

Restoration Ecology Minor

This undergraduate minor is designed to advance the level of knowledge and skills for individuals interested or working in the areas of natural resource management, forest and wildlife management, environmental conservation, natural resource management consulting, or environmental education. This minor is designed to help students better understand natural processes in terrestrial ecosystems; provide information on processes and practices that are relevant to the restoration of these ecosystems; and enhance critical thinking and communication skills.

Code	Title	Hours
Restoration Ecology - Undergraduate Minor		
15 hours required for minor		
Core Courses (6 hours required)		
FOWS 5210	Restoration Ecology	3
FORY 4230	Forest Ecology	3
or BIOL 3060	Ecology	
Restricted Electives (9 hours from courses listed below)		
BIOL 5090	Conservation Biology	3
FORY 5150	Forest Health	3
FORY 5460	Forest Fire Management	3
FOWS 5230	Forest Stand Dynamics	3
FOWS 5240	Fire Ecology	3
FOWS 5250	Longleaf Pine Ecology, Management, and Restoration	3
FOWS 5260	Forest Wetlands Restoration Ecology	3
FOWS 5340	Invasion Ecology	3
NATR 4240	Watershed Management	3
NATR 5250	Wetland Ecology and Management	3
WILD 3280	Wildlife Ecology, Conservation, and Management	3
WILD 5140	Plant Ecology	4
WILD 5880	Wildlife Habitat Assessment and Management	4
