMED 9550 URINARY SYSTEM (2) LEC. 29. Pathophysiology, pathologic lesions, radiographic and ultrasonographic lesions, diagnosis, treatment, and prevention of disease affecting the urinary system.

VMED 9560 ENDOCRINE SYSTEM (2) LEC. 25. Pathophysiology, pathologic lesions, diagnosis, treatment and prevention of diseases of the endocrine system.
### VMED 9570 REPRODUCTIVE SYSTEM (4)
LEC. 66. Pathophysiology, pathologic lesions, radiographic and ultrasonographic lesions, diagnosis, treatment; and prevention of diseases of the reproductive system. Course may be repeated for a maximum of 12 credit hours.

### VMED 9580 NERVOUS SYSTEM (2)
LEC. 36. LAB. 6. Pathophysiology, pathologic lesions, radiographic and ultrasonographic lesions, diagnosis, treatment, and prevention of diseases affecting the nervous system.

### VMED 9590 MUSCULOSKELETAL SYSTEM (3)
LEC. 42. LAB. 4. Pathophysiology; pathologic, radiographic and ultrasonographic lesions; diagnosis; treatment; and prevention of diseases affecting the musculoskeletal system.

### VMED 9601 VETERINARY CLINICAL ROTATIONS (3)
LEC. 3. Clinical experiences through various specialty service in the Veterinary Medical Teaching Hospital. Course may be repeated with change in topics.

### VMED 9602 RESEARCH PROBLEMS IN BIOMEDICAL SCIENCE (1-10)
RES. SU. Research problems in a variety of specialized disciplines for veterinary students and advanced undergraduates.

### VMED 9611 VETERINARY CLINICAL ROTATIONS-ELECTIVES (3)
LEC. 3. SU. Clinical experiences through various specialty services in the Veterinary Medical Teaching Hospital. Course may be repeated for a maximum of 9 credit hours.

### VMED 9621 CLINICAL ROTATIONS IN VETERINARY MEDICINE (2)
CLN. 80. Clinical practicum experiences in large and small animal teaching hospitals on the veterinary medical campus. Course may be repeated with change in topics.

### VMED 9631 ALTERNATIVE ROTATIONS IN VETERINARY MEDICINE (2)
CLN. 80. SU. Clinical practicum experiences in alternative large and small animal experiences as documented in college procedures. Course may be repeated with change in topics.

### VMED 9640 LARGE ANIMAL ALIMENTARY SYSTEM (2)
LEC. 36. Pathophysiology, pathologic lesions, diagnosis, treatment and prevention of diseases affecting the large animal alimentary system. Course may be repeated for a maximum of 6 credit hours.

### VMED 9650 CANINE SPORTS MEDICINE AND REHABILITATION (1)
LEC. 1. SU. Activities, requirements, and disorders encountered in canine athletes; role of veterinarian in care and rehabilitation; current research.

### VMED 9670 SPECIAL SENSES SYSTEMS (1)
LEC. 19. LAB. 4. Common procedures for evaluation, diagnosis and treatment of eye disorders in domestic species are covered to provide basic veterinary ophthalmology knowledge to veterinary students.

### VMED 9690 REPTILE AND AMPHIBIAN MEDICINE (1)
LEC. 1. SU. Diseases, treatment, husbandry, handling, restraint, examination, sample collection in reptiles and amphibians.

### VMED 9700 INTRODUCTION TO ANESTHESIA (3)
LEC. 33. LAB. 16. Principles and practices of veterinary anesthesia in large and small animals.

### VMED 9710 PRACTICE MANAGEMENT (1)
LEC. 1. SU. Fundamental principles of effective client, personnel, practice and business management for the veterinarian.

### VMED 9720 DISASTER MEDICINE FOR VETERINARIANS (2)
LEC. 1. SU. Pr. (VMED 9111 or VMED 5111). Role of the veterinarian in responding to natural and man made disasters.

### VMED 9721 APPLIED ANATOMY I (1)
LAB. 3. Pr. VMED 5111 or VMED 9111. Detailed anatomical basis for small animal surgical approaches.

### VMED 9731 APPLIED ANATOMY II (1)
LAB. 3. Pr. (VMED 9111 or VMED 5111). Detailed anatomical basis for small animal diagnostics and therapeutics.

### VMED 9740 APPLIED COMPANION ANIMAL BEHAVIOR (2)
LEC. 2. Pr. VMED 9300 or VMED 9180 or VMED 5300 or VMED 5180. Diagnosis, treatment and client education on selected behavior problems in companion animals.

### VMED 9741 EQUINE LIMB JOINTS AND FOOT (1)
LAB. 3. SU. Pr. VMED 9121 or VMED 5121. A study of the functional anatomy of the joints and foot of the horse fore and hind limbs.

### VMED 9750 DIAGNOSTIC VETERINARY ULTRASONOGRAPHY (2)
LEC. 2. LAB. 1. Pr. (VMED 9121 or VMED 5121) or (VMED 9150 or VMED 5150). Basic physics, instrumentation, and scanning techniques of ultrasonography. Normal sonographic anatomy correlated with the cross-sectional anatomy of body structures and organs.
VMED 9770 ADVANCED VETERINARY DERMATOLOGY (1) LEC. 1. SU. Pr. VMED 9510 or VMED 5510. Clinical dermatology in a case-based format.

VMED 9790 SMALL ANIMAL WOUND MANAGEMENT AND SURGERY (1) LEC. 1. SU. Pr. (VMED 9510 or VMED 5510) and (VMED 9310 or VMED 5310). Wound management, reconstructive/salvage surgery.

VMED 9800 APPLIED SMALL ANIMAL NEUROLOGY (1) LEC. 1. SU. Clinical management of commonly occurring neurologic diseases of small domestic animals.

VMED 9801 PRECEPTORSHIP (3) LAB. 320. SU. Training in a practice situation under the direct supervision of a veterinarian or, under certain conditions, in specialized programs. Approval of Preceptorship Committee.

VMED 9810 INTEGUMENTARY SYSTEM (2) LEC. 29. LAB. 6. Diagnosis, treatment and prevention of diseases affecting the integumentary system.

VMED 9820 ADVANCED REPRODUCTIVE TECHNIQUES (2) LEC. 2. Pr. VMED 9120. Techniques associated with embryo transfer, fetal sexing, in-vitro fertilization, applied and experimental techniques in cattle emphasized.

VMED 9830 VETERINARY MEDICINE AND THE PUBLIC (1) LEC. 1. SU. News events related to veterinary medicine and the role of the veterinarian in public education and public policy.

VMED 9840 WILDLIFE DISEASES (1) LEC. 1. SU. Control and role of veterinarian in prevention of disease in wild animals, specifically wildlife indigenous to U.S.

VMED 9860 ADVANCED TECHNIQUES IN POPULATION MEDICINE (1) LEC. 1. SU. Techniques for investigation of disease problems in populations with emphasis on computer software specialized for outbreak investigation and disease mapping.

VMED 9880 EQUINE REPRODUCTION (1) LEC. 1. Reproductive physiology, endocrinology, breeding soundness evaluation, breeding management and advanced technologies.

VMED 9950 CLINICOPATHOLOGIC CONFERENCE (1) SEM. 15. SU. Oral presentation of veterinary clinical case or case material.

VMED 9960 SPECIAL PROBLEMS (1) LEC. 1. SU. Introduction to veterinary literature, evaluation of recent articles, references, reports on veterinary medicine.

VMED 9995 VETERINARY CLINICAL ROTATIONS - EXTERNSHIPS (0) CLN. SU. Successful completion of didactic veterinary curriculum. Students will participate in clinical rotations including specialty rotations.

Interdepartmental Undergraduate Programs

Bioprocess Engineering (BPEN)
The curriculum in bioprocess engineering is coordinated by the Samuel Ginn College of Engineering and prepares students to seamlessly combine engineering and natural sciences to design and develop systems, processes and equipment that convert biological and agricultural materials to value-added products such as food, nutraceuticals, polymers and pharmaceuticals. See the Department of Biosystems Engineering (p. 622) in the Samuel Ginn College of Engineering for further information.

Biosystems Engineering (BSEN)
The curriculum in Biosystems Engineering is coordinated by the Samuel Ginn College of Engineering and prepares students for productive careers in the biosystems industries and related natural resource and environmental systems sectors. See the Department of Biosystems Engineering (p. 622) in the Samuel Ginn College of Engineering for further information.

Ecological Engineering (ECEN)
The curriculum in ecological engineering is coordinated by the Samuel Ginn College of Engineering and prepares students to solve environmental problems by applying engineering knowledge to natural ecological and biological systems. See Department of Biosystems Engineering (p. 622) in the Samuel Ginn College of Engineering for further information.

Environmental Science (ENVI)
The curriculum in environmental science is an interdepartmental program based on the strengths of Auburn University in the engineering, biological and physical sciences. See the Department of Crop, Soil and Environmental Sciences (p. 213) in the College of Agriculture for further information.

Forest Engineering (FOEN)
The curriculum in Forest Engineering is coordinated by the Samuel Ginn College of Engineering and the School of Forestry and prepares students for professional careers in forest products industry and related natural resource and environmental systems sectors. See the Department of Biosystems Engineering (p. 622) in the Samuel Ginn College of Engineering for further information.

Materials Engineering (MATL)
The curriculum in materials engineering is an interdisciplinary curriculum conducted cooperatively by departments in the Samuel Ginn College of Engineering and the College of Sciences and Mathematics. See the Department of Mechanical Engineering (p. 698) in the Samuel Ginn College of Engineering for further information.

Aerospace Studies (AFROTC) Courses

AIRE 1010 THE FOUNDATIONS OF US AIR FORCE (1) LEC. 1. Introduction to the US Air Force and Air Force ROTC.

AIRE 1011 AFROTC LEADERSHIP LABORATORY (0) LAB. 0. SU. Departmental approval. Required AFROTC Leadership Laboratory for students who are pursuing a commission in the US Air Force. Course may be repeated with change in topics.

AIRE 1020 THE FOUNDATIONS OF US AIR FORCE (1) LEC. 1. Introduction to the US Air Force and Air Force ROTC.

AIRE 1021 AFROTC LEADERSHIP LABORATORY (0) LAB. 2. SU. Departmental approval. Required AFROTC Leadership Laboratory for students who are pursuing a commission in the US Air Force. Course may be repeated with change in topics.

AIRE 2010 EVOLUTION OF US AIR AND SPACE POWER (1) LEC. 1. Air and space power history, doctrine, capabilities and functions.

AIRE 2011 AFROTC PROFESSIONAL MILITARY TRAINING (0) LAB. 0. SU. Departmental approval. Required AFROTC Professional Military Training for General Military Course (GMC) students and their Professional Military Course (POC) trainers, all who are pursuing a commission in the US Air Force. Course may be repeated with change in topics.

AIRE 2020 EVOLUTION OF US AIR AND SPACE POWER (1) LEC. 1. Air and space power history, doctrine, capabilities and functions.

AIRE 2021 AFROTC PROFESSIONAL MILITARY TRAINING (0) LAB. 0. SU. Departmental approval. Required AFROTC Professional Military Training for General Military Course (GMC) students and their Professional Military Course (POC) trainers, all who are pursuing a commission in the US Air Force. Course may be repeated with change in topics.

AIRE 3010 AIR FORCE LEADERSHIP STUDIES (3) LEC. 3. Pr. AIRE 2020. Departmental approval. Advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills and supervision concepts.

AIRE 3011 AFROTC PHYSICAL TRAINING (0) LAB. 0. SU. Departmental approval. Required AFROTC Physical Training (PT) for students who are pursuing a commission in the US Air Force. Course may be repeated with change in topics.

AIRE 3020 AIR FORCE LEADERSHIP STUDIES (3) LEC. 3. Pr. AIRE 3010. Departmental approval. Advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills and supervision concepts.

AIRE 3021 AFROTC PHYSICAL TRAINING (0) LAB. 0. Departmental approval. Required AFROTC Physical Training (PT) for students who are pursuing a commission in the US Air Force. Course may be repeated with change in topics.

AIRE 4010 NATIONAL SECURITY AFFAIRS AND PREPARATION FOR ACTIVE DUTY (3) LEC. 3. Pr. AIRE 3020. Departmental approval. For AFROTC senior cadets. The role of military officers in American society.

AIRE 4011 AFROTC LEADERSHIP LABORATORY (0) LAB. 2. SU. Departmental approval. Required AFROTC Leadership Laboratory for students who are pursuing a commission in the US Air Force. Course may be repeated with change in topics.

AIRE 4020 NATIONAL SECURITY AFFAIRS AND PREPARATION FOR ACTIVE DUTY (3) LEC. 3. Pr. AIRE 4010. Departmental approval. For AFROTC senior cadets. The role of military officers in American society.

AIRE 4021 AFROTC LEADERSHIP LABORATORY (0) LAB. 0. SU. Departmental approval. Required AFROTC Leadership Laboratory for students who are pursuing a commission in the US Air Force. Course may be repeated with change in topics.
### Military Science (AROTC) Courses

**MILS 1010** INTRODUCTION TO ARMY ROTC I (1) LEC. 1. Coreq. MILS 1011. Introduction to the Reserve Officer Training Corps and the US Army.

**MILS 1011** INTRODUCTION TO ARMY ROTC I LABORATORY (1) LAB. 3. Coreq. MILS 1010. Introduction to the Reserve Officer Training Corps and the US Army.

**MILS 1020** INTRODUCTION TO ARMY ROTC II (1) LEC. 1. Coreq. MILS 1021. Introduction to the Reserve Officer Training Corps and the U.S. Army.

**MILS 1021** INTRODUCTION TO ARMY ROTC II LABORATORY (1) LAB. 3. Coreq. MILS 1020. Introduction to the Reserve Officer Training Corps and the U.S. Army.

**MILS 2010** SELF TEAM DEVELOPMENT (1) LEC. 1. Coreq. MILS 2011. Learn and apply ethics-based leadership skills that develop individual attributes and contribute to effective team building.

**MILS 2011** SELF/TEAM DEVELOPMENT LABORATORY (1) LAB. 2. Coreq. MILS 2010. Learn and apply ethics-based leadership skills that develop individual attributes and contribute to effective team building.

**MILS 2020** INDIVIDUAL/TEAM MILITARY TACTICS (1) LEC. 1. Coreq. MILS 2021. Introduction to individual and team aspects of military training in small unit operations.

**MILS 2021** INDIVIDUAL/TEAM MILITARY TACTICS LABORATORY (1) LAB. 2. Coreq. MILS 2020. Introduction to individual and team aspects of military training in small unit operations.

**MILS 3010** LEADING SMALL ORGANIZATIONS I (2) LEC. 2. Coreq. MILS 3011. Introduction to squad level planning and operations. Admittance into the Advanced Course of Army ROTC.

**MILS 3011** LEADING SMALL ORGANIZATIONS I LABORATORY (1) LAB. 4. Coreq. MILS 3010. Practical application of the foundational skills of small unit leadership. Admittance into Advanced Course Army ROTC.

**MILS 3020** LEADING SMALL ORGANIZATIONS II (2) LEC. 2. Pr. MILS 3010 and MILS 3011. Coreq. MILS 3021. Introduction to platoon-level planning and operations and the U.S. Army Training Management System.

**MILS 3021** LEADING SMALL ORGANIZATIONS II LABORATORY (1) LAB. 4. Pr. MILS 3010 and MILS 3011. Coreq. MILS 3020. Series of practical opportunities to lead small groups, receive performance assessments and coaching, and lead again in situations of increasing complexity.

**MILS 3030** HISTORY OF THE UNITED STATES ARMY (3) LEC. 3. Survey of the history of the United States Army from the colonial era to present.

**MILS 4010** LEADERSHIP CHALLENGES AND GOAL-SETTING (2) LEC. 2. Pr. MILS 3020 and MILS 3021. Coreq. MILS 4011. Plan, conduct and evaluate training and organizational cohesion.

**MILS 4011** LEADERSHIP CHALLENGES AND GOAL-SETTING LABORATORY (1) LAB. 4. Pr. MILS 3020 and MILS 3021. Coreq. MILS 4010. Plan, conduct and evaluate training and activities of the ROTC cadet organization.

**MILS 4020** TRANSITION TO LIEUTENANT I (2) LEC. 2. Pr. MILS 4010 and MILS 4011. Coreq. MILS 4021. Identify and resolve ethical dilemmas. Refine counseling and motivating techniques.

**MILS 4021** TRANSITION TO LIEUTENANT I LABORATORY (1) LAB. 4. Pr. MILS 4010 and MILS 4011. Coreq. MILS 4020. Practical application of the principles taught in MILS 4020.

**MILS 4040** THE ARMY PROFESSION (0) LEC. 1. SU. U.S. Army current trends and affairs. Army policies and programs. Completion of Army ROTC Advanced Course or Early Commissioning Program.

### Naval Science (NROTC) Courses

**NAVS 1010** INTRODUCTION TO NAVAL SCIENCE (3) LEC. 3. Basic areas of Naval Science including uniforms and insignia, military courtesy, discipline, warfare components, organizational structure, and supporting elements of the U.S. Navy and U.S. Marine Corps.
NAVS 1011 NAVAL SCIENCE LABORATORY (0) LAB. 3. SU. Required for commission in Navy/Marine Corps. Includes naval drill, physical fitness and general military instruction.

NAVS 1020 SEAPOWER AND MARITIME AFFAIRS (3) LEC. 3. Introduction to broad principles, concepts and elements of naval history, seapower, and maritime affairs from past to present.

NAVS 1021 NAVAL SCIENCE LABORATORY (0) LAB. 3. SU. Required for commission in Navy/Marine Corps. Includes naval drill, physical fitness and general military leadership instruction. Course may be repeated with change in topics.

NAVS 2010 LEADERSHIP AND MANAGEMENT (3) LEC. 3. Fundamentals of leadership and management theory vital to the effectiveness of Navy/Marine Corps officers.

NAVS 2011 NAVAL SCIENCE LABORATORY (0) LAB. 3. SU. Required for commission in Navy/Marine Corps. Includes naval drill, physical fitness and general military leadership instruction.

NAVS 2021 NAVAL SCIENCE LABORATORY (0) LAB. 3. SU. Required for commission in Navy/Marine Corps. Includes naval drill, physical fitness and general military leadership instruction.

NAVS 2060 NAVIGATION (3) LEC. 3. Theory and principles of piloting involving the use of visual and electronic aids.

NAVS 3011 NAVAL SCIENCE LABORATORY (0) LAB. 3. SU. Required for commission in Navy/Marine Corps. Includes naval drill, physical fitness and general military leadership instruction.

NAVS 3021 NAVAL SCIENCE LABORATORY (0) LAB. 3. SU. Required for commission in Navy/Marine Corps. Includes naval drill, physical fitness and general military leadership instruction.

NAVS 3030 EVOLUTION OF WARFARE (3) LEC. 3. Pr. P/C NAVS 3011 or P/C NAVS 3021. Forms of warfare practices to identify historical continuity and change in the evolution of warfare. Explores the impact of historical precedent, economic factors and technological change on politico-military thought and action.

NAVS 3050 NAVAL SHIP SYSTEMS I (ENGINEERING) (3) LEC. 3. Principles of ship design, construction, and stability. Introduction to thermodynamics and the steam cycle as applied to naval propulsion systems.

NAVS 3060 NAVAL SHIP SYSTEMS II WEAPONS (3) LEC. 3. Theory and employment of systems through a study of fundamental principles of sensor, tracking, computational, and weapons delivery subsystems.

NAVS 4011 NAVAL SCIENCE LABORATORY (0) LAB. 3. SU. Required for commission in Navy/Marine Corps. Includes naval drill, physical fitness and general military leadership instruction.

NAVS 4020 LEADERSHIP AND ETHICS (3) LEC. 3. Pr. NAVS 2010. Departmental approval. Integrates an intellectual exploration of Western moral traditions and ethical philosophy with a variety of topics, such as military leadership, core values, and professional ethics.

NAVS 4021 NAVAL SCIENCE LABORATORY (0) LAB. 3. SU. Required for commission in Navy/Marine Corps. Includes naval drill, physical fitness and general military leadership instruction. Course may be repeated with change in topics.

NAVS 4050 NAVAL OPERATION AND SEAMANSHIP (3) LEC. 3. Inland and International law governing maritime operations, communication procedures, and other naval/maritime operational procedures.

Air Force Aerospace Studies

LIEUTENANT COLONEL KENNETH A. MCDONALD
Commander, AFROTC Det 005
Professor of Aerospace Studies
Auburn University (334) 844-4355
Four-Year Program

The Air Force Reserve Officer Training Corps (ROTC) is an educational program designed to give men and women the opportunity to become an Air Force officer while completing an undergraduate degree. The Air Force ROTC program is designed to teach the necessary skills needed to accept the challenging opportunities encountered in the Air Force. Air Force ROTC offers a pathway from college to many exciting career possibilities as an Air Force officer: flying, engineering, intelligence, computer systems, aircraft maintenance, management, etc. Interested students should contact the Air Force ROTC department (www.auburn.edu/afrotc); det005@maxwell. af.mil; 243 Nichols Center; 334-844-4355).

General Military Course (GMC)

The GMC is the first half of the program and is taken during the freshman and sophomore years. This program allows the student to “try out” Air Force ROTC without obligation (students on an Air Force ROTC scholarship incur an obligation upon the start of their second GMC year). During the first two years, the student will learn basics about the Air Force and the historical development of airpower. GMC students may be eligible to compete for an Air Force ROTC scholarship that pays tuition and fees, and provides both an allowance for books and a non-taxable monthly stipend while school is in session. The classes are one semester hour each. During the spring semester of the sophomore year, the student will compete for the opportunity to attend a four-week Field Training encampment (see Field Training section below for additional information). Successful completion of field training is mandatory for entrance into the Professional Officer Course (POC), the junior and senior years of the program. Qualified students may enroll in both freshman and sophomore classes at the same time and spend only one year in the GMC if they are already in college and need only three more years to graduate.

</tr>
</tbody>
</table>

Professional Officer Course (POC)

The POC is the second half of the program, taken during the junior and senior years. These classes are three semester hours each. POC students take on leadership roles, planning and running most cadet activities. This gives them valuable experience that prepares them to become an officer. Students in selected degree programs (e.g. engineering) may spend a third year in the POC to complete their degree. All POC members receive a monthly stipend, and those with an Air Force ROTC scholarship continue with their benefits (tuition, fees, books allowance). As a junior, the student will learn about various leadership roles and management techniques needed to become an effective Air Force officer. During the senior year, students will learn about foreign policy and national security while preparing them for entrance into active duty.

</tr>
</tbody>
</table>

Leadership Laboratory (LLAB)

Each Air Force ROTC student pursuing a commission in the Air Force is required to attend Leadership Laboratory; students not qualified for or not pursuing a commission may not enroll. Leadership Laboratory consists of a two-hour class, two one-hour periods of Physical training (PT) and up to two additional hours of practical military training each week. Although no academic credit is awarded by the university, LLAB is an essential part of officer training. It is a cadet-centered program where the student will learn such things as military customs and courtesies, drill and ceremonies, and proper wear of uniform, as well as develop their physical fitness. On occasion, the student will have the opportunity to hear guest speakers discuss a variety of interesting and stimulating topics or participate in fun team-building activities such as bowling and paintball.

**Field Training (FT)**

Cadets completing the General Military Course attend four weeks of FT during the summer at Maxwell Air Force Base, Alabama, and Camp Shelby, Mississippi. This rigorous program of leadership training, physical conditioning and academics assesses the cadet's potential to be an Air Force officer. Additionally, cadets also receive survival and firearms training, career information and one or more military aircraft orientation flights. Cadets receive travel pay and a daily allowance for attending FT.

**Air Force ROTC Scholarships**

Air Force ROTC offers scholarships on a competitive basis to high school seniors and college students. These scholarships are offered to highly qualified students, primarily in scientific/technical majors or nursing. Please visit www.afrotc.com (http://www.afrotc.com) for the latest information about scholarships.

**Aerospace Studies Minor**

The Department of Aerospace Studies offers a minor under the following conditions. Fifteen semester hours are required, nine of which must be upper-level. A maximum of six credit hours must be utilized from AIRF 3010, AIRF 3020, AIRF 4010, or AIRF 4020. The remaining nine hours will come from electives determined by the department. See Core Curriculum (p. 111) for limitation.

**Army - Military Science**

The purpose of the Army ROTC program is to select, train, and motivate the future leadership of the active Army, Army National Guard and Army Reserve. The curriculum is available to both men and women and prepares students to become effective leaders and managers in a variety of challenging fields.

The Army ROTC curriculum is divided into two courses: a Basic Military Course open to all students and an Advanced Military Course for qualified juniors, seniors and graduate students. The Basic Military Course serves to acquaint Auburn students with the Army and its role in our society; The Advanced Military Course prepares students for service as commissioned officers. Successful completion of both courses and award of a bachelor’s degree constitute the normal progression to earning a commission as a Second Lieutenant. Students who are undecided about pursuit of a commission may participate in the Basic Military Course. This affords freshman and sophomore students the opportunity to make an informed decision on the advantages of an officer’s commission while incurring no military obligation.

**The Basic Military Course**

The Basic Military Course consists of a four-semester block of instruction normally taken during the freshman and sophomore years. Successful completion of MILS 1010, MILS 1020, MILS 2010, and MILS 2020 with a leadership lab (MILS 1011, MILS 2021, MILS 2011, and MILS 2021) satisfies the academic requirements for progression to the Advanced Military Course. Two credit hours per semester are earned for the lecture and lab. Subject to departmental approval, students may complete all four courses in one academic year.
The basic military science courses provide unique classroom and hands-on instruction in orienteering, small unit tactics, first aid, physical fitness, and leadership skills. They introduce the student to the Army as a profession, lay the foundation of value-based, ethical decision-making, illuminating the Army’s place in society preparing the Cadet for the Advanced Military Course that follows. The Professor of Military Science may admit the student to the Advanced Military Course upon completion of these courses and labs. Contracted Cadets currently receive a tax-free allowance of $420 per month while enrolled.

Courses are offered in the fall and spring semesters and credits earned may be applied as elective credits toward degree requirements in all schools of the university.

**Basic Camp – Cadet Summer Training (CST)**

Students who are unable to complete the Basic Military Course during their freshman and sophomore years may qualify for admission to the Advanced Course by successfully completing Basic Camp at Fort Knox, Kentucky.

Basic Camp consists of approximately five weeks of training conducted during the summer months. Students desiring to exercise this option are required to submit a formal application and pass a general medical physical and the Army Physical Fitness Test (APFT). Students who participate in the Basic Camp will receive approximately $900 in addition to travel expenses to and from Fort Knox. Uniforms, housing, medical care and meals are furnished by the Cadet Command during training.

Interested students are strongly encouraged to enroll in a military science course and leadership lab during the spring semester of their sophomore year. Deadline for application is May 15. All applicants must contact the Military Science Department no later than May 1.

**The Advanced Military Course**

Successful completion of the Basic Military Course or approved alternative training, a minimum 2.0 grade-point average, and medical qualifications are pre-requisites for enrollment in the Advanced Military Course. Service veterans, transfer students from junior or military colleges, members of the National Guard or Army Reserve, and former military academy Cadets may qualify for direct entry into the Advanced Military Course two academic years before their projected graduation.

The Advanced Military Course is designed to develop a Cadet’s leadership and management potential, physical stamina, Army Values, as well as the character traits desired of an Army officer. The program’s objective is to produce the highest caliber junior officer, fully capable of accepting command in the modern Army, exercising management responsibilities and serving the broader community.

The Advanced Military Course consists of a four-semester block of instruction taken during the junior and senior years (MILS 3010, MILS 3020, MILS 4010, and MILS 4020). Successful completion of the courses, with a leadership lab (MILS 3011, MILS 3021, MILS 4011, and MILS 4021) each semester fulfills military science academic requirements for award of an officer’s commission. Three credit hours per semester are earned for the lecture and laboratory. Cadets currently receive a tax-free allowance of $420 per month while enrolled.

Students enrolled in the Advanced Military Course are required to successfully complete approximately five weeks of leadership training at Fort Knox, Kentucky, during the summer to become eligible for commissioning. Attendance at Advanced Camp normally occurs in the summer following the junior year. The purpose of the course is to provide each Cadet hands-on experience in leadership development as well as extensive training in military tactics, techniques and related subjects vital to success as a junior officer. Cadets attending the Advanced Camp receive approximately $900 in addition to travel expenses to and from Fort Knox. Uniforms, housing, medical care and meals are furnished by the government during the training.

Additional voluntary training at one or more of a variety of active Army service schools is available to select Cadets each summer. Students may apply for attendance at Airborne School, Air Assault School, The Northern Warfare Training Center and Cadet Troop Leadership Training. Students who successfully complete the appropriate course are authorized to wear the Parachutist, Air Assault or other applicable skill badge.

Students who successfully complete the Army ROTC curriculum, and earn a bachelor’s degree, serve on active duty or with the Army National Guard or Army Reserve. Active duty is for a period of three or four years with the opportunity for qualified officers to apply for extended service. Current salary and allowances for a Second Lieutenant exceed $45,000. Medical and other benefits are also provided at no cost.

**Professional Military Education Requirements**

All Army ROTC cadets seeking a commission are required to pass a Written Communication Skills course (currently fulfilled by the University Core Curriculum) and History of the US Army (MILS 3030). An alternate military history course may be substituted with the approval of the Professor of Military Science.
Simultaneous Membership Program
Second, third- and fourth-year students are eligible to participate in the Simultaneous Membership Program with the Army National Guard or Army Reserve. Cadets who participate in this program affiliate with an Army unit, thus affording them the opportunity for enhanced leadership development. Students in this program receive a monthly salary, additional tax-free benefits and GI Bill educational benefits (if otherwise qualified).

Military Science Minor
The Department of Military Science offers a minor under the following conditions. Seventeen semester hours in Military Science [MILS] are required, including 12 at the 3000/4000-level, and a three-hour 3000-level Military History course and a two-hour PHED 1263, Military Fitness for everyone.

Scholarship Programs
Each year the Army offers a limited number of four-year, three-year and two-year scholarships to those young men and women who have demonstrated outstanding scholastic, athletic and leadership potential. Scholarships are available on a campus competitive basis and pay most or all of the cost of tuition and fees for both resident and non-resident students or they can opt for a room and board scholarship of $10,000 per year ($5,000 per semester). Additionally, scholarship students receive a book stipend of $600 per semester and the $420 per month tax-free allowance.

POC is the Admissions and Scholarship Officer, 334-844-5641/4305.

Naval Science
CAPTAIN MATTHEW P. ROBERTS
Commanding Officer and Professor of Naval Science

The mission of the Naval Reserve Officer Training Corps is to develop NROTC students mentally, morally, and physically and to imbue them with the highest ideals of duty, honor, and loyalty; to commission college graduates as naval officers who possess a basic professional background, are motivated toward careers in the naval service, and have a potential for future development in mind and character so as to assume the highest responsibilities of command, citizenship, and government. All NROTC programs are open to qualified applicants. All Naval Science courses of one or more credits are open to all Auburn students regardless of affiliation with the NROTC Program.

To be eligible for enrollment as a midshipman, an applicant must be a United States citizen; have no moral obligations or personal convictions that will prevent bearing of arms, and supporting and defending the Constitution of the United States against all enemies, foreign and domestic; meet age requirements of at least 17 years on or before 1 September of the year of enrollment and less than 27 years on 30 June of the year an applicant expects to graduate; meet physical requirements for the NROTC Program; and be accepted for admission as a full-time student at Auburn University. Applicants with prior or current active duty in the U.S. Armed Forces may be granted age waivers equal to the number of months served, not to exceed 36 months. Those granted the maximum age waiver must be less than 30 years of age on 30 June of the year they expect to graduate.

NROTC Programs
Four-Year NROTC Navy-Marine Corps Scholarship

Entrance into the Navy-Marine Corps Scholarship Program is via nationwide competition. Applicants typically apply during their senior year of high school, but anyone who meets eligibility requirements and has completed less than 30 semester hours of college credit may apply. Qualifications for enrollment, applications, and information bulletins are available at https://www.nrotc.navy.mil, high schools, colleges, recruiting stations, and the Auburn NROTC Unit, located on the second floor of W. F. Nichols Center. The Department of the Navy pays tuition, fees, $375 per semester for textbooks, and provides a monthly stipend. Freshmen on scholarship receive $250, sophomores $300, juniors $350, and seniors $400 per month. Active duty pay for summer training is approximately $560 per month with living quarters and meals provided. The NROTC program divides degrees into three Tiers with Tier I containing engineering majors, Tier II remaining technical majors and Tier III liberal arts (for a complete list, see the Auburn NROTC home page. Tiers do not apply to Marine Options). Although the program emphasizes engineering and science majors, students may enroll in any Auburn University major leading to a baccalaureate degree. In addition to the requirements of their major, scholarship students must complete 24 semester hours (21 for Marine Options) of Naval Science courses, calculus I and II (Navy option only), calculus-based physics I and II (Navy option only), a military history/national security policy course and a world cultures course. Summer activities include two at-sea training cruises and one summer period of career orientation lasting approximately four weeks. Marine Option
students participate in a six-week office candidates school, in Quantico, VA in lieu of the second at-sea training cruise. Successful completion of the ROTC program leads to a commission as an Ensign, U.S. Navy, or Second Lieutenant, U.S. Marine Corps.

**College Program**

The College Program is a non-scholarship option that offers a two, three, or four year program. There is no calculus or physics requirement and no preference for technical majors. Interested students should apply directly to the Auburn NROTC Unit during their senior year of high school for the four year program. Those already at Auburn should apply the spring of their freshman year for the three-year program or the spring of their sophomore year for the two-year program (two year not available for Marine options). The program pays for uniforms and instructional fees for Naval Science courses. College Program students selected for advanced standing prior to their junior year receive a stipend for a maximum of 20 months. Advance standing is only available starting the junior year of college. Stipend per academic month is $350 junior year and $400 senior year. College Program students will complete Naval Science and other university courses, a few specific university courses, and attend one summer training session at sea for Navy Option midshipmen or Quantico, VA, for Marine Option midshipmen. Upon graduation, College Program midshipmen may be commissioned Ensigns, U.S. Navy, or Second Lieutenants, U.S. Marine Corps.

Uniforms, Naval Science textbooks, and equipment necessary for the NROTC Program are furnished in all programs.

**Active Duty Service Requirements upon Graduation**

Active duty service requirements for scholarship midshipmen vary depending on the warfare area they enter. The basic requirement is eight years, five of which must be on active duty. The remaining three years may be completed on active duty or in the reserves. Specific requirements per warfare community are as follows:

- Surface and Submarine Warfare - 8 years total, at least 5 on active duty
- Naval Aviator (Navy and Marine pilot) - 8 years active duty after qualification as a Naval Aviator
- Naval Flight Officer (Navy and Marine non-pilot aviators) - 6 years active duty after qualification as a Naval Flight Officer
- Marines and Nurse Corps - 8 years total, at least 4 on active duty

**Curriculum**

The Naval Science curriculum consists of one 3-credit class per semester for eight semesters. In addition, all NROTC students attend two 0-credit Naval Science laboratory class periods and two one-hour physical training sessions per week. Naval Science subjects are listed in this Bulletin. Naval Science course hours are considered part of the normal load, which is defined as 15 to 18 credits per semester. Six hours of Naval Science may be used as electives in any major.

**Naval Science Minor**

The Department of Naval Science offers a minor to any student, regardless of NROTC affiliation, who completes 15 semester hours of Naval Science, nine semester hours must be courses numbered 3000 or above. The following courses qualify:

<table>

WOLTER, JEREMY, Associate Professor, 2013, PhD MS Florida State, BS Central Florida (MKTG)

*WOOD, MATTHEW P., Associate Professor, 2007, DMA Texas, MM BM Missouri (MUSI)

*WOODS, FLOYD M., Associate Professor, 1990, PhD Mississippi State, MS Cornell, BS Tuskegee (HORT)

WOODS, LAUREN, Assistant Professor (ARTS)

WOODS-GROVES, SUZANNE, Assistant Professor (SERC)

*WOOLDRIDGE, ANNE A., Associate Professor, 2007, PHD Duke University, MS Louisiana State University, DVM BS Texas AM University (VMCS)

*WOOTEN, MICHAEL C., Professor, 1986, PhD North Texas State, MS BS Memphis State (BIOL)

WOROSZ, MICHELLE, Professor, 2006, PhD MS BS, Michigan State (AGEC)

*WORTHINGTON, DEBRA L., Associate Professor and Associate Director for Communication, 1999, PhD, University of Kansas; MA, Wichita Sate; BA, Auburn University (CMJN)

*WOWER, JACEK, Professor, 1997, MS PhD Mickiewicz (ANSC)

*WRIGHT, RUSSELL A., Associate Professor and Extension Specialist, 1997, PhD Wisconsin, MS North Carolina State, BA North Carolina (FISH)

*WRIGHT, AMY NOELLE, Professor Associate Dean of Instruction, 2002, PhD North Carolina State, MS BS Virginia Tech. (HORT)

*WRIGHT, BRAD, Associate Clinical Professor, 2008, PharmD Auburn (PYPP)

WYSOCKA-DILLER, JOANNA, Associate Professor, 2000, PhD MA Columbia BS Hunter (BIOL)
X
XU, PEI, Assistant Professor (SCMN)

Y
YAMPOLSKII, MARK, Associate Professor (COMP)
YANKE, AMY B., Assistant Professor (VMCS)
*YILMAZ, LEVENT, Professor, 2003, PhD MS Virginia Tech, BS Bilkent University (COMP)
YNGARD, RIA, Senior Lecturer (CHEM)
*YORDY, MORGAN, Assistant Professor, 2016, DNP - USA, MSN - USA, BSN - USA (NURS)
*YOST, KEVEN E., Associate Professor, 2003, PhD Purdue, BA Florida (FINC)
YOUNG, ANDREW, Lecturer (CMJN)
YOUNG, KELLEY, Instructor (CMJN)
*YOUNGBLOOD, ED, Associate Professor, 2008, PhD, Texas Tech; MA, Texas State; BA, Southwestern (CMJN)
YOUNGBLOOD, SUSAN, Associate Professor, 2008, PhD Texas Tech, BA Massachusetts-Lowell (ENGL)

Z
ZABALA, MICHAEL, Assistant Professor (MECH)
ZACHARY, MILES, Assistant Professor (MNGT)
*ZALIK, RICHARD A., Professor, 1985, DSc Technion, Lic Buenos Aires (MATH)
*ZANZOT, JOCELYN, Assistant Professor, 1989, March MLA Pennsylvania, BS SUNY (ARDC)
ZANZOT, JAMES, Lecturer (BIOL)
*ZENG, PENG, Associate Professor, 2010, PhD MS BS Purdue (MATH)
*ZHAN, WEI, Associate Professor, 2006, PhD Texas A M, MS Chinese Academy of Sciences, BS Lanzhou China (CHEM)
*ZHANG, DAOWEI, Alumni and George Peake Professor, 1994, PhD British Columbia, MS Beijing Forestry, BS South-Central Forestry (FOWS)
*ZHANG, YAOQI, Professor, 2003, PhD Helsinki, MS Chinese Academy of Forestry, BS Fujian Agric. and Forestry (FOWS)
ZHANG, XINYU, Associate Professor, 2005, PhD University of Texas Dallas, ME Tianjin University, BE Tianjin University (PFEN)
ZHANG, XINYU, Associate Professor (CHEN)
*ZHAO, DONGYE, Elton Z. and Lois G. Huff Professor, 2001, PhD Lehigh University, MS BS Taiyuan University of Technology (CIVL)
ZHENG, JINGYI, Assistant Professor (MATH)
*ZHONG, JUMING, Professor, 2001, PhD Missouri, DVM Southwest Chengdu P.R. China (VMAP)
ZHONG, MIN, Lecturer (BIOL)
*ZOU, HUAGUO, Professor, 2013 (CIVL)
ZOU, YANG, Assistant Professor (COMP)
ZIEBARTH, NICOLAS, Associate Professor (ECON)
ZOHDY, SARAH, Assistant Professor (FOWS)
ZORN, MICHELLE, Associate Professor (MNGT)

ZOU, HAIBO, Professor, 2008, PhD Florida State, MS BS Nanjing (GEOL)

*ZUGAZAGA, CAROLE, Associate Professor and Chair, 2002, PhD MSW Central Florida, BSW Florida State (SOCY)

*ZUWIYYA, ZACHARY D., Professor, 1997, Ph.D. University of California, Santa Barbara (FLNG)

*ZYLLA-JONES, ELIZABETH, Clinical Professor, 1991, MS Purdue, BA Pacific (CMDS)
Undergraduate Majors

• College of Agriculture (p. 25)
• College of Architecture, Design, and Construction (p. 26)
• Raymond J. Harbert College of Business (p. 26)
• College of Education (p. 26)
• Samuel Ginn College of Engineering (p. 27)
• School of Forestry and Wildlife Sciences (p. 27)
• College of Human Sciences (p. 27)
• College of Liberal Arts (p. 28)
• School of Nursing (p. 29)
• School of Pharmacy (p. 1140)
• College of Sciences and Mathematics (p. 29)
• College of Veterinary Medicine (p. 1312)

College of Agriculture
• Agricultural Business & Economics (p. 211)
• Agricultural Communications (p. 284)
• Agricultural Science (p. 268)
• Crop and Soil Sciences - Science Option (p. 221)
• Crop and Soil Sciences - Production Option (p. 219)
• Crop and Soil Sciences - Turfgrass Option (p. 223)
• Crop and Soil Sciences - Soil, Water and Land Use Option (p. 222)
• Animal Sciences - Equine Science Option (p. 234)
• Animal Sciences - Meat Science Option (p. 235)
• Animal Sciences - Pre-Professional Option (p. 236)
• Animal Sciences - Animal and Allied Industries Option (p. 232)
• Applied Biotechnology (p. 252)
• Biological and Agricultural Technology Management (p. 244)
• Biosystems Engineering (p. 632)
• Biosystems Engineering (Bioprocess Engineering option) (p. 629)
• Biosystems Engineering (Ecological Engineering option) (p. 633)
• Biosystems Engineering (Forest Engineering option) (p. 630)
• Environmental Science (p. 225)
• Fisheries, Aquaculture, and Aquatic Sciences - Pre-Professional Medicine Option (p. 261)
• Fisheries, Aquaculture and Aquatic Sciences - Fisheries and Aquaculture Option (p. 262)
• Fisheries, Aquaculture and Aquatic Sciences - Marine Resources Option (p. 263)
• Food Science (p. 286)
• Horticulture - Fruit and Vegetable Production Emphasis (p. 270)
• Horticulture - Landscape Horticulture Emphasis (p. 271)
• Horticulture - Nursery and Greenhouse Science Emphasis (p. 273)
• Horticulture - Pre-Landscape Architecture Emphasis (p. 274)
• Poultry Science - Poultry Production (p. 281)
• Poultry Science - Poultry Science/Pre-Veterinary Medicine (p. 283)

College of Architecture, Design, and Construction

• Architecture
  • Architecture (Foundation Unit) (p. 337)
  • Architecture (Summer Design) (p. 338)
• Interior Architecture
  • Architecture/Interior Architecture (Foundation Unit) (p. 340)
  • Architecture/Interior Architecture (Summer Design) (p. 342)
• Building Science (p. 323)
• Environmental Design (p. 344)
• Environmental Design - Pre-Landscape Architecture (p. 346)
• Graphic Design (p. 314)
• Industrial Design (p. 315)
• Post-Baccalaureate Bachelor Science in Industrial Design Studies (p. 316)

Raymond J. Harbert College of Business

• Accountancy - On-Campus Option for First Degree Candidates (p. 376)
• Accountancy - Online Option for Second Degree Candidates (p. 375)
• Business Administration / Business Administration Online Degree Completer Program (p. 388)
• Business Analytics (p. 405)
• Finance (p. 381)
• Information Systems Management (p. 406)
• Management (p. 389)
• Marketing (p. 394)
• Supply Chain Management (p. 407)

College of Education

• Agriscience Education (p. 480)
• Business and Marketing Education (p. 481)
• Chemistry Education (p. 483)
• Collaborative Teacher Education, K-12 (p. 544)
• French Education (p. 489)
• German Education (p. 490)
• Spanish Education (p. 491)
• Early Childhood Education (p. 484)
• Early Childhood/Elementary Special Education, P-6 (p. 545)
• Elementary Education (p. 485)
• English Language Arts Education/English (p. 487)
• Exercise Science (p. 523)
• Fitness, Conditioning and Performance (p. 524)
• General Science Education (p. 492)
• General Social Science Education/History (p. 494)
• Mathematics Education (p. 495)
• Music Education/Instrumental and Vocal (p. 496)
• Physical Education/Teacher Education (p. 498)
• Physical Activity and Health (p. 526)
• Physics Education (p. 499)
• Rehabilitation and Disability Studies (p. 546)

**Samuel Ginn College of Engineering**

• Aerospace Engineering (p. 621)
• Biosystems Engineering (p. 632)
• Biosystems Engineering (Bioprocess Engineering option) (p. 629)
• Biosystems Engineering (Ecological Engineering option) (p. 633)
• Biosystems Engineering (Forest Engineering option) (p. 630)
• Chemical Engineering (p. 642)
• Civil Engineering (p. 659)
• Computer Engineering (p. 684)
• Computer Science (p. 672)
• Computer Science (online) (p. 670)
• Electrical Engineering (p. 685)
• Industrial and Systems Engineering (p. 696)
• Materials Engineering (p. 709)
• Mechanical Engineering (p. 710)
• Software Engineering (p. 673)
• Wireless Engineering (Hardware Option) (p. 686)
• Wireless Engineering (Software Option) (p. 687)

**School of Forestry and Wildlife Sciences**

• Forestry (p. 734)
• Geospatial and Environmental Informatics (p. 736)
• Natural Resources Management (p. 737)
• Sustainable Biomaterials and Packaging (p. 739)
• Wildlife Ecology and Management (p. 740)
• Wildlife Enterprise Management (p. 742)
• Wildlife Sciences, Pre-Veterinary Medicine Concentration (p. 743)

**College of Human Sciences**

• Apparel Merchandising, Design and Production Management (Apparel Merchandising Option) (p. 776)
• Apparel Merchandising, Design and Production Management (Apparel Design and Production Management Option) (p. 778)
• Consumer and Design Sciences, ABM (p. 779)
• Global Studies in Human Sciences (p. 811)
• Hospitality Management - Hotel and Restaurant Management Option (p. 804)
• Hospitality Management - Event Management Option (p. 810)
• Hospitality Management- Culinary Science Option (p. 808)  (http://bulletin.auburn.edu/undergraduate/majors/undergraduate/collegeofhuman sciences/departmentofnutritiondieteticsandhospitalitymanagement/hospitalitymanagementculinaryoption_major/)
• Human Development and Family Studies (p. 789)
• Human Development and Family Studies Option in Child Life (p. 792)
• Human Development and Family Studies Option in Early Child Development (p. 793)
• Interior Design (p. 780)
• Nutrition, ABM (p. 803)
• Nutrition (Nutrition/Dietetics Option) (p. 806)
• Nutrition (Nutrition Science Option) (p. 805)
• Nutrition (Wellness Option) (p. 807)
• Philanthropy and Non-Profit Studies (p. 782)

College of Liberal Arts

• Anthropology (p. 1077)
• Art (p. 933)
• Art History (p. 935)
• Art-Studio/Fine Arts (p. 936)
• Aviation Management (p. 947)
• Communication (p. 1118)
• Communication Disorders (p. 954)
• Economics - Primary Track (p. 960)
• Economics - Quantitative Track (p. 962)
• English - Creative Writing (p. 970)
• English - Professional and Public Writing (p. 973)
• English - Literature (p. 972)
• French (p. 991)
• French International Trade (p. 992)
• German (p. 993)
• German International Trade (p. 994)
• Health Services Administration (p. 1053)
• History (p. 1011)
• Interdisciplinary University Studies (p. 1127)
• International Studies (p. 999)
• Journalism (p. 1119)
• Law and Justice (p. 1055)
• Media Studies (p. 1120)
• Media Studies - Visual Media Option (p. 1122)
• Music (p. 1029)
• Music Performance - Instrumental (p. 1030)
• Music Performance - Piano (p. 1031)
• Music Performance - Voice (p. 1033)
• Music Performance - Composition and Technology (p. 1035)
• Neuroscience (p. 1067)
• Philosophy (p. 1040)
• Political Science (p. 1056)
• Professional Flight (p. 948)
• Public Administration (p. 1057)
• Public Relations (p. 1123)
• Psychology (p. 1066)
• Spanish (p. 995)
• Spanish International Trade (p. 996)
• Social Work (p. 1078)
• Sociology (p. 1079)
• Theatre (p. 1088)
• Theatre - Design / Technology (p. 1089)
• Theatre - Management (p. 1090)
• Theatre - Music Theatre (p. 1092)
• Theatre - Performance (p. 1093)

School of Nursing
• Nursing - Traditional (p. 1137)
• RN - BSN (p. 1139)

College of Sciences and Mathematics
• Applied Mathematics (p. 1288)
• Applied Mathematics - Actuarial Science Option (p. 1286)
• Applied Mathematics - Applied Discrete Mathematics Option (p. 1287)
• BA Chemistry (p. 1247)
• BA Chemistry - Pre-professional concentration in:
  • Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1245)
• BS Chemistry (p. 1249)
• Biochemistry (p. 1246)
• Biomedical Sciences - Pre-professional concentrations in:
  • Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1299)
  • Pre-Pharmacy (p. 1301)
  • Pre-Physical Therapy, Pre-Physician Assistant (p. 1302)
• Geography (p. 1261)
• Geology (p. 1262)
• Geology - Earth System Science Option (p. 1264)
• Laboratory Sciences (p. 1250)
• Marine Biology (p. 1226)
• Mathematics (p. 1285)
• Medical Laboratory Sciences (p. 1251)
• Microbial, Cellular and Molecular Biology Microbiology Option (MCMB) (p. 1234)
• Microbial, Cellular and Molecular Biology Cell & Molecular Biology Option (MCCM) (p. 1233)
• Microbiology - pre-professional concentrations in:
  • Pre-Medical, Pre-Dental, Pre-Optometry (p. 1231)
  • Pre-Physical Therapy, Pre-Physician Assistant (p. 1232)
  • Pre-Veterinary (p. 1304)
• Organismal Biology - Conservation & Biodiversity Option (p. 1237)
• Organismal Biology - Ecology, Evolution & Behavior Option (p. 1235)
• Organismal Biology - Integrative Biology Option (p. 1227)
• Organismal Biology - pre-professional concentrations in:
  • Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1228)
  • Pre-Physical Therapy, Pre-Physician Assistant (p. 1230)
  • Pre-Veterinary Medicine (p. 1307)
• Physics (p. 1293)
• Physics - pre-professional concentrations in:
  • Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1294)
  • Pre-Physical Therapy, Pre-Physician Assistant (p. 1295)
• A (p. 30)
• B (p. 30)
• C (p. 31)
• D
• E (p. 31)
• Accountancy (p. 376)
• Aerospace Engineering (p. 621)
• Agricultural Business & Economics (p. 211)
• Agricultural Communications (p. 284)
• Agricultural Science (p. 268)
• Agriscience Education (p. 480)
• Animal Sciences - Equine Science Option (p. 234)
• Animal Sciences - Meat Science Option (p. 235)
• Animal Sciences - Pre-Professional Option (p. 236)
• Animal Sciences - Animal and Allied Industries Option (p. 232)
• Anthropology (p. 1077)
• Applied Biotechnology (p. 252)
• Applied Discrete Mathematics (p. 1287)
• Applied Mathematics (p. 1288)
• Apparel Merchandising, Design and Production Management (Apparel Merchandising Option) (p. 776)
• Apparel Merchandising, Design and Production Management (Product Design and Production Management Option) (p. 778)
• Architecture (Foundation Unit) (p. 337)
• Architecture (Summer Design) (p. 338)
• Architecture/Interior Architecture (Foundation Unit) (p. 340)
• Architecture/Interior Architecture (Summer Design) (p. 342)

- Application for Admission
- Admission of Transient Graduate Students
- Conditional Admission
- McNair Scholars
- Active Military Personnel
- Correspondence Work Unacceptable
- Student Classifications
- Master's Accelerator Program

Admission Requirements

Departments make admissions decisions based on the compatibility of the applicant’s goals with departmental resources, the availability of spaces for new students, and a holistic evaluation of the applicant’s potential for success in the program. Other considerations might typically include standardized test scores, grades and/or GPAs, letters of recommendation, writing samples, research or applied experience, and interviews.

To be considered for admission, the applicant must satisfy the following requirements:

1. The applicant must hold a bachelor’s degree from an accredited U.S. institution or provide proof of equivalent training from a recognized academic institution outside the United States. Equivalency is determined by international evaluators in the Graduate School.
2. The applicant must be in good standing at the institution last attended.
3. The applicant must submit standardized examination scores (GRE, GMAT, TOEFL, and/or IELTS) if required for application to the degree program. Applicants with an earned doctorate (Professional, EdD, PhD) from an accredited institution whose instruction is in English may be exempted from this requirement.
4. The successful applicant normally will meet one of the following: a) a GPA of at least 2.75 on all undergraduate course work at an accredited United States institution in fulfillment of the requirements for a baccalaureate degree; b) a GPA of at least 3.0 on all graduate course work at an accredited United States institution in fulfillment of the requirements for a graduate degree; or c) an acceptable GRE or GMAT score as determined by the program to which the applicant applies.
5. Applicants whose native language is not English must submit: 1) TOEFL scores of at least 550 on the written test (213 on the computer-based test); 2) 79 on the Internet Based Test with at least 16 in each section; 3) IELTS overall band score of at least 6.5; or 4) demonstrate English proficiency during an oral examination (interview) satisfactory to the examining committee and approved by the graduate dean.
6. The applicant must be recommended for admission by the graduate faculty in the applicant’s area of study. Departments may (and frequently do) establish higher standards than those described here, and may require that applicants submit additional materials. Applicants should contact the department to which they seek admission for information about additional requirements.
7. The applicant must disclose all institutions beyond secondary school, including Auburn University, which the applicant has previously attended; similarly, all course work and/or degrees must be disclosed. Withholding information requested on the application for admission, including attendance at any other institution, or giving false information, may make the applicant ineligible for admission to the university or subject to dismissal.

Final evaluation of application files will not occur until all of the above requirements have been met. Applicants will be notified by the dean of the Graduate School when an admissions decision has been made. Some departments, operating with a limited number of spaces for students each year, make final decisions for the fall semester in early spring.

Policies and Procedures for Admissions

Auburn University is an equal-opportunity educational institution, and as a matter of policy, does not discriminate in its admissions policy on the basis of race, color, sex, religion, disability, sexual orientation, age, or national origin. Applications for resident and non-resident students are accepted for all curricula; however, the number of students and academic credentials of the applicants accepted for admission are determined by the availability of facilities and faculty.
Admission of Transfer Students
Transfer applicants must provide official transcripts (not duplicated or faxed copies) from each college attended, including any at which the applicant enrolled while in high school. A minimum 3.00 cumulative GPA on a 4.0 scale on all college work attempted and eligibility to re-enter the institution last attended are required to be considered for transfer admission.

Application for Admission
To apply for graduate study, submit to the Office of Graduate Admissions:

1. A formal application. Applications for admission are submitted online at www.grad.auburn.edu. Domestic applications must be accompanied by a fee of $60; international applications must be accompanied by a fee of $70. These fees may be paid online via credit card.

2. Unofficial transcript(s) from all institutions that were attended. If admitted to a program, applicants will be required to submit a final official transcript from each institution, sent directly from the institution(s), prior to registration. Official transcripts may be sent at any time but will be required before registration. An applicant who, because of current enrollment, cannot provide final transcripts at the time of application, should submit the incomplete transcripts from the current institution. Applicants do not need to provide transcripts for credits earned at Auburn University.

3. Standardized Graduate Record Examinations (GRE) general test scores are required for admission in all departments except the following: Clinical Mental Health Counseling; Industrial Design; Integrated Design and Construction; Landscape Architecture; Nursing; School Counseling; and Real Estate Development. The Physicians MBA program and the Executive MBA program do not require any standardized test for admission. The following programs require the Graduate Management Admissions Test (GMAT): Accountancy; Aviation and Supply Chain Management; Finance; and MBA. The following programs require the GRE or the GMAT: Hospitality Management and Management (GMAT preferred). The master of business administration program will allow the substitution of the GRE for the GMAT under some circumstances. International applicants must also submit Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores. Applications and dates for these tests may be obtained at many colleges and universities; by writing the Educational Testing Service, P.O. Box 6000, Princeton, NJ 08541-6000; by telephoning (609) 771-7670 for the GRE, (609) 771-7330 for the GMAT, or (609) 771-7100 for the TOEFL; or by accessing the Educational Testing Service website at www.ets.org.

4. Additional Materials. Academic programs typically require additional materials to evaluate an applicant’s potential for graduate study. Prospective students must also contact the department in which they wish to study to obtain information regarding additional admission requirements, such as writing samples and letters of recommendation. With the exception of the application, official transcripts, and standardized test scores, which should be sent to the Graduate School, materials requested by programs should be sent directly to the academic department.

Admission to any graduate degree program is granted by the dean of the Graduate School upon the recommendation of the department of proposed study. Applications and all other relevant material must be received by the Graduate School at least 45 days before the first day of class of the semester in which the student wishes to begin graduate study. International applicants should submit all required materials at least 90 days before the first day of class of the semester in which the student wishes to begin graduate study. However, most academic units make admission decisions several months in advance. Thus, applicants should check with the department to which they seek admission to determine when materials should be submitted. Approval is valid for a maximum of 12 months beyond the beyond the entrance date given on the application, with the approval of the program admitting the student. If the student does not register during this period, a new request for approval must be submitted. Application materials become the property of Auburn University and may not be returned to the applicant or forwarded to other institutions.

Admission of Transient Graduate Students
A graduate student in good standing in an accredited college or university may be admitted as a transient when faculty and facilities are available. To be eligible, the student must submit a special Graduate Transient Form prior to the beginning of the semester for which transient status is requested. The form, available from the Graduate School or on the Web at www.grad.auburn.edu, must bear the signature of the student’s department head and graduate dean or his/her designee. Transient status is granted for one semester only and does not constitute admission or matriculation as a degree candidate.

Provisional Admission
First-time applicants to Auburn University’s Graduate School who hold the bachelor’s degree from an accredited U.S. institution (or who provide proof of equivalent training from a recognized academic institution outside the United States) and who are otherwise academically qualified but who do not meet certain other requirements for admission may be admitted on a provisional basis.
These other requirements include but are not limited to the following: 1) scores above the minimum required on standardized tests of English language proficiency, 2) scores above the minimum required on the GRE or GMAT, or 3) the submission of official documentation (e.g., transcripts).

Departments may set higher standards or may not consider students for provisional admission.

International students whose English language proficiency is marginally below the Graduate School’s required levels are required to enroll in Auburn University’s Auburn Global program and satisfy proficiency requirements before enrolling in graduate-level course work.

Other students who are admitted on a provisional basis are given an opportunity to demonstrate that they can perform graduate-level work and can be expected to make reasonable progress toward earning a graduate degree. They may also be required to remedy deficiencies in undergraduate preparation by taking upper-division courses.

Provisionally admitted students must demonstrate their ability to perform at the graduate level by obtaining a “B” grade point average (3.0 on a 4.0 scale) in their first 12 semester hours of graduate-level work. These 12 semester hours must be completed within the first three consecutive semesters following admission.

Students admitted on a provisional basis will be fully admitted to the Graduate School only when all conditions for admission have been met, including the completion of at least 12 semester hours of approved graduate-level courses at Auburn University with a grade point average of at least 3.0.

Students admitted provisionally who fail to satisfy all conditions for admission within the allotted time period will be dismissed from the Graduate School.

**McNair Scholars**

The Graduate School recognizes the achievement of students who have successfully completed a Ronald E. McNair Postbaccalaureate Achievement Program by waiving the Graduate School application fee. A letter confirming participation in the program is required.

**Active Military Personnel**

The Graduate School recognizes the contributions of students actively serving in the United States military by waiving the Graduate School application fee. A letter confirming active duty status is required.

**Correspondence Work Unacceptable**

Study by correspondence shall not be counted toward a graduate degree.

**Student Classifications**

For administrative purposes, Auburn University students are assigned to a class level. Those that apply to graduate students are:

- **MST** - Students who hold full admission to Master’s programs.
- **EDS** - Students who hold full admission to Specialist in Education programs.
- **PHD** - Students who hold full admission to Doctor of Philosophy programs.
- **GCRT** – Students admitted to an approved Graduate Certificate program.
- **GND** – Students who hold a Bachelor’s degree (or post-baccalaureate degree) may apply for admission to the Graduate School as a non-degree student for personal development, to obtain or renew certification, or to take a limited number of courses preliminary to enrolling in a graduate degree program. No more than 12 hours of credit earned while enrolled as a non-degree student may later be counted toward a graduate degree; however, students officially enrolled in an approved graduate certificate program may count up to the maximum number of credit hours allowed by the certificate program toward a graduate degree. Non-degree students who later decide to pursue a graduate degree must re-apply for admission to the Graduate School and the graduate degree program.
- **GPR** – Students who meet requirements for provisional admission except that they have not taken the GRE or GMAT (if required by the admitting program) or have not submitted all transcripts. This classification is for one semester only, and satisfactory scores and/or all transcripts must be submitted by the end of that semester. This classification cannot be used by international students, who must submit official transcripts and satisfactory scores on all required examinations before they are admitted.
**Master’s Accelerator Program**

The Master’s Accelerator Program (MAP) eases the transition from a bachelor’s degree in your home country to graduate school in the U.S. It provides three simple routes to enter your graduate program at Auburn. MAP combines credit-bearing courses from your master’s degree with additional support, teaching, and cultural experiences, helping to ensure your future success. All MAP students complete a comprehensive series of English language, research, and professional development modules (the Professional Development Suite), and a series of credit-bearing graduate courses (the Academic Suite) prior to transferring into their intended degree program.

Auburn Global offers four ways for international students to enter their graduate program. The entry path that is best for you will depend on your qualifications and personal preferences. Choose from the Integrated Master’s Accelerator, the Master’s Accelerator (one term) or Master’s Accelerator (two or three terms). For more details on these options see: http://www.auburnglobal.org/about-map. Students in the Master’s Accelerator Program are enrolled in a minimum of 14 clock hours in Fall and Spring semesters, and 9 clock hours in summer.

Auburn offers 23 graduate programs through the Master’s Accelerator Program, in engineering, education, mathematics, and public administration, and community planning.

MAP students take a core curriculum* and credit bearing courses from their chosen master’s degree.

Registration

- Leave of Absence
- Withdrawing from Courses
- Continuous Enrollment Policy
- Exceptions to the Continuous Enrollment Policy
- Inactive Status
- Non-Graduate Students and Graduate Work
- Non-Graduate Students Enrolled in Accelerated Bachelor’s/Master’s Degree Plans or in the Honors College
- Registration and Graduation Requirements
- Transfer of Credit from Other Institutions
- Transfer to a Different Degree Program
- Undergraduate Courses, S/U Option and Auditing Courses

Leave of Absence

A student may be granted a leave of absence for medical reasons, family necessity or dependent care, military service, or other approved personal reasons. Students planning to discontinue enrollment for a semester or more must request approval for a leave of absence. Students may petition the Graduate School for a leave of absence for a maximum of two semesters during the entire program; however, the Graduate School may approve extensions to the maximum two semester leave of absence (e.g., for military service obligations extending beyond two semesters).

A petition for a leave of absence (or extension), signed by the Graduate Program Officer or head of the academic unit, must be approved by the dean of the Graduate School. The Graduate School may request appropriate documentation. The request must be filed and approved before the anticipated absence. An approved leave of absence will enable students to re-enter their program without applying for re-activation or owing retroactive tuition and enrollment fees.

A student on leave is not required to pay fees, but in turn may not use Auburn University faculty, facilities, resources, or services intended only for enrolled students; receive a graduate assistantship, fellowship or financial aid from the University or take any Auburn courses related to the plan of study.

Withdrawing from Courses

Courses may be dropped without academic penalty on or before mid-semester using the Schedule Adjustment form. A course may be dropped after mid-semester only under unusual conditions. When the Graduate dean approves dropping the course under such circumstances, a W will be assigned only when the instructor indicates that the student is clearly passing the course. Otherwise a grade of WF (Withdrawn Failing) is assigned. A student dropping the only course or all courses for which the student is registered after the first class day must resign for the semester on a separate form obtained from the Graduate School.

Continuous Enrollment Policy

All full- and part-time degree-seeking graduate students must be continuously enrolled. Continuous enrollment is defined as registration for a minimum of one credit hour in at least two semesters in a given academic year (fall, spring, summer) until the degree is awarded or status as a degree-seeking student is terminated through an official university withdrawal. Students must register for the term in which they take their examinations, defend their dissertations, and complete degree requirements (including summer term). Although the Graduate School and individual graduate programs will monitor the enrollment status of graduate students, it is ultimately the responsibility of graduate students to ensure that they are meeting the enrollment provisions of this policy.

* Students who enroll for the first time during spring or summer semesters will not be declared inactive if they register in at least two semesters during their first full and subsequent academic years.

Exceptions to the Continuous Enrollment Policy

The Graduate School, if circumstances warrant, may grant exceptions to the Continuous Enrollment Policy. Appeals should be made directly to the dean of the Graduate School.
Inactive Status

Students who fail to register for at least two semesters in a given academic year will be declared inactive. To be re-activated, students must apply for re-activation to the program in which they were enrolled and the Graduate School. Students must also complete the re-admission form. Re-activation is not guaranteed. In order to fulfill the continuous registration requirement, students who are re-activated must register retroactively for a minimum of one credit hour and pay the associated tuition and fees for all semesters that have elapsed since they were last enrolled --- up to a maximum of two semesters per academic year and a total of four semesters.

Non-Graduate Students and Graduate Work

An Auburn University undergraduate student may register for graduate courses provided that the following conditions are met: the student has at least a 3.0 GPA, is within 30 semester hours of graduating, has the written consent of the instructor of each graduate course, and obtains approval in advance from the Graduate School. A maximum of 12 semester hours of graduate course work taken in this option later may be applied toward a graduate degree at Auburn University with the approval of the student's advisory committee provided that appropriate arrangements are made in advance with the Graduate School and a grade of B or higher is achieved on all courses used for graduate credit. The total course load taken at the time the undergraduate student is in a graduate course may not exceed 16 semester hours per semester. The same guidelines apply to undergraduate students taking graduate courses for undergraduate credit. A student may not use the same graduate course for both undergraduate and graduate credit. An exception is made for non-graduate students officially enrolled in the Honors College or an approved Accelerated Bachelor's/Master's Degree Plan (see Non-Graduate Students Enrolled in Accelerated Bachelor's/Master's Degree Plans below).

Any post-baccalaureate, non-degree student desiring enrollment in a graduate course must receive written consent of the instructor and approval of the Graduate dean in order to register for such a class.

Non-Graduate Students Enrolled in Accelerated Bachelor’s/Master’s Degree Plans or in the Honors College

An Auburn University undergraduate student officially admitted and enrolled in an approved Accelerated Bachelor’s/Master’s degree plan (ABM) may register for graduate courses that are listed as required or elective courses in the student’s ABM plan. Similarly, students officially admitted and enrolled in the Honors College may enroll in a limited number of graduate courses. A maximum of nine hours (in a 30-hour master’s program) or 12 hours (in a 36-hour or more master’s program) may be counted towards both degrees, provided that a grade of B or higher is achieved on all courses used for graduate credit. No courses may be counted for both undergraduate and graduate credit in a program in which the double counting of courses is prohibited by an accrediting agency. The total course load taken at the time the undergraduate student is in a graduate course may not exceed 16 semester hours per semester.

Registration and Graduation Requirements

Thesis and dissertation students needing thesis or dissertation final approval and submission and the final examination, or non-thesis graduate students needing to complete projects, would register for GRAD 7000, 7990 Research and Thesis, 8990 Research and Dissertation, or 7980 Project, as applicable. Non-thesis graduate students requiring only a final examination would register for GRAD 7000. Students may not register for GRAD 7000 for more than one semester. Exceptions can be made by the Graduate School under special circumstances.

No student will be permitted to graduate who fails to submit a graduation check request to the Graduate School prior to the semester of expected graduation. Graduation day is the official last day of each semester and, therefore, is the deadline for approved plans of study and graduation checks for graduation the following semester. It is the responsibility of graduate students to check records for compliance with graduation requirements. Students who have completed a graduation check for a previous term must notify the Graduate School of pending graduation before the 15th class day of each subsequent semester. Graduate degrees are awarded at the end of each semester.

A graduate student may carry a maximum course load of 16 hours per semester (14 in the summer term) including undergraduate courses. Graduate students must carry nine hours per semester or enroll in (GRAD 7AA0/GRAD 8AA0) with concurrent enrollment for a minimum of one hour of 7990/8990 to be classified as full-time students. Enrollment in (GRAD 7AA0/GRAD 8AA0) requires the completion of the form available at the Graduate School or at www.grad.auburn.edu.

Transfer of Credit from Other Institutions

Graduate credit taken in residence at an international institution or at a regionally accredited U.S. institution may be transferred when recommended by the student’s major professor, advisory committee, graduate coordinator, and when also approved by the dean of the Graduate School. Such transfer credit must fall within the time limits of the degree. Students seeking transfer credit must provide documentary evidence showing that the course is comparable to similar graduate courses at Auburn University and relevant to the
Auburn University

Auburn University

student’s plan of study. Students must also provide an official transcript showing credit earned for the course. No prior commitment is made concerning whether transfer credit will be accepted.

The total number of credit hours that may be transferred from another accredited institution towards a master’s, education specialist, or doctoral degree varies by program and may be no more than 50% of the total credit hours for the program. Such transfer credit 1) must fall within the time limits of the degree; and, 2) must be approved by the advisory committee and the Dean of the Graduate School.

In the case of graduate degree programs offered through joint, cooperative, or consortial agreements, the student must earn a majority of credits from the participating institutions. No transfer credit will be approved without an official transcript. No course on which a grade lower than B was earned may be transferred. Additionally, credit will not be allowed if the combined GPA on graduate work taken at other schools is less than 3.0 on a 4.0 scale, nor may transfer credit be used to improve the GPA on courses taken at Auburn University.

Students who are admitted to a graduate certificate program may use a limited amount of course work taken at another accredited university to meet certificate requirements, with the approval of the program faculty and the Graduate School.* The total number of credits transferred shall not exceed 40% of the total required for the Certificate. Total credits allowed to transfer may be less as determined by the Certificate Program. Such transfer credit must fall with the time limits of the certificate program. Students must provide an official transcript showing credit earned for the course and documentary evidence that the course is comparable to similar graduate courses in the certificate program at Auburn University. No course on which a grade lower than B was earned may be transferred.

*A student may not use the same graduate course for both undergraduate and graduate credit.

Transfer to a Different Degree Program

For a student to transfer from one department to another requires that the student be in good academic standing, a new application for admission and the usual application fee. Changes in application status (master’s to doctoral, doctoral to master’s) or enrollment status (master’s to doctoral or doctoral to master’s) must be requested by the applicant/student involved and endorsed by the department head or chair, major professor, and advisory committee for enrolled students and approved by the dean of the Graduate School. Current international students must recertify full financial sponsorship for the issuance of a new 1-20 form.

Undergraduate Courses, S/U Option and Auditing Courses

A graduate student may register for undergraduate courses (1000-4000-level). For students enrolled in Graduate School, grades earned in undergraduate courses will not be used in calculation of the GPA for either retention or graduation, but will appear on the graduate transcript. This policy took effect with the posting of grades fall 1998. For courses taken before fall 1998, grades earned in undergraduate courses may be used in calculation of the GPA for retention, but not for graduation. A graduate student may elect any course to be graded under the Satisfactory (S)-Unsatisfactory (U) option, if the major professor so recommends. Students are not allowed to select this option after the 15th class day. Courses listed on the Plan of Study must be graded A, B, C, D or F except for those designated as S/U. Similarly a graduate student may elect to audit any course not on the Plan of Study. The student may not change from audit to credit after classes begin, but may change from credit to audit before the 15th class day. All uses of the S/U and audit option require approval of the Graduate School.
Academic Progress

- Incomplete Grades (p. 1410)
- Grades (p. 1410)
- Academic Standing (p. 1410)
- Advisors (p. 1410)
- Academic and Professional Progress (p. 1411)
- Academic Requirements for Students in the Professional Program of Veterinary Medicine (p. 1411)
- Student Athletes (p. 1412)
- Student Financial Aid Recipients (p. 1412)
- Veterans (p. 1412)

Incomplete Grades

A grade of “incomplete” must be removed within the following six months or it will be recorded permanently as an F and the course will have to be repeated. This applies regardless of the student’s enrollment status. A student not enrolled during the following six months is not exempt from this rule. No student may graduate until “incomplete” and “no record” grades are removed, and the removal must be completed at least three weeks before the date of graduation, regardless of whether or not the course is included on the plan of study worksheet.

Grades

To receive a graduate degree at Auburn University, a student must earn a cumulative GPA of 3.0 on a 4.0 scale on all courses carrying graduate credit. No more than nine hours beyond the student’s Plan of Study is allowed in obtaining the cumulative graduate GPA (CGGPA). No grade below C (including unsatisfactory grades for courses taken under the S/U option) is acceptable for credit toward a graduate degree. Each graduate course in which a grade below C is received must be repeated at Auburn University whether or not it is listed on the student’s Plan of Study. Both the original grade and the grade for the repeated course will be counted in calculating the CGGPA. Course credits transferred from another institution may not be used to satisfy this requirement. Courses retaken will not count against the nine-hour limit beyond the student’s Plan of Study in obtaining the minimum CGGPA.

Academic Standing

Only grades in Auburn University courses approved for graduate credit will be used in determining the overall GPA for continuation in the Graduate School. If at the end of any semester the cumulative graduate GPA (CGGPA) falls below 3.0, the student will be placed on academic probation. If the CGGPA remains below 3.0 after the next eleven credit hours of graduate enrollment (both graded and ungraded) or two consecutive terms (whichever comes first), the student will be placed on academic suspension.* Students on academic suspension may not hold a graduate assistantship. The student may be readmitted only after completion of a remediation plan recommended by the academic unit and approved by the Dean of the Graduate School. Course work taken as part of the remediation plan must be completed within two consecutive terms and may count toward both the student’s degree and CGGPA with the recommendation of the department head and the approval of the graduate dean.* Upon completion of the remediation plan, the student must have addressed academic deficiencies and have a CGGPA of 3.0 or above. Once approved by the graduate dean, remediation plans may not be amended or extended beyond the original deadline. If a student fails to complete the remediation plan as approved or if the student earns a grade of C or below while completing the remediation plan, the student will be dismissed from the Graduate School and the designation ACADEMIC DISMISSAL will be placed on the student’s official record.

*The summer term is counted as one of the consecutive semesters only if a student is enrolled during the summer term.

Advisors

The dean of the Graduate School is the general counselor to all graduate students. A faculty advisor or major professor will be designated for each student in accordance with departmental policy. There also will be an advisory committee for each student. The major professor generally serves as the chair of the advisory committee. In the case of co-chairs, at least one must be a member of the graduate faculty at the appropriate level at Auburn University. Some required forms and reports regarding the student’s program must be approved by the major professor, advisory committee, department head or chair and the dean of the Graduate School. Students should ascertain which signatures must be obtained.
**Academic and Professional Progress**

Monitoring the academic progress of graduate students and graduate teaching assistants on a regular basis is important to their success and to the success of Auburn’s graduate programs. The Graduate School requires that each department conduct — at least on an annual basis — an evaluation of the progress of each graduate student enrolled in a doctoral program and each Graduate Teaching Assistant (GTA). Departments are also encouraged to monitor the progress of all other degree-seeking students. Annually, each department will report to the Graduate School, confirming that the evaluation of all doctoral students and GTAs has been completed.

The student’s advisory committee monitors each graduate student’s progress toward a degree, and issues of professional and personal development may be considered. While failure to maintain academic standards is reason for dismissal, a student also may be dismissed from the Graduate School if progress is unsatisfactory in other areas.

In such cases, the advisory committee will prepare a statement of grievance and discuss it in a meeting with the student. The statement must have the unanimous support of all members of the committee. The student will be warned that corrective measures must be taken within a specified time to avoid action that might result in dismissal. The committee determines the period allowed for correction. Copies of the statement of grievance and summary of the meeting will be provided to the student, the department head/chair, and the academic dean.

If the deficiency is not corrected within the time allowed by the committee, a statement reiterating the grievance and recommending dismissal should be sent to the graduate dean with copies to the student, the department head/chair, and the academic dean.

The graduate dean will give the student an opportunity to respond and will make a final determination. The student and the advisory committee will be notified.

The action taken will not appear on the student’s official transcript, and release of information is restricted under the University’s policy on the confidentiality of student records.

**Academic Requirements for Students in the Professional Program of Veterinary Medicine**

All applicants and students in the professional program are subject to the academic and disciplinary regulations of the College of Veterinary Medicine in addition to those of Auburn University.

Any student who earns less than a 2.25 GPA for any term will be placed on academic probation (academic warning). A student who fails to earn a 2.25 GPA in each of the succeeding two terms of enrollment will be dropped from the rolls of the College of Veterinary Medicine for scholastic deficiency. In addition, a student who does not have a veterinary college cumulative average of 2.25 at the end of any academic year will be required to withdraw from the College of Veterinary Medicine.

Any student who receives a D in any course will be placed on academic probation. If the student receives a second D in the same calendar year or academic year, they will be required to withdraw from the College of Veterinary Medicine.

A student will be removed from academic probation after two terms, assuming they have met the terms of probation.

A student who makes a grade of F in any course will be required to withdraw from the College of Veterinary Medicine. If a student who is dismissed for academic reasons is re-admitted, they may be required to repeat additional courses as deemed necessary by the Admissions and Standards Committee.

Clinical courses are unique in that the art and skills to be developed in them can be acquired only through full participation in the laboratories. Attendance in these courses is required except in case of illness or other extenuating circumstances as may be judged by the involved instructor. Grading in these clinical laboratory courses is primarily by subjective evaluation. When a course involves student rotation through several disciplines or sections, the student must receive a passing grade in each area before a passing grade can be given for the course.

Any student who earns a D or F in any clinical rotation will be placed on academic probation. If the student receives a second F during clinical rotations, that student will be required to withdraw from the College of Veterinary Medicine. If the student receives a second and third D or F during clinical rotations, that student will be required to withdraw from the College of Veterinary Medicine. If the college admissions and standards committee permits re-admission, the student may be required to repeat all clinical experiences to meet the requirements for the clinical year.
Student Athletes
In addition to meeting the general academic requirements of the university, student athletes must meet all academic requirements, including those relating to satisfactory progress toward a degree, set forth in the legislation of the Southeastern Conference (SEC) and of the National Collegiate Athletic Association (NCAA).

Student Financial Aid Recipients
In addition to meeting the general academic requirements of the university, applicants for student financial aid funds must maintain Satisfactory Academic Progress to receive, or to continue to receive, assistance through federal, state, and institutional student aid programs. Descriptions of these Satisfactory Academic Progress requirements for distinct classifications of Auburn students are available from the Office of Student Financial Services.

Veterans
Veterans Resource Center
The Auburn University Veterans Resource Center (AUVRC) assists veterans, guardsmen, reservists, active duty, military dependents, and survivors receiving Veteran Affairs (VA) federal education benefits in all aspects of academic success, while transitioning to campus and community. The center provides timely and comprehensive support with a range of services for current and former military service members, including eligible military dependents, by collaborating with university faculty and staff, state representatives, the local veteran community, and civilian-advocate organizations.

Contact the AUVRC: (334) 844-8167, veterans@auburn.edu, or visit http://veterans.auburn.edu.

Priority Registration:
Priority Registration is given to groups of students who fall under certain categories, including veterans. The priority status must be recognized by the Registrar’s Office when the time tickets are set in order for the student’s special registration status to be activated.
International Opportunities

- International Academic Opportunities (p. 1413)
- International Internships, Academic/Curricular Practical Training (p. 1413)
- English as a Second Language (ESL) Program (p. 1413)
- Office of International Programs (p. 1413)
- OIP International Student and Scholar Services (p. 1413)
- OIP Auburn Abroad Experience (p. 1413)

International Academic Opportunities
Access to international opportunities is provided throughout many colleges, schools, departments and other student support units. However there are several units on campus that provide specialized services for English language study, study abroad and international students attending Auburn University.

International Internships, Academic/Curricular Practical Training
Academic internship experience both within the US and abroad are highly encouraged for all disciplines and all AU students. Students interested in participating in such experiences should check with their academic units for specific requirements. For international students practical training is available: UNIV 4920 Curricula Practical Training depending on US immigration status as Curricular Practical Training (F) or Academic Training (J). Students may also do academic internships abroad under Auburn Abroad. For further details on Auburn Abroad or CPT/AT students should check with the Office of International Programs.

English as a Second Language (ESL) Program
The ESL Program operates under the Assistant Provost for International Programs and offers English language instruction to international students and visiting scholars. It provides courses in oral and written proficiency to support international students enrolled in undergraduate and graduate degree programs, a course in classroom communication skills for international graduate teaching assistants, and an Intensive English program involving 25 hours of instruction per week in listening, speaking, reading, writing, grammar, pronunciation, and TOEFL skills. It also operates an International Student English Center that develops international students’ and scholars’ English skills through tutoring and workshops at no charge. For additional information, contact: 316 Foy Hall, (334) 844-2122; email: raffadc@auburn.edu; or visit www.auburn.edu/esl (http://www.auburn.edu/academic/international/esl/).

Office of International Programs
The Office of International Programs (OIP) is a unit of the AU Division of Academic Affairs. Its mission is to provide leadership and relevant administrative support to academic units, faculty, students, and staff for the effective promotion and efficient adoption of Auburn University’s internationalization goals. The International Students and Scholar Service component of the OIP assists foreign national students, visiting scholars, and university employees in achieving their academic objectives. The Auburn Abroad unit of the OIP promotes and facilitates student and faculty participation in an international education experience through programs outside of the United States. For additional information, contact: Office of International Program, 228 Foy Hall; 334-844-5001; intledu@auburn.edu; or www.auburn.edu/international. (http://www.auburn.edu/academic/international/)

OIP International Student and Scholar Services
The ISSS unit of the OIP provides assistance and guidance to foreign national students, visiting scholars, and University employees regarding US immigration requirements and Auburn policies for studying and/or working at Auburn University. Documentation of eligibility for study in the United States, work authorizations, and other government documents required by international students, scholars, and employees are issued and monitored by the ISSS. Joint orientation programs are conducted in cooperation with the Office of International Student Life and other units of the University to assist students, visitors, and employees adapt to the AU community. Currently, the university has more than 1200 international students, visiting scholars, and employees from over 90 nations. Go to the section on International Student Services for additional information.

OIP Auburn Abroad Experience
The Office of International Programs (OIP) Auburn Abroad unit seeks to develop, expand and facilitate credit bearing study, internship and exchange opportunities outside of the United States. Each year more than 1200 Auburn University students participate in the Auburn Abroad experience on over 93 programs. More than 90 percent of these students go on faculty led programs and Exchange Programs with the rest going on other university or provider programs. With some planning, credit earned through the Auburn Abroad experience can be integrated with Auburn University degrees and applied to core, major, minor, and elective courses. Students on
International Opportunities

Auburn University faculty-led programs, the CORE curriculum program in Barcelona, Spain and Exchange Programs will earn AU credit and will receive grades on their transcript. Students going on other university programs will earn transient/transfer credit for their courses abroad. If a student chooses to go on other university programs, they will need to be enrolled in an Auburn Abroad placeholder course to be able to use their financial aid.

Auburn Abroad experiences vary considerably in length and are available for all semesters including summer. Each college and school within Auburn University has programs abroad tailored to their students’ needs. The Auburn Abroad staff conducts a Fall Study Abroad and Passport Fair, and over 100 other information sessions each year to inform students about international opportunities. Both undergraduate and graduate students can participate in the Auburn Abroad Experience. Requirements for acceptance into the Auburn Abroad Experience include the following: (1) a minimum institutional cumulative GPA of 2.25 for undergraduates and 3.0 for graduate students, (2) the student must attain the age of 19 prior to the start date of program, (3) the student’s record must show no pending Auburn University judicial actions and the student must be in good academic standing in their college or school. Faculty directors for programs abroad may also have additional requirements. Although some programs require prior knowledge of a foreign language, there are many that do not.

Students considering any type of credit bearing experience abroad should start their Auburn Abroad Experience by attending either (1) a weekly, thirty minute Study Abroad 101 session conducted by the Auburn Abroad Staff or (2) by attending a faculty led program orientation session. Sessions are conducted on Thursdays at 3pm and repeated on Fridays at 11am in the Auburn Abroad conference room, 242 Foy Hall. These sessions include an introduction to the on-line Auburn Abroad application process, hints on searching for faculty led and other types of programs abroad, the credit approval process, transcript information, information on a variety of funding resources, and paperwork needed for scholarship, PACT V.A. and other benefit programs. Students interested in faculty led programs must contact the faculty director(s) for the dates of their orientation sessions. After students attend a study abroad orientation session, they are ready to start their on-line study abroad application, found at www.auburn.edu/studyabroad (http://www.auburn.edu/academic/international/auab/) on the Program Search link. They need to complete this on-line application, submit a completed Course Approval Form, and respond to any Auburn Abroad Unit emails requesting additional information. The Course Approval Form requires special attention and students must obtain all required signatures including department chair and dean. The on-line application and requested materials must be completed and submitted by the deadline dates listed on www.auburn.edu/studyabroad (http://www.auburn.edu/academic/international/auab/) to be considered. Current deadline dates are: Summer Programs: March 30; Fall Programs - April 30 and Spring Programs: October 15.

The OIP staff monitors students’ on-line applications and will enroll individual students in one of the following Auburn Abroad Full Time Placeholder courses: (UNIV 2940 / UNIV 2945 , UNIV 4940 / UNIV 4945 , UNIV 5940 / UNIV 5945 or UNIV 7940 / UNIV 7945 ). These placeholder courses will be listed on the students’ transcripts while they are abroad. Once students complete their course work abroad and the Auburn Abroad staff receives and processes their transcript through the registrar, then the actual, approved courses listed on their Course Approval Form will be listed on the students’ transcripts as Auburn University Credit. These processes and dates are subject to change and it is the individual student’s responsibility to attend orientation sessions and check the website to insure that they are in compliance. In addition to receiving credit for an abroad experience, students enrolled in Auburn Abroad are provided opportunities to attend pre-departure sessions and will be enrolled in the Auburn University International Travel Assistance plan. Students will receive an enrollment card and material to read concerning the assistance plan, health and safety issues. The Auburn Abroad staff, along with the Office of Campus Safety and Security routinely monitor global situations and will provide assistance to students in distress abroad. Returning students are encouraged to become Global Tiger Peer Advisors when they return, share their “Global Tiger Tale” on the Auburn Abroad website and submit photos from their experience abroad for the annual student photo contest. For additional information please visit the OIP Auburn Abroad Experience Website at www.auburn.edu/studyabroad (http://www.auburn.edu/academic/international/auab/) and/or send an email to: auab@auburn.edu.
Graduate Assistantships & Fellowships

• Tuition Waiver (p. 1415)
• Graduate Assistantships (p. 1415)
• Types of Graduate Assistantships (p. 1415)
• Annual Evaluation of Graduate Teaching Assistants and Doctoral Students (p. 1416)
• Background Check Policy (p. 1417)
• Graduate Fellowships (p. 1417)
• Graduate Assistantship Workload Policy (p. 1417)
• Graduate Assistant Performance Improvement and Administrative Action Policy (p. 1415)
• Sexual and Gender Based Misconduct Policy Training for University Graduate Assistants (p. 1418)

Tuition Waiver
Non-Alabama resident graduate assistants may receive a waiver of the out-of-state portion of their tuition if they are on at least a 25 percent graduate assistantship (new appointments beginning in Fall 2013 must be at 33 percent) and are paid a minimum monthly stipend set each year by the provost. Such graduate assistants who have been on assistantship for consecutive fall and spring semesters are eligible to have the out-of-state portion of their tuition waived for the summer semester whether or not they are on assistantship that semester. Students will need to contact the Graduate School to have this waiver applied.

Graduate Assistantships
Graduate assistant appointments are temporary. Continuation depends upon availability of funds, level of enrollment, research needs, and satisfactory performance. Salaries are paid in accordance with the budget policies and payroll procedures of the university. The Board of Trustees is obligated to pay certain fixed charges against the institution and thereafter pay salaries in full insofar as funds are available. If for any reason beyond the control of the Board of Trustees funds are not available, salaries will be prorated.

Each graduate assistant must be in a degree-seeking program and registered in the classification of MST, EDS, PHD, or GPR. The student also must be registered for at least one course (during each academic term of the assistantship), must satisfy the minimum course load specifications of the individual departments and must be making satisfactory progress toward the degree.

Workloads for graduate assistants are defined on the basis of a normal teaching load or the equivalent time in other duties as determined by each department head and the dean of the school or college in which the assistant is employed. For example, a one-third workload is one-third of a normal teaching load. Graduate students may hold multiple assistantships and the assistantships may come from different units on campus, but together they cannot add up to more than a 0.50 FTE (20 hours per week) appointment. Maximum course loads for graduate assistants are determined by individual departments. It is recommended that graduate students working more than half-time not carry a full academic load.

Requirements that graduate students register for hours not included in the plan of study as a condition of employment or to enhance credit hour production for administrative purposes are inappropriate. Similarly, requiring hours on the plan of study beyond the degree requirements established by the Graduate Faculty for such administrative purposes is also inappropriate unless the additional requirements are required by university policy.

International graduate students on F1 visas cannot hold a greater than 50 percent work appointment. International graduate students on F2 visas cannot hold a work appointment. Multiple assistantships for international graduate students cannot add up to more than a 50 percent work appointment.

International graduate teaching assistants who are assigned to scheduled lecture or laboratory sections must first be certified in spoken English proficiency. Certification may be attained through a minimum score of 50 on the Test of Spoken English (TSE) or a 23 on the speaking section of the Internet Based TOEFL offered by the Educational Testing Service or approval by the director of the English as a Second Language Program (ESL). Applicants who hold a baccalaureate degree from an accredited institution whose instruction is in English may be exempted from this requirement.

Types of Graduate Assistantships
Graduate Teaching Assistants (GTAs)
A Graduate Teaching Assistant must meet eligibility requirements and be supervised by an appropriate graduate faculty member. The GTA’s primary responsibility is to support the instructional mission of the University. For a student to be classified as a GTA, at least
50% of the student’s responsibility as a teaching assistant must be devoted to the direct instruction of students, typically in a classroom or laboratory setting.* The GTA’s responsibilities may also include, for example: advising or mentoring of students; proctoring exams; grading papers, homework, and/or projects; preparing instructional materials; or providing other general assistance in the instructional process. GTAs may not be given duties to support faculty research or duties primarily clerical in nature. Whatever their instructional responsibilities, GTAs must be supervised by a faculty member who is responsible for monitoring and evaluating their performance at least on an annual basis. GTAs who have no prior teaching experience must be given some form of training before being allowed to teach. Any GTA with primary responsibility for a course must have a minimum of 18 semester hours of graduate course credit in that field of instruction.

*GTAs are not permitted to serve as instructor of record for courses numbered 6000 or above, although they may assist with laboratories for such courses. Additionally, they may not teach or assist with a course in which they are enrolled.

**Graduate Research Assistants (GRAs)**
A Graduate Research Assistant (GRA) must meet eligibility requirements and be supervised by an appropriate graduate faculty member. The GRA’s primary duty is to engage in original, professional-level research under a faculty member’s supervision in the course of obtaining a graduate degree. The faculty supervisor determines the students’ specific duties and is responsible for monitoring and evaluating the GRA’s performance at least on an annual basis.

**Graduate Extension Assistants (GEAs)**
A Graduate Extension Assistant must meet eligibility requirements and be supervised by an appropriate graduate faculty member or extension agent. GEAs are responsible for various kinds of extension work and interaction with the public. The various branches of the Extension Service award these assistantships. A faculty member or extension agent should be responsible for monitoring and evaluating the performance of GEAs at least on an annual basis.

**Graduate Assistants (GAs)**
Graduate Assistants must meet eligibility requirements and be supervised by a faculty member, administrator, or other appropriate university employee. GAs are responsible for duties other than teaching, research, or extension. These responsibilities can be varied and could include performing administrative duties not related to the GA’s field of study or the instructional or research missions of the university. Whatever their responsibilities, GAs should be supervised by a faculty member, administrator, or other appropriate university employee who is responsible for monitoring and evaluating their performance at least on an annual basis.

*Tuition waivers for graduate assistants not engaged in teaching, research, or extension are subject to taxation and income tax withholding.

**Policy on Paid Leave for Graduate Assistants (GAs)**
Graduate Assistants are non-exempt employees and are generally paid for hours worked. However, it is Auburn University policy that hourly-paid Graduate Assistants be paid during official university holidays and breaks, including Fall Break, Spring Break, and/or official University closures.

**Annual Evaluation of Graduate Teaching Assistants and Doctoral Students**

**Policy:** Effective beginning Fall 2014, the Graduate School will require that each department conduct -- at least on an annual basis -- an evaluation of the progress of each Graduate Teaching Assistant (GTA) and each graduate student enrolled in a doctoral program. Continuation is contingent upon satisfactory performance.

**Reporting:** Annually, each department will report to the Graduate School, confirming that the evaluation of all GTAs and doctoral students has been completed. In addition, the department will provide the Graduate School with a summary report of all instances in which a GTA or doctoral student has received an unsatisfactory review.

**Expectations:** Each department will be responsible for developing procedures (if not already in place) for the annual evaluation of the progress of GTAs and doctoral students. Following guidelines for best practices, the review should include at least the following:

- A student self-report and assessment of academic progress; teaching (if applicable); and research (if applicable) [prepared in advance of the review conference];
- A report prepared by the student’s advisor (and preferably at least one other faculty member, e.g., a member of the student’s advisory committee) that assesses the student’s academic progress; teaching (if applicable); and research (if applicable) that identifies strengths and weaknesses, and establishes expectations for the next year. The report may be augmented by reports from teaching supervisors or other members of the student’s advisory committee.
• An opportunity for the student to discuss the report in person.
• A signed copy of the written assessment should be placed in the student’s file and a copy given to the student.

Background Check Policy
The Graduate School requires that all graduate student employees (including hourly paid) have an approved consumer report and/or investigative consumer report (background check) as a condition for appointment. The information contained in these reports may be used to deny an individual employment or continued employment with Auburn University. The background report and its contents are deemed private and confidential and shall be disclosed only for the purposes described in “Procedures for Securing Background Reports for Graduate Students Before Hiring” to those University employees who have a need to know, or as otherwise required or permitted by law. This policy is effective for all graduate student employees whose new appointments begin on or after January 1, 2014.

Graduate Fellowships
Auburn University provides in-state tuition fellowships to most of its students holding graduate assistantships. Though administered through the Graduate School, applicants should contact the specific academic departments concerning eligibility and availability.

Graduate Assistantship Workload Policy
Graduate students may not normally hold an appointment of more than 50 percent, whether the appointment is from a single unit or multiple units. This policy also applies to internship appointments (whether called an internship or externship). Graduate students may hold multiple assistantships (assistantships and/or hourly employment) from one or more units on campus, but the cumulative appointments cannot add up to more than a 0.50 FTE (20 hours per week) appointment. This allows the students the time needed to devote to their academic programs. An exception is automatically allowed in the special case of a graduate assistant assigned to teach one four credit course and one three/four credit course. In such cases, appointments will be made at 0.58/0.67 FTE, respectively. Other exceptions may be requested, with compelling academic justification, in writing to the Provost by the dean. For multiple assistantships from different units, coordinating approval memos from the home unit and the hiring units are required. Please note that federal regulations limit the cumulative appointment for international graduate students to no more than a 0.50 FTE (20 hours per week) appointment.

Graduate Assistant Performance Improvement and Administrative Action Policy

FAILURE TO SATISFY PERFORMANCE STANDARDS
Performance Improvement Meetings — In addition to regularly scheduled performance reviews, when a supervisor determines that a graduate assistant is failing to meet satisfactory performance standards, the supervisor will meet with the assistant. Together, they will review the duties and responsibilities expected of the graduate assistant, and the supervisor will identify those areas in which the performance of those duties and responsibilities is judged to be unsatisfactory. The supervisor will then advise the graduate assistant that if his or her performance does not improve to a satisfactory level within a time period specified by the supervisor, the assistantship will be terminated. The time period established by the supervisor should provide a sufficient and reasonable time for the graduate assistant to demonstrate a satisfactory level of performance. In some instances, the graduate assistant’s failure to meet satisfactory standards of performance may be disruptive of the educational process (e.g., failure to appear for a teaching assignment, or failure to grade examinations in a timely fashion). In such instances, the graduate student should be advised that any subsequent failure to meet satisfactory performance standards may result in termination of the assistantship. As soon as possible following this meeting (generally within three working days) the supervisor will provide the assistant with a written summary of the meeting, including notice of areas of unsatisfactory performance and the time period specified for improvement to a satisfactory level. A copy will be sent to the department chair for review/approval and to the dean of the Graduate School.

Termination of an Assistantship — If a graduate assistant fails to meet acceptable standards of performance as prescribed in the performance improvement meeting, the supervisor will notify the department chair. The department chair will schedule a meeting with the supervisor and graduate assistant as soon as possible, generally within three working days. At that meeting, the graduate assistant’s performance will again be reviewed. If it is concluded that the graduate assistant has failed to meet acceptable performance standards, the department chair may terminate the graduate assistantship appointment. The department chair will provide a written notice summarizing the meeting and the action taken to the supervisor, graduate assistant, the dean of the college, and the dean of the Graduate School within five working days of the meeting.
ACTS OF MISCONDUCT AND UNPROFESSIONALISM – Acts of misconduct or unprofessionalism may require prompt action. Such acts may include, but are not limited to:

1. Refusing to obey reasonable and necessary instructions or job assignments, insubordination, or using abusive or unprofessional language in the workplace.
2. Indulging in offensive or obscene manner.
3. Drinking intoxicants on University property, with exception of events acting in accordance with the University Campus Alcohol Policy.
4. Using illegal drugs on University property.
5. Stealing or misappropriating University property or property belonging to students or university employees.
6. Scientific misconduct

Appropriate actions include termination of an assistantship, suspension of an assistantship for a specified period, and reduction of the FTE and/or benefits associated with that assistantship. If a supervisor believes a graduate assistant has engaged in such an act of misconduct or unprofessionalism, the following steps are to be taken.

For incident(s) of unprofessional acts or behavior which violate accepted norms of professional conduct, the supervisor will provide notice of the proposed administrative action to the graduate assistant and document the situation in a written report. In such cases, the graduate assistant may be placed on immediate administrative leave with pay from the assistantship duties, at the discretion of the supervisor. The report will be provided to the department chair to whom the supervisor reports, who will schedule a meeting with the supervisor and graduate assistant as soon as possible, generally within three working days. At that meeting, the incident(s) will be reviewed and the proposed administrative action may be affirmed, amended, or overturned by the department chair. The department chair will provide a written notice summarizing the meeting and his/her decision regarding administrative action to the supervisor, graduate assistant, the dean of the college, and the dean of the Graduate School within five working days of the meeting.

Additionally, for misconduct covered by the Student Code of Conduct or the Sexual Misconduct Policy, the case will also be referred to the Office of Student Conduct. Acts of misconduct may include, but are not limited to, theft, fraud, physical altercation, and sexual harassment, as defined in the Student Code of Conduct and the Sexual Misconduct Policy.

Supervisors and students should be aware that termination or reduction of the FTE of an assistantship, will have large financial impacts, which can be particularly problematic for a student if termination or FTE reduction occurs before the last class day of a semester. A description of the rules regarding graduate assistant benefits, including tuition fellowships http://graduate.auburn.edu/current-students/guidelines-for-graduate-tuition-fellowships/#1460317892963-152df5d5-786c and health insurance http://graduate.auburn.edu/graduate-student-health-insurance-program/ at the indicated links.

Appealing Action Regarding an Assistantship — If a graduate assistant wishes to appeal a decision of administrative action regarding an assistantship, including termination, he/she may file a written appeal within five working days of receipt of the department chair’s written notice with the dean of that college. The graduate assistant will be notified in writing of the result of the appeal within five working days of the submission of the written appeal. The decision resulting from this process is final and not subject to further appeal.

Sexual and Gender Based Misconduct Policy Training for Auburn University Graduate Assistants

The Graduate School requires that all Graduate Assistants (including Graduate Teaching Assistants, Graduate Research Assistants, and Graduate Extension Assistants) have approved AU Sexual and Gender Based Misconduct policy training as a condition for continued appointment. The specific form of the required training will be determined in consultation by the Graduate School and the Office of Affirmative Action/Equal Employment Opportunity. The policy is effective beginning August 1, 2016.
Doctoral Degrees

- Admission
- Summary of Procedures for Doctoral Degree Programs
- Advisory Committee and Plan of Study Worksheet
- Course Requirements
- Time Limit
- Dissertation
- Annual Evaluation of Graduate Teaching Assistants and Doctoral Students
- The Doctor of Philosophy Degree
- Final Examination
- Language Requirement

The doctor of philosophy is offered in administration of elementary and secondary education, administration of higher education, administration of supervision and curriculum, adult education, aerospace engineering, animal sciences, biological sciences (botany, microbiology and zoology), career and technical education, chemical engineering, chemistry, civil engineering, computer science and software engineering, counselor education, counseling psychology, discrete and statistical sciences, early childhood education, educational psychology, electrical and computer engineering, elementary education, English, English language arts education, fisheries and allied aquacultures, forestry and wildlife sciences, history, horticulture, human development and family studies, industrial and systems engineering, kinesiology, management, materials engineering, mathematics, mathematics education, mechanical engineering, music education (instrumental and vocal), nutrition, food science, physics, plant sciences (agronomy and soils, plant pathology, and entomology), poultry science, psychology, public administration and public policy, reading education, rehabilitation and special education, science education (biology, chemistry, general science and physics), and social science education (general social science and history), plus interdepartmental programs in biomedical sciences (anatomy, physiology, and pharmacology; large animal surgery and medicine; pathobiology; radiology; and small animal surgery and medicine), economics (agricultural economics and forestry), integrated textile and apparel science (consumer affairs and polymer and fiber engineering), and pharmaceutical sciences.

Admission

Prospective candidates for the degree of doctor of philosophy are admitted under the same procedures and requirements outlined in the general regulations elsewhere in this Bulletin. A student must be admitted to a specific doctoral program, but admission does not mean admission to candidacy for the degree, which occurs only after satisfactory completion of the general oral examination.

Summary of Procedures for Doctoral Degree Programs

The student should:

1. Obtain application forms from the Graduate School and apply by submitting all required materials to the Graduate School by the deadlines published in this Bulletin. The Graduate School forwards the application to the appropriate departmental screening committee. The department head or chair then makes a recommendation to the dean of the Graduate School, who sends a letter notifying the applicant of the decision.
2. Apply for an assistantship, if applicable, through the department involved.
3. Become familiar with the requirements for the doctoral degree as published in this Bulletin.
4. Consult with the departmental advisor and become familiar with departmental procedures.
5. Discuss and develop a plan of study during the first semester with an advisor or major professor.
6. Acquire necessary forms at the Graduate School or on the Web at www.grad.auburn.edu.
7. Establish an advisory committee through the major professor and department head or chair. Official appointment of the advisory committee occurs when the Committee Selection Form is approved by the Graduate School.
8. Prepare a plan of study worksheet and have it approved by the advisory committee and department head or chair. Submit the Committee Selection Form.
9. Complete course work, including language requirements, if any, and as detailed in the plan of study worksheet.
10. Arrange for the general written and oral examinations through the advisory committee. After the written examination, schedule the general oral examination at least two weeks in advance using a form obtained from the Graduate School. The Advisory Committee, as identified in the Committee Selection Form, must be approved by the Graduate School prior to scheduling the General Oral Exam.

12. Request graduation application through AU Access no later than mid-term of the semester prior to the semester of graduation.

13. Register for at least one course the semester of graduation.

14. Prepare dissertation and submit a committee-approved first draft to the Graduate School for review and approval by the University Reader, who serves as the representative of the graduate faculty.

15. Study recommendations of the University Reader and make appropriate changes in the dissertation.

16. On approval of the dissertation by the Dean of the Graduate School, arrange for final oral examination.

**Advisory Committee and Plan of Study Worksheet**

After the student has enrolled in the doctoral program, an advisory committee should be selected by the student, major professor, and department/program head or chair. The advisory committee is responsible for developing the student’s plan of study worksheet and conducting the doctoral general and final examinations. It should consist of at least four members of the Auburn University graduate faculty. Additional voting members may be appointed to the committee (including no more than one non-Auburn University faculty member, who must hold the terminal degree in the field). Three of the Auburn University-affiliated committee members, including the major professor, must be members of the graduate faculty at Level 2. The major professor must also be a graduate faculty member in the department/program granting the degree. The formal appointment of the advisory committee occurs when the Committee Selection Form is approved by the Graduate School.

Changes to the plan of study worksheet may be warranted as required by student needs, research interests, and course availability. If so, submit a new Committee Selection Form if there are changes such as transfer courses and/or exceptions.

**Course Requirements**

The minimum number of hours in a doctoral program is 60 semester hours earned through instruction beyond the bachelor’s degree, including 1) a minimum of 30 semester hours graded (e.g. A, B) graduate course work (6000-level and above); and 2) a minimum of 30 semester hours of additional graduate course work (6000-level and above) that may include ungraded courses, 7990 and 8990 and must include at least 10 hours of 8990. Some departments require more than 60 semester hours, and requirements may vary according to a student's background and interest.

The total number of credit hours that may be transferred from another accredited institution toward a doctoral degree varies by program but must be less than 50 percent of the credit hours listed on the Plan of Study. Such transfer credit 1) must fall within the time limits of the degree; and, 2) must be approved by the advisory committee and the dean of the Graduate School. A maximum of four hours of 7990 (Research and Thesis) from a completed master's program may be counted.

All doctoral students must complete a minimum of 10 hours of 8990. Enrollment in 8990 may take place at any time the student and the advisory committee deem appropriate. During any one semester, the number of hours of 8990 in which the student enrolls should reflect the amount of instructional time being spent on the dissertation and the degree to which university resources are being utilized. Students may enroll, during any one semester, for as few as one hour or as many as 16 hours of 8990. Dissertation students submitting their dissertation, awaiting committee review and approval, or taking their final examination must register for 8990 Research and Dissertation in the semester(s) when these steps in the process take place. The requisite 10 hours of 8990 should be included in the plan of study worksheet. No grade is assigned.

The Dean of the Graduate School is authorized to approve alternatives to these course work requirements in exceptional cases and on an individual basis.

**Time Limit**

Programs and departments should conduct annual reviews of doctoral candidates to assess progress toward the completion of the degree. Students are expected to achieve candidacy within six years and to complete all requirements for the degree within ten years. Upon admission to candidacy, the student has four calendar years to complete all remaining requirements for the doctoral degree. The student’s time to completion begins with the earliest completed course approved for inclusion in the plan of study. If unable for any reason to complete the requirements on time, the student may petition, with the approval of the advisory committee, the dean of the Graduate School for a one year extension. Students failing to complete the degree in the allotted time revert to the status of an applicant and must petition, with the approval of the advisory committee, the dean of the Graduate School to retake the oral examination.
Dissertation

A dissertation is required of all candidates for the degree of doctor of philosophy. It shall constitute an original contribution to knowledge. The student conducts the research and prepares the dissertation under the direction of the major professor. Only dissertations prepared according to the Electronic Thesis and Dissertation Guide, available at http://graduate.auburn.edu/current-students/electronic-thesis-dissertation-guide/, are accepted by the Graduate School. Submission of a dissertation is defined as the time at which the first complete draft of such is submitted to the major professor for review. All dissertations are published electronically through AUETD and disseminated by ProQuest. Auburn University reserves the right to make copies of the dissertation, but the student retains all publication rights.

Annual Evaluation of Graduate Teaching Assistants and Doctoral Students

Policy: Effective beginning Fall 2014, the Graduate School will require that each department conduct -- at least on an annual basis -- an evaluation of the progress of each Graduate Teaching Assistant (GTA) and each graduate student enrolled in a doctoral program.

Reporting: Annually, each department will report to the Graduate School, confirming that the evaluation of all GTAs and doctoral students has been completed. In addition, the department will provide the Graduate School with a summary report of all instances in which a GTA or doctoral student has received an unsatisfactory review.

Expectations: Each department will be responsible for developing procedures (if not already in place) for the annual evaluation of the progress of GTAs and doctoral students. Following guidelines for best practices, the review should include at least the following:

- A student self-report and assessment of academic progress; teaching (if applicable); and research (if applicable) [prepared in advance of the review conference];
- A report prepared by the student’s advisor (and preferably at least one other faculty member, e.g., a member of the student’s advisory committee) that assesses the student’s academic progress; teaching (if applicable); and research (if applicable) that identifies strengths and weaknesses, and establishes expectations for the next year. The report may be augmented by reports from teaching supervisors or other members of the student’s advisory committee.
- An opportunity for the student to discuss the report in person.
- A signed copy of the written assessment should be placed in the student’s file and a copy given to the student.

The Doctor of Philosophy Degree

The doctor of philosophy is conferred in recognition of the mastery of a special field of learning as shown by the satisfactory completion of a prescribed course of study and investigation, the successful passing of general examinations covering the major and minor fields, the preparation of an acceptable dissertation reflecting high achievement in scholarship and independent original investigation, and the passing of a final examination on the dissertation and related subjects. The degree is a research degree. It is not conferred merely upon fulfillment of technical requirements, but awarded in recognition of the ability to think and work independently, originally, and creatively in a chosen field. Some departments have special requirements for the degree, and the student will be governed by those, including the ones listed in departmental statements under Courses of Instruction elsewhere in this publication.

General Doctoral Examination

A general examination, often called the “preliminary examination,” is required of all applicants for the degree of doctor of philosophy. It consists of written and oral testing by the student’s advisory committee (or by an examination committee designated by the student’s academic program) in the student’s major and minor. The written portion of the examination does not require approval in advance by the Graduate School. The oral portion, however, does require such approval. Arrangements for the oral examination must be made by application to the Graduate School at least two weeks in advance of the examination. The primary purpose of the general examination is to assess the student’s understanding of the broad body of knowledge in a field of study. The examination also affords the advisory committee an opportunity to review the student’s proposed research and understanding of research methods and literature in the chosen field. If the general examination reveals deficiencies in any of these areas, the advisory committee may recommend remedial work, re-examination, or discontinuation of doctoral study.

The general oral examination should be conducted immediately after the successful completion of the written examination and well before the final examination. At least one complete semester (preferably more than one) must intervene between the general oral and final examinations. The two examinations thus cannot be taken either in the same semester or in consecutive semesters. Some departments have specific requirements for conducting these examinations, and the student should become familiar with these. Successful completion of the oral examination requires unanimous support of the student’s advisory committee. If the general oral examination is failed, a re-examination may be given on recommendation of the committee and approval by the dean of the Graduate
School. Further examinations require exceptional circumstances and approval by the Graduate Council. The student becomes a candidate for the degree on successful completion of the general examination.

**Final Examination**

After the dissertation has been completed (except for minor revisions) and has been approved by the student’s advisory committee, it is submitted to the Graduate School. A University Reader (a member of the graduate faculty [Level 1 or 2] who serves to represent the university’s graduate faculty and the Graduate School) will be appointed to review the dissertation. However, the student’s advisor may request appointment of the University Reader at any time rather than waiting until after the dissertation is drafted. When the Graduate School has received an approved evaluation from the University Reader, the student may apply for the final examination on a form sent by the Graduate School. The application must be filed with the Graduate School at least one week in advance of the final examination. The examination is administered by the student’s advisory committee. The University Reader also attends and participates. The examination, which generally is oral but may be both oral and written, includes the major and minor fields and a defense of the dissertation. Successful completion requires unanimous support of all members of the committee, including the University Reader. Any member of the Graduate Faculty may attend.

**Language Requirement**

Language requirements for graduate degrees vary with departments. The Department of Foreign Languages offers proficiency courses in a number of languages. The department also offers reading proficiency examinations for those students who wish to demonstrate proficiency without taking a course. Such students must apply to the Graduate School for these examinations by the deadline listed in the Graduate School calendar at the beginning of this Bulletin.
Master's Degree Program

- Summary of Procedures for Master's Degree Program
- Advisory Committee
- Plan of Study Worksheet
- Time Limit
- Language Requirement
- Master's Degree Options
- The Thesis Option
- The Non-Thesis Option
- Major and Minor Subjects
- The Master of Arts
- The Master of Science
- Second Master's Degree
- Special or Professional Master's Degrees

The minimum requirements for most master’s degrees can be satisfied in one academic year of two semesters or nine months. In practice, however, many students need three semesters or longer. Certain departments have special requirements as outlined in this Bulletin. In addition, those students who hold assistantships or fellowships, those who engage in time-consuming work off-campus, or those with scholastic deficiencies of any sort cannot meet all requirements in the minimum time. Also, research is unpredictable and frequently requires more time than anticipated. Certain departments offer a master’s degree under two plans, referred to as the Thesis Option and the Non-Thesis Option.

Summary of Procedures for Master's Degree Program

The student should:

1. Obtain application forms from the Graduate School and apply for admission by submitting completed forms and other required materials as outlined in this Bulletin.
2. Apply for an assistantship, if pertinent, with the department involved.
3. Become familiar with requirements for the desired degree as outlined in this Bulletin.
4. Consult with departmental advisor and become oriented to departmental procedures.
5. Plan schedule of study for the first semester with advisor.
6. Establish an advisory committee through the department head or chair and departmental advisor; usually done during the first semester of course work.
7. Prepare a proposed plan of study worksheet in consultation with the advisory committee. Once approved, and at least one semester before graduation, submit the Committee Selection Form to the Graduate School.
9. Fulfill language requirements, if any.
10. Request a graduation application through AU Access no later than mid-term of the semester prior to the semester of graduation.
11. Register for at least one course the semester of graduation.
12. Prepare thesis manuscript, if pertinent.
13. Arrange for final oral examination with the advisory committee.

Advisory Committee

The student works under the direction of an advisory committee composed of three members recommended by the appropriate department/program head or chair. Two must be members of the Auburn University graduate faculty. Note, only a major professor is required for Master’s Non-Thesis, course-only degree options. The committee chair (or one of the co-chairs) must be a graduate faculty member in the department/program granting the degree. This committee will approve the student’s program of study, conduct required examinations and direct the required field project or thesis. Students in a teaching field (e.g., music education, science education,
foreign language education) work under a committee composed of at least two members from the College of Education and one
member from a related academic field. The names of the committee members are submitted through the Committee Selection Form.

Plan of Study Worksheet

Early in the graduate program, each student should confer with the appropriate departmental advisor or major professor to select
courses and discuss research interests. Use the program or department's plan of study worksheet to plan for courses, transfer courses,
exceptions, requirements, and/or graduation. Once approved, and at least one semester before graduation, submit the Committee
Selection Form to the Graduate School. The student is responsible for carrying out the planned program and for asking the major
professor to make necessary changes.

Time Limit

All graduate work toward a master’s degree must be completed within a period of six calendar years. The student’s time to completion
begins with the earliest completed course approved for inclusion in the Plan of Study.

Language Requirement

Some departments require a reading knowledge of one foreign language. These requirements are outlined in the departmental
statements later in this section. Arrangements to take the foreign language examination should be made with the student’s major
professor and the head or chair of the department. The student must apply at the Graduate School by the deadline for each semester
listed in the calendar.

Master’s Degree Options

The following general regulations are minimum requirements. The professor or committee in charge of a student’s work may require
more than the specified minimum in order to achieve a well-rounded program. All programs require a minimum of 30 semester hours of
graduate courses, 6000-level or above.

The Thesis Option

The master of arts, master of science and master of industrial design are offered under the thesis option. Thesis students register for
7990 Research and Thesis in semesters when working on the thesis, when submitting, defending or awaiting final approval of the
thesis, and when taking final examinations.

Major and Minor Subjects

A student under the thesis option must earn a minimum of 30 semester hours, of which at least 21 semester hours must be in a major
area of concentration. Depending on departmental requirements or the wishes of the student’s advisory committee, the remainder of
the course work may be taken within the major field or in a separate but closely related area. Specific requirements are set forth in this
Bulletin.

If a student has not met all undergraduate pre-requisites in any field chosen for major or minor work, these should be scheduled as
soon as possible, preferably before graduate work begins. The major professor can indicate these on the student’s plan of study
worksheet.

The topic selected for the thesis must be approved by the student’s major professor and advisory committee. The student conducts the
research and prepares the thesis under the direction of the major professor. The course, Research and Thesis, is number 7990 in all
departments. The student must register for a minimum of four credit hours of this course but may register for as many hours as desired.
No more than six hours may be counted toward meeting degree requirements. The student may register for one or more hours at a
time. No grade is assigned for this course.

graduate.auburn.edu/current-students/electronic-thesis-dissertation-guide/. Submission of a thesis is defined as the time at which the
first complete draft of such is submitted to the major professor for review. The Graduate School accepts only theses prepared according
to the Guide. Refer to the Approval Process section in the Guide to have a final format check done. The Graduate School Calendar lists
the deadline for acceptance of final approved theses by the Graduate School each semester. If the electronic thesis needs corrections,
the student’s graduation may be delayed at least one semester. Auburn University reserves the right to make copies of the thesis, but
the student retains all publication rights. All theses are published electronically through AUETD and disseminated through ProQuest.

At the discretion of the program, students may be required to pass a comprehensive examination independent of the required
thesis defense. If a program requires a comprehensive examination, the program will publish and submit to the Graduate School a
description of the scope and form of the assessment (e.g., comprehensive oral or written examination) and the process for appeal or re-examination should the student fail the examination.

The major professor will schedule the thesis defense not later than the deadline indicated in the Graduate School calendar. The thesis defense should be open to members of the graduate faculty as visitors. Successful completion of the thesis defense requires the unanimous support of all members of the advisory committee. If a student fails the thesis defense, one re-examination may be given on the recommendation of the advisory committee and approval by the Dean of the Graduate School. Further examinations will be allowed only under exceptional circumstances and with approval of the Graduate Council.

The Non-Thesis Option
At the discretion of the program, students may be required to pass a comprehensive examination. If a program requires a comprehensive examination, the program will publish and submit to the Graduate School a description of the scope and form of the assessment (e.g., comprehensive oral or written examination) and the process for appeal or re-examination should the student fail the examination. Non-thesis graduate students who complete a special project must register for 7980 in semesters when working on the project. Non-thesis students requiring only a final examination register for GRAD 7000 in the semester when the exam is taken. Credit hours for 7990 Research and Thesis cannot be counted toward graduation requirements for non-thesis degree programs.

The Master of Arts
The master of arts is offered in communication (thesis and non-thesis option), English (thesis and non-thesis option), history (thesis and non-thesis option), sociology (thesis and non-thesis option) and Spanish.

The Master of Science

Second Master’s Degree
For a second master’s degree, the student fulfills all requirements applicable to any other master’s degree, including the thesis, if appropriate. The student may, on recommendation of the advisory committee, transfer a limited number of credit hours from the previous master’s degree. At least 24 semester hours, or 50% of the total hours required for the degree (whichever is greater) must be unique to each degree and be taken at Auburn University.

Special or Professional Master’s Degrees
These special or professional degrees are offered: master of accountancy, master of aerospace engineering, master of agriculture (agricultural economics, agronomy and soils, animal sciences, entomology, horticulture, plant pathology, and poultry science), master of applied mathematics, master of aquaculture, master of biological studies, master of building construction, master of business administration, master of chemical engineering, master of civil engineering, master of communication disorders, master of community planning, master of design build, master of education (curriculum and teaching, educational foundations leadership and technology, health and human performance, and special education, rehabilitation, and counseling school psychology), master of electrical engineering, master of forestry, master of Hispanic studies, master of industrial design (thesis and non-thesis option), master of industrial and systems engineering, master of landscape architecture, master of management information systems, master of materials engineering, master of mechanical engineering, master of probability and statistics, master of public administration, master of social work, master of software engineering, and master of technical and professional communication.
Specialist in Education Degree

- Admission
- Advisory Committee
- Requirements for Degree
- Committee Selection Form
- Time Limit

This degree is designed for professionals in education and human services areas who want increased competence in a field of specialization. Areas of specialization are offered in the various departments in the College of Education.

Admission

Scholarship, interpersonal orientation, and potential for leadership are considered in the screening procedure. Appropriate experience in teaching or a leadership position in education or a human services area is requisite. All work beyond the baccalaureate must have been of high quality with a GPA of at least 3.0 on a 4.0 scale.

Advisory Committee

The specialist student works under the direction of an advisory committee composed of three members recommended by the appropriate department/program head or chair. All must be members of the Auburn University graduate faculty. The committee chair (or one of the co-chairs) must be a graduate faculty member in the department/program granting the degree. This committee will approve the student’s program of study, conduct required examinations, and direct the required field project. Students in a teaching field (e.g., music education, science education, foreign language education) work under a committee composed of two members from the College of Education and one member from a related academic field.

Requirements for Degree

A minimum of 30 semester hours beyond the master’s degree must be taken in a program approved by the student’s advisory committee and can be identified through a plan of study worksheet. Professional educators pursuing sixth-year certification are responsible for adapting the plan of study worksheet to requirements in the states in which they will need advanced certification. A relevant field project, approved in advance by the student’s committee, must be completed under the supervision of the major professor. A final written report on the field project will be submitted to the advisory committee by the student. The advisory committee will conduct a final examination based on the area of specialization and the field project.

Committee Selection Form

Submit the Committee Selection Form once coursework is approved, as identified on the plan of study worksheet. The Committee Selection Form should be submitted to the Graduate School at least one semester before the semester in which the student graduates. No student will be permitted to graduate who fails to submit a Committee Selection Form and graduation check to the Graduate School prior to the semester of expected graduation. Graduation day is the official last day of each semester and is the deadline for submitting a Committee Selection Form to graduate the following semester.

Time Limit

All graduate work toward an Education Specialist degree must be completed within a period of six calendar years. The student’s time to completion begins with the earliest completed course approved for inclusion in the plan of study worksheet.

Points of Contact

GEORGE T. FLOWERS, Dean
MARIA WITTE, Associate Dean

The Graduate School is open 7:45-11:45 a.m. and 12:45-4:45 p.m., Monday through Friday.
Telephone: (334) 844-4700. Fax: (334) 844-4348.
E-mail: gradadm@auburn.edu
Web: www.grad.auburn.edu
Mailing Address: 106 Hargis Hall, Auburn, AL 36849-5122.

Calendar

The university operates on the semester system. The Graduate School calendar at the beginning of this Bulletin is also available at the Graduate School and contains the dates of various important deadlines. It should be followed carefully.

Graduate Study and University Employees

An Auburn University faculty member or employee may pursue a graduate degree with the approval of the head or chair of the employing department and the dean of the employing school or college. Inquiries should be made to the dean of the Graduate School.
**Academic Programs and Curricula**

An academic program is an organized plan of study which, when successfully completed, is recognized by the awarding of a degree. It includes all courses and related activities required by the university and those required by a school, college, department or interdisciplinary program. At Auburn University, the minimum number of hours in a doctoral program is 60 semester hours earned through instruction beyond the bachelor’s degree, including 1) a minimum of 30 semester hours graded (e.g., A, B) graduate course work (6000-level and above); and 2) a minimum of 30 semester hours of additional graduate course work (6000-level and above) that may include ungraded courses 7990 and 8990 and must include at least 10 hours of 8990. Some departments require more than 60 semester hours and requirements may vary according to a student’s background and interest. The minimum number of hours in a master’s degree program is 30 semester hours of courses, 6000-level and above.

A graduate program option is a formally approved variation of an academic program by the offering department which meets objectives that may be more specifically focused. These additional objectives are integrated with the basic program. A formal graduate program option must preserve the integrity of the academic program of which it is a variant. Specifically, the formal program option must 1) be in a recognized sub-field of the discipline; and 2) share at least half of the total credits of the degree program. Only formally approved graduate program options are designated on the transcript. Other less formal variants, which may carry the name of “track,” “concentration,” “emphas,” or similar terms, are not designated on the transcript; however, all academic programs and designated variations (whether called “options,” “tracks,” “concentrations,” “emphas” or some similar term) must be approved by the Alabama Commission on Higher Education (ACHE).

A graduate minor is an organized sequence or cluster of courses offered by a department or interdepartmental program. Not all departments or interdepartmental programs offer a minor. At Auburn University, the term graduate minor designates those sequences or clusters of courses that have been formally proposed as minors by departments or interdepartmental programs and approved by the Graduate Council. The minimum number of semester hours in a minor is nine, all of which must be in courses at the 6000-level or above and must be completed at Auburn University.

**Accelerated Bachelor’s/Master’s Degree Plan**

The Accelerated Bachelor’s/Master’s Degree Plan allows Auburn students in some academic programs to count up to nine approved hours (in a 30-35-hour master’s program) or 12 approved hours (in a 36-hour or greater master’s program) toward both a bachelor’s and a master’s degrees. These hours must be at the graduate level.

To be considered for admission, students must have completed at least 45 credit hours and no more than 96 credit hours, including advanced placement credits. Transfer students must have completed at least 24 credit hours at Auburn University. All students must have a cumulative GPA of 3.0/4.0 or higher on course work completed at Auburn. Individual graduate programs may set higher standards or require additional criteria for admission to the accelerated degree program.

Students must complete an “Application for Admission to the Accelerated Bachelor’s/Master’s Degree Plan,” and work with a graduate advisor in the degree-granting department to complete an approved Plan of Study, including: a) a list of the courses that count toward both the undergraduate and graduate degree; and b) the projected dates for the completion of the bachelor’s and master’s degrees. Students in the Honors College remain eligible to graduate with Honors while participating, and should consult with an Honors advisor.

Students must maintain a cumulative GPA (CGPA) of 3.0/4.0 or higher on Auburn University coursework; if the student completes the bachelor’s degree requirements with a cumulative GPA of less than 3.0/4.0 at Auburn, the student cannot double-count credit hours and is terminated from the program.

Students must apply for admission to the Graduate School by the prescribed deadline. Admission to the Accelerated Degree Plan does not guarantee admission to the Graduate School. Students cannot opt to bypass the bachelor's degree.

Students may withdraw voluntarily from the Accelerated Plan at any time. Students must notify, in writing, the graduate program officer and the coordinator/director of undergraduate studies in their respective departments. Students who withdraw from the program voluntarily or because they do not meet program requirements will not be awarded graduate credit for double-counted courses. Students may contact their major program to see if it participates or visit the Graduate School’s website for a listing of current ABM plans: http://grad.auburn.edu/abm.html.

**Graduate Study and University Employees**

An Auburn University faculty member or employee may pursue a graduate degree with the approval of the head or chair of the employing department and the dean of the employing school or college. Inquiries should be made to the dean of the Graduate School.
Class Attendance

Students are expected to attend all their scheduled classes. College work requires regular class attendance as well as careful preparation. Specific policies regarding class attendance are the prerogative of individual faculty members. Faculty shall inform each class in writing at the beginning of the course regarding the effect of absences on the determination of grades.

The student is expected to carry out all assigned work and to take examinations at the class period designated by the instructor. Failure to carry out these assignments or to take examinations at the designated times may result in an appropriate reduction in grade, except as provided below.

Instructors shall determine the policy regarding grading which they feel is best for the course. This policy shall be presented to the class, in writing, at the beginning of the term and will govern the actions of the instructor in the course.

Arrangement to make up missed major examinations (e.g. hour exams, midterm exams) due to properly authorized excused absences (as defined by the Student Policy eHandbook) shall be initiated by the student within one week from the end of the period of the excused absence. Normally, a make-up exam shall occur within two weeks from the time that the student initiates arrangements for it. Instructors are encouraged to refrain from giving make-up examinations during the last three days prior to the first day of final examinations. The format of make-up exams and opportunities for students to make up work other than major examinations are at the discretion of the instructor whose make-up policies should be stated in writing at the beginning of the term. Instructors are expected to excuse absences for:

1. Illness of the student or serious illness of a member of the student's immediate family. The instructor may request appropriate verification.
2. The death of a member of the student's immediate family. The instructor may request appropriate verification.
3. Trips for members of the student organizations sponsored by an academic unit, trips for university classes, and trips for participation in intercollegiate athletic events. When feasible, the student must notify the instructor prior to such absences, but in no case more than one week after the absence. Instructors may request formal notification from appropriate university personnel to document the student's participation in such trips.
4. Religious holidays. Students are responsible for notifying the instructor in writing of anticipated absences due to their observance of such holidays.
5. Subpoena for court appearance.
6. Any other reason the instructor deems appropriate.

If the instructor does not appear within 20 minutes after the designated class hour, it may be assumed the class is canceled.

It is university policy that all classes will meet as scheduled on the last day before and the first day after holiday periods designated by the university.

Unresolved problems regarding class attendance or procedures should be referred to the University Student Academic Grievance Committee.

Examinations

Examinations are classified as (1) final examinations at the end of each term; (2) special examinations; and (3) other course examinations as determined by the instructor.

Announced tests in graduate courses will be administered at a regularly scheduled meeting of the course. Exceptions to this regulation may arise in specialized courses requiring performance or oral tests, and in multiple-sectioned laboratory classes requiring practical laboratory tests. Faculty having sound reasons for scheduling tests at times other than regularly scheduled meeting times are to obtain approval from the department head prior to the beginning of the term, and are to present a written schedule of these changes to the class during the first few days of the term. Rescheduled tests are not to interfere with other scheduled academic endeavors of the students involved, and an appropriate reduction in regularly scheduled class time is to be given to compensate for the rescheduled test period.

Student Academic Grievance Policy

The Student Academic Grievance policy, which appears in full in the Student Policy eHandbook, is designed to resolve academic grievances of students which result from actions of faculty or administrators.
Grades

Grade Definitions

Final passing grades are A, superior; B, good; C, acceptable; D, passing; and S, satisfactory. Final failing grades are F, failure; FA, failure for excessive absences; U, unsatisfactory; NR, no grade reported; and WF, officially dropped with permission of the student’s dean but failing at time of withdrawal and is calculated into the GPA. (For the definition of W, see the following section on Grade Assignment for Class Withdrawal.)

A TD, thesis and dissertation research credit, is assigned to courses 7990 Research and Thesis and 8990 Research and Dissertation.

A grade of IP (In Progress) is used by professional programs, specifically Pharmacy and Veterinary Medicine, for those courses that extend beyond the end of the regular term. Students who are making progress toward completion of their work but have not completed all course requirements may receive the IP grade. The IP grade is not calculated in the GPA until the grade is cleared.

Grades of SA and SN may be assigned in certain specialized classes in which progress to the next level of a program depends on performance in the class. In such cases, a grade of SA in a particular course may be required for advancement. A grade of SN will give the student appropriate earned credit, but will not allow the student to advance in that program.

An NR is assigned systematically when the instructor does not assign a letter grade.

Faculty Policy on Assigning Grades of Incomplete (excludes Distance Education courses)

Effective Fall 2007, student (or appropriate representative) must contact the instructor in writing prior to the submission of final course grades to request a grade of Incomplete due to documented reason (illness/death in family/etc.).

If a student does not request an IN, the instructor should grade the student based upon the percentage of course work completed to date and using a 0 for any exams/assignments not completed.

To be eligible for a grade of IN, the student must have completed (and have passed) more than half of all class assignments for the semester or summer term.

The instructor must fill out the Incomplete Grade - Memorandum of Understanding form, indicating:

- reason for the IN,
- percent of course work currently completed at the time of submission and the grade average on that work,
- detailed information about the additional work needed to complete the course,
- timeline to complete the work (6 months maximum; preferably sooner), and
- grade the student should be assigned if the additional work is NOT completed by the deadline set for the completion of the work; the missing work is calculated as a 0.

Grades of Incomplete automatically become the grade identified by the instructor, if not cleared within 6 months.

If the instructor assigning a grade of IN leaves Auburn University, the Department Head should make a reasonable attempt to contact the former instructor and then assign a grade based upon the work presented by the student and the information provided on the Incomplete Grade - Memorandum of Understanding form.

Once an IN has been changed to another grade it may not be changed, in the future, to a different grade without approval of the provost.

Documentation of class work must be maintained by the student; the Incomplete Grade-Memorandum of Understanding form must be maintained by the student, faculty and the Office of the Registrar. For instructors who submit the IN Grade forms to the Office of the Registrar prior to course grades being rolled to academic history, the IN will be reflected on the electronic grade roster; faculty will be unable to change that grade on the electronic grade roster.

Instructors should NOT enter a grade on the electronic course roster for those students who are to be assigned the IN grade but leave the grade blank. The system will automatically convert blanks to NR. Once the IN Grade form is received by the Office of the Registrar, that office will convert the NR to the IN grade.

It is the responsibility of the instructor to send a copy of the Incomplete Grade - Memorandum of Understanding form to the Office of the Registrar.
When the student has completed the outstanding work, it is the responsibility of the instructor to initiate the change of grade form and send it to the appropriate department/dean's office for additional signatures and transmittal to the Office of the Registrar.

These policies apply to all students in undergraduate and graduate courses.

**Faculty Policy on Grade Changes (includes NR; Excludes IN)**

Grades should be accurate when posted.

- Any change of letter grades (A, B, C, D, F, S, U, FA, and NR) should be made only in extraordinary situations.
- Any grade changes must be completed within 6 months of completion of the course.
- Any grade changes outside of this timeframe must also be approved by the provost.
- A final grade may be changed only by the written request of the instructor, with approval of the department head and dean, submitted to the registrar.
- A grade of F and additional penalties may be assigned for academic dishonesty. See the Student Academic Honesty Code section in the Tiger Cub for further information.

**Grade Assignment For Class Withdrawals**

A student who withdraws from a course prior to the 15th class day during a semester (or the fifth class day of summer term) will have no grade assignment; however, from the 15th class day during a semester (or the fifth class day of summer term) through mid-semester (mid-term) a W (Withdrawn Passing) grade will be recorded for the course. A course may be dropped with a W after mid-semester only under unusual conditions and only with permission from the student’s dean. When approval for dropping the course under such circumstances is granted, a W may be assigned only when the instructor indicates that the student is clearly passing the course. Otherwise, a grade of WF (Withdrawn Failing) is assigned. All failing grades are calculated into GPA as grades of F.

**Grade Average and Quality Point Computation**

A 4.0 grade scale is used. An A equals 4.0; B, 3.0; C, 2.0; D, 1.0; and F equals 0.0. Only course work attempted at Auburn University is used in determining the grade report average and continuation-in-residence requirements. S and U grades do not enter into grade-point computations.

**S-U Grading**

Grades of S (Satisfactory) and U (Unsatisfactory) may be assigned only to courses approved to be graded S-U, and courses elected under the S-U option.

A graduate student may enroll in undergraduate courses, except for 6000-level courses taken for graduate credit, under the S-U option on the major professor’s recommendation.

Students are not permitted to change from S-U grading to conventional grading or vice versa after the fifteenth class day of the fall and spring terms or the fifth class day of any summer term.

**Grade Reports**

Grade information may be obtained via tigeri at the Auburn University homepage, www.auburn.edu.

**Credit for Directed Studies**

The university policy on directed studies was approved effective August 2006. Auburn University offers directed readings courses, also referred to as special problems courses or independent studies, in accordance with established policy.

Directed readings courses allow in-depth study of a particular subject by a student who is well into her or his major and, in extraordinary circumstances, accommodate scheduling issues when no other remedy is available.

Directed readings courses should not normally be used as replacements for required courses or as a solution to routine scheduling problems.

Approval to Teach Course - A standard Approval for Independent Study/Directed Readings Form, available through the Office of the Provost website, will specify the necessary approvals and serve as the vehicle for obtaining them.

**Classified or Proprietary Research**

No thesis or dissertation should be based exclusively on a proprietary or classified research project, nor should a thesis or dissertation include proprietary or classified information. Any graduate student and advisor engaged in such research should identify an alternative
Research Involving Humans

Auburn University established the Institutional Review Board for the Use of Human Subjects in Research (IRB) to evaluate research for compliance with the guidelines and policies of the U.S. Department of Health and Human Services, the Public Health Service, the Food and Drug Administration and other federal, state and local regulations. All research using human subjects – whether it is conducted by faculty, staff or students – must be approved in advance by the IRB, regardless of the source of funding, lack of funding or any other consideration. Research involving human subjects not approved in advance may be disallowed and may incur severe penalties for non-compliance with institutional policy. Information and review forms may be obtained from the Administrator for Special Programs, 307D Samford Hall, (334) 844-5966.

Activities Involving Animals

Auburn University’s Animal Resources Program requires compliance with the Animal Welfare Assurance negotiated with the Office of Protection from Research Risks/National Institutes of Health (OPRR/NIH). A major part of that Assurance involves the Institutional Animal Care and Use Committee (IACUC) that ensures compliance with the Assurance, the policies of the U.S. Department of Health and Human Services, the U.S. Department of Agriculture and all other federal, state and local regulations concerning care, treatment and use of animals. All activities, whether teaching, research, production or display of animals, and whether or not the activity is funded, must be approved in advance by the committee. The use of animals for any purpose that is not approved in advance by the IACUC may involve severe penalties for non-compliance with institutional policy and could jeopardize the university’s Animal Welfare Assurance filed with the OPRR and the NIH. Information may be obtained from the Director of Animal Resources, (334) 844-5667.

Academic Engagement

Any graduate student enrolled in a degree program culminating in a thesis or dissertation will directly engage in research and/or creative scholarship with the major professor, will have access to the tools needed for the research/scholarly activity, will be immersed in the culture of graduate education, will engage in the professional activities of the discipline, and will complete the research/scholarly activity in a reasonable period of time.

Academic Integrity and Student Conduct

Graduate students at Auburn University are expected to adhere to established standards of academic integrity, personal conduct, and professional conduct. The primary code of conduct is detailed in the Auburn University Code of Student Discipline.

Academic units may also define and publish standards appropriate to their disciplines as well as describing the processes for resolving disputes and appealing decisions. Students found in violation of policies defining academic integrity, personal conduct, and professional conduct may be subject to dismissal from the Graduate School.

AUETD Publication and Access Policy

AUETD is an online database of electronic theses and dissertations (ETDs) submitted by Auburn University students in partial fulfillment of the university’s graduate degree requirements. Its purpose is to make Auburn University’s ETDs widely available to the public and easy to find online. The ETDs in the AUETD database are indexed by Google and other internet search engines and may appear in search results for those search engines. Graduate students who want to limit access temporarily to the full text of their ETD must choose one of the limited access options during the ETD submission process (see options below). Students who choose to limit access to their ETD should be aware that basic bibliographical information about their ETD (including the abstract) will appear in the AUETD database and that the full text of their ETD will become publicly available immediately upon the expiration of the time limit set for limited access. Students who have questions or concerns about this policy are encouraged to contact Clint Lovelace at (334) 844-4112 BEFORE submitting their ETD to AUETD.

Limited Access Options

1. Unlimited access: Publication in AUETD with unlimited access is immediate and irreversible. Once a thesis/dissertation is published in AUETD, access via the world-wide-web may not be denied or reversed.

2. Limited access: Upon request, students may limit access to their thesis/dissertation only to users with a valid AU userid and password for a limited time period. Upon request, limited access is granted for a period of time not to exceed: i) six months; ii) one year; iii) two years; or iv) five years. Unless the student petitions to extend the period of limited access, the thesis/dissertation will be published with unlimited access immediately upon the expiration of the time period.
3. **Withheld access**: Upon request, students may withhold access to their thesis/dissertation to all users for a limited time period. This means that all users, including the students and their advisory committees are denied access to the thesis/dissertation in AUETD. Upon request, withheld access is granted for a period of time not to exceed: i) six months; ii) one year; iii) two years; or iv) five years. Unless the student petitions to extend the period of limited access, the thesis/dissertation will be published with unlimited access immediately upon the expiration of the time period.

4. **Copyright.** If students plan to copyright some of all of their thesis/dissertation, these plans should be discussed in advance with the major professor, especially if the thesis/dissertation includes shared data.

### Online Offerings of Thesis and Dissertation Course Work

Recognizing the importance of global research and professional opportunities, international travel, and the wide-spread availability of technologies that bring remote research and scholarly partners together, the Graduate School allows thesis and dissertation coursework to be completed by means of online education in approved courses: Research and Thesis (7996) and Research and Dissertation (8996). Graduate students engaged in on-campus study must not be enrolled in Research and Thesis (7996) or Research and Dissertation (8996). At the time of enrollment, the major professor certifies compliance with this requirement.

### General Regulations

Regulations listed here represent the minimums of the Graduate School. However, individual departments may impose more stringent requirements and students will be governed by them.

### Exceptions to Graduate School Policies

Exceptions may be made to policies of the Graduate School under special circumstances. A person wishing to request an exception should write a letter to the dean of the Graduate School stating the nature of the request and the reasons for it. If a student is making the request, the letter should be submitted first to the major professor, who will write a letter of recommendation. Both letters go to the department head. If a member of the faculty is making the request, the letter goes to the department head, who will write a letter of recommendation. All letters go to the associated College/School dean for approval. Letters and comments then are forwarded to the dean of the Graduate School. A request for an extension of time to meet degree requirements must be justified. It must be accompanied by a proposed schedule for completion and assurance that the student is current in subjects included in the plan of study.

### Graduate Certificate Definition

**Graduate certificate programs** constitute an integrated curriculum, but not necessarily one aligned with a specific academic program. They may exist within programs, bridge programs or offer content widely useable across programs. Graduate certificate programs consist of a minimum of 9 and maximum of 21 hours of graduate-level course work. The course work may be graded or non-graded. A minimum GPA of 3.0 must be maintained on all graded course work in the certificate program.

Graduate certificate programs pertain to graduate students, whether degree seeking or non-degree seeking. A graduate certificate is distinguished from graduate minors in two primary ways. First, graduate minors are intended exclusively for degree seeking graduate students. Graduate certificates may be directed to both degree seeking and non-degree seeking students. Second, there are limits to the number of course credits taken in pursuit of graduate minors that may be applied to a graduate degree (e.g., masters degrees require 21/30 hours to be in the major discipline). The limiting factor in the application of certificate course credits to graduate degrees is departmental policy or advisory committee recommendations. As an example, if a department developed a certificate program intended only for non-degree seeking students, that department could prevent those certificate courses from applying to a degree. However, in the absence of departmental policy, and with the approval of a student's advisory committee, both degree seeking and non-degree seeking students (if they later change status to degree seeking) may include all certificate-related courses toward degree requirements.

When new graduate certificates are proposed, they undergo the full process of curriculum review. This same process applies regardless of delivery method (i.e., on campus and distance). Special requirements for applicants may be negotiated between the certificate proposing program and the graduate school at the time the program is proposed. Consistent with Graduate School policy related to the Masters and Specialist degrees, all requirements for a graduate certificate must be accomplished within 6 years unless departmental criteria for the certificate necessitate a longer time. Certificate Programs that require an exception to this 6-year time limit must be approved by the Graduate Council. Not only must the content of the proposed certificate be appropriate, but the availability of a viable group of graduate faculty to teach the courses in the certificate must be documented. Proposals for graduate certificate programs must identify a specific person who will serve as coordinator. Certificates that bridge departments must have a home department to which all certificate applicants apply. But each affiliated department must also designate a coordinator. Students who fulfill all
requirements for a graduate certificate will have the certificate noted on their transcript when the Graduate School receives a memo signed by the certificate coordinator documenting the successful completion of all certificate requirements.

**Graduate certificates** are to be differentiated from professional development certificates. No comprehensive definition of the latter is offered here, however, in brief, completion of a professional development certificate does not require admission to the Graduate School and is awarded based on participation in non-credit work. The definition of graduate certificate does not limit the ability of departments or other units from defining, implementing, or awarding professional development certificates. Professional development certificates are not subject to the Auburn University curriculum process, nor are their achievement noted on Auburn University transcripts.

**Graduate Curriculum Model Change**

When a graduate curriculum model is changed, the changes apply only to students who matriculate after the approval of the changes and to currently enrolled students who voluntarily choose to complete the requirements of the new curriculum model. In no case, for students who are continuously enrolled, will the changed curriculum compel them to accumulate additional hours and grade points to graduate. Curriculum model changes are to be implemented at the beginning of the semester in which the largest number of new students typically enroll (fall semester for most programs). Graduate students who have not been enrolled at Auburn University for two or more semesters and who are returning to the same curriculum may be subject to different university, college, school or departmental requirements than those which existed when continuous enrollment ceased.

**Institutions with Special Affiliations**

By special arrangement with Florida A & M University, the Graduate School application fee is waived for students applying from this institution.

**Oak Ridge Associated Universities**

Auburn University has been a sponsoring institution of the Oak Ridge Associated Universities (ORAU) since 1946. ORAU is a private, not-for-profit consortium of 82 colleges and universities and a management and operating contractor for the U.S. Department of Energy (DOE) with principal offices located in Oak Ridge, Tennessee. Founded in 1946, ORAU provides and develops capabilities critical to the nation’s technology infrastructure, particularly in energy, education, health and the environment. ORAU works with and for its member institutions to help faculty and students gain access to federal research facilities; to keep members informed about opportunities for fellowship, scholarship and research appointments; and to organize research alliances among our members in areas where their collective strengths can be focused on issues of national importance.

ORAU manages the Oak Ridge Institute for Science and Education (ORISE) for DOE. ORISE is responsible for national and international programs in science and engineering education, training and management systems, energy and environment systems and medical sciences. ORISE’s competitive programs bring students at all levels, K-12 through postgraduate, and university faculty members into federal and private laboratories. Other ORAU activities include the sponsorship of conferences and workshops, the Visiting Scholars program and the Junior Faculty Enhancement Awards. Contact Dr. Bryan A. Chin, (334) 844-4784, for more information about ORAU programs.

**Graduate Program Option Definition**

A graduate program option is a formally approved variation of an academic program by the offering department which meets objectives that may be more specifically focused. These additional objectives are integrated with the basic program. A formal graduate program option must preserve the integrity of the academic program of which it is a variant. Specifically, the formal program option must 1) be in a recognized sub-field of the discipline; and 2) share at least half of the total credits of the degree program. Only formally approved graduate program options are designated on the transcript. Other less formal variants, which may carry the name of “track,” “concentration,” “emphases,” or similar terms, are not designated on the transcript; however, all academic programs and designated variations (whether called “options,” “tracks,” “concentrations,” “emphases” or some similar term) must be approved by the Alabama Commission on Higher Education (ACHE).

**Two-Campus Studies**

A student seeking a graduate degree at Auburn University, Auburn University at Montgomery, the University of Alabama, the University of Alabama at Birmingham, or the University of Alabama at Huntsville may take up to half the course work at another of these institutions. The courses taken must be approved in advance by the student’s Advisory Committee and the respective graduate deans. All credit must be earned at the two institutions in which the student is working, and none may be transferred from another institution. Students engaged in two-campus studies are required to meet the requirements of continuous enrollment at Auburn University.
Policy on Teaching Graduate Courses

The Auburn University Handbook states, "Lecturers and senior lecturers are not eligible for graduate faculty status." However, Lecturers and senior lecturers who otherwise meet graduate faculty criteria (level 1) for the department may be granted permission to teach graduate-level courses and/or serve on graduate student committees on an exceptions basis under the following conditions:

1. A Lecturer/Senior Lecturer desiring to teach a graduate course or serve on a graduate student committee should make a written request to the department chair.
2. If this request is acceptable to the majority of the department's tenure and tenure track graduate faculty and chair, a memo requesting such authorization will be submitted to the Graduate Dean for review and approval.
3. Authorization may be requested for teaching only, committee service only, or both.
4. No more than one Lecturer/Senior Lecturer may serve on a graduate student committee.
5. Authorization must be requested for each semester a graduate course is to be taught by a given Lecturer/Senior Lecturer.
6. Authorization must be provided each time that a Lecturer/Senior Lecturer serves on a graduate student committee.
7. The department will provide the faculty member with resources appropriate to the graduate service being provided. What constitutes appropriate support would vary by department, but the following points would generally apply:
   a. Service on a graduate committee should not simply be added on top of current service if the Lecturer is already performing at least 5% service and has an appointment that is supposed to be 95% teaching and 5% service. If a Lecturer serves on a graduate committee, other forms of service should be reduced, or the Lecturer should receive a higher percent of his or her appointment for service.
   b. In most cases, teaching a graduate course requires being completely up-to-date with the most recent research in the field. Appropriate support might include a course release for a Lecturer teaching the course for the first time.
   c. A lecturer should not teach a graduate course as an overload class.

Student Records

Confidentiality of Student Records

The university recognizes that the maintenance of student information and educational records is necessary and vital to assist the student's education and development and to provide opportunities for university research and policy formulation. The university recognizes its obligation to exercise discretion in recording and disseminating information about students to ensure that their rights of privacy are maintained.

The university will furnish annual notification to students of their right to inspect and review their educational records; the right to request amendment of educational records considered by them to be inaccurate or misleading or that violate privacy or other rights; and of their right to a hearing should the university decline to amend such records. This annual notice will be published in the Auburn University Bulletin and an electronic notification is sent to each active Auburn student.

The following guidelines have been developed to ensure the privacy rights of students. For the purposes of this policy statement a student is defined as an individual who has been admitted and has been in attendance in a component unit of the university. Classification as a student in one component unit of the university (e.g., an undergraduate program) does not imply that the person has been accorded the rights outlined below in other component units (i.e., graduate school, professional schools, branch campus).

Student Access to Records

Auburn University’s permanent student education record consists of one or more of the following: the official transcript of grades, competency evaluations, and any narrative evaluations. This is in accordance with guidelines established by the American Association of Collegiate Registrars and Admissions Officers and the State of Alabama policies on Retention of Records.

Students have the right to be provided a list of the type of educational records maintained by the university which are directly related to the student; the right to inspect and review the contents of these records; the right to obtain copies of these records; the right to a response from the university to reasonable requests for explanation and interpretation of these records; the right to an opportunity for a hearing to challenge the content of these records; and if any material or document in the educational record of a student includes information on more than one student, the right to inspect and review only the part of such material or document as relates to the student.

Students do not have access to financial records of their parents; confidential letters and statements of recommendation which were placed in the educational record prior to Jan. 1, 1975, provided such letters or statements were solicited or designated as confidential and are not used for purposes other than those for which they were specifically intended; confidential recommendations, if the student
signed a waiver of the right of access, respecting admission, application for employment, and the receipt of an honor or honorary recognition.

Students do not have access to instructional, supervisory or administrative personnel records which are not accessible or revealed to any other individual except a substitute; Campus Security records which are maintained apart from educational records, which are used solely for law enforcement purposes, and which are not disclosed to individuals other than law enforcement officials of the same jurisdiction; employment records except when such employment requires that the person be a student; and the Alumni Office records.

Students do not have access to physical or mental health records created by a physician, psychiatrist, psychologist or other recognized professional acting in his or her capacity or to records created in connection with the treatment of the student under these conditions which are not disclosed to anyone other than individuals providing treatment. A physician or appropriate professional of the student’s choice may review these records.

**Procedures for Access**

The Office of the Registrar has a complete list of educational records maintained by the university which students may obtain. Students should contact the appropriate office to inspect and review their records. An office may require that a university official be present when a student inspects and reviews his or her educational records. Any questions concerning a student’s access to records should be directed to the registrar.

**Amending Educational Records**

Students may request that any information contained in their educational records which they consider to be inaccurate, misleading, or in violation of their privacy or other rights be amended or deleted from the records. (A grade or other academic scores may not be amended, except that the accuracy of recording the information may be challenged.)

Students who request that information in their records be amended should first direct their request to the official with primary responsibility for the information on the record. If the matter is not resolved to their satisfaction, students should direct their requests to the official’s dean or division head. If the matter is not resolved to their satisfaction, they may request a formal hearing.

**Right to a Formal Hearing and Procedures for Decision**

Students may request formal hearings to challenge information contained in their educational records. The hearing will be held in a reasonable time (not to exceed 45 days) and in a reasonable place. Students may be assisted or represented by persons of their choice, including an attorney, at the expense of the student, and shall be afforded a full and fair opportunity to present evidence relevant to the issue(s).

Students or their representative should request the hearing in writing and should specifically identify the information they seek to have amended. The request should be directed to the Office of the Provost/Vice President for Academic Affairs.

The Office of the Provost/Vice President for Academic Affairs will conduct the hearing and render a decision within a reasonable period of time after the conclusion of the hearing and the decision shall be based solely upon the evidence presented at the hearing. The student shall be notified in writing of the reason(s) for the decision and given a summary of the evidence.

If the decision is that the information in the student’s educational records is inaccurate, misleading or in violation of his rights and privacy, the statement(s) will be corrected or expunged from the student's records.

If the decision is that the information is not inaccurate, misleading, or in violation of the privacy or other rights of the student and that the information or parts thereof are to remain in the student’s educational records, the student shall be notified and given the right to enter a statement in the records setting forth any reason for disagreeing with the decision of the Office of the Provost/Vice President for Academic Affairs. This statement shall be maintained in the records as long as the record or contested portion thereof is maintained, and if the contested educational record or contested portion thereof is disclosed by Auburn University to any party, the student's explanation shall also be disclosed to that party.

The Secretary of Education has established a review board to receive complaints regarding violation of student’s rights. Students wishing to file a complaint directly to the review board should write to the Family Policy and Regulations Office, Department of Education, Washington, D.C. 20202. Detailed procedures for this complaint procedure are listed under section 99.63 of the regulations issued by the Secretary and will be furnished upon request by the registrar, Auburn University.

This policy is adopted pursuant to the Family Educational Rights and Privacy Act, (34 CFR Part 99), and is not intended to impose any restrictions or grant any rights not specifically required by this Act.
Release of Directory Information

The university may release directory information without the student’s written consent. Directory information consists of student’s complete name; local address and associated telephone number; place of birth; parent/spouse name, address and associated telephone number; mailing address and associated telephone number; E-mail address; photographs, video or other electronic image; participation in recognized activities and sports; weight and height of members of athletic teams; dates of attendance; enrollment time status (full or part time); degrees and awards received; and most recent previous educational agency or institution attended.

A student may deny the release of directory information by completing an Address Change/Information restriction request form available in the Office of the Registrar, Langdon Hall. Students may also restrict directory information on tigeri.

To deny the release of information regarding participation in recognized activities the student must notify the vice president for Student Affairs and the student’s academic dean in writing. To deny the release of athletic information, the student must notify the director of Athletics in writing. A former student, one who is not in attendance, must contact the appropriate offices to deny the release of information.

Release of Educational Records

The university will release a student’s educational record(s) upon the student’s written request. The student must:

1. Specify the records to be disclosed.
2. Include the purpose or purposes of the disclosure.
3. State the party or parties and the address to whom the information is to be disclosed.

The student shall, upon request, receive a copy of the record that is to be disclosed. It is university policy to furnish single copies of a student’s record at no charge.

The university may release student’s educational records to the following without prior written consent:

1. University officials who have a legitimate educational interest in the records. University officials are defined as teachers, administrative personnel and other employees except personnel of the security or law enforcement unit of Auburn University, and other agents acting on behalf of the university. If university officials are required in the performance of their duties to review the educational records of a student, this will be considered to be a legitimate educational interest. Auburn University has designated the National Student Clearinghouse as a university official.

2. Officials of another school in which the student intends to enroll upon request of the transfer school.

3. Government representatives of the Comptroller General of the United States, the Secretary of Education, the U.S. Commissioner of Education, the Director of the National Institute of Education, the Assistant Secretary for Education, State educational authorities, and State officials to whom such information is specifically required to be reported or disclosed by State law adopted prior to Nov. 19, 1974.

4. Appropriate authorities in connection with financial aid with the understanding that only the necessary records will be released.

5. Organizations conducting studies for, or on behalf of, the university or its agencies for the purpose of developing, validating, or administering predictive tests, administering student aid programs, and improving instruction and student life provided that the studies will not permit the personal identification of students and their parents by individuals other than representatives of the organization and provided that the personally identifiable information furnished will be destroyed when no longer needed for the purposes for which the study was conducted.

6. Accrediting organizations to carry out their accrediting functions.

7. Parents of a dependent student as defined in section 152 of the Internal Revenue Code of 1954. University officials may release educational records to parents on the basis of a written documentation from the parent that the student is a dependent as defined under the Code and there is reasonable notification of the student regarding the request.

8. A court of law to comply with a judicial order or lawfully issued subpoena with the understanding that the student will be notified in advance insofar as possible.

9. Appropriate parties to protect the health and safety of the student or other individuals in emergencies with the understanding that only information essential to the emergency situation will be released, that information will be released only to a party who would be in a position to deal with the emergency, and that the student will be notified insofar as possible of the information released, the purpose for the release, and to whom the information was released.

No personal information on a student will be released without a statement from the university to the party receiving the information that no third party is to have access to such information without the written consent of the student.
Accommodation Policy for Students with Disabilities

Auburn University is committed to providing its students with an accessible campus and equitable learning environment. If you have a disability that requires academic accommodations, access to assistive technology training, or support services, contact the Office of Accessibility for additional information. 1228 Haley Center; 334-844-2096 (Voice/TT) or visit the Office of Accessibility website at accessibility.auburn.edu.

Policy on Withdrawals and Resignation

Withdrawal refers to the situation where a student drops a class or classes, but remains enrolled in at least one class (at least one credit hour) at the university that term.

Resignation refers to the student dropping all classes (0 credit hours) and no longer being enrolled that term.

Withdrawals

Students may withdraw from a course via the web up through the last business day prior to the opening of registration for the following term in spring and fall semester and the posted date in the summer (See Academic Calendar for dates). Students who withdraw from a course before the posted term census date (15th class day in spring and fall and 5th class day in summer) will have no grade assignment and no record of having attempted the course on the transcript. Students who withdraw after census and on or before the withdrawal deadline will have a grade of W for the course recorded on the transcript. Grades of W are not used in calculating the term or cumulative GPA at Auburn University.

A course may be dropped after the withdrawal deadline only under unusual conditions and with special permission. Requests for medical withdrawals (serious physical and/or psychological illness of the student) must be verified and approved by the Auburn Cares office. A medical withdrawal is appropriate when, by recommendation of a licensed health care provider, a student cannot continue enrollment in one or more of his/her courses because of a serious physical and/or psychological condition. Because serious health conditions usually impact all courses, most requests for a medical withdrawal result in a medical resignation (see Resignation from all courses.) All other requests for withdrawals after the withdrawal deadline, based on extraordinary personal circumstances, must be approved by the student's associate dean and subsequently by the designated representative from the Office of the Provost. When approval for dropping the course under such circumstances is granted by the Auburn Cares office or the Office of the Provost, a W may be assigned only when the instructor indicates that the student was clearly passing the course on the date of withdrawal. Otherwise, a grade of WF (Withdrawn Failing) is assigned. Grades of WF are used in calculating the term and cumulative GPA and have the same impact as a grade of F. In extraordinary situations, where it can be clearly demonstrated that a failing grade in the class at the time of withdrawal is directly related to the medical or personal situation leading to the withdrawal, a student may request a withdrawal without grade penalty. The request for withdrawal without grade penalty must be approved by the Auburn Cares office in the case of a medical withdrawal or the student's associate dean in the case of a personal withdrawal, and finally by the designated representative from the Office of the Provost. The Auburn Cares office or the student's Associate Dean will notify the student's professors and ask for any additional information about the student's progress in the class/classes—and to determine the student's grade.

Resignations

Students are encouraged to contact their advisors and their academic deans before resigning. Resignations can impact financial aid, veteran's benefits, international student standing, eligibility for varsity athletics, and on-campus housing.

Students may resign without grade penalty if they resign no later than the posted withdrawal deadline (See Academic Calendar). As with course withdrawal, a student may resign after the posted withdrawal deadline (See Academic Calendar) only under unusual circumstances, such as serious illness of the student, serious illness or death of a member of the student's immediate family, or being called to active military service.

A medical resignation is appropriate when, by recommendation of a licensed health care provider, a student cannot continue enrollment in his/her courses because of a serious physical and/or psychological illness. All requests for medical resignations (serious physical and/or psychological illness of the student) must be verified and approved by the Auburn Cares office. All other requests for resignations after the posted withdrawal deadline (See Academic Calendar), based on extraordinary personal circumstances, must be approved by the student's associate dean and subsequently by the designated representative from the Office of the Provost. The
Auburn Cares office or associate dean will obtain from the student’s instructors the records of the student’s scholastic standing at the time of resignation. In the case of personal resignations after the withdrawal deadline, the associate deans will send the information to the designee from the Office of the Provost who will review the request and decide on final approval.

If on the effective date of the resignation is after the posted withdrawal deadline and the student is failing in over half of the total course hours (where total course hours exclude any grades of W previously recorded for the term), the number of hours reported as failing will be assigned grades of WF and will be used in calculation of the student’s term and cumulative GPA. The hours reported as passing will be assigned grades of W and will not be counted in the term or cumulative GPA at Auburn University. If the student is passing half or more of the total course hours (excluding any grades of W previously recorded for the term), the student will receive grades of W on all course hours and these grades will not enter into the calculation of the student’s Auburn GPA.

When a student needs to resign after the posted withdrawal deadline (See Academic Calendar), either for medical reasons or for compelling personal reasons, and when the medical condition or extraordinary personal situation can be determined to be the main factor causing scholastic deficiencies, discretionary power in waiving the scholastic penalty will rest with the Auburn Cares office in the case of medical resignations or with the Office of the Provost in the case of personal resignations. All such decisions must include input from the student’s instructors.

In all cases of resignation, if a student has been placed on academic suspension at the end of the last term in residence before the term of resignation, the student’s associate dean will review the grades at the time of resignation and determine whether the student will be placed on further academic suspension.

**Enrollment in Terms Following a Medical Resignation**

Students who plan to enroll in subsequent semesters or summer terms following a medical resignation will be required to submit medical documentation from a licensed health care provider which indicates readiness to return to an academic environment. Additionally, academic units reserve the right to request further documentation and/or other requirements specific to the student’s individual program of study. All documentation will be submitted to the Auburn Cares office and is kept confidential. A hold will be placed on the student’s registration until this documentation is submitted. If the student has already registered for the following semester, the schedule will be dropped if documentation is not submitted by a specified date and/or the student has not contacted the Auburn Cares office.

**Retroactive Dating of Withdrawals and Resignations**

Retroactive dating refers to establishing an effective date for withdrawal or resignation before the date that one is filling out the form, often, prior to withdrawal deadline. For retroactive dating to be allowed, there must be a compelling reason that the forms were unable to be filed at the requested effective date.

Retroactive withdrawals/ resignations are most frequently initiated when a student has documentation from a health professional (doctor/psychologist, etc.) verifying a medical condition, which is confirmed by the Auburn Cares office, and the medical condition prevented the student from withdrawing or resigning on the effective date.

If the retroactive withdrawal/ resignation is based upon a non-medical justification/explanation, the associate dean follows the procedures for all other (non-medical) withdrawals/ resignations, gathering information from the instructors and submitting the documentation to the designee from the Office of the Provost. The Provost’s designee will determine why the student was unable to resign in a timely manner and if an earlier effective date is warranted.

Retroactive withdrawals/ resignations should not be undertaken if more than two calendar years have passed since the course(s) was/were taken, without the direct review and approval of the Provost.

Aerospace Engineering - MS, PhD

Program Degrees:
- Aerospace Engineering (MS)
- Aerospace Engineering (PhD)

Graduate studies in aerospace engineering lead to the degrees of master of science and doctor of philosophy. The graduate program prepares students for careers in the aerospace industry, in government laboratories and in academia. Doctoral studies are also designed to produce research scholars.

Applicants should have a bachelor’s degree in aerospace or mechanical engineering or its equivalent from an institution of recognized standing, plus satisfactory GRE scores. Degrees in mathematics, physics and other related engineering disciplines may also be appropriate for entrance into the graduate program. Applications will be evaluated on an individual basis by the department’s graduate committee.

The master of science may be earned under either thesis or non-thesis options. For both options, a total of 30 semester graduate credits of 6000-7000 level courses are necessary and at least 21 credits must be in aerospace engineering or the AERO category. Substitution of up to six (of the 21) credit hours from other engineering and science disciplines is permitted with prior approval by the...
graduate programs committee when appropriate courses are unavailable in aerospace engineering. The remaining nine graduate credits can be earned through technical courses in engineering, science or mathematics.

Students pursuing a master of science degree under the thesis option should include six hours of AERO 7990 (or 7996 for online students): Research and Thesis as part of their 30 hours. After the completion of thesis research supervised by a major professor, the student must submit a written thesis to a committee of at least three faculty members and pass a final oral examination that includes defending the thesis.

Students pursuing a master of science degree under the non-thesis option will have a plan of study supervised by their graduate committee. The non-thesis master of science degree option does not have a residency, research or final oral examination requirement. The non-thesis degree can be earned entirely through the Engineering Online Graduate Program or though on-campus instruction.

For the doctor of philosophy degree, the student must complete a minimum of 60 credit hours beyond the bachelor’s degree. A plan of study will be arranged on an individual basis and students may elect to specialize in the general areas of aerodynamics, computational fluid dynamics, control theory, flight dynamics, orbital mechanics, propulsion, structures or structural dynamics. A written qualifying examination and a general doctoral examination, with both written and oral parts, are required of all doctoral candidates. An oral defense of the doctoral dissertation is also required of each student.

There is no language requirement for the master of science or PhD degree.

**Aerospace Engineering - MAE**

The master of aerospace engineering (MAE) degree has been superseded by the master of science (non-thesis) degree option, which is available to both on-campus and distance learning students. Students are encouraged to enroll in the MS (non-thesis) degree program instead of the MAE program, which is being phased out.

### Agricultural Economics and Rural Sociology - MS, MAg, Applied Economics - PhD

**Programs Degrees:**

- Agricultural Economics - MS (p. 1446)
- Agricultural Economics - MAg (p. 1446)
- Applied Economics (Agriculture) - PhD (p. 1447)

Graduate degrees in the Department of Agricultural Economics and Rural Sociology (DAERS) include the master of science (MS) in agricultural economics or rural sociology, the master of agriculture (MAg) in agricultural economics, as well as the PhD in applied economics. Admission to the masters program in agricultural economics requires a bachelors degree from an accredited institution with 15 semester hours in related courses including economics, sociology, statistics, or related subjects accepted by the Graduate Committee. Applicants are required to have a bachelors degree from an accredited institution and generally are required to have a minimum score of 290 (150 V and 140 Q) and a GPA of 3.0 on all completed coursework. Admission into the MS programs requires a minimum GRE score of 900 (450 V and 450 Q). Admission into the PhD program requires and minimum GRE score of 1000 (400 V and 600 Q). International applicants from non-English speaking countries must have a minimum TOEFL score of 550 (213 computer). Applicants with GRE scores below 400 will be required to complete specified English courses. Applicants to all graduate programs are generally required to have a minimum GRA of 3.0 on the last 60 semester hours of completed coursework.

The master's program in rural sociology is part of an Interdepartmental Graduate Program in Sociology. Admission to the program is administered by co-directors representing the Department of Sociology, Anthropology & Social Work and the Department of Agricultural Economics & Rural Sociology. Applicants are required to have a bachelor's degree from an accredited institution and generally are required to have a minimum GRE score of 290 (150 V and 140 Q) and a GPA of 3.0 on all completed coursework. The applicant's resume and letters of recommendation also are considered in making a decision on admission. Further details on the master's degree in rural sociology can be found in the AU Bulletin (http://bulletin.auburn.edu/theschools/graduatedegreesoffered/ ruralsociologyms_major/) and the Interdepartmental Graduate Program in Sociology guide (http://www.cla.auburn.edu/sociology/sociology-program/graduates/program-guide/).

The MS in agricultural economics (thesis option) requires a minimum of 30 semester hours of graduate credit with 6 hours of thesis research. Required of all MS students:

<table>

<tr>
<td><strong>Total Hours</strong></td>
<td></td>
<td><strong>12</strong></td>
</tr>
</tbody>
</table>

Course substitution for will be allowed for ECON 6020 upon approval of the Graduate Program Officer. A total of 12 hours of core course is required in a program of 24 course hours. The remaining 12 hours can be filled with any graduate-level courses approved by
the major professor and thesis committee. At least one-half of all credit hours toward the minimum degree requirement must be earned in courses at the 7000-level or above. All MS candidates must pass a comprehensive examination covering the major field, as well as research and thesis. This usually is a two-hour oral examination upon completion of coursework and the thesis, but the student’s advisory committee also may require a written examination.

There is a non-thesis MS option that requires 30 hours of coursework. Twelve of these hours must be in core courses:

</tbody>
</table>

The remaining 18 hours can be filled with any graduate-level courses approved by the major professor and graduate committee. At least one-half of all credit hours toward the minimum degree requirement must be earned in courses at the 7000-level or above. The non-thesis option requires a “Plan B” paper that serves as the basis for the student’s final oral exam.

Graduate study in rural sociology (MS thesis or MS nonthesis) is available through the Interdepartmental Graduate Program in Sociology, which includes rural sociologists from DAERS as well as sociologists and anthropologists from the Department of Sociology, Anthropology, and Social Work.

The master of agriculture (MAg) in agricultural economics requires 32 graduate credit hours, 18 in the major, as approved by the advisory committee. A final oral examination is given by the advisory committee.

A PhD in Economics is offered through the interdepartmental program in economics, which is administered jointly by the Department of Agricultural Economics and Rural Sociology, the Department of Economics, and the School of Forestry and Wildlife Sciences. For students enrolled in the College of Agriculture, the PhD in Applied Economics requires a minimum of 42 credit hours beyond a masters degree or 60 hours beyond a bachelors degree, plus at least 10 hours of dissertation research. All students must take:

A Graduate Minor in Agricultural Economics (GMAE) is offered for non-majors wishing to obtain training in the application of economic principles to problems affecting rural communities and households. The GMAE requires 12 credit hours of graduate-level coursework in agricultural economics (6 hours must be at the 7000 level or above). The student’s graduate committee must include a faculty member from the agricultural economics department, and the student must demonstrate competence in the application of economic principles to problems in research. The latter requirement is typically met via a chapter or section in the student’s thesis or dissertation.

### Crop, Soil and Environmental Sciences - MS, MAg, PhD

**Program Degrees:**
- Crop, Soil and Environmental Sciences - MS (p. 1448)
- Crop, Soil and Environmental Sciences - MAg (p. 1448)
- Crop, Soil and Environmental Sciences - PhD (p. 1448)
- Turfgrass Management - MTM (p. 1449)

Graduate training in this department enables outstanding students to achieve a high level of scholarly attainment in the soil, crop and environmental sciences. Within these broad areas, research training and experience may be gained in the specialized fields of soil fertility and plant nutrition; soil chemistry; soil genesis, morphology and classification; soil mineralogy; soil physics; soil microbiology; plant breeding and genetics; weed science; forage, fiber, bioenergy and grain crop production; crop ecology; environmental quality; and turfgrass management.

All graduate students are required to have core undergraduate courses in math, chemistry, physics, botany, plant physiology, genetics, and statistics. The Graduate Studies Committee evaluates each applicant's record and determines prerequisite deficiencies. Qualified students lacking prerequisite subjects can be admitted, but will be required to complete course work to satisfy undergraduate course deficiencies. Students are encouraged to visit the department's web site and view the graduate student handbook for specifics. Admission is based primarily on a combination of required grade point average (GPA) and graduate record examination (GRE) scores and TOEFL tests for international students.
Three degrees are offered:

1. **Master of Science (MS)**, earned only under the thesis option where importance is placed on both classroom and research training. The MS requires a minimum of 30 semester hours at or above the 6000 level of which 6 hours of thesis research and 2 hours of seminar are included. The student’s advisory committee along with the student determines the course of study. In addition, the student must complete research, a written thesis and an oral defense examination of the thesis research.

2. **Master of Agriculture (MAg)** earned under the non-thesis option places more emphasis on classroom training over a broader range of subject matters. The MAg degree requires at least two additional graded courses that replace thesis research hours. An oral defense of course subject matter is required and students must register for GRAD 7000 during the semester the exam is taken. MAg students must write a professional paper as part of a special problems course (CSES 6960/CSES 6966) and present an exit seminar (CSES 7950/CSES 7956) on this paper.

3. **Doctor of Philosophy (PhD)** requires a minimum 60 semester hours of course work beyond the Bachelor of Science. Of the 60 semester hours, 30 must be graded courses 6000 level and above, 20 of which must be completed under the 09 classification at Auburn University while registered in the PhD program. There is no language requirement for this degree. Upon completion of the course work, a PhD student must satisfy a general written examination administered by each member of the graduate advisory committee. A student must pass all parts of the written examination before scheduling the preliminary oral examination. After satisfactory completion of the preliminary examination, the student advances to candidacy. The PhD student will conduct independent research and prepare a dissertation through the guidance and direction of the advisory committee. Upon completion of the dissertation, the student must pass a final oral examination defending the dissertation.

Graduate students in a program requiring a thesis or a dissertation must register for at least one hour of CSES 7990 or CSES 8990 per semester. Research Associates and similar classifications that also are graduate students are exempt from this requirement but must complete 10 hours of 7990 in the master’s program or 20 hours of 8990 if in a PhD program.

**Anatomy, Physiology and Pharmacology**

(See Biomedical Sciences (p. 1457))

**Animal Sciences - MS, MAg, PhD**

**Degree Programs:**

- Animal Sciences - MS (p. 1451)
- Animal Sciences - MAg (p. 1450)
- Animal Sciences - PhD (p. 1451)

Graduate study in animal sciences is directed toward the master's and doctoral degrees. The Master of Agriculture (MAg) is offered as a non-thesis degree and prepares students for careers in secondary education, Cooperative Extension and agribusiness. Graduate programs leading to the Master of Science (MS) and Doctor of Philosophy (PhD) degrees provide advanced education and technical training in preparation for careers in public and private sectors related to animal science and technology, food science and technology, animal biotechnology, agribusiness and university-level research and education. Areas of specialization include animal nutrition, biochemistry and molecular biology, food technology and safety, growth biology, meat science and muscle biology, functional genomics...
The PhD degree requires a minimum of 60 credit hours beyond the bachelor's degree and a dissertation describing original research. Admission to the PhD degree program usually requires that the student have a master's degree from a recognized graduate program. However, evidence of exemplary potential may be considered as a criterion for admission with a bachelor's degree. The doctoral program emphasizes original, scholarly research and includes significant advanced course work. Admission is based primarily on consideration of GPA, GRE scores and, in the case of an international student, TOEFL test scores. Applicants lacking suitable preparatory course work in the basic sciences will be required to correct deficiencies by satisfactorily completing additional courses. The PhD degree requires successful completion of a minimum of 30 credit hours, 21 of which must be in an agricultural or related sciences. Additional courses may be required for individual students. Although MAg students do not write a thesis, they are required to take a comprehensive examination and present a report on their comprehensive scholarly project completed under ANSC 7960 (Special Problems). In addition, MAg students are required to present one academic seminar (ANSC 7950) during their program.

Admission to the MAg degree program requires that the student has the bachelor's degree or evidence of satisfactory progress toward attainment of the bachelor's degree in animal sciences or a related area in the biological sciences. Admission is based primarily on consideration of Grade Point Average (GPA), GRE scores and, in the case of an international student, TOEFL test scores. Applicants lacking suitable preparatory course work in the basic sciences will be required to correct deficiencies by satisfactorily completing additional courses. The MAg degree requires a minimum of 30 credit hours of graduate work, including at least 21 credit hours in the major field of study. The remainder may be in a minor area selected by the student and upon approval by the advisory committee. In addition to the required course work, the student must complete research, a written thesis and a thesis defense examination as defined by the student's advisory committee. Students are required to present two academic seminars (ANSC 7950) during their program.

Admission to the MS degree program requires that student have the bachelor's degree or evidence of satisfactory progress toward attainment of the bachelor's degree in animal sciences or a related area in the biological sciences. Admission is based primarily on consideration of GPA, GRE scores and, in the case of an international student, TOEFL test scores. Applicants lacking suitable preparatory course work in the basic sciences will be required to correct deficiencies by satisfactorily completing additional courses. The MS degree requires a minimum of 30 credit hours of graduate work, including at least 21 credit hours in the major field of study. The remainder may be in a minor area selected by the student and upon approval by the advisory committee. In addition to the required course work, the student must complete research, a written thesis and a thesis defense examination as defined by the student's advisory committee. Students are required to present at least one academic seminar (ANSC 7950) or dissertation (ANSC 8990) research each term. Classified (FLSA-exempt) research associates holding full admission status in the Graduate School for work toward a graduate degree are exempt from this requirement, but must complete 10 hours of thesis research in a MS program or 20 hours of dissertation research in a PhD program following completion of a master's degree. A PhD degree program undertaken by classified (FLSA-exempt) research associates but not preceded by a master's degree must include 30 hours of dissertation research credit.

Prospective graduate students are evaluated for admission to the graduate program by a departmental graduate-program committee. The committee makes a recommendation to the department head based on its review of academic transcripts, three letters of recommendation, a written statement of intent from the applicant, and Graduate Record Examination (GRE) General Test score; in the case of an international student, the Test of English as a Foreign Language (TOEFL) is also required. Prior to making formal application, prospective students are expected to first contact a prospective faculty advisor in the Department whose area of specialization is compatible with the prospective student's interest, and inquire about openings in his/her program. The departmental graduate-program committee will not review an application from a prospective graduate student unless requested to do so by a prospective faculty advisor, nor will it recommend that a student be admitted unless a prospective faculty advisor agrees to sponsor the applicant's graduate program.

Prospective graduate students are evaluated for admission to the graduate program by a departmental graduate-program committee. **Audiology Program - AuD**

The Department of Speech, Language, and Hearing Sciences offers the professional clinical degree: the Doctor of Audiology (AuD). As opposed to the PhD research degree, the AuD is a clinical practice degree. The AuD degree program spans four years (11 semesters including summers), each cohort group begins fall semester. Details are provided at the Department of Communication Disorders website: http://www.cla.auburn.edu/communicationdisorders/.

Most graduates of the AuD program work in clinical settings, such as major hospitals, ear, nose and throat clinics, and private practice facilities. A few graduates teach in clinical programs in academic institutions.

To complete the program, students must have transportation for courses and clinics in both Auburn and Montgomery as well as for additional clinical experiences and internships located in other cities within the surrounding region.

**Admission Requirements**

A bachelor’s degree from an accredited university is necessary. Highly qualified students from any discipline are considered. Foundation courses in language development, phonetics, and speech anatomy will be added to the curriculum. At least one undergraduate course each of math, life sciences, statistics, physical sciences (chemistry or physics required), and behavioral sciences is an accreditation expectation, and applicants lacking any of these must comply before conferral of the AuD degree.

Potential students apply both to the Graduate School and to Communication Sciences and Disorders Centralized Application System (CSDCAS). Letters of recommendation must be uploaded to CSDCAS. Applicants must submit one set of official transcripts (for GPA) and GRE scores to CSDCAS, and official GRE scores to the Graduate school.

The Graduate School web application requires the following:

- Application fee
- Official General Test GRE scores sent directly from ETS (Code:1005)

The application sent to CSDCAS:

- The department’s application form available on the website
- Three letters of recommendation
- A letter of interest, which will serve as a writing sample
• Transcripts
• Official General Test GRE scores sent directly from ETS (Code: 7807)

Those applicants clearing the initial screening will be invited to campus for an interview.

The application deadline is January 10 of each year.

Graduation Requirements

The curricular plan of study is a static sequence of academic and clinical coursework. The academic and clinical components of the AuD program interact in a logical progression over a four-year period. A total of 124 semester hours are required for the degree.

The early portion of training is largely academic, and the later portions involve mostly applied clinical work. As the program progresses, the balance of academic and clinical work changes substantially. During the first two years of the program, the emphasis is on academic preparation for clinical work. Students must pass comprehensive exams to enter the fourth year of the program. In the third year of the program, academic courses are combined with advanced seminars on current issues in clinical practice and the completion of an applied clinical research project referred to as a capstone experience. During this third year of the program, students are engaged in a series of intensive clinical internships at off-campus clinical settings. Students must successfully complete internships at three different clinical settings during the third year, and return to campus to participate in seminar course work. In the final year of the program, students participate in a clinical residency during which they work full time for a period of nine months. Clinical residencies may be done at any facility in the United States where a certified audiologist agrees to supervise the student within ASHA guidelines.

Plan of Study

The four-year sequence of academic and clinical course work, including the semester hours, is as follows:

</table>
Internships and Clinical Residency

During third year, students complete internships in three different locations, and in the final year, they work full-time under the supervision of a certified audiologist. Off campus clinical experiences for the third year are typically located within a two hour drive time radius to allow the student a quality experience and the ability to return to campus for class and capstone research work. The fourth year clinical residency experience can be anywhere in the United States with appropriate supervision and a broad scope of practice.

Other Requirements for the AuD

Along with their course work and internships, students are required to pass comprehensive written exams in order to advance to candidacy. Oral examinations will be conducted if written responses lack detail or clarity. To graduate, students must also successfully complete a capstone project, which can be a planned audiology-related research or clinical project designed to explore a research hypothesis or meet a clinical outcome.

Financial Aid

A limited number of graduate assistantships are available for meritorious students to assist in teaching, research, or clinical roles.

Systems & Technology - MS, PhD, Graduate Certificates

THE TITLE ON THIS PAGE IS WRONG. THE DEPARTMENT NAME IS SYSTEMS & TECHNOLOGY NOT SUPPLY CHAIN MANAGEMENT.

REFERENCES TO AVIATION AND SUPPLY CHAIN IN THE BODY BELOW SHOULD BE CHANGED TO SYSTEMS & TECHNOLOGY.

Degree Program:

• Information Systems Management - MS (on-campus/full-time and online)
• Information Systems Management - PhD

Graduate Certificate:

• Business Analytics
• Management Information Systems

The Systems and Technology department (SYST) offers graduate study leading to the master of science and the doctor of philosophy degrees in Information Systems Management. The program also offers a joint program leading to both the MSIS and MBA degrees. Applicants must hold a bachelor’s degree from a recognized institution. Graduates of business schools will likely have met this requirement; graduates of other programs may be required to complete additional courses to compensate for deficiencies.

Master of Science in Information Systems

The (MSIS) Program in Business is a non-thesis program that emphasizes practical application of management information systems to managerial problem solving and decision making. Students are required to complete a final project. The program is designed to provide students the opportunity to develop an expertise in a chosen area of management. Applicants to the master's program must have
completed an undergraduate degree. The MSIS program is offered as a traditional, on-campus program and as an online program. A twelve-hour graduate certificate is also available.

The MBA/MSIS is a 54-hour program administered jointly by the Systems & Technology faculty and the MBA program. The program saves the student fifteen hours of coursework over completing both degrees separately. For the MBA, students without two years full-time work experience are required to do an additional 0-3-credit hour internship. Students must apply separately to each program (MISE and MBA), but only have to pay one application fee. Students can also opt to apply for the second degree program during their first year in the other program.

The PhD program in Business with Information Systems Management Concentration prepares graduates to conduct high-quality research in universities, colleges, government and business. Individual flexibility is provided in a program of study that develops the conceptual and methodological skills that graduates need to establish a leadership position in their chosen fields. Objectives of the program are accomplished through the completion of a formal program of study, successful completion of a statistics core, preparation and completion of two examination manuscripts, and dissertation research. Students with assistantships may also be required to teach. Students are expected to have a fulltime presence on campus. Applications to the PhD program must complete an Auburn University Graduate School application. For full consideration, applications must be received no later than February 1, prior to the Fall term.

Information concerning specific program requirements may be obtained by visiting www.harbert.auburn.edu.

### Information Systems Management (PhD)

<td></td>
</tr>
<tr>
<td><strong>Total Hours</strong></td>
<td><strong>60</strong></td>
<td></td>
</tr>
</tbody>
</table>

The PhD in Business requires 60 semester hours earned through instruction beyond the bachelor's degree, including 1) a minimum of 30 semester hours graded (e.g., A, B) graduate course work (6000-level and above); and 2) a minimum of 30 semester hours of additional graduate course work (6000-level and above) that may include ungraded courses, 7990 and 8990, and must include at least 10 hours of 8990. Up to 30 hours (if less than half of the total number of hours) of applicable master’s level course work may be used to satisfy part of these requirements with advisor approval.

The total number of credit hours that may be transferred from another accredited institution toward a doctoral degree varies by program but must be less than 50 percent of the credit hours listed on the Plan of Study. Such transfer credit 1) must fall within the time limits of the degree; and 2) must be approved by the advisory committee and the dean of the Graduate School. A maximum of four hours of 7990 (Research and Thesis) from a completed master's program may be counted.

All doctoral students must complete a minimum of 10 hours of 8990. Enrollment in 8990 may take place at any time the student and the advisory committee deem appropriate. During any one semester, the number of hours of 8990 in which the student enrolls should reflect the amount of instructional time being spent on the dissertation and the degree to which university resources are being utilized. Students may enroll, during any one semester, for as few as one hour or as many as 16 hours of 8990. Dissertation students submitting their dissertation, awaiting committee review and approval, or taking their final examination must register for 8990 Research and Dissertation in the semester(s) when these steps in the process take place. The requisite 10 hours of 8990 should be included in the Plan of Study. No grade is assigned.

Auburn University

Management Information Systems - Graduate Certificate

Select 4 courses from any approved courses from the following list: ISMN 6000-7999, and BUAL 6650/6, 6660/6. Current Auburn University graduate students may substitute one of their program courses for one of the above courses with approval from the certificate granting department.

Total Hours: 12

Biological Sciences - MS, PhD, Graduate Certification

Degree Programs:
- Biological Sciences - MS (p. 1456)
- Biological Sciences - MS (Non-Thesis, Pre-Professional Option)
- Biological Sciences - PhD (p. 1456)

Graduate Certification:
- Computational Biology (p. 1456)

The Department of Biological Sciences offers graduate training leading to the MS and PhD degrees in biological sciences; a non-thesis master’s degree is optional. Candidates for advanced degrees should have an undergraduate degree in an appropriate area from an accredited institution, with adequate training in biology, chemistry, physics and mathematics. Qualified students lacking prerequisite subjects can be admitted, but may be required by the departmental graduate studies committee to make up the pre-requisites. A satisfactory score on the general GRE is required (suggested minimums of 500 on verbal and quantitative tests).

A major of at least 30 and 60 semester hours may be taken for the MS and PhD degrees, respectively. MS and PhD students must present at least one departmental seminar on their research during the semester of their oral or final examination. There is no foreign language requirement.

Interdisciplinary minors may be taken in biochemistry, cell/molecular biology, ecology, environmental studies and plant, animal, or microbial molecular biology.

Biological Sciences - MS (Non-Thesis, Pre-Professional Option)

The Biological Sciences Pre-Professional MS-NT option will provide students a broad graduate experience, enhancing their knowledge base of biological phenomena and processes, that will improve their credentials for application to dental, medical, optometry, physician assistant, and other health care professional programs.

Computational Biology - Graduate Certificate

Offered by the Department of Biological Sciences, this certificate is designed to provide trainees with a broad understanding and appreciation of the utility of computation in relation to “Big Data”, or large data sets that can only be analyzed with an advanced set of computational skills towards revealing patterns, trends, and associations pertaining to biological and life science phenomena. This certificate program requires 18 credit hours of coursework to be completed within a period of three years. All trainees in the certificate program will complete 12 credit hours of required coursework. Trainees will select (at least) six additional credit hours of coursework from a given list that heavily utilize computational approaches and tailored to their specific research interests.

</tbody>
</table>

**Selected elective coursework (6 credit hours):**

From approved list of courses that heavily utilize computational approaches. The list of potential electives is expected to grow and evolve given development of new courses tied to continuing new faculty hires at Auburn University.

Total Hours 18

Trainees who successfully complete this certificate program will exhibit proficiency in the comprehension, planning and implementation of computationally intensive experiments and analyses of biological data originating from various sources and should be well-positioned for finding positions in academia, government or the private sector.

Biomedical Sciences - MS, PhD

Degree Programs:

- Biomedical Sciences - MS (p. 1457)
- Biomedical Sciences - PhD (p. 1458)

All graduate faculty of the College of Veterinary Medicine participate in a college-wide graduate program leading to the master of science and the doctor of philosophy degrees in Biomedical Sciences (BMS or VBMS for curriculum descriptions). Participating departments are: Anatomy, Physiology and Pharmacology (APP); Clinical Sciences (DCS); and Pathobiology (PATHO).

Applicants to the program are required to meet entrance standards established by the College’s Graduate Program Committee, the Graduate School, and their intended area of study. Either a baccalaureate degree or the Doctor of Veterinary Medicine (DVM) degree or equivalent is required for admission.

The three departmental programs represent the gateway to areas of concentration. The ten BMS concentrations (MS and PhD programs unless otherwise stated): Anatomy (APP), Animal Genetic Disease (PATHO), Animal Parasitology (PATHO), Clinical Sciences (including all DCS Residency Programs, MS only), Infectious Disease (PATHO), Molecular Oncology (multidisciplinary through PATHO), Pathology (Anatomic and Clinical; PATHO), Pharmacology (APP), Physiology (APP), and Veterinary Sports Medicine (DCS, MS only). The BMS program offers specific enrichment activities including seminars and journal clubs, training in grant writing, participation in scientific meetings, and opportunities to present results of research at national and international meetings.

A graduate student advisory committee is appointed by the dean of the Graduate School for each student upon recommendation of the college’s Associate Dean for Research and Graduate Studies. The student’s faculty adviser usually serves as the chair of this committee, and the remaining members, selected from the graduate faculty, should have expertise relevant to the student’s area of study. The advisory committee develops a plan of study which must be submitted to the college’s Associate Dean for Research and Graduate Studies for approval and then to the dean of the Graduate School. Study programs are designed to meet the student’s needs and interests while featuring research training and assuring a strong background in biochemistry, biophysics and/or molecular biology. Original research is required for all BMS graduates. Courses must be selected in conformity with the regulations of the college’s BMS Graduate Program Committee and the Graduate School. For additional information, visit: http://www.vetmed.auburn.edu/graduate-program/.

A dual degree program (DDP) allows students to pursue DVM and graduate degrees simultaneously in a time-and content-integrated manner. Graduates, particularly DVM/PhD graduates, will have strong backgrounds both in veterinary medicine and research so as to be well prepared for successful careers in academia, industry and/or specialty clinics. For the DDP program, students must be admitted into the College of Veterinary Medicine program via application to the Auburn University College of Veterinary Medicine and to the graduate program via application to the Auburn University Graduate School. Students already admitted to the Graduate School may apply for admission to the DVM program in order to gain entry to the combined degree program. Such students must meet specific criteria to be allowed to pursue this course of study (http://www.vetmed.auburn.edu/graduate-program/).

Biosystems Engineering - MS, PhD

Degree Programs:
- Biosystems Engineering - MS (p. 1458)
- Biosystems Engineering - PhD (p. 1459)

Graduate study in Biosystems Engineering leads to Master of Science (thesis, non-thesis) or Doctor of Philosophy degrees. Instruction, research training, and experience are available in various specialized fields such as ecological engineering; bioenergy and bioproducts engineering; food engineering; biological process engineering; biosystems automation and off-highway vehicle engineering. Applicants are expected to have earned a baccalaureate degree in biosystems engineering or a closely related area. All applicants should provide a written statement of purpose for their graduate study, three letters of reference, and all other data required by Auburn University. Additional details regarding graduate study in the Department of Biosystems Engineering are available at www.eng.auburn.edu/bsen (http://www.eng.auburn.edu/bsen/).

Biosystems Engineering - MS

The MS (thesis option) in Biosystems Engineering requires a minimum of 30 semester credit hours of graduate course work that includes up to 6 credit hours of thesis research. After completion of research, candidates for the MS thesis option must successfully defend the thesis. The specific requirements for the MS (thesis option) are:

<table>
<thead>
<tr>
<th>Code</th>

Total Hours 30

* Specific courses are approved by BSEN Graduate Program Coordinator.

The department also offers an accelerated bachelors/masters (ABM) program in Biosystems Engineering. Interested students should contact the department.

**Biosystems Engineering - PhD**

The Ph.D. in Biosystems Engineering requires a minimum of 60 semester hours of graduate-level course work beyond the bachelor’s degree. The total number of credit hours that may be transferred from another accredited institution toward a doctoral degree must be less than 50 percent of the credit hours listed on the Plan of Study. Students must take a qualifying examination (written and oral) administered by the student’s advisory committee that tests the student’s knowledge and competence in the proposed research area and in the general field of biosystems engineering. The student advances to Ph.D. candidacy after the successful completion of the qualifying examination. The PhD student will conduct independent research and prepare a dissertation. After completion of the dissertation, the student must pass a final oral examination defending his/her dissertation.

**Building Construction - MBC, PhD, Graduate Certificates**

**Degree Programs:**

- Building Construction - MBC (p. 1460)
- Building Construction - PhD (p. 1461)

**Executive Graduate Certificates:**

- Construction Management (p. 1462)
- Executive Technical Construction Management (p. 1462)
- Integrated Processes Construction Management (p. 1462)
Building Construction (MBC)

The McWhorter School of Building Science offers the Master of Building Construction (MBC).

The McWhorter School of Building Science’s non-thesis master of building construction program provides its students with an unparalleled educational experience. From conceptual idea to post-occupancy of facilities, the degree content offers a practical and industry-oriented study of the interdisciplinary and collaborative processes involved in the planning, financing, design, construction and management of the built environment.

Admission to the master of building construction is competitive, and enrollment is limited. The admissions committee considers GRE scores, undergraduate GPA, educational background, letters of recommendation, prior construction industry experience, and other relevant information.

For students holding an accredited undergraduate degree in construction, the MBC curriculum consists of 35 semester hours of academic credit, including a core of BSCI graduate courses (17 credit hours), electives (15 credit hours) and capstone (3 credit hours), taken over a period of three academic terms beginning in the fall of each year.

Students with undergraduate degrees in areas other than construction are given conditional admission to the program, and are required to take a series of five foundation courses (14 credit hours) commencing the summer term prior to fall admission. Upon successful completion of these classes, they are formally admitted to the 35 credit-hour MBC program.

MBC Degree Requirements

Foundation Courses
Offered in Summer and required for students with undergraduate degree in areas other than construction. There are 5 foundation courses worth 14 semester hours of academic credit.

The Core Curriculum

<table>
<thead>

</tr>
</tbody>
</table>

All classes are three credit hours except graduate seminar which is one credit hour.

Electives
Four building science electives (12 credit hours) and one approved graduate elective (3 credit hours) from any field.

Capstone

BSCI 7980, students are required to undertake a capstone project in their final semester. The purpose of the capstone project is to demonstrate the student’s ability to independently explore a new topic, demonstrate appropriate application of the materials, and successfully communicate the information in a professional and academically rigorous format.

Note 1: Online Master's students are not required to take BSCI 7060 (Research Methods) or BSCI 7950 (Graduate Seminar I and II).

Note 2: Online Master’s classes BSCI numbers all end in the number 6 (Example BSCI 7026, BSCI 7036).

Select 15 Credits in @ 6000-8999 (Electives) 15

Total Hours 35*

* Does not include credit hours for foundation courses which are required for students with an undergraduate degree in a non-construction discipline.

Building Construction (PhD)

The PhD in Building Construction is a research-based degree focused on the generation of new knowledge through innovative exploration of theory, development of creative perspectives, and applications of new technologies. It emphasizes original interdisciplinary scholarship in key and emerging areas such as high performance buildings, n-D modeling and simulation of building construction processes, sustainability, integrated project delivery, and facilities maintenance and management.

The PhD in Building Construction requires 62 semester hours of graduate course work beyond the bachelor’s degree. Up to 21 credit hours from a Master’s degree or previous graduate course work are transferable on the approval of the School’s PhD committee. It also requires a Comprehensive Written and Oral Examination before dissertation research commencement, a Comprehensive Research Proposal Examination defined as the Proposal Defense, and a Final Oral Examination defined as the Dissertation Defense.

For a PhD in Building Construction, the specific semester hours’ requirements are as follows:

Number of credit hours transferable from a Master’s degree (6000 or higher level courses): Max. 21 (Please refer to degree requirements in the program booklet for details)

Number of credit hours for Building Science (BSCI) graduate courses (6000 level or above): Min. 9

- BSCI 8060: Advanced Research Methods in Building Science-1 (3)
- BSCI 8070: Advanced Research Methods in Building Science-2 (3)
- Other BSCI 6000 or higher level courses from the Course List

Number of credit hours for BSCI or other graduate courses (6000 level or above) directly related to the candidate’s area of research: Min. 18

Business Administration - MBA, MS, PhD

Degree Programs:

- Master of Business Administration (with on-campus, online, and Executive and Physicians Executive options) - MBA (p. 1465)
- Master of Science Business Administration, Finance Option - MS (p. 1552)
- Business - PhD (with concentrations in Finance, Information Systems, and Management) (p. 1466)

Graduate programs in Business Administration are fully accredited by AACSB International – the Association to Advance Collegiate Schools of Business (AACSB) – and include the master of business administration, the master of science in business administration with a concentration in finance, and the doctor of philosophy in business with concentrations in Finance, Information Systems, and Management.

Application for admission to graduate programs in Business should be made directly to the Graduate School. Information concerning specific program requirements may be obtained by visiting www.harbert.auburn.edu.

An Auburn MBA can be an important part of the advantage needed to succeed in an increasingly competitive business environment. The College of Business offers an on-Campus MBA, an Online MBA, an Executive MBA and a Physicians Executive MBA, all structured to provide students with a world-class learning experience. An MBA from Auburn prepares individuals to enter the workplace in key leadership positions. Hands-on leadership training is integrated throughout the program. The MBA is a 39-hour program. MBA students without two years full-time work experience are also required to do an additional 3-credit hour internship. For on-Campus and Online students, dual MBA/MS graduate degree options are available in Finance, Management Information Systems, and Industrial and Systems Engineering.

For more information on MBA Program options, please visit: www.harbert.auburn.edu (http://harbert.auburn.edu/)

Graduate Executive Programs –

The Graduate Executive Programs comprise the Executive MBA, the Physicians Executive MBA, and the Masters of Real Estate Development Executive programs. These programs are designed to be taken as a cohort with one start in the Fall of each year, an exact sequence of courses taken each term and with graduation in the Spring – five semesters later.

Due to the hybrid nature of these Graduate Executive programs, which use a format that combines on-campus residency with online learning, the residencies typically occur during breaks on campus. See the relevant program website for the exact calendar dates per term for each executive program.

Students in the Graduate Executive Programs are restricted to the exact courses which are offered to that cohort in any one semester.

The course load varies from term to term – from a minimum of 5 hours to a maximum of 9 hours.

The course load is thus considered to be full time as they cannot take more hours or less as they follow the mandated and approved curriculum.

Tuition Costs Excluded VA Benefit Coverage:

VA benefits will not cover costs for lodging, meals, travel, books, supplies or memberships to organizations. As many of these costs are included in the Graduate Executive Programs’ tuition, those costs have been broken out and will be billed separately. See the relevant program website for the exact amounts per term.

MBA/MS Dual Degree Options:

The MBA/MSIS is a 54-hour program administered jointly by the Systems and Technology faculty and the MBA program. The program saves the student fifteen hours of coursework over completing both degrees separately. For the MBA, students without two years full time work experience are required to do an additional 3-credit hour internship. Students must apply separately to each program (MSIS
and MBA), but only have to pay one application fee. Students can also opt to apply for the second degree program during their first year in the other program.

The MBA/MSBA-Finance is a 54-hour program administered jointly by the Finance faculty and the MBA program. The program saves the student fifteen hours of coursework over completing both degrees separately. For the MBA, students without two years full time work experience are required to do an additional 3-credit hour internship. Students must apply separately to each program (MSBA-Finance and MBA), but only have to pay one application fee. Students can also opt to apply for the second degree program during their first year in the other program.

The MBA/MISE is a 55-hour program administered jointly by ISE and the MBA program. The program saves the student fifteen hours of course work over completing both degrees separately. For the MBA, students without two years full time work experience are required to do a 3-credit hour internship in place of one of the 3-hour BUSI or related electives. Students must apply separately to each program (MISE and MBA), but only have to pay one application fee.

PhD Business

The PhD Business offer three concentrations:

- PhD Business - Finance (p. 1553)
- PhD Business - Information Systems Management (p. 1454)
- PhD Business - Management (p. 1585)

The PhD in Business requires 60 semester hours earned through instruction beyond the bachelor’s degree, including 1) a minimum of 30 semester hours graded (e.g., A, B) graduate course work (6000-level and above); and 2) a minimum of 30 semester hours of additional graduate course work (6000-level and above) that may include ungraded courses, 7990 and 8990, and must include at least 10 hours of 8990.

The total number of credit hours that may be transferred from another accredited institution toward a doctoral degree varies by program but must be less than 50 percent of the credit hours listed on the Plan of Study. Such transfer credit 1) must fall within the time limits of the degree; and 2) must be approved by the advisory committee and the dean of the Graduate School. A maximum of four hours of 7990 (Research and Thesis) from a completed master's program may be counted.

All doctoral students must complete a minimum of 10 hours of 8990. Enrollment in 8990 may take place at any time the student and the advisory committee deem appropriate. During any one semester, the number of hours of 8990 in which the student enrolls should reflect the amount of instructional time being spent on the dissertation and the degree to which university resources are being utilized. Students may enroll, during any one semester, for as few as one hour or as many as 16 hours of 8990. Dissertation students submitting their dissertation, awaiting committee review and approval, or taking their final examination must register for 8990 Research and Dissertation in the semester(s) when these steps in the process take place. The requisite 10 hours of 8990 should be included in the Plan of Study. No grade is assigned.

Chemical Engineering - MS, PhD

Program Degrees:

- Chemical Engineering - MS (p. 1467)
- Chemical Engineering - PhD (p. 1468)

The Chemical Engineering Department offers graduate programs leading to the degrees of master of science and doctor of philosophy. Specialized courses and research training are provided in a wide variety of specialties within chemical engineering or related interdisciplinary areas. Some of these specialties include: surface science, biochemical engineering, catalysis, pulp and paper engineering, environmental engineering, waste conversion, computer-aided process design and simulation, novel bioseparations systems, chemical kinetics and reactor design, biomedical engineering, process control and optimization, thermodynamics, advanced energy research, mass and energy transfer, electrochemical engineering, polymer engineering, interfacial phenomena, process synthesis, material science, nanotechnology, and space science. Additionally, individualized interdisciplinary programs which cross the traditional departmental boundaries are encouraged. These may include collaborative work in chemistry, engineering disciplines, physics, mathematics, agriculture, forestry, biology, microbiology, genetics and health sciences or other areas.

The applicant must hold a bachelor’s degree or its equivalent from an institution of recognized standing and must have the pre-requisite undergraduate experience in areas of study relevant to the proposed graduate program. The General Test of the Graduate Record Examination (GRE) is required. If the applicant’s undergraduate degree is other than chemical engineering, an individualized plan of study will be developed to impart the critical skills inherent in the bachelor's chemical engineering program. All applicants will be
evaluated on an individual basis by the Chemical Engineering Graduate Admissions Committee. The admissions committee will evaluate the undergraduate (and graduate) record, GRE scores, letters of recommendation and any experience in research. Non-core, non-duplicating, “A” grade graduate courses from another university are eligible as determined by the Graduate Program Officer for transfer credit (maximum of 6 credit hours for Masters, 12 credit hours for PhD).

The master of science may be earned under a thesis or non-thesis option. There is not a language requirement for either option. For both options, a total of 30 semester hours of work is necessary and at least 21 hours must be in chemical engineering (CHEN). A total of 12 hours must be taken at the 7000 level or higher, the remaining 18 hours must be at the 6000 level or higher. The following core courses must be taken for a total of 9 hours:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEN 7100</td>
<td>Transport Phenomena</td>
<td>3</td>
</tr>
<tr>

</tr>
<tr>
<td>CHEN 7250</td>
<td>Chemical Reaction Engineering</td>
<td>3</td>
</tr>
<tr>
<td>Total Hours</td>
<td></td>
<td>9</td>
</tr>
</tbody>
</table>

Students pursuing a MS with thesis degree should enroll in CHEN 7950 Graduate Seminar each semester of enrollment. These students may include six (6) hours of research and thesis as part of the 30 hours. After completion of the thesis, the student must pass a final oral examination defending the thesis. The non-thesis MS degree option does not have a residency, seminar, research or final oral exam requirement. The non-thesis degree can be earned entirely through the Auburn Engineering Graduate Online Program.

The doctor of philosophy provides for advanced course work and emphasizes original, creative research. A dissertation embodying the results of this research represents the major portion of the requirements for this degree. A minimum of 60 semester hours of graduate work past the bachelor’s degree is necessary. Each student may include 10 hours of research and dissertation as part of the 60 hours. Four calendar years beyond the bachelor’s degree or three past the master’s degree usually are needed to complete the PhD. There are four (4) core graduate courses for a total of 12 credit hours:

<table>
<thead>
<tr>
<th>Code</th>

<tr>
<td>Total Hours</td>
<td></td>
<td>12</td>
</tr>
</tbody>
</table>

Additional 18 credit hours of chemical engineering (minimum 9 credit hours) and/or other elective courses at 6000 level or higher is required. The remaining 30 credit hours are composed of research and dissertation (minimum 10 credit hours), formal courses (6000 level or higher), and graduate seminar.

The General Doctoral Examination consists of two parts, the “PhD Qualifying Examination” and the “PhD Preliminary Oral Examination”. The PhD Qualifying Examination will be successfully fulfilled by earning a B or higher in each of the four (4) core graduate courses above.

At the PhD Preliminary Oral Examination, the student will present to their Faculty Research Advisory Committee a thorough description and comprehensive discussion of his/her proposed dissertation research. Successful completion of the Preliminary Oral Examination requires unanimous approval of the student’s Faculty Research Advisory Committee. Upon successful completion of the PhD Qualifying and Preliminary Oral Examinations, the student advances to candidacy. After completion of the dissertation, the student must pass a final oral examination defending the dissertation.

There is no language requirement for the PhD.

**Chemical Engineering - MS**

The master of science may be earned under a thesis or non-thesis option. There is not a language requirement for either option. For both options, a total of 30 semester hours of work is necessary and at least 21 hours must be in chemical engineering (CHEN). A total of 12 hours must be taken at the 7000 level or higher, the remaining 18 hours must be at the 6000 level or higher. There are three (3) core courses that must be taken for a total of 9 hours:
Chemical Engineering - PhD

</tbody>
</table>

By the end of the second semester, PhD students must submit a plan of study which details the courses that will be taken. This is done with the assistance of the major professor and with the consent of the student's advisory committee. The rest of the courses usually are taken in the major area. Directed study, CHEM 7930, may be taken for a maximum of 15 hours. Students must pass the written and oral general examination. Students must orally present their research and defend their dissertations in the final oral examination.

Civil Engineering - MCE, MS, PhD

Degree Programs:

- Civil Engineering - MCE (p. 1470)
- Civil Engineering - MS (p. 1470)
- Civil Engineering - PhD (p. 1471)

The Department of Civil Engineering offers graduate-level instruction and research programs leading to the degrees of Master of Civil Engineering (MCE), Master of Science (MS) and Doctor of Philosophy (PhD). These programs provide qualified students opportunities for advanced training and specialization and enable them to gain experience conducting engineering research and interpret and communicate their findings. The department offers programs in Construction Engineering and Management,
Environmental Engineering, Geotechnical Engineering, Hydraulics/Hydrology, Pavements and Materials, Structural Engineering, and Transportation Engineering. Coursework may be taken in supportive disciplines including applied statistics, building science, computer science or mathematics, with sufficient justification.

Applicants for the graduate programs must have an earned baccalaureate degree (BCE, BS or BSCE) in Civil Engineering or a closely related area and must have completed such formal training as to warrant advanced study in the major and minor fields. Applicants from related disciplines may be required to take prerequisites, as determined by the relevant specialty program and the department. There is no formal foreign language requirement.

All MS candidates must write a thesis. At least 30 semester hours of graduate-level course credit must be completed satisfactorily. At least six of the 30 hours must be in CIVL 7990 and at least 24 hours must be in graduate course work other than CIVL 7990. Candidates must pass a comprehensive examination covering the coursework, research and thesis.

Admission requirements for MCE are the same as those for MS. MCE students must take at least 30 semester hours of graduate-level courses, which may include three-semester hours of CIVL 7980. A plan of study must be approved by the student's advisory committee.

PhD applicants must have earned a BS or master's degree in Civil Engineering or a related area. Applicants from other related disciplines may be required to take prerequisites determined by the relevant specialty program and the department.

The PhD is conferred in recognition of mastery of a specific field of knowledge and a contribution to that engineering discipline through the doctoral dissertation. The degree is a research degree, requiring not only completion of certain technical requirements but proof of the candidate's ability to work independently in an engineering research environment.

To be qualified as a PhD candidate, an admitted doctoral student must pass a written comprehensive examination and a follow-up oral critique administered by the student’s advisory committee. The examination may not be taken sooner than one year after the student begins doctoral course work. Additional academic preparation may be prescribed by the advisory committee to strengthen deficiencies identified by the examination, or the student may be suspended from the program. One retake may be permitted after the student has completed the prescribed preparation. Upon successful completion of the examination, the student becomes a candidate for the PhD.

After successfully completing the comprehensive examination, the doctoral candidate will defend the proposed dissertation topic, which must represent a significant contribution to the state-of-the-art. This defense may be included in the oral critique of the comprehensive examination if the advisory committee agrees. Once the committee approves the research topic, the doctoral candidate may proceed with the research and dissertation. When it is completed, the candidate defends the completed dissertation before the advisory committee and the outside reader appointed by the Graduate School.

Communication - MA, Graduate Certificate

**Degree Programs:**
- Communication - MA (p. 1473)

**Graduate Certificates:**
- Communication Studies - Graduate Certificate (p. 1473)

The School of Communication and Journalism offers the Master of Arts in Communication and the Graduate Certificate in Communication Studies.

Students earning the MA in Communication have excellent employment opportunities working for organizations ranging from Fortune 100 companies to non-profit groups. For those interested in pursuing a doctorate, our graduates have been admitted to the best PhD programs in the Communication discipline.

For more information about both the MA and the Graduate Certificate, see [http://www.cla.auburn.edu/cmjn/](http://www.cla.auburn.edu/cmjn/). Program statistics (e.g., number of students accepted, average GRE scores, etc.) and additional information on the application process are available on that website.

**Master of Arts in Communication**

**Application Process**

Applicants for the MA must hold bachelor’s degrees from an accredited college or university and must take the General Test of the GRE. They must submit a statement of purpose, undergraduate transcripts, GRE scores, a writing sample, recommendation review forms, and letters of recommendation for consideration by an admissions committee.

They should ensure that these materials are submitted to the Graduate School web application:
- Application fee
- Official scores for the General Test of the GRE
- Official transcripts for every institution attended

They should ensure that these materials are submitted to the graduate program in the Department of Communication and Journalism:
- Statement of purpose
- Recommendation review forms
- Three letters of recommendation
- Writing sample

Deadlines for application materials are posted on the departmental website.

**MA Degree Requirements**

Students may pursue either a thesis or a non-thesis option for the MA in Communication. The MA-thesis option requires 31 hours beyond the bachelor’s degree, including the thesis. The MA-non-thesis option requires 30 hours beyond the bachelor’s degree, including appropriate field experience.
Students without a bachelor’s degree in communication (i.e., communication, journalism, public relations, radio/television/film) must earn an additional 9 graduate credit hours.

The following courses are required for the MA in Communication:

- COMM 7000 Communication Theory
- COMM 7010 Qualitative Methods of Communication Research
- COMM 7020 Quantitative Methods of Communication Research

Upon completion of the required classes, students must pass a written qualifying examination covering material presented in these three courses before continuing in the degree program. All remaining hours are elective course work.

MA-thesis option students will enroll in a minimum of 4 thesis hours (COMM 7990). MA-non-thesis option students will enroll in a minimum of 3 non-thesis project hours (COMM 7980).

All students seeking the master’s degree must pass comprehensive exams prior to graduation. The exams include both written and oral components. The nature of the written portion of the comprehensive exams will vary depending on the choice of the thesis or non-thesis option. For students choosing the thesis option, the thesis typically constitutes the written portion of the comprehensive examination. Students choosing the non-thesis option must pass a written examination covering the program of study as well as any research and special project/internship/field experience.

There is no foreign language requirement.

### Graduate Certificate in Communication Studies

#### Application Process

Applicants for the Graduate Certificate must hold bachelor’s degrees from accredited colleges or universities and must take the General Test of the GRE. An admissions committee evaluates the applicant’s statement of purpose, undergraduate record, GRE scores, writing sample, recommendation review forms, and letters of recommendation.

Applicants should ensure that these materials are submitted to the Graduate School web application:

- Application fee
- Official scores for the General Test of the GRE
- Official transcripts for every institution attended

They should ensure that these materials are submitted to the graduate program in the Department of Communication and Journalism:

- Statement of purpose
- Recommendation review forms
- Three letters of recommendation
- Writing sample

#### Requirements

The Graduate Certificate in Communication Studies requires 18 hours beyond the bachelor’s degree. It does not require a thesis or field experience. The following courses are required for the Graduate Certificate in Communication Studies:

- COMM 7000 Communication Theory
- COMM 7010 Qualitative Methods of Communication Research
- COMM 7020 Quantitative Methods of Communication Research

Upon completion of these three required classes, students must pass a written qualifying examination covering material presented in these three courses. The remaining 9 hours are elective course work.

#### Financial Aid

A limited number of competitive graduate teaching assistantships are available. To get more information about the assistantships and to learn how to apply, please visit the following website: http://www.cla.auburn.edu/cmjn/graduate-program/assistantships/ (http://bulletin.auburn.edu/theschoolofgraduatestudies/graduatedegreesoffered/communicationmajors/20http://www.cla.auburn.edu/cmjn/
graduate-program/assistantships/). Students enrolled in the Graduate Certificate in Communication Studies are not eligible for financial aid.

Communication Disorders - MCD, MS

**Degree Programs:**

- Communication Disorders - MS

The Department of Speech, Language, and Hearing Sciences offers a master’s programs in speech-language pathology accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association (ASHA). A Master of Speech, Language, and Hearing Sciences (MS) has a thesis or non-thesis requirement. The degree does not require expertise in a foreign language. Information about the degree program is available at [http://www.cla.auburn.edu/communicationdisorders/](http://www.cla.auburn.edu/communicationdisorders/).

The plan of study for the MS degree may be designed according to the student’s career interests; however, the curriculum planned must conform to academic and practicum requirements for ASHA certification and Alabama licensure. Students then are prepared for careers in school systems, clinics, hospital/rehabilitation centers, physicians’ offices, and private practice and for pursuing the doctoral degree.

**Admission Requirements**

A baccalaureate degree from an accredited university is necessary. Those with a degree in communication sciences and disorders, or equivalent, complete the Master of Speech, Language and Hearing Science (MS) degree with 55 semester credit hours; additional thesis hours are optional for the thesis track. General education courses on the undergraduate transcript should include at least one course in each of the following areas: math, statistics, life science, physical science (i.e., Chemistry or Physics), and behavioral science. As this background is expected by the program’s accreditation agency, any deficiency must be fulfilled before conferral of the master’s degree in this program. Students who do not have required undergraduate prerequisite course will be required to take the coursework prior to entering or as part of their graduate program.

Some application materials are sent directly to the Graduate School and other materials are sent CSDCAS.

Application to Auburn University’s Speech, Language and Hearing Sciences Dept. requires that you complete both the electronic application through the Communication Sciences and Disorders Centralized Application Service (CSDCAS) AND the online application to the Auburn University Graduate School. Here are specific steps:

1. Apply online to AU’s Graduate School and submit payment.
2. GRE scores must also be submitted to the Graduate School at Auburn University (ETS Institution code 1005)

- Official transcripts from every college or university attended must be sent to CSDCAS
- Official GRE scores must be sent to CSDCAS (ETS code 7807)
- Three professional letters of recommendation must be submitted to CSDCAS
- A video: See website for instructions and prompt

For international students whose native language is not English, the TOEFL must be taken and submitted to both CSDCAS and AU Graduate School.
January 15th is the annual deadline for applications to the graduate program. To be considered for admission, all materials need to be submitted to AU and CSDCAS no later than January 15th.

**Graduation Requirements**

The MS in Speech, Language, and Hearing Sciences thesis track requires a minimum of 54 hours of graduate course work, including at least four hours of CMDS 7990 Research and Thesis, and an appropriate internship experience, CMDS 7920 Internship in Speech-Language Pathology.

The Master in Speech, Language, and Hearing Sciences non-thesis track requires a minimum 55 hours of graduate course work and appropriate internship experience, CMDS 7920 Internship in Speech-Language Pathology.

**Required Courses**

This is the course schedule for both tracks, with the exception of CMDS 7990 Research and Thesis (4 hours), which is required only for the MS thesis track students. MS thesis track students do not take comprehensive exams. CMDS 7990 Research and Thesis is not required for non-thesis track students who take comprehensive exams rather than write a thesis.

* Thesis Track: A minimum of 4 and a maximum of 6 credit hours of CMDS 7990 Research and Thesis count toward the degree. Thesis students waive academic comprehensive examinations (0 credit) and also may waive CMDS 7920 Internship (5 credits) unless additional clock hour experience is needed. This option requires a minimum total of 54 semester credit hours. Non-Thesis Track: Non-Thesis students waive must complete and pass comprehensive examinations (0 credit) and complete the CMDS 7920 Internship (5 credits). This option requires a minimum total of 55 semester credit hours.

Community Planning - (MCP)
The Community Planning Program at Auburn University is a professionally oriented masters degree program that focuses on the skills that professional planners need for practice in an interactive and interdisciplinary environment. The centerpiece of the program is the opportunity for students and faculty to engage with under-served communities throughout Alabama and the Southeast through outreach, teaching, and engaged research. Through working on projects with communities throughout Alabama and the Southeast,
students learn to help diverse and complex communities create and implement plans that improve and protect their quality-of-life, culture, resource base, built environment, natural environment, and economic vitality.

The Master of Community Planning (MCP) is a professional, non-thesis degree. Students will normally earn the degree in two academic years by successfully completing 45 credit hours of course work, including two capstone plan-making workshops. The program offers dual degree options with public administration, and landscape architecture (each of which requires a separate application). Enhanced opportunities for interdisciplinary teaching and learning are offered by the program’s distinctive Alabama City Year Program, in which the program focuses on one city in the Southeast each year and students complete multiple outreach and engagement projects in that city in each of their classes.

Master of Community Planning (45 credit hours)

**Computer Science and Software Engineering - MS, PhD**

**Degree Programs:**

- Computer Science and Software Engineering - MS (p. 1478)
- Computer Science and Software Engineering (Distance) - MS (p. 1478)
- Computer Science and Software Engineering - PhD (p. 1479)

Graduate study in the Department of Computer Science and Software Engineering (CSSE) leads to the non-thesis master of science (MS Non-Thesis) or research oriented master of science (MS Thesis) and doctor of philosophy (PhD) degrees in computer science and software engineering. All applications are reviewed by the CSSE Graduate Programs Committee.

To enter the MS degree program, the student must hold a bachelor’s degree or its equivalent from an institution of recognized standing. The student also must have the pre-requisite undergraduate experience in areas of computer science and/or software engineering. If the student has deficiencies in the pre-requisites, he or she will be required to take appropriate undergraduate courses. All applicants must submit Graduate Record Examination scores for the general test.

The thesis option of the MS program requires 30 semester credit hours, including six credit hours for research and thesis. The non-thesis option of the MS program requires 33 semester credit hours. Students pursuing the MS (Non-Thesis) degree may take three (3) credit hours of COMP 7980 Capstone Engineering Project, which is a graded course.

For the PhD program, the applicant must hold a master’s degree or have successfully completed a minimum of one academic year of graduate study, from an institution of recognized standing in an area related to the proposed doctoral study. All applicants must submit GRE scores for the general test. The student will take a written qualifying examination after gaining admission to the program. Additional examinations, as described in the general Graduate School requirements, are given throughout the program, culminating
with the defense of the dissertation. The PhD program typically includes at least one academic year of course work and one year of research beyond the master’s level. The PhD program requires a minimum of 66 semester credit hours of course work beyond the bachelor’s level, including 18 hours of research and dissertation.

**Computer Science and Software Engineering - MS**

The master of science may be earned under a thesis or non-thesis option. The MS (non-thesis) degree requires a minimum of 33 graduate semester credit hours. All courses in the degree must be taken for a grade. The three required 7000-level courses are COMP7270, COMP7300, and COMP7500. Students may take up to three (3) credit hours of COMP7930 Directed Study. Students may take three (3) credit hours of COMP7980 Master of Science Capstone Engineering Project, which is a graded course.

The Master of Science degree (thesis option) requires a minimum of 30 graduate semester credit hours. All courses in the degree must be taken for a grade; the exception is COMP7990 Research and Thesis, which is offered in incomplete/complete format. The three required 7000-level courses are COMP7270, COMP7300, and COMP7500. Students may take up to three (3) credit hours of COMP7930 Directed Study. A thesis is required for the MS-CSSE degree (i.e., thesis option). A written proposal supporting thesis project must be approved by a student’s supervisory committee, which is comprised of at least three faculty members. One member of the committee is designated as the major professor (a.k.a., advisor). Students must pass a comprehensive oral examination at the conclusion of their studies. All students with thesis option are required to submit Master’s Final Examination Form to the graduate school.

**Computer Science and Software Engineering (Distance) - MS**

The distance-learning option enables students to participate in online learning. The Department of Computer Science and Software Engineering (CSSE) offers the Master of Science distance program (non-thesis), which is the online version of the Master of Science Program in Computer Science and Software Engineering (non-thesis option). The MS (non-thesis) degree requires a minimum of 33 graduate semester credit hours. All courses in the degree must be taken for a grade. The three required 7000-level courses are COMP7270, COMP7300, and COMP7500. Students may take up to three (3) credit hours of COMP7930 Directed Study. Students may take three (3) credit hours of COMP7980 Master of Science Capstone Project, which is a graded course.

A maximum of six (6) credit hours of directed study (COMP 8930) can be applied toward the degree. A maximum of 18 hours of COMP 8990 can be applied toward the degree.

The general doctoral examination consists of two parts – written and oral. The written part will be successfully fulfilled by passing the three qualifying exams (computer organization/architecture, operating systems, and algorithms) or earning a B or higher in the required core courses. In the oral part, a doctoral student will present to her/his advisory committee a thorough description of her/his proposed dissertation research. Successful completion of the oral part requires unanimous approval of the student’s advisory committee. Upon successful completion of the general examination, the student advances to candidacy. After completion of the dissertation, the student must pass a final examination defending the dissertation.

There is no language requirement for the PhD.

**Consumer and Design Sciences - MS, PhD**

**Degree Program:**

- Consumer and Design Sciences - MS (p. 1481)
- Consumer and Design Sciences - PhD (p. 1482)

Graduate study in the Department of Consumer and Design Sciences, College of Human Sciences, leads to the master of science and the doctor of philosophy. Major focus areas are apparel design or merchandising, interior design, and consumer behavior. The department emphasizes integration of basic and applied knowledge from multiple fields to enhance professional skills for careers in textile and apparel product development and design; production management; retail management; merchandising in textile and apparel retail or design firms; design of residential and commercial interiors; and college teaching and research. A foreign language is not required. Entrants with limited undergraduate backgrounds in their chosen area may need to complete some undergraduate courses. Graduate teaching and research assistantships are available on a competitive basis.

Applicants for the M.S. must have a bachelor’s degree or its equivalent from an accredited college or university. The General Test of the Graduate Record Examination is required. The admissions committee will evaluate the undergraduate record, GRE scores, letter of intent, resume, and three letters of recommendation. International applicants must submit the Test of English as a Foreign Language and meet the Graduate School admission requirements for this test.

The M.S. degree offers a Thesis Option and a Non-Thesis Option. The Thesis Option requires 30 semester hours; the Non-Thesis Option requires 36 semester hours. Individually designed focus areas incorporate courses in Consumer and Design Sciences and other departments. At least 21 semester hours must be in apparel, interiors, or consumer-related courses.

Requirements common to both options include:

<table>

</table>
CADS 7040  Protocol for Graduate Study  1

CADS 7050  Research Methods in Consumer and Design Sciences  3

CADS 7060  Survey of Consumer and Design Sciences Research  3

At least 2 CADS graduate level theory courses  6

At least two Graduate level Statistics courses  6-8

Electives to support dissertation topic and/or to meet career goals  27-31

Research & Thesis  4

Research & Dissertation  10

Total Hours  60-66

1  If student has a non-thesis Master’s degree, a manuscript suitable for submission to a research journal must be prepared and submitted prior to beginning the dissertation research.

2  If thesis hours are not applicable, 4 hours must be satisfied with approved electives.

PhD students must pass a General Doctoral Examination after completion of the course work and prior to proceeding to the dissertation. The General Doctoral Examination has written and oral parts to evaluate comprehension of existing knowledge in the student’s area of study. Upon successful completion of the Examination, the student enters the candidacy for the Doctor of Philosophy degree and proceeds with the dissertation research. The Final Oral Examination is the defense of the dissertation, which must receive unanimous approval by the Graduate Advisory Committee and the Outside Reader before the PhD can be conferred.

Curriculum and Teaching - MEd, MS, EdS, PhD

Degree Programs

- Agriscience Education (p. 1484)
- Business and Marketing Education (p. 1487)
- Career and Technical Education (p. 1490)
- Early Childhood Education (p. 1490)
- Elementary Education (p. 1493)
- English for Speakers of Other Languages (p. 1498)
- English Language Arts Education (p. 1495)
- Foreign Language Education: French or Spanish (p. 1499)
- Mathematics Education (p. 1504)
- Music Education: Instrumental or Vocal (p. 1506)
- Reading Education (p. 1510)
- Science Education: General Science, Biology, Chemistry, or Physics (p. 1511)
- Social Science Education: General Social Science or History (p. 1521)

Graduate Certificates

- Community Music (p. 1525)
- Reading Instruction (http://bulletin.auburn.edu/thegraduateschool/graduatedegreesoffered/curriculumandteachingmedmsedsphd_major/readinginstruction_certificate/)
- Teaching English as a Second Language (TESL)/Teaching English as a Foreign Language (TEFL) (p. 1526)

The Department of Curriculum and Teaching offers graduate certificates and graduate degree programs leading to the master of education (certification option), master of science (non-certification option), specialist in education, and doctor of philosophy. All graduate teacher certification programs are approved by the Alabama State Board of Education (ALSBE). Auburn University's College of Education is accredited through the National Council for Accreditation of Teacher Education (NCATE). Music education programs are also accredited by the National Association of Schools of Music (NASM).

Master’s Degree Programs (MEd/MS)

Master of education (MEd) degree programs include both alternative and traditional certification options. Alternative MEd certification programs offer qualified students who hold non-teaching baccalaureate degrees a route to initial teacher certification while
simultaneously earning a master’s degree. Traditional MEd certification programs offer advanced study in pedagogy. MS non-certification programs provide interdisciplinary graduate-level education for community-based or international educators who do not wish to gain teacher certification/licensure in the United States.

Applicants to master’s degree programs must satisfy the Graduate School’s admission requirements. Departmental admission requirements include a bachelor’s degree from an accredited college or university with a minimum GPA of 2.75 overall or a master’s or higher degree with a GPA of at least 3.0. This GPA must be documented on the official transcript of the degree granting institution and must be the GPA that was used as the basis for granting the degree, not a GPA that includes post-degree courses. Admission requirements also include academic good standing at the institution last attended, competitive GRE scores, letters of recommendation, current resume, clear background check, and approval by the department. In addition, applicants to alternative MEd certification programs must satisfy the State’s teaching field admission requirements and submit a passing score on each of the Praxis Core Academic Skills for Educators (Reading, Writing, and Mathematics). Applicants to a traditional MEd certification program must hold a valid bachelor’s-level professional educator certificate in the same teaching field as the MEd, except for English for speakers of other languages (ESOL) and reading education. Admission to the MEd ESOL program requires at least a valid bachelor’s-level professional educator certificate in any teaching field. Admission to the MEd certification program in reading education includes (a) a valid bachelor’s-level professional educator certificate in early childhood education, elementary education, or collaborative special education teacher Grades K-6 and two full years of full-time classroom teaching experience or (b) a valid bachelor’s-level professional educator certificate in any area of education, two full years of full-time classroom teaching experience, and a passing score on the Praxis II Teaching Reading test validated for use in Alabama.

Degree requirements for MEd certification programs are in compliance with regulations established by the ALSBE. Alternative MEd certification programs range from 30-44 hours and typically take a minimum of four semesters to complete if enrolled full-time; additional undergraduate coursework may be required. Degree requirements include a semester long, full-time internship; satisfactory completion of the State’s testing program including passing scores on the appropriate Praxis II assessments prior to internship; and a written comprehensive exam.

Traditional MEd certification programs and MS non-certification programs require a minimum of 30 semester hours and a comprehensive examination. Requirements for MEd certification programs in reading education and ESOL include a passing score on the appropriate Praxis II subject assessment.

In accordance with State regulations, effective for students unconditionally admitted to an MEd certification program prior to July 1, 2017, a minimum GPA of 3.00 is required on all courses used to meet master’s-level certification program requirements. Effective for students unconditionally admitted to an MEd certification program July 1, 2017 and after, a minimum GPA of 3.25 will be required on all courses used to meet master’s-level certification program requirements.

Specialist in Education Degree Programs (EdS)

Applicants to EdS programs must satisfy the Graduate School’s admission requirements. Departmental admission requirements include a master’s degree from an accredited college or university, academic good standing at the institution last attended, competitive GRE scores, letters of recommendation, current resume, a valid master’s-level professional educator certificate in an appropriate area of teaching, clear background check, and approval by the department.

Degree requirements for specialist-level teacher certification programs are in compliance with regulations established by the ALSBE. Specialist programs include a minimum of 30 semester hours beyond the master’s degree. Additional requirements include satisfactory completion of a field project and a written comprehensive exam.

In accordance with State regulations, effective for students unconditionally admitted prior to July 1, 2017, a minimum GPA of 3.25 is required on all courses used to meet specialist-level certification program requirements. Effective for students unconditionally admitted July 1, 2017 and after, a minimum GPA of 3.50 will be required on all courses used to meet specialist-level certification program requirements.

Master’s- and Specialist-Level Certification

Individuals completing State-approved MEd certification programs are eligible to apply for Alabama Class A certification; individuals completing State-approved specialist-level certification programs are eligible to apply for Alabama Class AA certification. Effective September 1, 2018, the Alabama State Board for Education will require an acceptable score on the edTPA for initial certification in a teaching field. This state certification requirement applies to individuals completing alternative master’s programs. Individuals seeking certification in states other than Alabama are responsible for contacting those state certification offices to obtain their application form and requirements. The State of Alabama signs the National Association of State Directors of Education and Certification (NASDTEC) Interstate Agreement which facilitates the applications of program graduates when they apply for certification in other states.
Doctor of Philosophy Degree Programs (PhD)
Applicants to PhD programs must satisfy the Graduate School’s admission requirements. Departmental admission requirements include a competitive GRE score, current resume, statement of purpose, letters of recommendation, and approval by the department.

All doctoral programs require a minimum of 80 semester hours beyond the bachelor’s degree. Research methods, statistics, and foundations of education courses are components of all doctoral programs. The remaining hours are divided between the area of specialization and approved support courses. Plans of study for students in secondary education fields must contain at least 30 semester hours of graduate courses in the appropriate teaching fields. After satisfactory completion of coursework and a general written and oral examination, the student advances to candidacy. Doctoral students must register for at least 10 semester hours of doctoral research while completing a dissertation. Doctoral students must enroll each semester during their program.

Graduate Certificates
The Department of Curriculum and Teaching offers graduate certificates in Teaching English as a Second Language (TESL)/Teaching English as a Foreign Language (TEFL), Community Music Education, and Reading Instruction. Departmental admission requirements for these graduate certification programs include a transcript showing the applicant’s last degree completed, a current resume, and three letters of recommendation.

The Department in collaboration with the Department of Educational Foundations, Leadership and Technology also offers a graduate certificate in Adult Education and English Language Teaching. Applicants should contact the Department of Educational Foundations, Leadership and Technology for admission requirements for the Adult Education and English Language Teaching graduate certificate program.

Online Learning Graduate Programs and Courses
The Department of Curriculum and Teaching offers the majority of graduate programs through online learning as well as through residential study.

Additional Information
Detailed admission and program requirements for the department’s multiple areas of graduate study are available on the Department of Curriculum and Teaching’s website, Graduate Application and Admission (http://www.education.auburn.edu/ct-grad-admissions).

<td></td>
</tr>
</tbody>
</table>

At least 1/3 of the program shall be in teaching field courses.

Professional Studies: 21 hours
CTCT 6050/6056  Methods of Teaching in Area of Specialization 3
CTCT 6060/6066  Program Planning in Area of Specialization 3
CTRD 6000/6006  Language and Literacy in the Content Areas 1 3
RSED 6000/6006  Advanced Survey of Exceptionality 1 3
CTCT 7920/7926  Clinical Residency 2 9

Total Hours 33

1 RSED 6000/6 must be completed if a survey of special education course was not completed prior to unconditional admission. If a survey of special education course was completed prior to unconditional admission, the state diversity course requirement is fulfilled with CTRD 6000/6 Language and Literacy and the 3-hour course requirement for RSED 6000/6 will be waived resulting in 18 hours in Professional Studies and 30 total program hours.

2 Clearance for Clinical Residency includes completion of all other coursework. Exceptions require approval using the Student Petition Form.

In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.25 is required on all courses used to meet program requirements.

Coursework used to meet admission requirements cannot be used again to meet Alternative Class A program requirements.

All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.

Undergraduate courses may be required by your advisory committee for your plan of study. This coursework is in addition to the total hours noted above and must be completed prior to Clinical Residency.

Total Hours 30

1 RSED 6000/6 Advanced Survey of Exceptionality must be used to fulfill requirement if survey of special education course was not completed for prior level certification. It may not be used to fulfill the requirement if a survey of special education course was completed for prior level certification. State-approved diversity courses for Auburn University are posted on the ALSDE website.

2 To ensure a field experience, CTCT 8910/CTCT 8916 is required for those seeking Class AA certification only; this requirement is in addition to any practicum credit counted for Class A certification. CTCT 8980/CTCT 8986 is required for those seeking the EdS degree.

3 Supporting courses must be applicable to the area of certification (e.g., research, assessment/evaluation, classroom management, pedagogy, human behavior/development, foundations, technology, teaching field).
In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.50 is required on all courses used to meet program requirements.
Coursework used to meet Class A certification requirements may not be used to meet requirements for Class AA certification.
All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.

</table>

1. Required if not previously completed at undergraduate level.
2. RSED 6000/6 must be completed if a survey of special education course was not completed prior to unconditional admission. If a survey of special education course was completed prior to unconditional admission, the state diversity course requirement is fulfilled with CTRD 6000/6 Language and Literacy and the 3-hour course requirement for RSED 6000/6 will be waived resulting in 19 hours in Professional Studies and 41 total program hours.
3. Clearance for Clinical Residency includes completion of all other coursework. Exceptions require approval using the Student Petition Form.

In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.25 is required on all courses used to meet program requirements.

Coursework used to meet admission requirements cannot be used again to meet Alternative Class A program requirements.

All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.

Undergraduate courses may be required by your advisory committee for your plan of study. This coursework is in addition to the total graduate program hours noted above and must be completed prior to Clinical Residency.

### Business/Marketing Education - MEd (Certification, Online Option Available)

#### Class A Program Checklist for Teaching Field

**Teaching Field: 18 hours**

At least 1/3 of the program shall be teaching field courses.

**Required: 3 hours**

- CTCT 7300/7306 Integrating Technology in Career and Technical Education

**Select 15 hours from the following:**

- CTCT 6200/6206 Records Management Systems
- CTCT 6240/6246 Multimedia Design
- CTCT 6250/6256 Information Design & Analysis
- CTCT 6260/6266 Applied Computer Technology
- CTCT 7200/7206 Career and Occupational Information
- CTCT 7240/7246 Administrative Management
- CTCT 7970/7976 Special Topics in Area of Specialization

Other advisor-approved courses 6000 level and above in teaching field (i.e., CTCT, ACCT, BUSI, FINC, HRMN, ISMN, MNGT, or MKTG)

**Survey of Special Education/ Diversity Course: 3 hours**

- RSED 6000/6006 Advanced Survey of Exceptionality OR state-approved diversity course

**Additional Courses: 9 Hours**

**Required: 4 hours**

- CTCT 7710/7716 Advanced Teaching Methods
- CTCT 7950/7956 Seminar in Area of Specialization

**Select 5 hours from the following:**

- CTCT 6080/6086 Principles of Coordination
- CTCT 7000/7006 Foundations of Career and Technical Education
- CTCT 7010/7016 Youth Program Development
- CTCT 7720/7726 Advanced Program Planning in Area of Specialization
- CTCT 7730/7736 Program Evaluation
- CTCT 7750/7756 Administration of Career and Technical Education
- CTCT 7760/7766 Comprehensive Planning in Career and Technical Education
CTCT 7770/7776 Clinical Supervision
CTCT 7780/7786 Research in Career and Technical Education
CTCT 7910/7916 Practicum in Area of Specialization
CTCT 7990/7996 Research and Thesis
Other advisor-approved supporting courses 6000 level and above

Total Hours 30

1 RSED 6000/6 Advanced Survey of Exceptionality must be used to fulfill requirement if survey of special education course was not completed for prior level certification. It may not be used to fulfill the requirement if a survey of special education course was completed for prior level certification. State-approved diversity courses for Auburn University are posted on the ALSDE website.

2 Required unless teaching in area of certification at an approved school site.

3 Supporting courses must be applicable to the area of certification (e.g., research, assessment/evaluation, classroom management, pedagogy, human behavior/development, foundations, technology, teaching field).

In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.25 is required on all courses used to meet program requirements.

Coursework used to meet Class B certification requirements may not be used to meet requirements for Class A certification.

All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.

</tbody>
</table>

1. Required if not previously completed.
2. To ensure a field experience, CTEE 7910/CTEE 7916 is required for those seeking Class AA certification only; this requirement is in addition to any practicum credit counted for Class A certification. CTEE 8980/CTEE 8986 is required for those seeking the EdS degree.
3. RSED 6000/6 Advanced Survey of Exceptionality must be used to fulfill requirement if survey of special education course was not completed for prior level certification. It may not be used to fulfill the requirement if a survey of special education course was completed for prior level certification. State-approved diversity courses for Auburn University are posted on the ALSDE website.
4. Supporting courses must be applicable to the area of certification (e.g., research, assessment/evaluation, classroom management, pedagogy, human behavior/development, foundations, technology, teaching field).

In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.50 is required on all courses used to meet program requirements.
Coursework used to meet Class A certification requirements may not be used to meet requirements for Class AA certification. All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.

CTSE 7920/7926  Clinical Residency  3

Total Hours  33

1. English Language Arts programs shall require at least one course in two areas within the broader field.

2. RSED 6000/6 must be completed if a survey of special education course was not completed prior to unconditional admission. If a survey of special education course was completed prior to unconditional admission, the state diversity course requirement is fulfilled with CTRD 6000/6 Language and Literacy and the 3-hour course requirement for RSED 6000/6 will be waived resulting in 18 hours in Professional Studies and 30 total program hours.

3. Clearance for Clinical Residency includes completion of all other coursework. Exceptions require approval using the Student Petition Form.

In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.25 is required on all courses used to meet program requirements.

Coursework used to meet admission requirements cannot be used again to meet Alternative Class A program requirements. All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.

Undergraduate courses may be required by your advisory committee for your plan of study. This coursework is in addition to the total graduate program hours noted above and must be completed prior to Clinical Residency.

1 RSED 6000/6 Advanced Survey of Exceptionality must be completed if survey of special education course was not completed for prior level certification. If a survey of special education course was completed for prior level certification, the state diversity course requirement is fulfilled with CTSE 7520/6 Curriculum and Teaching in Foreign Language.

2 Required unless teaching in area of certification at an approved school site.

3 Supporting courses must be applicable to the area of certification (e.g., research, assessment/evaluation, classroom management, pedagogy, human behavior/development, foundations, technology, teaching field).

In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.25 is required on all courses used to meet program requirements.

Coursework used to meet Class B certification requirements may not be used to meet requirements for Class A certification.

All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.

### CTSE 7920/7926 Clinical Residency

| Total Hours | 42 |

1. RSED 6000/6 must be completed if a survey of special education course was not completed prior to unconditional admission. If a survey of special education course was completed prior to unconditional admission, the state diversity course requirement is fulfilled with CTSE 7520/6 Curriculum & Teaching in Foreign Language and the 3-hour course requirement for RSED 6000/6 will be waived resulting in 24 hours in Professional Studies and 39 total program hours.

2. Clearance for Clinical Residency includes completion of all other coursework. Exceptions require approval using the Student Petition Form.

In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.25 is required on all courses used to meet program requirements.

Coursework used to meet admission requirements cannot be used again to meet Alternative Class A program requirements. All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.

Undergraduate courses may be required by your advisory committee for your plan of study. This coursework is in addition to the total graduate program hours noted above and must be completed prior to Clinical Residency.

**Total Hours** 30

1. RSED 6000/6 Advanced Survey of Exceptionality must be used to fulfill requirement if survey of special education course was not completed for prior level certification. It may not be used to fulfill the requirement if a survey of special education course was completed for prior level certification. State-approved diversity courses for Auburn University are posted on the ALSDE website.
To ensure a field experience, a minimum of 1 hour of CTSE 8980/CTSE 8986 is required for those seeking Class AA certification only; 3 hours is required for those seeking the EdS degree.

Required if not previously completed at Auburn University.

Required if graduate level course in organization in math education not previously completed.

Required if graduate level course in evaluation in math education not previously completed.

Supporting courses must be applicable to the area of certification (e.g., research, assessment/evaluation, classroom management, pedagogy, human behavior/development, foundations, technology, teaching field).

In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.50 is required on all courses used to meet program requirements. [Add note to curriculum model and DegreeWorks/Program Block. The additional GPA will be calculated and monitored by the college.]

Coursework used to meet Class A certification requirements may not be used to meet requirements for Class AA certification.

All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.

#### Class AA Program Checklist for Teaching Field

**Teaching Field: 11 hours**

At least 1/3 of the program shall be teaching field courses

Select 11 hours of advisor-approved 6000-7000 level courses in Music (MUSI, MUSE, and/or MUAP)

**Survey of Special Education/Diversity Course: 3 hours**

- RSED 6000/6006 Advanced Survey of Exceptionality OR state-approved diversity course

**Additional Courses: 16 hours**

- CTMU 8980/8986 Field Project
- Select 10 hours of the following: 13
  - CTMU 7000/7006 School and Community Music
  - CTMU 7510/7516 Research Studies in Music Education
  - CTMU 7520/7526 Curriculum and Teaching in Music Education
  - CTMU 7530/7536 Organization of Program in Music Education
  - CTMU 7540/7546 Evaluation of Program in Music Education
  - CTMU 7550/7556 Applications of Technology in Music Education
  - CTMU 7560/7566 Digital Media Production for Music Education
  - CTMU 7570/7576 Music Instruction Multimedia Research and Development
  - CTMU 7910/7916 Practicum in Area of Specialization
  - CTMU 7970/7976 Special Topics

Select 3 hours of advisor-approved courses 6000 level and above

**Total Hours** **30**

---

1. RSED 6000/6006 Advanced Survey of Exceptionality must be used to fulfill requirement if survey of special education course was not completed for prior level certification. It may not be used to fulfill the requirement if a survey of special education course was completed for prior level certification. State-approved diversity courses for Auburn University are posted on the ALSDE website.

In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.25 is required on all courses used to meet program requirements.

Coursework used to meet Class B certification requirements may not be used to meet requirements for Class A certification.

All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.
In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.50 is required on all courses used to meet program requirements.

Coursework used to meet Class A certification requirements may not be used to meet requirements for Class AA certification.

All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.

---

1. RSED 6000/6 Advanced Survey of Exceptionality must be completed if survey of special education course was not completed for prior level certification. If a survey of special education course was completed for prior level certification, the state diversity course requirement is fulfilled with CTRD 6000/6 Language and Literacy.

2. Supporting courses must be applicable to the area of certification (e.g., research, assessment/evaluation, classroom management, pedagogy, human behavior/development, foundations, technology, teaching field).

In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.25 is required on all courses used to meet program requirements.

Coursework used to meet Class B certification requirements may not be used to meet requirements for Class A certification.

All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.

Total Hours 37

1. General Science programs shall require at least one course in two areas within the broader field (e.g., biology, chemistry, physics, and geology).
2. RSED 6000/6 must be completed if a survey of special education course was not completed prior to unconditional admission. If a survey of special education course was completed prior to unconditional admission, the state diversity course requirement is fulfilled with CTRD 6000/6 Language and Literacy and the 3-hour course requirement for RSED 6000/6 will be waived resulting in 22 hours in Professional Studies and 34 total program hours.
3. Clearance for Clinical Residency includes completion of all other coursework. Exceptions require approval using the Student Petition Form.

In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.25 is required on all courses used to meet program requirements.
Coursework used to meet admission requirements cannot be used again to meet Alternative Class A program requirements. All substitutions for required courses must be approved using the Course Substitution Form, including transfer work. Undergraduate courses may be required by your advisory committee for your plan of study. This coursework is in addition to the total graduate program hours noted above and must be completed prior to Clinical Residency.

### Class AA Program Checklist for Teaching Field

**Teaching Field: 12 hours**

At least 1/3 of the program shall be in teaching field courses.

Select 12 hours of advisor-approved 6000-7000 level courses in Science $^1$

**Survey of Special Education/Diversity Course: 3 hours**

RSED 6000/6006 Advanced Survey of Exceptionality OR state-approved diversity course $^2$

**Additional Courses: 15 hours**

Select 15 hours from the following:

- CTSE 6000/6006 Technology in Science Education
- CTSE 7510/7516 Research Studies in Area of Specialization $^3$
- CTSE 7520/7526 Curriculum and Teaching in Area of Specialization
- CTSE 7530/7536 Organization of Program in Area of Specialization
- CTSE 7540/7546 Evaluation of Program in Area of Specialization $^3$
- CTSE 7900/7906 Directed Studies
- CTSE 7910/7916 Practicum in Area of Specialization $^4$
- CTSE 7970/7976 Special Topics
- CTSE 8980/8986 Field Project $^4$

Other advisor-approved courses 6000 level and above in Science Education

Other advisor-approved supporting courses 6000 level and above $^5$

**Total Hours**

30

---

$^1$ General Science programs shall require at least one course in two areas within the broader field (e.g., biology, chemistry, physics, geology).

$^2$ RSED 6000/6006 Advanced Survey of Exceptionality must be used to fulfill requirement if survey of special education course was not completed for prior level certification. It may not be used to fulfill the requirement if a survey of special education course was completed for prior level certification. State-approved diversity courses for Auburn University are posted on the ALSDE website.

$^3$ CTSE 7510/7516 required if a graduate level course in research studies in Science Education not previously completed; CTSE 7540/7546 required if a graduate level course in evaluation in Science Education not previously completed.

$^4$ To ensure a field experience, CTSE 7910/CTSE 7916 is required for those seeking Class AA certification only; this requirement is in addition to any practicum credit counted for Class A certification. CTSE 8980/CTSE 8986 is required for those seeking the EdS degree.

$^5$ Supporting courses may not exceed 6 hours and must be applicable to the area of certification (e.g., research, assessment/evaluation, classroom management, pedagogy, human behavior/development, foundations, technology, teaching field).

In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.50 is required on all courses used to meet program requirements.

Coursework used to meet Class A certification requirements may not be used to meet requirements for Class AA certification.

All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.

¹ RSED 6000/6 must be completed if a survey of special education course was not completed prior to unconditional admission. If a survey of special education course was completed prior to unconditional admission, the state diversity course requirement is fulfilled with CTSE 6000/6 Language and Literacy and the 3-hour course requirement for RSED 6000/6 will be waived resulting in 22 hours in Professional Studies and 34 total program hours.

² Clearance for Clinical Residency includes completion of all other coursework. Exceptions require approval using the Student Petition Form.

In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.25 is required on all courses used to meet program requirements.

Coursework used to meet admission requirements cannot be used again to meet Alternative Class A program requirements.

All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.

Undergraduate courses may be required by your advisory committee for your plan of study. This coursework is in addition to the total graduate program hours noted above and must be completed prior to Clinical Residency.

Total Hours: 30

1. RSED 6000/6 Advanced Survey of Exceptionality must be used to fulfill requirement if survey of special education course was not completed for prior level certification. It may not be used to fulfill the requirement if a survey of special education course was completed for prior level certification. State-approved diversity courses for Auburn University are posted on the ALSDE website.

2. CTSE 7510/7516 required if a graduate level course in Research Studies in Science Education not previously completed; CTSE 7540/7546 required if a graduate level course in evaluation in Science Education not previously completed.

3. To ensure a field experience, CTSE 7910/CTSE 7916 is required for those seeking Class AA certification only; this requirement is in addition to any practicum credit counted for Class A certification. CTSE 8980/CTSE 8986 is required for those seeking the EdS degree.

4. Supporting courses may not exceed 6 hours and must be applicable to the area of certification (e.g., research, assessment/evaluation, classroom management, pedagogy, human behavior/development, foundations, technology, teaching field).
In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.50 is required on all courses used to meet program requirements.

Coursework used to meet Class A certification requirements may not be used to meet requirements for Class AA certification.

All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.

1. General Social Studies programs shall require at least one course in two areas within the broader field (i.e., ECON, GEOG, HIST, POLI).

2. RSED 6000/6 must be completed if a survey of special education course was not completed prior to unconditional admission. If a survey of special education course was completed prior to unconditional admission, the state diversity course requirement is fulfilled with CTRD 6000/6 Language and Literacy and the 3-hour course requirement for RSED 6000/6 will be waived resulting in 21 hours in Professional Studies and 33 total program hours.

3. Clearance for Clinical Residency includes completion of all other coursework. Exceptions require approval using the Student Petition Form.

In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.25 is required on all courses used to meet program requirements. Coursework used to meet admission requirements cannot be used again to meet Alternative Class A program requirements. All substitutions for required courses must be approved using the Course Substitution Form, including transfer work. Undergraduate courses may be required by your advisory committee for your plan of study. This coursework is in addition to the total graduate program hours noted above and must be completed prior to Clinical Residency.

Economics - MS

The Department of Economics offers the Master of Science in Economics and a PhD track that is described elsewhere. The MS is an academic degree preparing students for careers in business, government, and academia.

More information about the MS in Economics is available at http://www.cla.auburn.edu/economics/.

Admission Requirements for the MS in Economics

Applicants for the MS in Economics must have a bachelor’s degree or its equivalent from an accredited college or university. A minimum of 18 semester hours of economics and the completion of a calculus sequence are also needed to enter the program. The General Test of the GRE is required. A minimum score of 153 (or 500 on the old GRE scale) on the Verbal GRE portion and a minimum score of 148 (or 600 on the old GRE scale) on the Quantitative GRE portion are required. The graduate committee will evaluate applicants based on their undergraduate records, GRE scores, and letters of recommendation.

Applicants should ensure that the following materials are submitted to the Graduate School web application at http://www.grad.auburn.edu/:
• Official scores from the General Test of the GRE
• Official transcripts from every undergraduate institution attended
• Official TOEFL scores for international students

They should ensure that the following materials are submitted to the graduate program officer in the Department of Economics:

• Three letters of recommendation
• Statement of purpose

For applicants to be given full consideration for financial support, a completed application and supporting documents should be received by March 1. Admission and funding decisions will begin shortly thereafter. Later applications will be considered, but decisions will be contingent upon availability.

**Graduation Requirements**

Students must complete a total of 30 credit hours of course work, including required courses and electives, and comprehensive examinations. No thesis is required for the MS.

**Required Core Courses**

Masters students are required to complete the following nine core courses. Transferring credit hours from other peer institutions is allowed only in exceptional cases.

<table>
<thead>
<tr>
<th>First Year</th>
<th>Fall</th>

</tr>
</tbody>
</table>

**Electives**

Students must take 3 hours of electives at the 6000-level or above in consultation with the Director of Graduate Studies. The core curriculum and the electives combine for a minimum of 30 total semester hours.

**Comprehensive Examinations**

Students must achieve satisfactory (MS level pass) on 3 comprehensive examinations in microeconomics, macroeconomics, and econometrics. Only one retake is permitted on each exam. Please note that there is no thesis required.

**Financial Aid**

Financial aid, usually in the form of graduate teaching assistantships is available on a competitive basis for PhD students in good academic standing. Funding normally consists of a tuition waiver and monthly stipend.

**Applied Economics - Forestry (PhD)**

**PhD in Applied Economics** is administered jointly by the Department of Economics, the Department of Agricultural Economics and Rural Sociology, and the School of Forestry and Wildlife Sciences. Forestry students in this program will take core courses in microeconomics, macroeconomics, and econometrics in the Department of Economics and pass written preliminary exams given there.

An additional oral examination is required in the SFWS for admission to candidacy. The minimum number of hours in this doctoral program is 60 semester hours earned through instruction beyond the bachelor’s degree, including 1) a minimum of 30 semester hours graded (e.g. A, B) graduate course work (7000-level and above); and 2) a minimum of 30 semester hours of additional graduate course work.
work (6000-level and above) that may include ungraded courses, 7990 and 8990 and must include at least 10 hours of 8990. As with all other PhD students in the SFWS, students are required to take Research Methods (FORY 7510) and Seminar (FOWS 7950). Dissertation work under this degree program generally involves in-depth economic analysis of a forestry/natural resources/environment issue or problem.

**Applied Economics - Liberal Arts (PhD)**

The PhD in Applied Economics is offered jointly by the Department of Economics, the Department of Agricultural Economics and Rural Sociology, and the School of Forestry and Wildlife Sciences. The PhD track described below is offered in the Department of Economics, which also offers an MS in Economics described elsewhere.

More information about the PhD track offered in the Department of Economics is available at http://www.cla.auburn.edu/economics/.

Information about the PhD track offered in the Department of Agriculture Economics and Rural Sociology is available at http://www.ag.auburn.edu/agec/grad/.

Information about the PhD track offered in the School of Forestry and Wildlife Sciences is available at http://wp.auburn.edu/sfws/students/graduate-study/.

**Admission Requirements**

Applicants for the PhD track in Applied Economics offered through the Department of Economics must have a bachelor’s degree or its equivalent from an accredited college or university. A minimum of 18 semester hours of economics and the completion of a calculus sequence are also needed to enter the program. The General Test of the GRE is required. A minimum score of 153 (or 500 on the old GRE scale) on the Verbal GRE portion and a minimum score of 148 (or 600 on the old GRE scale) on the Quantitative GRE portion are required. The graduate committee will evaluate applicants based on their undergraduate records, GRE scores, and letters of recommendation.

Applicants should ensure that the following materials are submitted to the Graduate School web application at http://www.grad.auburn.edu/:

- Official scores from the General Test of the GRE
- Official transcripts from every undergraduate institution attended
- Official TOEFL scores for international students

They should ensure that the following materials are submitted to the graduate program officer in the Department of Economics:

- Three letters of recommendation
- Statement of purpose

For applicants to be given full consideration for financial support, a completed application and supporting documents should be received by March 1. Admission and funding decisions will begin shortly thereafter. Later applications will be considered, but decisions will be contingent upon availability.

**Graduation Requirements**

Students must complete a minimum of 60 semester hours of course work at the 7000-level or above. Any course work outside of the Department of Economics must be approved by the director of graduate studies. As part of their 60 credit hours, students complete the required courses listed below. They must also pass comprehensive exams in three areas and complete course work in two advanced fields. Finally, students must write and successfully defend a dissertation.

</tr>
</tbody>
</table>

Comprehensive Examination

Students must achieve satisfactory performance (Ph.D. level pass) on three comprehensive (preliminary) examinations in microeconomics, macroeconomics, and econometrics. Only one retake is permitted on each exam. Students are graded separately on each exam. All students enrolled in the Ph.D. program MUST pass all three preliminary examinations by the end of the second December after their initial three semesters in the program.

Completion of Two Advanced Fields

Students must complete the coursework and pass a written examination in two advanced fields. Field coursework consists of a minimum two course sequence and must be approved in advance by the Director of Graduate Studies.

Candidacy

Students will be admitted to candidacy after completing two advanced fields, forming a dissertation committee, and successfully passing a general Oral Examination (dissertation proposal). The Oral Examination is normally taken during the third year, and requires approval by the Graduate School at least one week prior. Upon successful completion of the proposal, the student becomes a candidate for the Ph.D. degree and has four calendar years to complete remaining requirements.

Dissertation and Oral Defense

Students must write a dissertation and pass an oral defense. Students must register for at least 10 semester hours of dissertation research (ECON 8990).

Financial Aid

Financial aid, usually in the form of graduate teaching assistantships, is available on a competitive basis for PhD students in good academic standing. Funding normally consists of a tuition waiver and monthly stipend.

Educational Foundations, Leadership and Technology - MEd, MS, EdS, PhD

Degree Programs

- Administration of Elementary and Secondary Education (p. 1531)
- Administration of Higher Education (p. 1533)
- Administration of Supervision and Curriculum (p. 1533)
- Adult Education (p. 1534)
- Agricultural Leadership (p. 1535)
- Educational Psychology (p. 1535)
- Library Media (p. 1536)
Graduate Certificates

- Adult Education (p. 1539)
- Adult Education and English Language Teaching (p. 1539)
- College/University Teaching (p. 1539)
- Educational Leadership (p. 1540)
- Extension Educator (p. 1540)
- Instructional Leadership (p. 1540)
- Instructional Technology for Distance Education (p. 1541)
- MEd Administration of Elementary and Secondary Education Pgrm (p. 1541)
- Program Evaluation (p. 1542)
- Technology Educator (p. 1542)

Minor

- Sport Management (p. 1543)
- Critical Studies in Education (p. 1543)

The Department of Educational Foundations, Leadership and Technology offers degree programs, graduate certificates, and a minor. Degree programs lead to a master of education (non-thesis option), master of science (thesis option), specialist in education, or doctor of philosophy. Graduate degrees are available in the areas of administration of elementary and secondary education, administration of higher education, administration of supervision and curriculum, adult education, educational psychology and library media. The graduate certification programs in administration of elementary and secondary education (instructional leadership) and library media are approved by the Alabama State Board of Education (ALSBE). The College of Education is accredited by the National Council for Accreditation of Teacher Education (NCATE).

Applicants to the department’s graduate programs must satisfy the Graduate School’s admission requirements. Departmental admission requirements include a degree from an accredited college or university, competitive Graduate Record Examination (GRE) or Miller Analogies Test (MAT) scores, a GPA of at least a 2.75 on undergraduate coursework, a statement of intent, three recommendations, and any remaining admission requirements as identified by the program or department.

Master’s Degree Programs (MEd/MS)

Master’s degree programs are offered in administration of elementary and secondary education, administration of higher education, administration of supervision and curriculum, adult education, and library media. All programs require a minimum of 30 semester hours, an internship and/or practicum, and a comprehensive examination.

Master’s-level certification programs include instructional leadership (MEd in administration of elementary and secondary education) and library media. Admission requirements established by the Alabama State Board of Education, including those pertaining to a clear background check, prior certification, and teaching experience must be satisfied prior to admission to one of these programs. Degree requirements for both programs are in compliance with State regulations. Graduation requirements include a passing score on the appropriate Praxis II subject assessment.

In accordance with State regulations, a minimum GPA of 3.25 is required on all courses used to meet master’s-level certification program requirements.

Specialist in Education Degree Programs (EdS)

EdS programs are offered in administration of elementary and secondary education, adult education, and library media. All programs require a minimum of 30 semester hours, a directed field project, and a comprehensive examination.

Specialist-level certification programs include instructional leadership (EdS in administration of elementary and secondary education) and library media. Admission requirements established by the Alabama State Board of Education, including those pertaining to a clear background check, prior certification, and teaching experience must be satisfied prior to admission to one of these programs. Degree requirements for both programs are in compliance with State regulations.

In accordance with State regulations, a minimum GPA of 3.50 is required on all courses used to meet specialist-level certification program requirements.
Master’s- and Specialist-Level Certification

Individuals completing State-approved master’s-level certification programs are eligible to apply for Alabama Class A certification; individuals completing State-approved specialist-level certification programs are eligible to apply for Alabama Class AA certification. Individuals seeking certification in states other than Alabama are responsible for contacting those state certification offices to obtain their application form and requirements. The State of Alabama signs the National Association of State Directors of Education and Certification (NASDTEC) Interstate Agreement which facilitates the applications of program graduates when they apply for certification in other states.

Doctor of Philosophy Degree Programs (PhD)

PhD programs require a minimum of 60 semester hours beyond the bachelor’s degree. Research methods, statistics, and foundations of education are components of all doctoral programs. The department offers a doctorate in the areas of administration of elementary and secondary education, administration of higher education, administration of supervision and curriculum, adult education, and educational psychology. After satisfactory completion of coursework and a general written and oral examination, the student advances to candidacy. Doctoral students must register for at least 10 hours of dissertation credit while completing a dissertation.

Minor and Graduate Certificates

The Department of Educational Foundations, Leadership and Technology offers a minor in sport management and graduate certificates in adult education, college/university teaching, educational leadership, extension educator, instructional leadership, instructional technology (technology educator and instructional technology for distance education), and program evaluation. In addition, the Department in collaboration with the Department of Curriculum and Teaching offers a graduate certificate in adult education and English language teaching.

Additional Information

Detailed admission and program requirements for the department's multiple areas of graduate study are available on the College of Education's website, Academics (http://www.education.auburn.edu/academics/). The University schedule of courses is available on the Auburn University website.

Survey of Special Education/Diversity Course ¹
Internship: 3 hours

EDLD 7930 Administrative Internship/Residency 3

Total Hours 33

1 EDLD 7210/6 Multiprofessional Leadership for Equity fulfills the state diversity course requirement. However, if a survey of special education course was not completed for prior level certification, RSED 6000/6 Advanced Survey of Exceptionality (3 hours) must be completed resulting in 36 total program hours.

In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.25 is required on all courses used to meet program requirements.

An applicant for certification in instructional Leadership who holds Class A certification in another teaching field or area of instructional support must take all courses indicated above that were not required for certification in another program at the Class A level.

Individuals must be unconditionally admitted to the Class A Instructional Leadership program before enrolling in any instructional leadership courses in the program.

Coursework used to meet Class A certification requirements may not be used to meet requirements for Class A certification.

All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.

</tr>
</tbody>
</table>

1 If EDLD 7910/6 Practicum (1 hour) must be completed to meet state admission requirements, 28 hours is required in the Instructional Support Area resulting in 34 total program hours.

2 RSED 6000/6 Advanced Survey of Exceptionality must be completed if survey of special education course was not completed for prior level certification. If a survey of special education course was completed for prior level certification, the state diversity course requirement is fulfilled with RSED 7410/6 Program Implementation in Leadership.

3 Supporting courses must be applicable to the area of certification (e.g., research, assessment/evaluation, classroom management, pedagogy, human behavior/development, foundations, technology, teaching field).

In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.50 is required on all courses used to meet program requirements.

Individuals must be unconditionally admitted to the Class AA instructional leadership program before enrolling in any leadership courses in the program.

Course used to meet Class A certification requirements may not be used to meet requirements for Class AA certification.

All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.

Other advisor-approved supporting courses 6000 level or above

Total Hours: 30

---

1. **RSED 6000/6 Advanced Survey of Exceptionality** must be used to fulfill the requirement if a survey of special education course was not completed for prior level certification. It may **not** be used to fulfill the requirement if a survey of special education course was completed for prior level certification.

2. Supporting courses must be applicable to the area of certification (e.g., research, assessment/evaluation, research, classroom management, pedagogy, human behavior/development, foundations, technology, teaching field).

3. Coursework used to meet Class B certification requirements may not be used to meet requirements for Class A certification.

All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.
In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.50 is required on all courses used to meet program requirements.

Coursework used to meet Class A certification requirements may not be used to meet requirements for Class AA certification.

All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.

This course may not be taken if previously completed.

**Total Hours**

33

1EDLD 7210/6 Multiprofessional Leadership for Equity fulfills the state diversity course requirement. However, if a survey of special education course was not completed for prior level certification, RSED 6000/6 Advanced Survey of Exceptionality (3 hours) must be completed resulting in 36 total program hours.
In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.25 is required on all courses used to meet program requirements.

An applicant for certification in instructional Leadership who holds Class A certification in another teaching field or area of instructional support must take all courses indicated above that were not required for certification in another program at the Class A level.

Individuals must be unconditionally admitted to the Class A Instructional Leadership program before enrolling in any instructional leadership courses in the program.

Coursework used to meet Class B certification requirements may not be used to meet requirements for Class A certification.

All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.

Critical Studies in Education

The purpose of the critical studies minor is to provide students in this program with opportunities to explore and apply critical theories as they relate to schooling, teaching and learning, and educational research. This critical analysis of education is centered on understanding cultural, institutional, and structural dynamics that create and perpetuate injustice, inequity, and oppression in education and schooling. Students will enact educational praxis that opens, and develops, and sustains critical consciousness around inequity, injustice, and oppression and supports those becoming critically conscious.

For this minor, students will complete 3 graduate credit hours from the following:

- FOUN 7000/7006 CULTURAL FOUNDATIONS OF EDUCATION
- FOUN 7020/7026 SOCIAL AND CULTURAL DIVERSITY IN AMERICAN EDUCATION
- FOUN 7030/7036 MODERNITY, PHILOSOPHY AND THE CURRICULUM
- FOUN 7040 PHILOSOPHY AND EDUCATIONAL RESEARCH
- FOUN 8010/8016 MODERN EDUCATION AND COMPARATIVE PERSPECTIVES

Students will complete an additional 6 graduate credit hours in courses in advisor/coordinator-approved electives.

Students will complete three credit hours of directed study (FOUN 7900) with a critical studies faculty member.

(Total of 12 credit hours.)

Electrical and Computer Engineering - MS, PhD

Degree Program:

- Electrical and Computer Engineering - MS (p. 1544)
- Electrical and Computer Engineering - PhD (p. 1544)

Electrical and Computer Engineering (ECE) offers graduate programs of instruction and research leading to master and doctoral degrees. Instruction is offered and research facilities are available to support graduate study in control systems & robotics, digital signal processing and communications, wireless engineering, electromagnetics modeling and analysis, microelectronics & microelectromechanical systems (MEMS), magnetic resonance imaging (MRI), power systems, digital systems, and computer engineering. Additionally, individualized programs that cross the traditional boundaries of engineering, mathematics and the sciences can be accommodated.

For admission at the master’s level, the applicant must hold a bachelor’s degree or its equivalent from an institution of recognized standing. Master’s degree programs are available to graduates of engineering curricula and, in cases of exceptional academic credentials, to graduates of mathematics and science curricula.

An applicant for admission to the PhD program should hold a master’s degree, or have taken a minimum of one academic year of graduate study, from an institution of recognized standing in an area of study related to the proposed doctoral work. An applicant
who holds a bachelor’s degree in electrical or computer engineering and has exceptional academic credentials may apply for direct admission to the PhD program.

All applicants must submit Graduate Record Examination scores for the General Test, three recommendation letters, a statement of purpose, and a resume. International applicants must also submit scores for either the TOEFL or IELTS exam.

Applications for admission are reviewed by the departmental graduate faculty. Decisions are based upon the applicant’s potential for success in advanced-level study as indicated by letters of reference, GRE scores and previous academic achievement.

The MS (thesis option) program requires a minimum of 30 semester hours of work, including 4 to 6 semester hours of research and thesis. MS (thesis option) students must pass an oral examination on the thesis. The MS (non-thesis option) program requires 33 semester hours of coursework, including at least 18 semester hours of ECE courses. Both masters programs must include courses in at least three of the major research areas in ECE and no more than 3 semester hours of independent study.

Students admitted to the doctoral program will take a written qualifying examination soon after entering, covering fundamental undergraduate material in ECE. Additional examinations are given throughout the program. The program generally consists of a minimum of 60 semester hours of course work beyond the bachelor’s level, including at least 10 hours of research and dissertation. A minor of at least 9 semester hours in a closely related field outside of the major area of study, either within or outside of ECE, is required.

English - MA, MTPC, PhD, Graduate Certificate

Degree Programs:
- English - MA
- English - PhD (p. 1548)
- Technical and Professional Communication - MTPC (p. 1548)

Graduate Certificate:
- Technical Communication (p. 1548)

The Department of English offers programs leading to the Master of Arts (MA), the Master of Technical and Professional Communication (MTPC), and the PhD. These graduate programs prepare students for careers in teaching and research, writing, editing, business, and other professions seeking broadly educated individuals skilled in analysis and communication. In addition, individuals holding a teaching certificate may, with an additional graduate course in Communication, earn Alabama Class A or AA certification under a state-approved Strengthened Subject Matter Option program in English/Language Arts. The Department of English also offers the Graduate Certificate in Technical Communication (GCTC).

More information about the MA in English is available at http://www.cla.auburn.edu/english/graduate-studies/ma/.

More information about the MTPC is available at http://www.cla.auburn.edu/mtpc/.

More information about the PhD in English is available at http://www.cla.auburn.edu/english/graduate-studies/phd/.

More information about the Graduate Certificate in Technical Communication is available at http://cla.auburn.edu/english/graduate-studies/graduate-certificate-in-technical-communication/.

Master of Arts

Admission Requirements

For admission to the MA program, the student must normally have a bachelor’s degree from an accredited institution with the equivalent of 24 semester hours of credit in upper-division English courses and satisfactory scores on the General Test of the GRE. Applicants lacking the required undergraduate courses must typically make up these deficiencies before they can be admitted to the degree program.

Applicants should ensure that the following materials are submitted to the Graduate School web application:
- Official transcripts from every undergraduate institution attended
- Official scores from the General Test of the GRE

They should submit the following to the Department of English:
- Writing sample
- Statement of purpose
- Three confidential letters of recommendation that speak to the applicant’s potential for successful graduate study

Application materials are due by January 15.

Options and Course Requirements

For the MA, students may select one of the following three tracks: literature, composition and rhetoric, or creative writing. Each track requires a minimum of 30 credit hours of coursework.

The literature track requires the following:
- Three major area courses (one pre-1800 literature, one post-1800 literature, one literary theory)
- One comparative literature, genre, or author-based course
- One technology and culture, globalism, sustainability, or diversity course
- One course in technical and professional communication, rhetoric and composition, linguistics, or creative writing
- Two elective courses in English
• ENGL 7940 Practicum in Teaching College English
• Two courses in a coordinated minor, chosen from courses in English or another discipline relevant to the student's professional and academic goals

The creative writing track requires the following:

• Three major area courses (ENGL 7130 Fiction Writing and ENGL 7140 Poetry Writing, with one repeated for a total of three creative writing courses)
• One pre-1800 literature course
• One technical and professional communication, rhetoric and composition, or linguistics course
• One technology and culture, globalism, sustainability, or diversity course
• Two courses in a coordinated minor, chosen from courses in English or another discipline relevant to the student's professional and academic goals
• Two elective courses in English
• ENGL 7940 Practicum in Teaching College English

The composition and rhetoric track requires the following:

• Three major area courses (ENGL 7040 English Composition: Issues and Approaches, ENGL 7050 Studies in Composition, and ENGL 7300 Rhetoric Theory and Practice)
• One course in technical and professional communication or linguistics
• One literature or creative writing course
• One technology and culture, globalism, sustainability, or diversity course
• Two courses in a coordinated minor, chosen from courses in English or another discipline relevant to the student's professional and academic goals
• Two elective courses in English
• ENGL 7940 Practicum in Teaching College English

Other Graduation Requirements
In addition to completing the required course work, students must successfully complete a portfolio and pass an oral examination based on the portfolio. They also must demonstrate reading knowledge of one foreign language.

Master of Technical and Professional Communication

Admission Requirements
For admission to the MTPC program, students must have a bachelor’s degree from an accredited institution, satisfactory scores on the General Test of the GRE, and excellent writing skills. Undergraduate course work in English is not required.

Applicants should ensure that the following materials are submitted to the Graduate School web application:

• Official transcripts from every undergraduate institution attended, including high school transcripts in the case of AP classes
• Official scores from the General Test of the GRE

They should submit the following to the Department of English:

• A sample of professional or scholarly writing (e.g., a technical manual, a business report, a research essay)
• A statement of purpose explaining their interest in the program
• Three letters of recommendation. At least two of the letters should come from professors or instructors; the other letter may come from an academic adviser, an employer, or some other person who can speak to their potential for success in the MTPC program.

Application materials should be received by January 15.

Course Requirements

• Four required courses (ENGL 7000 Technical and Professional Editing, ENGL 7010 Technical and Professional Communication: Issues and Approaches, ENGL 7060 Web Development, ENGL 7080 Document Design in Technical and Professional Communication)
• Three elective courses in English approved by the student's advisory committee
• Three courses in a coordinated minor or three additional courses in English approved by the student's advisory committee
• ENGL 7940 Practicum in Teaching College English

Other Graduation Requirements
Students must compile a portfolio of work accepted by the student's advisory committee, make a formal presentation about the portfolio, and pass an oral examination.

PhD
Admission Requirements
For admission to the PhD program, the student must normally have a master's degree in English and satisfactory scores on the General Test of the GRE.

Applicants should ensure that the following materials are submitted to the Graduate School web application:
• Official transcripts from every undergraduate and graduate institution attended
• Official scores from the General Test of the GRE

They should submit the following to the Department of English:
• Writing sample
• Statement of purpose
• Three confidential letters of recommendation that speak to the applicant's potential for successful graduate study

Concentrations and Course Requirements
The PhD requires a minimum of 60 credit hours beyond the BA, including 10 hours of dissertation credit. Students entering our program with an MA in English from Auburn or from another institution transfer in their course work; in consultation with their graduate advisory committee, students then select additional courses. Students may choose to pursue either a concentration in literature or a concentration in composition and rhetoric.

Other Graduation Requirements
After completing course work, students must take general doctoral examinations, both written and oral, over three related areas. These areas might include a literary period, a genre, an issue in composition or rhetorical studies, language and linguistics, or literary and cultural theory. After passing these examinations, students advance to doctoral candidacy. Within three months after advancing to doctoral candidacy, students must submit an approved dissertation prospectus to the director of graduate studies. Students must write and defend a dissertation.

Doctoral students must demonstrate a reading knowledge of two foreign languages or advanced proficiency in one foreign language.

Graduate Certificate in Technical Communication
Admission Requirements
For admission to the Graduate Certificate in Technical Communication, students must have a bachelor's degree from an accredited institution and excellent writing skills.

Applicants should ensure that the following materials are submitted to the Graduate School web application:
• Official transcripts from every undergraduate institution attended

They should submit the following to the Department of English:
• A sample of professional or scholarly writing (e.g., a technical manual, a business report, a research essay)
• A statement of purpose explaining their interest in the program
• Three letters of recommendation from professors, academic advisers, employers, or others who can speak to their potential for success in the GCTC program

Financial Aid
The department offers financial aid in two forms: fellowships and assistantships. Graduate teaching assistantships or graduate assistantships are often available for the most qualified students, except those enrolled in the GCTC. Assistantships are renewable,
provided that students perform satisfactorily and make adequate progress toward the degree. A few outstanding applicants also receive first-year or second-year fellowships. Review of applications for financial aid will begin on January 15 for the MA, PhD, and MTPC.

Entomology - MS, MAg, PhD

Program Degrees:

- Entomology - MS
- Entomology - MAg
- Entomology - PhD

The Department of Entomology and Plant Pathology offers three entomology-themed graduate degrees: a Master of Science (MS), a Master of Agriculture (MAg), and a Doctor of Philosophy (PhD). The graduate program emphasizes basic and applied aspects of the science of Entomology, and prepares students for careers in teaching, research and extension, in academic, government, private, and
industry settings. The MS degree provides fundamental knowledge of Entomology and introduces students to independent research through a thesis project. The MAg provides that same level of instruction but without a research focus. The PhD builds on the MS or other similar experiences by expanding upon the student’s fundamental knowledge. It also fosters a student’s ability to conduct original research at the frontiers of entomology through dissertation research.

Admission to the program is based on a combination of a candidate’s GPA (usually 3.0 or higher), letter of intent, and Graduate Record Examination (GRE) scores. TOEFL scores are required from international students. TOEFL exemptions are made on a case-by-case basis, depending on your official government language and medium of instruction. Applicants who have received a degree from an accredited U.S. institution may also be considered for this exemption. For a major in Entomology at the MS level, the student should have an appropriate degree from a recognized institution with some pre-requisite training in plant sciences, biology, zoology, botany, and chemistry. Qualified students lacking an introductory entomology course may be admitted, but will be required by the student’s advisory committee to make up this deficiency.

Master’s degrees are primarily sought by students holding baccalaureate degrees in agriculture or the biological sciences.

The Master of Science (MS) program in Entomology is available to qualified individuals who wish to pursue a master’s level program that requires a thesis. Importance is placed on both classroom and research training. The MS requires a minimum of 30 graduate level credit hours (6000 and above).

</tbody>
</table>

A minimum of 21 graduate level credit hours must be taken in Entomology, and 9 credit hours in subjects determined by the committee. The MS student will conduct research and prepare a thesis. After completion of the thesis, the student must successfully defend their thesis work during a final oral examination.

The Master of Agriculture (MAg) program with a specialization in Entomology is available to qualified applicants who wish to pursue a master’s level program that does not require a thesis. This degree carries the same entrance requirements as the MS, and requires a minimum of 32 graduate level credit hours (6000 and above), 21 of which must be in Entomology, including:

\(^1\)The remaining graduate level courses can be taken from a variety of subject areas determined in consultation with the student’s advisory committee. A comprehensive examination is required after all courses are completed.

The Doctor of Philosophy (PhD) program in Entomology requires 60 graduate level credit hours of course work. Of the 60 semester hours, 30 must be graded graduate courses (6000 and above) while registered in the PhD program. Thirty hours may be transferred in
from a previous graduate degree pending approval of the graduate advisory committee. PhD students must complete all courses in the core curriculum. In addition, PhD students should complete a minimum of two courses from List A and two courses from List B.

The MSBA program offers specialized training to graduate students desiring a more intense background in the field relative to the general preparation provided by an MBA. The objective of the program is to prepare students for careers in their chosen profession or for further graduate work. The program has a thesis and non-thesis option (the non-thesis option requires additional course work). The program of study is determined by the student and the student’s advisory committee based on the student’s background and areas of interest. The program also offers a joint program leading to both the MSBA-Finance and MBA degrees.

The MBA/MSBA-Finance is a 54-hour program administered jointly by the Finance faculty and the MBA program. The program saves the student fifteen hours of coursework over completing both degrees separately. For the MBA, students without two years full time work experience are required to do an additional 3-credit hour internship. Students must apply separately to each program (MSBA-Finance and MBA), but only have to pay one application fee. Students can also opt to apply for the second degree program during their first year in the other program.

The Ph.D. in Business with Concentration in Finance is a research oriented degree that prepares students for careers in research and teaching. It provides the depth of knowledge and skills required to conduct first-rate research in the field and present those findings in world-class scholarly publications. Our faculty is supportive of our students and works closely with them. Students will typically work on a joint research project with one or more of their professors early in their program. Thus, students are quickly immersed in doing substantial research.

Ph.D. candidates must be full-time, year around students. The doctoral program requires the development of a sense of scientific curiosity that permeates the extensive coursework and inquiry that is required. The core coursework is an intensive study of the theory and empirical analysis of Finance, focused on Investments, Corporate Finance, and Financial Institutions and Markets. Most of the coursework can be completed in the first two years. Students without master’s degrees or otherwise lacking an appropriate background may be required to take additional courses.

The preliminary exam is taken after the required coursework is completed. This will usually be at the beginning of the third year. After satisfactory completion of the exam, the last phase of the program is devoted to research, including the publication of articles and completion of the Ph.D. dissertation and its defense. The length of this phase of the program is expected to take two or more years.

Information concerning specific program requirements may be obtained by visiting the Raymond J. Harbert College of Business website.

The PhD in Business requires 60 semester hours earned through instruction beyond the bachelor's degree, including 1) a minimum of 30 semester hours graded (e.g., A, B) graduate course work (6000-level and above); and 2) a minimum of 30 semester hours of additional graduate course work (6000-level and above) that may include ungraded courses, 7990 and 8990, and must include at least 10 hours of 8990. Up to 30 hours (if less than half of the total number of hours) of applicable master's level course work may be used to satisfy part of these requirements with advisor approval.

The total number of credit hours that may be transferred from another accredited institution toward a doctoral degree varies by program but must be less than 50 percent of the credit hours listed on the Plan of Study. Such transfer credit 1) must fall within the time limits of the degree; and 2) must be approved by the advisory committee and the dean of the Graduate School. A maximum of four hours of 7990 (Research and Thesis) from a completed master's program may be counted.

All doctoral students must complete a minimum of 10 hours of FINC 8990. Enrollment in FINC 8990 may take place at any time the student and the advisory committee deem appropriate. During any one semester, the number of hours of 8990 in which the student enrolls should reflect the amount of instructional time being spent on the dissertation and the degree to which university resources are being utilized. Students may enroll, during any one semester, for as few as one hour or as many as 16 hours of 8990. Dissertation
students submitting their dissertation, awaiting committee review and approval, or taking their final examination must register for 8990 Research and Dissertation in the semester(s) when these steps in the process take place. The requisite 10 hours of 8990 should be included in the Plan of Study. No grade is assigned.

**Fisheries, Aquaculture, and Aquatic Sciences - MAq, MS, PhD**

**Degree Programs:**

- Fisheries, Aquaculture, and Aquatic Sciences (p. 1554) - MAq (p. 1554)
- Fisheries, Aquaculture, and Aquatic Sciences (p. 1555) - MS (p. 1555)
- Fisheries, Aquaculture, and Aquatic Sciences (p. 1555) - PhD (p. 1555)

The FAAS graduate program prepares students for productive careers in academia and the private and public sectors in aquaculture, aquatic resource management and ecology, and fisheries biology and management. The Department offers graduate programs leading to the Master of Science (MS), Master of Aquaculture (MAq), and Doctor of Philosophy (PhD) degrees.

Students desiring admission for graduate study should have a degree from a recognized academic institution, adequate course work in biology, zoology, botany, chemistry, physics, and mathematics and submit GRE scores. Otherwise qualified students lacking an adequate background in these areas may be admitted but may be required to correct deficiencies after they enroll at Auburn. Applicants must also meet minimum requirements of the Graduate School including English language requirements. Evaluation of applicants includes academic records, GPA, GRE scores, letters of recommendation, and past professional history.

The MAq is a non-thesis degree that prepares a student for a career in aquaculture management or extension. The degree requires successful completion of a minimum of 40 semester hours beyond the bachelors’ degree and includes a 3 to 5-month internship.

In addition, students must pass a comprehensive oral examination after completion of all course work and internship.

The Master of Science degree prepares the student for aquatic resource or aquaculture related careers as well as further studies toward a PhD degree. A minimum of 30 semester hours of 6000-level or above is required. A minimum of 21 semester hours (which includes FISH 7990) of 6000-level and above courses must be taken within the major area of concentration and at least an additional 9 hours taken in a separate but closely related area of concentration. A minimum of 4 semester hours of FISH 7990 (Research and Thesis) is required but no more than 6 semester hours may be counted toward the degree. In addition to the required course work, the student must complete research and a written thesis and pass a comprehensive examination on research and course work as defined by the student's advisory committee.

Admission to the Doctor of Philosophy degree program usually requires that the student has a master’s degree from a recognized graduate program. The doctoral program emphasizes original scholarly research and includes significant advanced coursework. The PhD degree requires a minimum of 60 semester credit hours beyond the bachelor's degree, of which a minimum of 31 hours must be taken through Auburn University, and a dissertation describing original research. A minimum of 30 hours must be graded graduate courses. The minimum and maximum number of hours of dissertation research (FISH 8990) is 10. Students must pass a general examination, often called the "preliminary examination," typically taken after all graded course work is completed, to become a PhD candidate. The exam includes a written exam followed by an oral exam. The student becomes a candidate for the degree on successful completion of the general examination. After completion of the dissertation, the student must pass a final oral examination defending the dissertation.

All graduate students are expected to be engaged in service to the department’s research and education programs as deemed appropriate by the academic adviser and department head. All students receiving departmental assistantships must be registered for at least one course (any course of at least 1 credit hour carrying an Auburn University course number) during each academic term of the assistantship. International students must meet visa requirements for coursework load. All graduate students must present an exit seminar in the department for which credit will be given as either FISH 7950 for master’s or FISH 8950 for PhD’s.

**Food Science - ABM, MAg, MS, PhD**

- Food Science - ABM
- Food Science - MAg
- Food Science - MS
- Food Science - PhD

Food Science graduate degrees, although technically offered as an option affiliated with poultry science, are managed by the Food Science Program. Students pursuing graduate studies in Food Science can earn Master of Agriculture, Master of Science, and Doctor of Philosophy degrees. These degrees are designed to prepare outstanding students for careers in the food industry, government, and academia. Research training and experience can be acquired in the specialized areas of food safety/microbiology, food quality, food chemistry, sensory evaluation, or processing and product technology.

Applicants apply through the ApplyYourself online platform and must indicate their desire to pursue graduate studies in Food Science. All applications are reviewed by the Food Science Graduate Committee. Application materials include: official copies of all college transcripts, TOEFL scores (for international students), 3 letters of recommendation, a resume, and a statement of purpose. Transcripts and test scores are sent directly to the Graduate School. The letters of recommendation may either be submitted online (preferred) or mailed to the graduate program officer. The resume and statement of purpose are sent to the graduate program officer at the departmental address or via email attachment. The GRE is not required. To pursue MS or MAg degrees in food science, applicants must have a bachelor’s degree in food science, nutrition, chemistry, biology, food engineering, or allied sciences from a recognized institution with a minimum GPA of 3.0 out of 4.0. A MS degree with thesis in a relevant field is required to be considered for admission into the PhD program. The course of study, developed by the student and the advisory committee, may include additional courses to address specific needs or course work deficiencies.

Additional information about requirements, policies, and availability of financial support can be obtained from the food science graduate program officer, Dr. Tung-Shi Huang (huangtu@auburn.edu).
**MS/MAg Degree Requirements**

1. The Master of Science (MS degree) requires a research project with a formal written thesis while the Master of Agriculture (MAg) requires a research project with written report. The MS degree requires a minimum of 30 semester credit hours. The MAg degree requires 33 semester credit hours. Both MS and MAg degrees require a comprehensive final oral examination.

2. The Food Science Core Curriculum –

3. Food Science Electives – MS students must take 4 food science electives chosen in consultation with the major professor and advisory committee. MAg students must take 5 food science electives. Free electives may be used to acquire the required 30 semester hours (MS) or 33 semester hours (MAg).

**PhD Degree Requirements**

1. For the PhD degree, a minimum of 30 semester hours of graduate coursework beyond the MS (60 hours beyond the bachelor’s degree) is required.

2. The Food Science Core Curriculum –

</tr>
</tbody>
</table>

3. Food Science Electives – PhD students must take 5 food science electives chosen in consultation with the major professor and advisory committee. Free electives may be used to acquire the required 60 semester hours.

4. Examinations – Upon completion of course work, students must pass general written examinations administered by the advisory committee, followed by a comprehensive preliminary oral examination. After satisfactory completion of these exams, the student advances to candidacy. A dissertation based on an independent research project is required to earn a PhD degree. After completion of the dissertation, the student must pass a final Doctoral oral examination defending the dissertation.

**Forestry - MNR, MS, PhD**

**Degree Programs:**
- Forestry - MS
- Forestry - PhD
- Forestry - PhD Applied Economics
- Forestry - PhD Interdisciplinary Earth System Science
- Forest Finance & Investment - Graduate Certificate
- Forestry - Restoration Ecology - Graduate Certificate

Graduate study in forestry leads to the Master of Natural Resources (MNR), Master of Science (MS), or Doctor of Philosophy (PhD) degrees. In addition to meeting Graduate School admission requirements, applicants are evaluated and recommended for admission by the graduate faculty of the School of Forestry and Wildlife Sciences based on an examination of scores on the TOEFL tests for international students, previous academic records, experience, and recommendations. While exceptions may be made, the faculty generally expect a minimum GPA of 3.0 in previous academic coursework. Course deficiencies are identified by the student’s advisory committee and approved by the GPO with due consideration for the student’s previous training and experience.

**Degrees offered:**

- **Master of Natural Resources (MNR)** - The MNR is a non-thesis degree.
  - *Professional Forester* track is for individuals with baccalaureate degrees in fields other than forestry and who are interested in becoming Registered Foresters in Alabama. This track is a two-year program which begins with a 10 week summer Field Practicum and requires a minimum of 64 semester hours (34 hours of specified undergraduate course work plus 30 hours of graduate course work).

- **Master of Science (MS)** A research proposal and thesis based on original research are required components for the MS degree. The program normally requires 2 – 3 years for completion, and can be tailored for students with interests in forest management, ecology and environmental sciences, economics, engineering, or business. The MS degree program requires a minimum of 30 hours beyond the bachelor degree at the graduate level, 21 hours of which must be in the major. A minimum of 4 but not more than 6 hours in Research and Thesis (FORY 7990) is required. All MS students are required to take Research Methods (FORY 7510) and Seminar (FOWS 7950).

- **Doctor of Philosophy (PhD)** may be tailored for any of the topical areas listed under the M.S. A research proposal and dissertation based on original research are required components for the PhD degree program. The degree requires 60 semester hours beyond the bachelor degree. There must be a minimum of 30 semester hours in graded coursework at the 7000-level or above. Of the remaining 30 semester hours, 10 hours must be Research and Dissertation (FORY 8990) and 20 hours of 6000-level or above. While some of these 60 hours can be from previous graduate work, such as a MS degree, the majority of hours of graded coursework at the 6000-level or above must be completed at Auburn. All PhD students are required to take Research Methods (FORY 7510) and Seminar (FOWS 7950). Oral and written preliminary exams are required for advancement to candidacy; The preliminary exams must be completed no less than two academic terms prior to graduation. The written and oral preliminary examinations for PhD students will normally consist of questions from each committee member regarding technical competency and other related issues.

An urban forestry minor, administered in cooperation with the Department of Horticulture, is available for MNR, MS, and PhD degrees.

PhD in Applied Economics

PhD in Applied Economics is administered jointly by the Department of Economics, the Department of Agricultural Economics and Rural Sociology, and the School of Forestry and Wildlife Sciences. Forestry students in this program will take core courses in microeconomics, macroeconomics, and econometrics in the Department of Economics and pass written preliminary exams given there.

An additional oral examination is required in the SFWS for admission to candidacy. The minimum number of hours in this doctoral program is 60 semester hours earned through instruction beyond the bachelor's degree, including 1) a minimum of 30 semester hours graded (e.g., A, B) graduate course work (7000-level and above); and 2) a minimum of 30 semester hours of additional graduate course work (6000-level and above) that may include ungraded courses, 7990 and 8990 and must include at least 10 hours of 8990. As with all other PhD students in the SFWS, students are required to take Research Methods (FORY 7510) and Seminar (FOWS 7950). Dissertation work under this degree program generally involves in-depth economic analysis of a forestry/natural resources/environment issue or problem.

Geography - MS

Graduate study in geography is directed toward the master of science degree. The MS degree provides an advanced understanding of key geographical concepts of space, scale, and distance in human and physical processes along with training in advanced geospatial analysis in preparation for employment in industry and government or further academic pursuits. The curriculum is oriented toward a broad applied geographic training with opportunity for specialization through electives, directed studies, and thesis or capstone research.

Admission into the master's program requires a bachelor's degree in geography or related discipline from an accredited institution, an acceptable undergraduate GPA, satisfactory scores on the Graduate Record Examination general test, and three letters of recommendation. Undergraduate course deficiencies may be required and can be made up during the student’s first year in the degree program.

The thesis option MS degree requires a minimum of 30 semester hours and the successful completion of a thesis. The 30 hours include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOG 6800</td>
<td>Geographic Thought</td>

</tr>
<tr>
<td>Graduate Level Electives</td>
<td>18</td>
<td></td>
</tr>
<tr>
<td>Total Hours</td>
<td></td>
<td>30</td>
</tr>
</tbody>
</table>
12 hours must come from geography.

The non-thesis option requires a minimum of 39 semester hours and the successful completion of a comprehensive written and oral examination by the faculty committee. The 39 hours include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>

<td></td>
<td>39</td>
</tr>
</tbody>
</table>

18 hours must come from geography.

**Geography, ABM**

The Accelerated Bachelors/Masters of Geography degree program provides an opportunity for highly-motivated students to gain an in-depth understanding of materials related to geography beyond that of typical bachelor's level graduates and make them more competitive for the employment of graduate studies. The accelerated degree program also allows an opportunity for students involved in undergraduate research to build upon those efforts and develop them into a master's thesis. In addition, the ABM program in Geography allows students to complete both a bachelor's and master's degree in five calendar years by allowing undergraduates to enroll in graduate level classes during their senior year. Application and Matriculation requirements apply to interested students. Please see the Department of Geology and Geography website for additional information:

http://www.auburn.edu/cosam/departments/geosciences/index.htm

**Senior Year for Students in Accelerated Degree Program**

The courses indicated in boldface type would be used by students enrolled in the Accelerated Master's program to meet nine undergraduate hours in Geography Electives during their senior year and nine graduate credit hours (including two courses required of all MS Geography students and a graduate Geography Elective) during their first year of the graduate program. All courses at the 6000-level are also offered at the 5000-level; however, those at the graduate level have additional requirements and higher expectations.

Total Hours: 30

The M.S. degree in Geography only has two required courses (GEOG 6700 and GEOG 6800) with the remainder of the coursework comprised of 18 graduate-level credit hours (12 of which must come from Geography). Students also complete 6 credit hours of research and thesis.

**Geology - MS**

Graduate study in geology leads to the master of science. The graduate program is oriented toward providing a sound practical background in preparation for employment in industry or government service or further academic pursuits. The curriculum provides broad training in geology with the opportunity for specialization through electives, directed studies, and thesis or capstone research.

Admission into the master's program requires a bachelor's degree in geology (or related Earth science discipline) from an accredited institution with 40 semester hours in geology, an acceptable undergraduate GPA, satisfactory scores on the Graduate Record Examination general test, and three letters of recommendation. Undergraduate course deficiencies may be made up during the student's first year in the degree program.

The thesis option MS degree in geology requires a minimum of 30 semester hours and completion of a thesis. The 30 hours include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOL 7100</td>
<td>Geocommunication</td>

<td>5-3</td>
<td></td>
</tr>
<tr>
<td>Total Hours</td>
<td>30</td>
<td></td>
</tr>
</tbody>
</table>

1 No more than 3 hours of which can be GEOL 7930-Directed Study

Students electing the non-thesis option must complete a minimum of 40 semester hours and a capstone project. The 40 hours include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOL 7100</td>
<td>Geocommunication</td>
<td>3</td>
</tr>
<tr>

</tr>
<tr>
<td>Approved 6000- or 7000-level Geology or Approved Electives</td>
<td>4</td>
<td></td>
</tr>
<tr>
<td>Total Hours</td>
<td>40</td>
<td></td>
</tr>
</tbody>
</table>

1 All or a portion of which may be GEOL 7930-Directed Study or GEOL 7980- Capstone Project.

Both degree options require (1) satisfactory completion of a summer field course or comparable field experience prior to beginning the second year of residence and (2) demonstrated working knowledge of a computer language or computer-based geographic information system (G.I.S.) before graduation.

**Pharmaceutical Sciences: Health Outcomes Research and Policy Option - MS**

The Auburn University Harrison School of Pharmacy offers interdisciplinary MS and PhD degree programs in Pharmaceutical Sciences. Those pursuing one of these degrees must select one of four curricular options: 1) Medicinal Chemistry, 2) Pharmaceutics, 3) Pharmacology, or 4) Health Outcomes Research and Policy.
The Medicinal Chemistry, Pharmaceutics and Pharmacology options are designed for students interested in the drug discovery or development processes, and are affiliated with the Department of Drug Discovery and Development. Areas of interest include neurodegenerative diseases, cardiovascular diseases, infectious diseases, cancer, diabetes and other metabolic diseases, synthetic organic chemistry, forensic analytical chemistry and drug delivery, disposition and formulation.

The Health Outcomes Research and Policy option is designed for students interested in studying healthcare delivery, medication use and outcomes. This option is affiliated with the Department of Health Outcomes Research and Policy.

Note that courses used to fulfill program core requirements may also be used to fulfill option specific requirements.

The MS degree is offered under the thesis option. Students must earn a minimum of 30 semester hours of graduate courses (6000-8999). Thesis students register for Research and Thesis in semester(s) when working on the thesis, when submitting, defending or awaiting final approval of the thesis, and when taking final examinations. Candidates for the MS degree are required to prepare a thesis proposal and complete a proposal defense.

For the MS Program, students must complete a Core Curriculum outlined below.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tr>
</tbody>
</table>

In addition to the specific core and option course requirements listed above, students must complete instructor approved graduate electives (6000-8999) to reach the 30 hour degree requirement.

**Pharmaceutical Sciences: Health Outcomes Research and Policy Option - PhD**

The Auburn University Harrison School of Pharmacy offers interdisciplinary MS and PhD degree programs in Pharmaceutical Sciences. Those pursuing one of these degrees must select one of four curricular options: 1) Medicinal Chemistry, 2) Pharmaceutics, 3) Pharmacology, or 4) Health Outcomes Research and Policy.

The Medicinal Chemistry, Pharmaceutics and Pharmacology options are designed for students interested in the drug discovery or development processes, and are affiliated with the Department of Drug Discovery and Development. Areas of interest include...
neurodegenerative diseases, cardiovascular diseases, infectious diseases, cancer, diabetes and other metabolic diseases, synthetic
organic chemistry, forensic analytical chemistry and drug delivery, disposition and formulation.

The Health Outcomes Research and Policy option is designed for students interested in studying healthcare delivery, medication use
and outcomes. This option is affiliated with the Department of Health Outcomes Research and Policy.

Note that courses used to fulfill program core requirements may also be used to fulfill option specific requirements.

The PhD program requires a minimum of 60 semester hours earned through instruction beyond the bachelor’s degree including 1)
a minimum of 30 semester hours graded (e.g. A, B) graduate course work (6000 - 8999); and 2) a minimum of 30 semester hours of
additional graduate course work (6000 - 8999) that may include ungraded courses, and must include at least 10 hours of research and
dissertation. A general examination, often called the preliminary examination, is required of all applicants for the degree of doctor of
philosophy. It consists of written and oral testing. The student becomes a candidate for the degree upon successful completion of the
general examination. Students working on the dissertation, submitting their dissertation or awaiting approval of their final examination
must register for Research and Dissertation in the semester(s) when these steps occur. Candidates for the PhD degree must complete
dissertation proposal and successfully defend their proposal during the final examination.

For the PhD program, students must complete a core curriculum outlined below.

<table>

</tbody>
</table>
In addition to the specific core and option course requirements listed above, students must complete instructor approved graduate electives (6000-8999) to reach the 60 hour degree requirement.

**History - MA, PhD, Graduate Certificates**

**Degree Program:**
- History - MA
- History - PhD

**Graduate Certificate:**
- Public History

The Department of History offers two graduate programs: the Master of Arts in History and the PhD in History. Additionally, the department offers Graduate Certificates in Public History and in Archival Studies. The graduate programs prepare students for careers in teaching, public history, archival management, government, and research. More information is available at http://cla.auburn.edu/history/students/graduate-students/.

**MA in History**

**Admission Requirements**

For admission to the MA program, the student must have a bachelor’s degree from an accredited institution and a satisfactory score on the General Test of the GRE. For more information about the Department of History’s expectations for admission, see http://cla.auburn.edu/history/students/graduate-students/admissions/. Applications must be approved by the department’s graduate committee. Applicants lacking course requirements must make up deficiencies before or after admission to the degree program. The committee’s decisions are based on a review of all application materials. A minimum GRE score on its own does not guarantee acceptance.

Applicants will submit the following materials for consideration:

- Official transcripts from all undergraduate and graduate institutions
- Official scores from the General Test of the GRE sent from ETS
- A writing sample
- A statement of purpose
- An application for an assistantship (for those who wish to be considered for funding—note earlier application deadline for assistantships)
- Three confidential letters of recommendation

All materials for admission to the MA in History are due on March 15. January 15 is the due date for those wishing to be considered for assistantships.

**MA Requirements**

The MA requires a minimum of 31 hours and a thesis. Of the 31 hours, 21 must be in seminar courses, including HIST 7700 Seminar in Historical Methods and one research seminar. In addition to possible concentrations in United States history, European history, and the history of technology, the MA program offers specializations in archival studies and public history, including practical training (a 3-hour required internship). The Department does not admit students to pursue non-thesis MA degrees, but a MA degree (non-thesis) can be awarded to students in the doctoral program who have not previously earned the master’s upon passing the general examination for admission to candidacy for the PhD.

There is no language requirement for the MA degree.

**PhD in History**

**Admission Requirements**

For admission to the PhD program, the student must have a bachelor’s degree from an accredited institution and a satisfactory score on the General Test of the GRE. For more information about the Department of History’s expectations for admission, see http://cla.auburn.edu/history/students/graduate-students/admissions/. Applications must be approved by the department’s graduate
committee. The committee's decisions on admission are based on a review of all application materials. A minimum GRE score on its own does not guarantee acceptance.

Applicants will submit the following materials for consideration:

- Official transcripts from all undergraduate and graduate institutions
- Official scores from the General Test of the GRE sent from ETS
- A writing sample
- A statement of purpose
- An application for an assistantship (for those who wish to be considered for funding--note earlier application deadline for assistantships)
- Three confidential letters of recommendation

All materials for admission to the PhD in History are due on March 15. January 15 is the due date for those wishing to be considered for assistantships.

**PhD Requirements**

The program requires a minimum of 65 semester hours beyond the bachelor's degree, written and oral examinations, a dissertation and oral defense, and reading knowledge of at least one foreign language. Of the 65 hours, 43 must be at the 7000- or 8000-level, including at least 3 hours and not more than 6 hours in research seminars. The 65 semester hours include 10 hours of Research and Dissertation credit.

Three courses are required:

- HIST 7700 Seminar in Historical Methods
- HIST 8700 Historiography and Theory of History
- HIST 8710 Introduction to the Teaching of History

Major fields in history include the following:

- United States to 1865
- United States since 1865
- Europe 1500-1789
- Europe since 1789
- History of Technology

In addition to the major field, students must construct two minor fields with a minimum of 9 hours of course work in each, and one breadth field with a minimum of 6 hours of course work. In each minor field at least one course must be a seminar, and no more than one independent readings course is allowed. Minor fields and specializations are offered in all of the preceding fields and additionally in Latin American history, world history, public history, archival studies, and other fields as approved by the department graduate committee. Students must have World History as either the breadth field or one of the minor fields. As part of this requirement, they will take at least one seminar that addresses current debates in the field of World History, for example, HIST 7690 Seminar in Modern World History. Other courses may focus more narrowly on some aspect of non-European, non-United States history. With the approval of the GPO and committee members, a minor field or breadth field may be constructed in a discipline other than history.

To advance to candidacy, students must demonstrate excellence in their major field of history and competence in two minor fields of history on their general examinations through written and oral examinations. These examinations need to be successfully completed in the semester immediately following the completion of course work.

Within four months of successful completion of the oral examination, students present to the assembled dissertation committee a dissertation proposal for discussion and approval. Following a successful defense of the proposal, doctoral candidates have four years to present the written dissertation and defend it in an oral examination before their major professor and advisory committee. If the oral examination is judged unsatisfactory or not submitted in a timely manner, the general rules of the Graduate School on retests and extension will apply.

The PhD requires a reading knowledge of at least one foreign language as determined by the student's doctoral committee. Language competency should be demonstrated before the student begins the fourth semester of the doctoral program.
Graduate Certificates in Archival Studies and Public History

In most circumstances, only students enrolled in a degree program in history or those who have completed an MA in History may enter the graduate certificate non-degree programs in history. However, applicants who have completed a master’s degree in an allied field may be eligible for admission to the Graduate Certificate in Archival Studies or Public History.

Admission Requirements

If applicants are not simultaneously seeking to matriculate into the MA or PhD program, they must have a MA in History or a related field and a satisfactory score on the General Test of the GRE. Applications must be approved by the Archival Studies or Public History program officers and by the department’s graduate committee.

Applicants will submit the following materials for consideration:

- Official transcripts from all undergraduate and graduate institutions
- Official scores from the General Test of the GRE sent from ETS
- A writing sample
- A statement of purpose
- An application for an assistantship (for those who wish to be considered for funding--note earlier application deadline for assistantships)
- Three confidential letters of recommendation

If applicants are not also seeking admission into the MA or PhD program, materials for admission to the Archival Studies or Public History Graduate Certificate programs may be submitted at any point during the academic year. The program officers and the department's graduate committee will determine the academic term of admission.

If applicants are also seeking admission to the MA or PhD program, applications for the graduate certificates should be received by March 15.

Graduate Certificate in Public History

Students who complete 12 required hours of public history course work, 3 hours of public history internship (HIST 7910 Public History Internship), and a course in historical methods (HIST 7700 Seminar in Historical Methods) or equivalent are eligible to receive the Graduate Certificate in Public History.

Graduate Certificate in Archival Studies

Students completing 12 required hours of archival studies coursework, 3 hours of archival internship (HIST 7920 Archival Internship), and a course in historical methods (HIST 7700 Seminar in Historical Methods) or equivalent are eligible to receive the Graduate Certificate in Archival Studies.

Horticulture - MS, MAg, PhD

Program Degree:
- Horticulture - MS (p. 1569)
- Horticulture - MAg (p. 1569)
- Horticulture - PhD (p. 1570)

Graduate Certificate:
- Public Horticulture (p. 1570)

Graduate study in horticulture emphasizes the Master of Science and Doctor of Philosophy degrees. Graduates are prepared for careers in teaching, research, business, public horticulture or Cooperative Extension. Master-level programs are available to students with undergraduate degrees in horticulture and to those from other areas seeking opportunities in horticulture-related careers. For the MS program, students must have a bachelor's degree in horticulture or a related area from an accredited university and meet specific departmental academic standards. Applicants from related areas will be required to correct any undergraduate course deficiencies. GRE test scores, GPA, letters of intent and reference, as well as other support material, will be considered in evaluating applicants. A
GRE Analytical Writing Score of 3.0 or above is recommended. For applicants scoring less than 3.0 on the essay portion of the GRE, ENGL 3040 Technical Writing will be considered a deficiency course. An absolute requirement for admission is a faculty member willing to serve as the applicant’s advisor. The MS requires a minimum of 30 credit hours of graduate work, including at least 21 credit hours in the major field of study and six of which may be research & thesis hours (HORT 7990). The student’s plan of study is individually tailored by the student, the major professor and the advisory committee to meet the student’s career goals. A thesis based on research by the student is required. Students in the MS program in Horticulture who are on departmental funding cannot change to the Master of Agriculture program.

Admission requirements for the MAg program, a non-thesis degree, are the same as for the MS degree. The MAg requires successful completion of 32 credit hours, 21 of which must be in agricultural sciences. Credit for HORT 7990, Research and Thesis, cannot be counted toward graduation requirements for the MAg. Additional courses may be required for individual students as determined by the major professor and the advisory committee. There is no specific schedule of courses for MS or MAg students or a foreign language requirement for any graduate students in Horticulture. Students in this option must complete a research or special project and pass a comprehensive oral exam covering course work and the project.

Admission to the Doctor of Philosophy program requires the completion of a thesis-based degree and meeting the same requirements as for master-level programs. Doctoral candidates must follow all Graduate School and departmental requirements concerning course work. For the PhD, the Graduate School requires a minimum of 30 semester hours of graded (e.g. A, B, C) graduate course work (6000-level and above) beyond the bachelor’s degree, and at least 30 semester hours of additional graduate course work that may include un-graded courses, including 7990 and 8990. The advisory committee may require additional course work. Upon completion of all course work, PhD students may be required to take a general written examination by his/her committee. Students must pass all parts of the written examination before scheduling the required preliminary oral examination (referred to as the PhD prelim exam). After satisfactory completion of the prelim exam the student advances to candidacy. The PhD student will conduct independent research and prepare a dissertation through the guidance and direction of an advisory committee. After completion of the dissertation, the student must pass a final oral examination defending the dissertation.

Several minors are available for horticulture graduate students. Auburn University’s Department of Horticulture and School of Forestry and Wildlife Sciences offer a minor in Urban Forestry. An interdisciplinary minor in Environmental Studies administered by the Crop, Soil and Environmental Sciences Department is also an option, as are minors in Ecology and Biochemistry and Cell/Molecular Biology. The department also offers a Graduate Certificate in Public Horticulture.

**Public Horticulture - Graduate Certificate**

This Graduate Certificate Program is designed to provide opportunities for those wishing to gain the theoretical knowledge and practical skills to connect traditional horticulture and public outreach. Career fields include working in public gardens, arboreta, university extension services, hospitality industry (resorts), zoos, and community gardens. Career practices include public garden administration, teaching, horticultural therapy, garden design and event planning. The curriculum includes courses that give students practical experience with horticultural skills and garden management as well as exposure to top public gardens around the world through travel and internship experiences.

**Human Development and Family Studies - MS, PhD**

**Degree Program:**

- Human Development and Family Studies - MS (p. 1571)
- Human Development & Family Studies – Marriage and Family Therapy Option - MS (p. 1572)
- Human Development and Family Studies - PhD (p. 1572)

**Graduate Certificate:**

- Advanced Research Methods for Developmental and Family Studies

The Department of Human Development and Family Studies offers graduate instruction leading to the Master of Science in Human Development and Family Studies or Marriage and Family Therapy and the Doctor of Philosophy in Human Development and Family Studies. The Department emphasizes the integration of knowledge from various fields to prepare students for careers in research, teaching, and human service provision as well as education, policy, and industry. To promote training and research, the Department operates the Auburn University Early Learning Center, Harris Early Learning Center of Birmingham, and the Center for Marriage and Family Therapy. The marriage and family therapy option is accredited by the American Association for Marriage and Family Therapy Commission on Accreditation for Marriage and Family Therapy Education. Both the Auburn University Early Learning Center and Harris Early Learning Center of Birmingham are accredited by the National Academy of Early Childhood Programs, a division of the National Association for the Education of Young Children.
For admission, a background in the social and behavioral sciences is highly desirable and should include course work in human development, family relations, psychology and/or sociology, and statistics. There is no language requirement for the MS or PhD degrees.

The department offers two MS concentrations (a) human development and family studies and (b) marriage and family therapy. The human development and family studies concentration requires a minimum of 30 semester hours and the concentration in marriage and family therapy requires 52 semester hours. Both require a thesis, and other fundamental work.

The PhD program requires a minimum of 60 credit hours beyond the BS. This program requires course work with a theoretical and substantive emphasis in human development and relationships, a research and statistics component, and an empirical dissertation.

Graduate research may focus on human development and relationships or the application of research to improve quality of life at any stage of the life cycle. Competitive graduate assistantships are available to students.

Industrial Design - MID

The school offers the master of industrial design degree accredited by the National Association of Schools of Art and Design (NASAD.) Applicants must have a bachelor's degree in industrial design or equivalent from an institution of recognized standing. Applicants with a bachelor's degree in an industrial-design-related discipline, such as architecture, graphic design, interior design, and fashion design, etc. are eligible to apply through the regular application process. Acceptance to the MID program is heavily based on portfolio review. Unsuccessful applicants with an industrial-design-related degree, or applicants with a non-design degree, may choose to apply to the graduate program under the condition that a minimum of 43 post baccalaureate credit hours in industrial design be completed at the undergraduate level with a 3.0 GPA. These applicants are admitted during the summer semester and awarded a bachelor of science in industrial design studies (NASAD accredited) upon completion of the three semester post baccalaureate program. Upon admission to the master's program successful completion of 35 graduate level credit hours, including a thesis is required. A 40-credit hour non-thesis option is available. Minimum (4) credit hours of INDD 7990 Design Thesis is required but may not exceed six hours. Course content beyond the 17-credit hour core curriculum will be structured to accommodate the student’s area of interest. Completion of an industry collaboration studio (INDD 7910 Industry Practicum) is required. There is no language requirement. An external terminal document draft review and a 3.0 overall graduate GPA are required. Participation in school sponsored international travel programs may be used as credit towards graduation. Students are admitted only in the fall semester. Applications to the graduate program must be complete by 1 February.

All courses are (3) credits except Special Problems INDD 6960 (1-5) credits, Thesis Design INDD 7990 (1-5) credits and Industry Practicum INDD 7910 (5) credits. Thesis requires (35) credits minimum, four semesters, with no more than (6) credits taken in INDD 7990. Non-Thesis requires (40) credits minimum, four semesters with (3) credits taken in INDD 7980. It is required that MID students take no more than 12 graduate credits per semester (9 is full-time) and enter the program during fall semester. All thesis, non-thesis documentation drafts for the MID must be completed and submitted for final graduation review by the respective graduate committee the semester prior to the intended semester of graduation. A 3.0 GPA or above is required to qualify for graduation. Select INDD 6960 classes may be offered during the summer semester. Graduate students transferring from other INDD graduate programs will be reviewed for admission on a case by case basis but must complete all AU/MID Required Core Courses. The recommended enrollment in graduate classes is eight students. No more than 15 credits in INDD 6960 may be used toward graduation.

Industrial and Systems Engineering - MISE, MISE/MBA, MS, MEM, PhD

Degree Programs:
- Industrial and Systems Engineering - MISE (p. 1575)
- Industrial and Systems Engineering - MS (p. 1575)
- Engineering Management - MEM (p. 1575)
- Industrial and Systems Engineering - PhD (p. 1577)

Graduate Certificate:
- Automotive Manufacturing Systems (p. 1574)
- Occupational Safety & Ergonomics (p. 1577)
- Modeling and Data Analytics for Operations (http://bulletin.auburn.edu/thegraduateschool/graduatedegreesoffered/industrialandsystemsengineeringmisemisembamsphd_major/modelingdataanalytics_certificate/)

The department offers the master of industrial and systems engineering, a master of science, a master of engineering management with four options, a joint program leading to both MISE and MBA degrees, the master of engineering management, and the doctor of philosophy. These programs are for students with undergraduate degrees in industrial engineering, other engineering disciplines, mathematics and sciences.

All applicants who have an engineering degree from an ABET-accredited program with a GPA of 2.75 or higher do not have to take the GRE. Otherwise, applicants must submit Graduate Record Examination scores for the General Test except MISE/MBA applicants who may instead submit Graduate Management Admission Test scores. For the master's programs, applicants with an undergraduate degree in engineering from an ABET-accredited institution with a 2.75 GPA or above GPA are not required to take the GRE. All PhD applicants are required to take the GRE.

Both the MISE and MS programs require a total of 31 hours of course work, which includes a one semester hour seminar class. The MISE is oriented toward professional practice. MISE students must take 9 semester hours of core courses, 12 hours of INSY electives and 9 hours of INSY-related electives. The MS has the same course requirements and hours except that 4-6 hours of thesis may be substituted for the same hours of elective courses.

The MEM program requires 30 hours of course work. There are four options: Manufacturing, Systems, Occupational Safety and Ergonomics, and Product Innovation.

The MISE/MBA program is a 55-hour program administered jointly by ISE and the MBA program. The program saves the student six hours of course work over completing both degrees separately. For the MISE portion of the dual degree, the program consists of 9 semester hours of core courses, 12 hours of INSY electives and 6 hours of INSY-related electives. One semester hour of INSY graduate seminar is also required. For the MBA portion of the dual degree, there are seven core (BUSI) classes for 21 semester hours and an additional 2 classes of BUSI or related electives for six hours. For the MBA, students without two years full time work experience are required to do a 3-credit hour internship in place of one of the 3-hour BUSI or related electives. Students must apply separately to each program (MISE and MBA), but only have to pay one application fee.

Research involvement is the dominant element in the doctoral program. It provides a quality educational experience for selected individuals whose records indicate excellent potential not only for superior performance in course work, but also for the research and ensuing dissertation which is an original and scholarly contribution to the field. The PhD program requires at least 60 semester hours of coursework beyond the bachelors, including 9 semester hours of core courses. A minimum of one hour of graduate seminar is also required. The student must demonstrate a high level of proficiency in a specific area of industrial and systems engineering as well as a competence in the entire field. The degree usually requires at least one calendar year of research.

### Master of Engineering Management

This degree allows those who are currently working in an engineering-related field to expand their career potential and earn a degree that will pay dividends toward their future. The degree is applicable to individuals working in the aerospace, biosystems, chemical, civil, computer science and software, electrical and computer, industrial and systems, materials, mechanical and wireless industries.

Information Systems Management

Degree Program:
- Information Systems Management - MS (on-campus/full-time and online)
- Information Systems Management - PhD

Graduate Certificate:
- Business Analytics
- Management Information Systems

The Systems and Technology department (SYST) offers graduate study leading to the master of science and the doctor of philosophy degrees in Information Systems Management. The program also offers a joint program leading to both the MSIS and MBA degrees. Applicants must hold a bachelor’s degree from a recognized institution. Graduates of business schools will likely have met this requirement; graduates of other programs may be required to complete additional courses to compensate for deficiencies.

Master of Science in Information Systems

The (MSIS) Program in Business is a non-thesis program that emphasizes practical application of management information systems to managerial problem solving and decision making. Students are required to complete a final project. The program is designed to provide students the opportunity to develop an expertise in a chosen area of management. Applicants to the master's program must have completed an undergraduate degree. The MSIS program is offered as a traditional, on-campus program and as an online program. A twelve-hour graduate certificate is also available.

The MBA/MSIS is a 54-hour program administered jointly by the Systems & Technology faculty and the MBA program. The program saves the student fifteen hours of coursework over completing both degrees separately. For the MBA, students without two years full time work experience are required to do an additional 0-3-credit hour internship. Students must apply separately to each program (MISE and MBA), but only have to pay one application fee. Students can also opt to apply for the second degree program during their first year in the other program.

The PhD program in Business with Information Systems Management Concentration prepares graduates to conduct high-quality research in universities, colleges, government and business. Individual flexibility is provided in a program of study that develops the conceptual and methodological skills that graduates need to establish a leadership position in their chosen fields. Objectives of the program are accomplished through the completion of a formal program of study, successful completion of a statistics core, preparation and completion of two examination manuscripts, and dissertation research. Students with assistantships may also be required to teach. Students are expected to have a fulltime presence on campus. Applications to the PhD program must complete an Auburn University Graduate School application. For full consideration, applications must be received no later than February 1, prior to the Fall term.

Information concerning specific program requirements may be obtained by visiting www.harbert.auburn.edu.

Kinesiology - MS, PhD

Degree Programs
- Exercise Science
- Physical Activity and Health
- Physical Education/Teacher Education
- Kinesiology

Graduate Certificate
- Movement Skill Analysis

Graduate Minor
- Sport Management
The School of Kinesiology offers graduate degree programs leading to a master of science (non-thesis and thesis options) and doctor of philosophy. Offerings also include a graduate certificate and a graduate minor. The school’s advanced programs prepare students for careers in sport performance, health optimization, fitness program management for community and corporate settings, the allied health, fitness and sport-related industry, as well as teaching and research in educational settings.

Master’s Degree Programs (MS)

Master’s programs are offered in exercise science, physical activity and health, and physical education/teacher education. Specialized areas of study include biomechanics, exercise physiology, motor neuroscience, physical activity and health, pedagogy and post-certification athletic training.

Applicants to MS programs must satisfy the Graduate School’s admission requirements. School of Kinesiology admission requirements include a bachelor’s degree from an accredited college or university, academic good standing at the institution last attended, an undergraduate minimum GPA of 2.75, competitive GRE scores, letters of recommendation, and School approval. For admission to the MS in physical education/teacher education, the undergraduate GPA must be documented on the official transcript of the degree-granting institution and must be the GPA that was used as the basis for granting the degree (not a GPA that includes post-degree courses); alternatively, a minimum GPA of 3.0 in a master’s of higher degree program may be used for admission.

MS programs in physical education/teacher education include alternative certification and traditional certification programs. The alternative MS certification program offers qualified students who hold non-teaching baccalaureate degrees a route to initial teacher certification while simultaneously earning a master’s degree; the traditional MS certification program offers advanced study for individuals who hold a valid bachelor’s-level professional educator certificate in physical education/teacher education. Applicants to the alternative MS certification program in physical education/teacher education must submit a clear background check and satisfy the State’s teaching field admission requirements; applicants to the traditional MS certification program in physical education/teacher education must submit a clear background check and hold a valid bachelor’s-level professional educator certificate in physical education. Both certification programs are approved by the Alabama State Department of Education (ALSDE). The College of Education is accredited by the National Council for Accreditation of Teacher Education (NCATE).

Degree requirements for all non-thesis master’s programs include a minimum of 33 hours and 36 hours for thesis master’s programs. All non-thesis master’s degrees require a written comprehensive exam. Additional degree requirements for the alternative MS certification program in physical education/teacher education are in compliance with regulations established by the Alabama State Department of Education. These requirements include a semester long, full-time internship and satisfactory completion of the State’s testing program which consists of a passing score on each of the Praxis Core Academic Skills for Educators assessments (Reading, Writing, and Mathematics) and a passing score on the appropriate Praxis II subject assessment and official submission of the edTPA assessment for scoring. Additionally, in order to be recommended for teacher certification candidates must receive passing scores on the edTPA assessment. In accordance with State regulations, effective for students unconditionally admitted prior to July 1, 2017, a minimum GPA of 3.00 is required on all courses used to meet master’s-level certification program requirements. Effective for students unconditionally admitted July 1, 2017 and after, a minimum GPA of 3.25 will be required on all courses used to meet master’s-level certification program requirements.

Doctor of Philosophy Degree Program (PhD)

Applicants to the School of Kinesiology’s PhD program must satisfy the Graduate School’s admission requirements. School of Kinesiology admission requirements include competitive GRE scores, current resume, statement of purpose (including research focus), letters of recommendation, and approval by the school.

The PhD program requires a minimum of 60 semester hours beyond the bachelor’s degree. Research methods and statistics are components of all doctoral programs. The remaining hours are divided between the area of specialization and approved support courses. After satisfactory completion of coursework and a general written and oral examination, the student advances to candidacy. Doctoral students must register for at least 10 semester hours of doctoral research while completing a dissertation.

Specialized areas of doctoral study include biomechanics, exercise physiology, motor neuroscience, motor development, sport and exercise psychology, motor learning and control, physical activity and health, and teaching and research in physical education.

Master’s- and Specialist-Level Certification

Individuals completing the State-approved MS certification programs in physical education/teacher education are eligible to apply for Alabama Class A certification. Effective September 1, 2018, the Alabama State Board for Education will require an acceptable score on the edTPA for initial certification in a teaching field. This state certification requirement applies to individuals completing alternative master’s programs. A State-approved specialist level non-degree program is available for PhD students who hold a valid master’s-
level professional educator certificate in physical education/teacher education. Individuals completing this program are eligible to apply for Alabama Class AA certification. In accordance with State regulations, effective for students unconditionally admitted prior to July 1, 2017, a minimum GPA of 3.25 is required on all courses used to meet master's-level certification program requirements. Effective for students unconditionally admitted July 1, 2017 and after, a minimum GPA of 3.50 will be required on all courses used to meet specialist-level certification program requirements.

Individuals seeking certification in states other than Alabama are responsible for contacting those state certification offices to obtain their application form and requirements. These individuals should first meet the requirements for certification in the State of Alabama. The State of Alabama signs the National Association of State Directors of Education and Certification (NASDTEC) Interstate Agreement which facilitates the applications of program graduates when they apply for certification in other states.

**Graduate Minor and Graduate Certificate**

The School of Kinesiology in collaboration with the Department of Educational Foundations, Leadership and Technology offers a graduate minor in sport management. In addition, the School of Kinesiology offers a graduate certificate in movement skill analysis.

**Additional Information**

Detailed admission requirements for the school's multiple areas of graduate study are available on the College of Education's website, Academics (http://www.education.auburn.edu/academics).

The University schedule of courses is available on the University website.

1. Take KINE 6350/6 Assessment in Physical Education and KINE 7920/6 Internship concurrently.
2. Take KINE 7910 Practicum and KINE 7350 Analysis of Instruction concurrently.
3. Clearance for Clinical Residency includes completion of all other coursework except KINE 7920/6 Internship and KINE 6350/6 Assessment in Physical Education. Exceptions require approval using the Student Petition Form.
4. KINE 7260 OR RSED 6000/6 must be completed if survey of special education course was not completed prior to unconditional admission. If a survey of special education course was completed prior to unconditional admission, the state diversity course requirement is fulfilled with CTRD 6000/6 Language and Literacy and the 3-hour course requirement for RSED 6000/6 will be waived resulting in 19 hours in Professional Studies and 33 total program hours. KINE 7260 may count as an advisor-approved course in Teaching Field.

In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.25 is required on all courses used to meet program requirements. Coursework used to meet admission requirements cannot be used again to meet Alternative Class A program requirements. All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.

Undergraduate courses may be required by your advisory committee for your plan of study. This coursework is in addition to the total graduate program hours noted above and must be completed prior to Internship.

Landscape Architecture - MLA

The School of Architecture, Planning and Landscape Architecture offers the Master of Landscape Architecture (MLA). This is a first professional degree program accredited by the American Society of Landscape Architects. The MLA consists of 96 credit hours delivered over six and a half semesters. Students with undergraduate degrees in disciplines other than landscape architecture enter in the Summer Mini-Semester II and graduate three years later. Students are encouraged to pursue internships during the remaining Summer Semesters. The program accepts and encourages applicants from a wide range of disciplines in the humanities, the sciences and the arts. Students who have an undergraduate degree in landscape architecture can complete the Master of Landscape Architecture in two years, by application, through Advanced Placement. Advanced Placement is not automatic, but based on portfolio and academic merit. Successful applicants for Advanced Placement enter in the Fall semester. Students who are currently in the Auburn University pre-landscape architecture programs [Bachelor of Horticulture and Bachelor of Environmental Design] complete their undergraduate degrees as the first year of the MLA. These applicants should contact the Program Chair or the Program Administrator for more information. Pre-landscape architecture students enter in the Summer Mini-Semester II.

Prospective students apply for admission online to the Graduate School. The Graduate Record Examination is not a requirement; however, the Admissions Committee will require the undergraduate record, three letters of recommendation, a 500 word statement of intent and, in the case of applicants for Advanced Placement, a portfolio of work.

The program is a studio design-based course of study that incorporates learning from across the disciplines of art, architecture, urban design, ecology, information technology and the natural sciences. The program studies regional and urban landscape systems through the relationships between human dwelling and natural systems. Graduates will be prepared to take action in rebuilding urban landscapes, reconnecting fractured ecosystems, and regenerating human and nonhuman habitats.

Each semester consists of 15 credit hours, including six credit hours of studio and fieldwork. In their final year of study students engage a comprehensive design studio that explores research by design. Students must also be prepared to undertake numerous field studies in a variety of locations that can involve interstate visits and several days away from Auburn University. All field trips and Study Abroad incur extra costs.
The Master of Landscape Architecture offers a limited number of Graduate Assistantships each year. GA positions are highly competitive, and applications exceed availability. The assistantships are awarded on the basis of merit. Students who wish to apply for an assistantship must do so when they send their materials to the Program Chair. When assessing the merit of applications for research assistantships, faculty review the following:

- Academic transcript
- GPA
- Portfolio
- Statement of intent

Applicants who can attend the Master of Landscape Architecture only if they receive an assistantship should make this clear to the Program Chair on application. As a rule Graduate Assistantships involve working with faculty on research projects. A wide range of tasks is expected to be performed to a high standard. Punctuality, timeliness and cordiality are strict requirements. Graduate Assistantships provide a partial tuition waiver and a monthly stipend. The tuition waiver applies to in-state and out-of-state students alike, and covers a portion of the tuition fee for each semester that the student is a GRA. Students who are appointed as GAs are required to pay the Professional Fee. Assistantships are awarded on a semester basis (and they are not available in the first summer) and there is no guarantee that recipients will receive a continuance of their assistantship. Reappointment will be made on the basis of students having:

- Maintained a high work standard
- Completed all their coursework and assignments satisfactorily
- Performed well for the faculty member to which they have been assigned.

Any questions about assistantships should be directed to the Program Chair. The Master of Landscape Architecture does not currently offer scholarships.

All students who enter the MLA must ensure that they have a their own laptop computer that conforms to the requirements set out on the Landscape Architecture page of the College of Architecture Design and Planning website.

Management - PhD

Degree Programs:
• Business Management Concentration  (PhD (p. 1585))

The Doctor of Philosophy in Business with a concentration in Management prepares students for careers in research and teaching. It provides the depth of knowledge and skills required to conduct first-rate research in the field, effectively analyze that research, and present those findings in world-class scholarly presentations and publications.

The Ph.D. in Business - Management, provides students with the opportunity to develop expertise in all phases of the process of change in organizations. The program emphasizes diagnosing organizational problems and implementing interventions to improve performance.

The Ph.D. in Business - Management is a four year, full-time program. The bulk of coursework is completed in the first two years. The third year is devoted to two required research papers. The fourth year is spent on dissertation research. Completion of the dissertation and its defense is the last requirement for completion of the degree. Students with assistantships may also be required to teach. Students are expected to have a full-time presence on campus.

Applicants to the program must hold a bachelor's degree from a recognized institution, complete a Graduate School application including submitting GMAT (preferred) or GRE scores. For full considerations, applications must be received no later than February 1, prior to the Fall term.

Information concerning specific program requirements may be obtained by visiting the Raymond J. Harbert College of Business website.

PhD in Business Management Concentration

<td>60</td>
</tr>
</tbody>
</table>

The PhD in Business requires 60 semester hours earned through instruction beyond the bachelor's degree, including 1) a minimum of 30 semester hours graded (e.g., A, B) graduate course work (6000-level and above); and 2) a minimum of 30 semester hours of additional graduate course work (6000-level and above) that may include ungraded courses, 7990 and 8990, and must include at least 10 hours of 8990. Up to 30 hours (if less than half of the total number of hours) of applicable master's level course work may be used to satisfy part of these requirements with advisor approval.
The total number of credit hours that may be transferred from another accredited institution toward a doctoral degree varies by program but must be less than 50 percent of the credit hours listed on the Plan of Study. Such transfer credit 1) must fall within the time limits of the degree; and 2) must be approved by the advisory committee and the dean of the Graduate School. A maximum of four hours of 7990 (Research and Thesis) from a completed master's program may be counted.

All doctoral students must complete a minimum of 10 hours of MNGT 8990. Enrollment in MNGT 8990 may take place at any time the student and the advisory committee deem appropriate. During any one semester, the number of hours of 8990 in which the student enrolls should reflect the amount of instructional time being spent on the dissertation and the degree to which university resources are being utilized. Students may enroll, during any one semester, for as few as one hour or as many as 16 hours of 8990. Dissertation students submitting their dissertation, awaiting committee review and approval, or taking their final examination must register for 8990 Research and Dissertation in the semester(s) when these steps in the process take place. The requisite 10 hours of 8990 should be included in the Plan of Study. No grade is assigned.

**Master of Accountancy (MAcc), Graduate Certificate**

**Degree Program:**
- MAcc

**Graduate Certificate:**
- Accountancy

**Master of Accountancy (Campus or Online Options)**
The Master of Accountancy (MAcc) is a professional non-thesis degree program requiring 30 semester hours and a two and one-half day campus residency. The program provides students additional technical skills, research and communication skills, as well as focused preparation on passing the Uniform CPA examination. During spring semester, campus students enroll in six hours of coursework and the Auburn Becker CPA Exam Review. Before graduation, campus students sit for all four parts of the CPA Exam.

The degree may be earned as a traditional, campus student or through the online option. Campus classes are recorded and streamed to online students. Therefore, online students receive the same lectures and AACSB accredited degree as their campus peers. The online option is identical to the campus option regarding rigor, standards, and student accountability. The campus option may be completed in three semesters while the online option may be completed in five semesters for students who are working full-time. Online students working full-time may take only two classes per semester.

**Graduate Certificate in Accountancy (Online Option)**
The online Graduate Certificate in Accountancy (GCA) is an 18 semester hour non-degree seeking program offering MAcc coursework to working professionals who desire to meet one or more of the following goals:

- Gain credentials to teach at collegiate level
- Matriculate to MAcc with only four courses remaining
- Enroll in graduate program without GMAT
- Enjoy flexibility and convenience of online program
- Take classes required for CPA Exam and certification
- Update and expand accounting knowledge and skills
- Enroll in a *U.S. News & World Report* top online graduate program

To be considered for admission to the GCA, a candidate’s academic credentials and work experience must be competitive for admission to the online MAcc, excluding the GMAT. We do not advertise minimum GPA requirements, because the Admissions Committee uses a holistic approach when reviewing a candidate’s application package. The Committee places high emphasis on the quality of a candidate’s academic background, overall and accounting grade point averages, and work experience. The GCA may be completed in three semesters for students who are working full-time. Students working full-time may take only two classes per semester. While enrolled in the last semester of the GCA, students who have performed well in the program may apply to the online MAcc and have only four additional courses remaining to complete the Master of Accountancy degree. Due to federal guidelines and regulations, Graduate Certificate programs do not qualify for financial aid.

For admission to the MAcc or GCA, students must have a four year accredited undergraduate business degree and a concentration in accounting. Criteria for admission and degree requirements are established by the School of Accountancy.
For more information, please visit www.harbert.auburn.edu. Questions should be directed to Mrs. Andee Hodo, Director of Graduate & Online Programs in the School of Accountancy, at andee.hodo@auburn.edu or (334) 844-6207.

Materials Engineering - MS, PhD

Degree Programs:
- Materials Engineering - MS (p. 1588)
- Materials Engineering - PhD (p. 1588)

Materials Engineering offers graduate programs of instruction and research leading to the degrees of master of materials engineering (MMtIE), master of science (MS) and doctor of philosophy (PhD). All applicants must submit GRE scores for the General Test. Students completing all degree programs are expected to have knowledge in the following areas: mechanical properties; materials structure; materials thermodynamics; kinetics; and electrical, optical and magnetic properties of materials. There are no foreign language or minor requirements for Materials Engineering graduate degrees. All students must submit an approved plan of study within one year of matriculating in the program.

The MMtIE is intended for those who expect to enter the engineering profession at an advanced level or are practicing engineers wishing to gain additional fundamental knowledge in the field of materials. Those students lacking the necessary background may be required to take additional course work. The requirements for the degree are 33 credit hours including a final engineering report. The topic of the report will be agreed upon by the student and the advisory committee. Applicants must have a baccalaureate degree in engineering or science from an institution of recognized standing. Students must pass a qualifying examination prior to taking the final general comprehensive examination required by the Graduate School.

The MS is intended for those who seek advanced knowledge in materials science or engineering for a career in research or other professional practice. The applicant must have a baccalaureate degree or its equivalent in an engineering or scientific discipline from an institution of recognized standing. Those lacking the necessary background will be required to take additional course work to ensure the continuity of their educational and professional experience. The MS program consists of 30 credit hours selected from areas of study appropriate to the objectives of the applicant and includes a thesis. Students must pass a qualifying examination prior to taking the final comprehensive examination required by the Graduate School. The PhD program requires that students pass qualifying examinations (oral and written) with a greater proficiency than master's students prior to taking the comprehensive examinations. The program is arranged on an individual basis with the student's advisory committee and in accordance with Graduate School guidelines. Students admitted to the doctoral program are required to take the general comprehensive examination based on a research proposal developed by the student within two years after entering the program. The student should be prepared to be examined in all areas of materials engineering.

Mathematics and Statistics - MS, MAM, MPS, PhD

Degree Programs:

- Applied Mathematics Non-Thesis - MAM (p. 1590)
- Mathematics Option Thesis - MS (p. 1590)
- Mathematics - PhD (p. 1590)
- Statistical Option Thesis - MS (p. 1590)
- Probability and Statistics Non-Thesis - MProbS (p. 1590)

The Department of Mathematics and Statistics offers programs leading to the master of science and doctor of philosophy in both pure and applied mathematics and statistics, the non-thesis master of applied mathematics, and the master of probability and statistics (also see Statistics). In addition, the department regularly offers actuarial science courses that are approved by both the Society of Actuaries and the Casualty Actuarial Society; they are designed to provide the background and material covered in the first three actuarial exams.

The master of applied mathematics gives students a strong foundation in one of several fundamental areas of applied mathematics. It is a flexible degree with courses being chosen in conjunction with the advisory committee, some of which may be relevant courses offered by other departments. The master of probability and statistics and the master of science in statistics degrees provide a solid foundation for careers involving applications of statistics. The master of science degree in mathematics develops both content knowledge of the student though coursework, and provides the opportunity to delve deeper into an area of mathematics through the writing of a thesis. The PhD is designed to give students a thorough understanding of a broad body of knowledge related to their field of study, as well as to develop their research capabilities. PhD students are required to pass one oral and three written preliminary examinations. A statistics concentration is available for the PhD degree (see Statistics).

The internationally known faculty of around 50 professors works in areas of algebra, analysis, applied mathematics, discrete mathematics, geometry, linear algebra, logic, numerical analysis, partial differential equations, probability, set theory, statistics and topology. Some professors maintain applied research programs associated with several government and industrial laboratories, and one holds the Associate of the Society of Actuaries designation.

Admission to the program is based on a student’s undergraduate record, three letters of recommendation from former teachers, GRE scores and graduate GPA (for doctoral students). The GRE subject test is not required. A bachelor’s degree in mathematics is not required, but students without such a background may be expected to take additional courses to make up deficiencies. The department follows the guidelines for graduate degrees set forth in this Bulletin. Doctoral students must satisfy the departmental preliminary examination requirement to continue their teaching assistantship. Course work in mathematics may be transferred from other institutions, subject to university limitations. (See http://www.math.auburn.edu/.)

Most students in the program are supported financially during their studies through Graduate Teaching Assistantships and through tuition waivers given to all teaching assistants (with some restrictions). The Baskervill, Fitzpatrick, and Haynesworth Fellowships (around $5,000 each) are awarded annually to qualified students in the Department of Mathematics and Statistics. The department occasionally has Graduate Research Assistantships available in conjunction with departmental contractual research programs. The department requires that all international GTAs who have responsibility for teaching a class be proficient in English, passing the test of spoken English.

Mechanical Engineering - MS, PhD

Degree Programs:

- Mechanical Engineering - MS (p. 1591)
- Mechanical Engineering - PhD (p. 1592)

The Mechanical Engineering Department offers graduate programs of instruction and research leading to the degrees of master of science (thesis and non-thesis options), and doctor of philosophy. Educational and research facilities are available to support graduate study in solid mechanics, experimental mechanics, electronic packaging and reliability, fracture and failure mechanics, robotics, vibrations, controls, dynamical systems, engineering design, additive manufacturing, friction-lubrication-wear, computer-aided design, fluid dynamics, transportation systems, conventional and renewable energy systems, thermal/fluid sciences, HVAC systems and nanotechnology applications. The applicant must hold a bachelor’s degree or its equivalent from an institution of recognized standing. If the applicant’s undergraduate degree is not closely related to mechanical engineering, an individualized plan of study will be developed to impart the critical skills inherent in the bachelor’s mechanical engineering program. This typically includes completing a prescribed number of core undergraduate mechanical engineering courses in addition to the graduate requirements. All applicants must submit Graduate Record Examination scores for the General Test and will be evaluated on an individual basis by the Mechanical Engineering Graduate Committee.

MS (Non-Thesis Option): This degree is intended for those applicants who expect to enter the engineering profession at an advanced level or those who are employed and seeking professional development. Requirements for the degree consist of completing 30 credit hours of 6000-7000 level courses. A minimum of 21 credit hours of graded course work should be in mechanical engineering. Substitution of courses from other engineering/science disciplines is permitted with prior approval when appropriate courses are unavailable in mechanical engineering. A committee of three faculty members including a major professor will supervise the plan of study of each student. There is no faculty supervised project requirement.

MS (Thesis Option): This degree is intended for those applicants who expect to enter the engineering profession at an advanced level with some creative research experience. The MS applicant must have a baccalaureate or its equivalent in an engineering or scientific discipline from an institute of recognized standing. The degree requires 30 credit hours of 6000-7000 level courses including 6 credit hours of MECH 7990 and 9 credits of graduate engineering/science technical elective courses. A minimum of 15 credit hours of graded course work should be in mechanical engineering courses. Substitution of courses from other engineering/science disciplines is permitted with prior approval when appropriate courses are unavailable in mechanical engineering. All candidates must pass an oral defense of their written thesis including a comprehensive examination covering the major courses. A committee of at least three faculty members including the major professor will supervise the plan of study of each student. There is no faculty supervised project requirement.

Doctor of Philosophy (PhD): This degree provides for advanced coursework and emphasizes original, creative research. A dissertation embodying the results of this research represents a major portion of the requirements for this degree. The PhD program will consist of a minimum of 60 credit hours, including dissertation, beyond the BS degree. PhD students will select their major courses from those at the 7000-8000-level unless there are special requirements for more basic courses. A minimum of 21 credit hours of graded course work should be in mechanical engineering courses. This amount could include up to 4 credit hours of MECH 7990 or equivalent. Substitution of courses from other engineering/science disciplines is permitted when appropriate courses are unavailable in mechanical engineering. The PhD also requires a coordinated minor of at least 9 credit hours of graded coursework in a closely related field such as mathematics, physics, chemistry, or other engineering disciplines. A minimum of 10 credit hours of MECH 8990 Research & Dissertation is also required. There is no language requirement for the PhD.

The General Doctoral Examination (Preliminary Examination) must be taken by those seeking a PhD. This examination, administered by the major professor in coordination with members of a committee of at least four faculty (including the major professor) consists of two parts: (1) a written Qualifying Examination based upon knowledge acquired from coursework, taken four semesters from the date of entry, and (2) an oral examination which includes questions on knowledge acquired from coursework as well as a presentation and defense by the student of his/her proposed dissertation research. All PhD candidates must also pass a Final Examination consisting of an oral defense of their written dissertation. A maximum of two attempts each is allowed for passing the General Doctoral Examination and the Final Examination.

Pharmaceutical Sciences: Medicinal Chemistry Option - MS

The Auburn University Harrison School of Pharmacy offers interdisciplinary MS and PhD degree programs in Pharmaceutical Sciences. Those pursuing one of these degrees must select one of four curricular options: 1) Medicinal Chemistry, 2) Pharmaceutics, 3) Pharmacology, or 4) Health Outcomes Research and Policy.

The Medicinal Chemistry, Pharmaceutics and Pharmacology options are designed for students interested in the drug discovery or development processes, and are affiliated with the Department of Drug Discovery and Development. Areas of interest include neurodegenerative diseases, cardiovascular diseases, infectious diseases, cancer, diabetes and other metabolic diseases, synthetic organic chemistry, forensic analytical chemistry and drug delivery, disposition and formulation.

The Health Outcomes Research and Policy option is designed for students interested in studying healthcare delivery, medication use and outcomes. This option is affiliated with the Department of Health Outcomes Research and Policy.

Note that courses used to fulfill program core requirements may also be used to fulfill option specific requirements.

The MS degree is offered under the thesis option. Students must earn a minimum of 30 semester hours of graduate courses (6000 - 8999). Thesis students register for Research and Thesis in semester(s) when working on the thesis, when submitting, defending or awaiting final approval of the thesis, and when taking final examinations. Candidates for the MS degree are required to prepare a thesis proposal and complete a proposal defense.

For the MS Program, students must complete a Core Curriculum outlined below.

In addition to the specific core course requirements listed above, students must complete committee approved graduate electives (6000-8999) to reach the 30 hour degree requirement.

**Pharmaceutical Sciences: Medicinal Chemistry Option - PhD**

The Auburn University Harrison School of Pharmacy offers interdisciplinary MS and PhD degree programs in Pharmaceutical Sciences. Those pursuing one of these degrees must select one of four curricular options: 1) Medicinal Chemistry, 2) Pharmaceutics, 3) Pharmacology, or 4) Health Outcomes Research and Policy.

The Medicinal Chemistry, Pharmaceutics and Pharmacology options are designed for students interested in the drug discovery or development processes, and are affiliated with the Department of Drug Discovery and Development. Areas of interest include neurodegenerative diseases, cardiovascular diseases, infectious diseases, cancer, diabetes and other metabolic diseases, synthetic organic chemistry, forensic analytical chemistry and drug delivery, disposition and formulation.

The Health Outcomes Research and Policy option is designed for students interested in studying healthcare delivery, medication use and outcomes. This option is affiliated with the Department of Health Outcomes Research and Policy.

Note that courses used to fulfill program core requirements may also be used to fulfill option specific requirements.

The PhD program requires a minimum of 60 semester hours earned through instruction beyond the bachelor’s degree including 1) a minimum of 30 semester hours graded (e.g. A, B) graduate course work (6000 - 8999); and 2) a minimum of 30 semester hours of additional graduate course work (6000 - 8999) that may include ungraded courses, and must include at least 10 hours of research and dissertation. A general examination, often called the preliminary examination, is required of all applicants for the degree of doctor of philosophy. It consists of written and oral testing. The student becomes a candidate for the degree upon successful completion of the general examination. Students working on the dissertation, submitting their dissertation or awaiting approval of their final examination must register for Research and Dissertation in the semester(s) when these steps occur. Candidates for the PhD degree must complete a dissertation proposal and successfully defend their proposal during the final examination.

**Natural Resources - MNR, MS**

**Program Degrees:**

- Natural Resources - MNR
- Natural Resources - MS

Graduate study in natural resources leads to the Master of Natural Resources (MNR), or Master of Science (MS) degrees. In addition to meeting Graduate School admission requirements, applicants are evaluated and recommended for admission by the graduate faculty of the School of Forestry and Wildlife Sciences based on an examination of scores on the TOEFL tests for international students, previous academic records, experience, and recommendations. While exceptions may be made, the faculty generally expect a minimum GPA of 3.0 in previous academic course work. Course deficiencies are identified by the student’s advisory committee and approved by the GPO with due consideration for the student’s previous training and experience.

**Degrees offered:**

- **Master of Natural Resources (MNR)** - The MNR is a non-thesis degree. *Natural Resource Management* is available for individuals with a baccalaureate degree who are interested in careers in the natural resources arena. This degree can be completed in 3-4 semesters depending upon coursework selected and requires a minimum of 30 semester hours of on-campus or online distance education graduate courses.

- **Master of Science (MS)** A research proposal and thesis based on original research are required components of the MS degree. The program normally requires 2 – 3 years for completion. The MS degree program requires a minimum of 30 hours beyond the bachelor degree at the graduate level, 21 hours of which must be in the major. A minimum of 4 but not more than 6 hours in Research and Thesis (FORY 7990) is required. All MS students are required to take Research Methods (FORY 7510), Seminar (FOWS 7950), and Research and Thesis (FORY 7990).

Nursing - MSN

Track Options:

The School of Nursing offers a Masters of Science in Nursing (MSN). MSN graduates are ready to lead in educator and advanced practice nurse roles in health-related services to diverse populations. The MSN Program has two program options: Nurse Educator (33 credit/semester hours) and Primary Care Nurse Practitioner (43 credit/semester hours). All formal program options share a 24-credit hour core. The hybrid program is offered primarily online, but does require 1-2 on campus course meetings each semester. The program does not require a thesis. Students are required to complete a capstone paper that is typically a plan for an evidence-based intervention either in the educational or primary care practice setting.

Admission to all program options is competitive and all qualified applicants may not be admitted. Completed application includes:

- Submission of all official transcripts to the Graduate School
- A Bachelor of Science degree in nursing from an accredited college or university or received request for waiver
- Nursing grade point average (GPA) of 3.0 on a 4.0 scale (students with GPAs lower than 3.0 may be considered for provisional/conditional admission if otherwise qualified)
- Current unencumbered license as a registered nurse in the state in which student plans to participate in any clinical experience or received request for waiver
- Three professional references for recommendation.
- 500 word professional goal statement
- Resume or curriculum vitae

Applicants may be asked by the School of Nursing for additional information and may be required to interview with the Director of the Graduate Program, the Graduate Admission, Progression and Graduation Committee, and/or graduate faculty.

Full-time admission is available in the summer semester only and part-time admission is available summer, fall, and spring if space is available. Courses are offered only one time each academic year, therefore, changing status from full to part-time may impact planned graduation dates. Application deadlines are: (1) Summer Semester- March 1, (2) Fall Semester-June 1, and (3) Spring Semester-October 1. The application is completed online and may be found on the Auburn University Graduate School webpage.

Nurse Educator - Graduate Certificate

The purpose of the post-master’s nurse educator certificate program is to provide specialization in nursing education for nurses who already hold a master’s degree in nursing.

Admission Criteria

- Masters of Science in Nursing (MSN) or Masters in Nursing (MN or MS) from an accredited nursing program
- Current unencumbered license as a registered nurse in the United States
- Nursing GPA of 3.0 on a 4.0 scale in the Masters Program
- Good academic standing from the last university attended
- Successful completion of Advanced Pathophysiology, Advanced Pharmacology, and Advanced Physical Assessment with 3.0 or higher within the last 5 years
- Successful completion (C or better) of an undergraduate statistics course
- Three professional references
- Minimum 1-year clinical experience
- Professional goal statement
- Submission of all official transcripts
- Current resume or curriculum vitae

School of Nursing Specific Admission and Progression Information

- If applicant is a student in a MSN program at time of application, the applicant must submit a request for waiver of the MSN and NP Certification admission requirements with application to the Graduate Program Director. If waiver is approved, the applicant must complete the MSN in good standing before admission and must obtain the NP Certification during the first semester of study. These
students will be admitted as provisional/conditional until the NP Certification is obtained. An official transcript indicating completion of the MSN and documentation of NP Certification must be provided to AUSON in order to remove the provisional/conditional status. If a waiver is obtained, these applicants will be considered based on their GPA on their current transcript.

• Students may be interviewed by the Graduate Admission, Progression, and Graduation (APG) Committee and other faculty and/or community members.

• Students must complete the intent to enroll form and required materials by the date indicated on the offer at admission or their seat may be given to another applicant.

• Students are required to provide credentialing documents including a background check and drug screen. All credentialing materials required by Auburn University and the School of Nursing must be completed before the first day of classes.

• To progress through the program, all AUSON graduate students must receive a grade of at least a B in all courses. Students earning any two course grades of less than a B will be dismissed from the graduate program.

**Primary Care Nurse Practitioner - Graduate Certificate**

The Post-Masters Primary Care Nurse Practitioner (PCNP) certificate program (19 credit/semester hours) is offered to nurses who hold a master’s degree in another specialty area. The goal of the PCNP graduate certificate is to give advanced practice nurses the opportunity to expand their practice by taking the clinical courses needed to qualify for the certification exam to be licensed as a PCNP. Students who complete the certificate program will be ready to lead in advanced practice roles in health-related services to diverse populations. The PCNP certificate program is offered via a hybrid format where some courses are totally online and other courses require one to two on-campus class sessions per semester. These on-campus class sessions would be for program/course orientations, presentations, or proctored testing.

Admission to all formal program options is competitive and all qualified applicants may not be admitted. Primary Care Nurse Practitioner Certificate Program admission criteria:

• Masters of Science in Nursing (MSN) or Masters in Nursing (MN or MS) from an accredited nursing program
• Current unencumbered license as a registered nurse in the United States
• Nursing GPA of 3.0 on a 4.0 scale in the Masters Program
• Good academic standing from the last university attended
• Successful completion of Advanced Pathophysiology, Advanced Pharmacology, and Advanced Physical Assessment with 3.0 or higher within the last 5 years
• Successful completion (C or better) of an undergraduate statistics course
• Three professional references
• Minimum 1-year clinical experience
• Professional goal statement
• Submission of all official transcripts
• Current resume or curriculum vitae

**School of Nursing Specific Admission and Progression Information**

**Nutrition - MS, PhD**

- MS Nutrition (p. 1602)
- PhD Nutrition (p. 1604)
- MS Nutrition with an option in Hotel and Restaurant Management (p. 1603)
- PhD Nutrition with an option in Hotel and Restaurant Management (p. 1605)

The Department of Nutrition, Dietetics, and Hospitality Management offers graduate study leading to the Master of Science (MS) and the Doctor of Philosophy (PhD) degrees in nutrition or with an option in hotel and restaurant management. The combination of these areas within a single department facilitates integrative studies addressing normal and clinical nutrition, food and health issues, food service, as well as hospitality management. For the MS degree, the student may specialize in general, community, clinical or sports nutrition, food service management, or hotel and restaurant management. The department emphasizes the integration of knowledge from various fields for the purpose of understanding and developing professional skills for careers in higher education, government, and food, healthcare and hospitality industries.

For admission to the MS or PhD programs, the student must have a bachelor’s degree from an accredited institution, a satisfactory GPA, a satisfactory GRE score (a GMAT score may substitute for the GRE score for the hotel and restaurant management emphasis), and acceptable undergraduate academic preparation. The admission committee will evaluate all application items, including transcripts, GRE/GMAT scores, letters of recommendation, a statement of intent, and resume. International applicants are also required to submit satisfactory TOEFL scores. Applicants lacking background requirements in chemistry and anatomy and physiology for the nutrition program must make up deficiencies prior to starting the program.

The MS degree with a thesis track requires a minimum of 30 semester hours and a thesis. The MS degree with the nonthesis track requires a minimum of 33 semester hours and a scholarly research project.

Required courses for the thesis track in nutrition include:

The M.S. in Nutrition (Non-Thesis) with Dietetic Internship Experience offers a minimum of 1200 hours of supervised field experience in conjunction with the M.S. degree to enable baccalaureate degree graduates of Didactic Programs in Dietetics (DPDs) the opportunity to fulfill the experiential requirements to sit for the Registration Examination for Dietitians. Students complete 9-credit hours of field experience taking NTRI 7016 Advanced Practicum in Dietetics as the elective courses for the non-thesis option. Academic coursework is completed over the first year, followed by the field experience. Supervised practice will occur in various settings, including acute and critical care, outpatient, long-term care, wellness, public health, community, school foodservice, and other professional settings. The Auburn University Dietetic Internship Experience emphasis is in Public Health and Community Nutrition. The supervised practice is completed regionally in Alabama and Georgia (within an approximate 60 mile radius) or may be arranged via distance at student-coordinated sites subject to approval by the Dietetic Internship Director. Graduates who successfully complete the Auburn University M.S. in Nutrition with Dietetic Internship Experience will be eligible to take the Registration Examination for Dietitians.

**PhD Degree**

The PhD degree requires a minimum of 60 semester hours beyond the bachelor’s degree, a general doctoral examination with written and oral components, and a dissertation describing original research in the area of nutrition or hotel and restaurant management. The student becomes a candidate for the degree on successful completion of the general examinations. Course requirements for the PhD degree in nutrition are the same as for the corresponding Master’s degree or an equivalent course from another institution plus NTRI 8970, NTRI 8850, and NTRI 7280. Laboratories are available for human, animal, chemical, and physical research. Supporting
courses to strengthen the nutrition major may be in, but not limited to, biochemistry, physiology, chemistry, animal science, kinesiology, education, and biostatistics.

Course requirements for the PhD degree in nutrition include:

<table>

<td>Advanced Practicum in Dietetics</td>
<td>1-9</td>
</tr>
</tbody>
</table>

Course requirements for the PhD degree with an option in hotel and restaurant management include:
• HRMT specialization: a minimum of 34 credit hours, including:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>HOSP 6530</td>
<td>Science of Quality Service in Hospitality</td>
<td>3</td>
</tr>
<tr>
<td>HOSP 7006</td>
<td>Hospitality Enterprise</td>
<td>3</td>
</tr>
<tr>
<td>HOSP 7010</td>
<td>Advanced Tourism Analysis</td>
<td>3</td>
</tr>
<tr>
<td>HOSP 8860</td>
<td>Current Issues in Hospitality Management</td>
<td>3</td>
</tr>
<tr>
<td>HOSP 8870</td>
<td>Advanced Hospitality Management Research and Applications</td>
<td>3</td>
</tr>
<tr>
<td>HOSP 8880</td>
<td>Theoretical Developments for Hospitality</td>
<td>3</td>
</tr>
</tbody>
</table>

Graduate-level HRMT and/or related courses.

• Research support: a minimum of 16 credit hours, including:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>NTRI 7050</td>
<td>Methods Of Research</td>
<td>2</td>
</tr>
<tr>
<td>NTRI 8850</td>
<td>Research Seminar for Doctoral Program</td>
<td>2</td>
</tr>
<tr>
<td>ERMA 7300</td>
<td>Design and Analysis in Education I</td>
<td>3</td>
</tr>
<tr>
<td>ERMA 7310</td>
<td>Design and Analysis in Education II</td>
<td>3</td>
</tr>
</tbody>
</table>

Graduate-level research/statistics courses.

• Dissertation: a minimum of 10 credit hours of NTRI 8990.

Examples of HRMT Specialization Elective Courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>HOSP 6460</td>
<td>Catering And Event Management</td>
<td>1</td>
</tr>
<tr>
<td>HOSP 6461</td>
<td>Catering And Event Management</td>
<td>2</td>
</tr>
<tr>
<td>HOSP 6550</td>
<td>Club Management</td>
<td>3</td>
</tr>
<tr>
<td>HOSP 6540</td>
<td>Conference Coordination</td>
<td>3</td>
</tr>
<tr>
<td>NTRI 6380</td>
<td>Study/Travel in Nutrition, Dietetics and Hospitality Management</td>
<td>1-6</td>
</tr>

<tr>
<td>HOSP 7136</td>
<td>Science of Brewing 2</td>
<td>3</td>
</tr>
<tr>
<td>HOSP 7916</td>
<td>Practicum in Brewing Science</td>
<td>1-3</td>
</tr>
</tbody>
</table>

The hotel and restaurant management option may take supporting courses in such areas as management, marketing, economics, and education. Course requirements for becoming a registered dietitian may be met during the graduate program by enrolling in additional required courses. Teaching, research, and extension assistantships are awarded competitively to qualified students.

**MS Nutrition**
