Poultry Science

Students within the Department of Poultry Science learn about the food system from poultry production on the farm to the conceptualization and manufacturing of food products for the consumer. The department houses two formal undergraduate degree programs: the B.S. degree in Poultry Science and B.S. degree in Food Science. Within Poultry Science, two curriculum options are available: 1) Poultry Production and 2) Poultry Science/Pre-Veterinary Medicine. Each option leads to the B.S. degree in Poultry Science. Enrollment in an internship, usually during the summer, is required for both B.S. degrees. The B.S. degree in Food Science is recognized as an approved program by the Institute of Food Technologists.
