- ¹ The AU Bulletin lists the University Core Curriculum requirements for students in the College of Engineering. Students must complete a sequence in either Literature or History. Because of the discipline-specific requirements for the Humanities courses, it is recommended that a History sequence be completed.
- ² Breadth electives, technical electives, the science elective, and the senior design project must be selected from lists of approved courses available from the Department of Civil and Environmental Engineering. Each student must take a breadth elective in at least three of seven specialty areas: construction, environmental, geotechnical, pavements and materials, structural, transportation, and water resources engineering.
