

Artificial Intelligence Engineering — Graduate Certificate

The graduate certificate program in Artificial Intelligence Engineering (GCRT-AIE) is open to everyone with a baccalaureate degree from an institution of recognized standing, either in computer science, software engineering or another STEM discipline, or with relevant professional experience that provides necessary background knowledge of programming, computing, and mathematics. It entails 12 graduate credit hours. All students are required to take three required courses (COMP 6130, 6600, 6630) and an approved technical elective from a list of department-prescribed courses related to AI and its subareas.

Code	Title	Hours
Required Courses		
COMP 6600	Artificial Intelligence	3
COMP 6630	Machine Learning	3
COMP 6130	Data Mining	3
Approved AI elective		3
Total		
Total Hours		12
