University College

University College fosters the growth of interdisciplinary and cross-college academic programs. Its programs are designed to provide intellectual opportunities for students whose interests, aptitudes, and career goals range widely across college boundaries. It is the home of the Interdisciplinary University Studies undergraduate major, the Aviation Department (which offers the BS in Aviation Management, the BS in Professional Flight, and related minors), and the Sustainability, Information and Cyber Analysis, and Leadership minors. The Exploratory Advising Center for incoming freshmen who are in the process of determining the academic major they wish to pursue is also part of University College.

Individuals applying to Auburn as first-time College students have the option to enroll as Exploratory students, without having to select a particular major or college. Exploratory students are advised by a group of cross-trained advisors and career counselors who provide intensive and personalized advising designed to help them choose the major that most closely meets their academic aptitudes and interests as well as their long-term goals. This option does not replace undeclared major options in Liberal Arts, Sciences and Mathematics, or Engineering. Instead, its goal is to assist students who are uncertain which broad academic area they wish to pursue. All students who enter Auburn University as Exploratory students must select a college or specific major by the end of their second semester. Students who enter Auburn as transfer students are not eligible to enroll as Exploratory.
