Admission to the College

Review Auburn University admission requirements (http://bulletin.auburn.edu/Policies/Academic/policiesandproceduresforadmissions/) for general admission guidelines and specific degree or program sections for any additional requirements. On-campus students may request a transfer into the College of Education by contacting their current academic advisor for their program area. Although currently enrolled students may transfer into any of the college's undergraduate majors, students transferring into the Teacher Education Majors should review GPA restrictions and other admission requirements. Please discuss progression and completion requirements with an academic advisor in the College of Education (http://www.education.auburn.edu/student-services/).

Additionally, College of Education students are charged a fee for professional liability insurance.

Accreditation and Approvals

Auburn University’s College of Education is accredited by the Council for the Accreditation of Educator Preparation (CAEP). All programs preparing teachers and other professional school personnel are approved by the Alabama State Board of Education (ALSBE). In addition, the state of Alabama signs the National Association of State Directors of Education and Certification (NASDTEC) Interstate Agreement which facilitates the applications of AU’s graduates who have met all Alabama State Department of Education (ALSDE) certification requirements when they apply for certification in other states. Students planning to teach in a state other than Alabama, should contact that state's certification agency to ensure compliance with any additional state requirements.

Undergraduate Degrees (p. 2)

The College of Education offers many undergraduate degree options, including several minors, with a focus on teacher preparation, health, and rehabilitation studies.

Teacher Education Majors

The college’s teacher education majors are designed to ensure that program graduates have the knowledge, skills, and dispositions to help all students learn. These programs maintain selective admission, retention, and graduation requirements and are in compliance with the Alabama State Board of Education’s (ALSBE) rules for educator preparation. Therefore, it is critical that students meet with their academic advisor for guidance throughout the program to ensure state guidelines are followed to meet certification requirements. All transfer courses must have been completed at a regionally accredited institution. Detailed information on the specific requirements for teacher education admission, clinical experiences, clinical residency, graduation, certification, and assurance of competence is available in the Teacher Education Majors Section (http://bulletin.auburn.edu/undergraduate/collegeofeducation/ TeacherEducationInformation/) or on the College of Education (https://education.auburn.edu/) website.
Health and Rehabilitation-related Majors

Exercise science and exercise, performance, and health optimization programs are offered in the School of Kinesiology (https://education.auburn.edu/kinesiology/). These programs promote knowledge about physical activity and performance. They prepare students for careers in physical therapy, occupational therapy, medicine, corporate wellness or cardiac rehabilitation, coaching, strength and conditioning, or personal training. The Department of Special Education, Rehabilitation, and Counseling offers one program in rehabilitation and disability studies (https://education.auburn.edu/special-education-rehabilitation-and-counseling/). This program prepares undergraduates to work in the professional positions that assist individuals with disabilities in achieving maximum independence through expanding knowledge of the complexities of disability within the context of society. Students are prepared to become professionals in the fields of disability studies and services that include counseling, allied health fields (Occupational Therapy/Physical Therapy), case management, human services, and supported employment.

Graduate Degrees (p. 3)

The College of Education offers graduate programs that prepare professionals in the fields of education, kinesiology, counseling, and rehabilitation. Offerings include M.Ed., M.S., Ed.S., and Ph.D. degree programs, graduate minors, and graduate certificates.

Non-degree Programs

The Physical Activity and Wellness Program is a non-degree program that requires 8 hours (4 courses), including KINE 1100 (https://bulletin.auburn.edu/search/?P=KINE%201100), Wellness, and 3 courses (each one from a different category of physical activity). Categories include cardio-respiratory fitness (PHED 1200 (https://bulletin.auburn.edu/search/?P=PHED%201200)), fitness and conditioning (PHED 1300 (https://bulletin.auburn.edu/search/?P=PHED%201300)), team sports (PHED 1400 (https://bulletin.auburn.edu/search/?P=PHED%201400)), individual sports (PHED 1500 (https://bulletin.auburn.edu/search/?P=PHED%201500)), performance activities (PHED 1600 (https://bulletin.auburn.edu/search/?P=PHED%201600)), and aquatic skills (PHED 1700 (https://bulletin.auburn.edu/search/?P=PHED%201700)). Students who complete the 8-hour program may apply for a Physical Activity and Wellness Certificate, issued by the School of Kinesiology. Students may also elect to take individual courses, without completing the 8-hour program. Of course, students may elect to take more than four courses if they desire to use the program to ensure a regular physical activity program.

The Education to Accomplish Growth in Life Experiences for Success, or EAGLES (https://education.auburn.edu/degree-certificate/eagles/) program is a comprehensive transition program (CTP) (http://www.education.auburn.edu/higher-education-opportunity-act-heoa-of-2008-comprehensive-transition-programs/) for students with intellectual disabilities. EAGLES provides a post-secondary education opportunity for students with intellectual disabilities to engage in a two or four-year campus experience to help students achieve their employment and independent living goals upon successful completion of the program. The EAGLES program is a non-degree program focusing on (1) academic enrichment, (2) personal and social skills, (3) independent living skills, (4) health and wellness, and (5) integrated work experiences. Students in the program receive an inclusive post-secondary education providing them with an enriching and rewarding Auburn experience as they prepare to transition to gainful employment, that aligns with the student’s strengths and interests and independent living. The EAGLES program curricula are structured to help students become contributing members of society through their career interests both now and in the future.

Special Requirements for Graduate Programs that Lead to Educator Certification

Each Academic Department in the College of Education offers one or more degree programs that prepare educator professionals. These program offerings include the Master’s of Education (M.Ed.), Master’s of Science (M.S.), and Education Specialist (Ed.S.).

Master’s Degrees (MEd or MS)

The college offers two options for Master’s degrees that lead to certification. Most traditional M.Ed./M.S. programs are designed for individuals to further develop knowledge and skills within the same subject area as their initial certification. However, there are special cases for individuals pursuing a traditional M.Ed./M.S. for the following fields: English for speakers of other languages, reading specialists, special education, school counseling, and instructional leadership. The Alternative M.Ed./M.S. option is designed for individuals who have a baccalaureate degree in another field and want to earn their first teaching certificate.

Traditional Master’s Option

Admission Requirements to the Traditional Master’s Option

- An ALSDE approved criminal history background check
- A valid bachelor’s-level certificate in the same teaching field for which the Master’s level certification is sought (except for special education, English for speakers of other languages [ESOL], reading specialists, school counseling, and instructional leadership)**
- Special Cases**
  - English for speakers of other languages requires a valid bachelor’s level certificate in any teaching field
  - Special Education requires a valid bachelor’s level certificate in any teaching field
  - Reading Specialists requires either:
    - A valid bachelor’s level professional educator certificate in early childhood education, elementary education, or collaborative special education (K-6), and two full years of full-time classroom teaching experience OR
    - A valid bachelor’s level professional educator certificate in any area of education, two full years of full-time classroom teaching experience, and a passing score on the Praxis Teaching Reading test validated for use in Alabama
  - School Counseling has two options that vary depending on a valid bachelor’s level certificate as well as two years of full-time classroom teaching experience; or a bachelor’s degree from an accredited institution in a related field with no experience requirement
  - Instructional Leadership requires three full years of full-time professional educational work experience in a P-12 setting, which must include teaching experience, and the submission of an admission portfolio before an interview

Secondary Education Courses

CTSE 1000 INQUIRY APPROACHES TO SCIENCE TEACHING: STEP 1 (1) LEC. 1. LAB. 2. This course allows students to explore teaching as a career. Following an introduction to the theory and practice behind excellent inquiry-based science instruction, candidates teach lessons in elementary classrooms to obtain firsthand experience in planning and implementation. An elementary school placement is chosen to help the AUTeach student connect with youth who are moving into the targeted grade band. Master teachers in AUTeach are instructors and are chosen for their experience and success in secondary classrooms. They provide candidates direct exposure to people who love teaching and view it as a rewarding career choice. Mentor teachers at the schools where candidates teach their prepared lessons demonstrate effective teaching techniques and classroom management skills, giving the future teachers a true taste of working in a supportive, diverse educational setting. The course emphasizes using the 5E Learning Cycle instructional model.

CTSE 2000 INQUIRY APPROACHES TO SCIENCE TEACHING: STEP 2 (1) LEC. 1. LAB. 2. This course allows students to continue developing the lesson planning and teaching skills explored in CTSE 1000 (Step 1). After observing a lesson being taught in a local school district classroom, students (in pairs) plan and teach two inquiry-based lessons to sixth, seventh, or eighth graders. Middle school science classrooms are selected both for the diversity of the student body and the quality of the classroom teachers, who serve as mentors for the Step 2 students assigned to them. For their final product, Step 2 students analyze and modify one of the lessons they taught, taking into account the results of the assessments, their reflection on how successful the lesson was, and feedback from observers (Mentor Teacher, Instructor, or Teaching Assistant). By the end of Step 2, students are usually able to make a decision about whether to pursue teacher certification through the AUTeach program. In addition to the unique Core Components and Course Objectives listed below, all AUTeach courses are designed in accordance with the AUTeach Course Design Principles. The course emphasizes using the 5E Learning Cycle instructional model.

CTSE 2500 INQUIRY APPROACHES TO SCIENCE TEACHING: COMBINED STEP 1 AND 2 (2) LEC. 2. LAB. 4. This course allows students to explore teaching as a career, learn the theory and practice behind excellent inquiry-based science instruction, and teach lessons in elementary and middle school classrooms in order to plan and implement lessons. This course replaces CTSE 1000 and CTSE 2000. It’s a combined course. After observing lessons being taught in local school districts, students work in pairs to plan and teach two lessons in elementary classrooms, and two inquiry-based lessons to sixth, seventh, or eighth graders. Elementary and middle school science classrooms are selected both for the diversity of the student body and the quality of the classroom teachers, who serve as mentors for the students assigned to them. For their final product, Step 1/2 students analyze and modify one of the lessons they taught, taking into account the results of the assessments, their reflection on how successful the lesson was, and feedback from observers (Mentor Teacher, Instructor, or Teaching Assistant). By the end of this class, students are usually able to make a decision about whether to pursue teacher certification through the AUTeach program.
