Management Information Systems — Graduate Certificate

This graduate certificate is designed to develop an individual's skills in database development and administration, security and information assurance, systems analysis and design, and business analysis. This certificate is targeted for current students and working professionals to specialize in management information systems knowledge and skills.

This certificate program has one required course. Students may select either ISMN 7660 (Information Systems Analysis and Design) or ISMN 7830 (Database Design and Development) to satisfy this requirement. The remaining 9 hours may be chosen from any ISMN courses at the 6000 level or above. Current Auburn University graduate students may substitute one of their program courses for 3 of the 9 hours of electives with approval from the certificate granting department advisor.
