Entomology Minor

A Graduate Minor in Entomology (ENTM) is offered for non-majors wishing to obtain training in entomology for promoting public health, ensuring safer food, and creating healthier communities. The ENTM graduate minor requires 9 credit hours of graduate-level coursework in entomology (9 hours must be at the 6000 level or above). The student's graduate committee must include a faculty member from the entomology department, and the student must demonstrate competence in the application of entomology principles and research problems. The latter requirement is typically met via a chapter or section in the student's thesis or dissertation.
